PUBLIC CONSULTATION MEETING MINUTES:

ENVIRONMENTAL SCOPING ASSESSMENT (ESA) FOR THE PROPOSED PROSPECTING & EXPLORATION ACTIVITIES ON EXCLUSIVE PROSPECTING LICENCE (EPL) NO. 7996 LOCATED MEAR ARANDIS IN THE NAMIB-NAUKLUFT PARK IN THE ERONGO REGION, NAMIBIA

Date: Tuesday, 12 April 2022

Time: 09h30

Venue: Arandis Community Hall

The Public Consultation Meeting was attended by four (4) people, including two Environmental Consultants from Excel Dynamic Solutions (Pty) Ltd (EDS). - **Please refer to the attached attendance register.**

INTRODUCTION AND WELCOMING REMARKS

Ms. Althea Brandt introduced the team of EDS and welcomed the attendees. The meeting attendance register was shared for the attendees to write down their names, contact details and sign so that they could be added to the list of interested and affected parties (I&APs) and receive further information on the ESA process.

MEETING AGENDA AND PRESENTATION

The agenda of the meeting included the following main points:

2.1 Brief Description of the Project

The Environmental Impact Assessment (EIA) or ESA and the reason that the proponent appointed Excel Dynamic Solutions (Pty) Ltd (EDS), independent environmental consultants to carry out the EIA and apply for the Environmental Clearance certificate (ECC).

2.2 Explanation of what an ESA is, its Process and the Public Role in the Process

Ms. A. Brandt explained to the attendees what the meeting was all about and why they were invited (with reference to the Environmental Management Act (EMA) No. 7 of 2007 and its 2012 Environmental Impact Assessment (EIA) Regulations on Public Consultation). Ms. Brandt further explained what an ESA is and that the proposed exploration activities are one of the listed activities in the 2012 EIA Regulations of the EMA that cannot be undertaken without an ECC from the Environmental Commissioner.

2.3 Presentation of Potential Project Impacts

To ensure transparency and that the attendees understand both sides of the proposed project activities, the Environmental Consultants also presented the potential pre-identified potential positive & negative environmental and social impacts.

2.4 Public Open Discussion (Interactive Session)

Ms. Brandt provided the meeting attendees the opportunity to raise their concerns/issues and or comment on the proposed project activities. The issues and comments recorded are presented in **Table 1** below.

Table 1: Comments and issues raised during the public meeting at the Arandis Community Hall on the 12th of April 2022

Comment/ issue No.	Commenter name & issue / comment / question	Response and name of responder:
1.	Which road will be used to access the EPL? Will it be through Arandis or the B2?	Ms. Althea Brandt: At this stage we will be using the B2 road and then the C28 road. We will also make use of the existing gravel roads, using our coordinates to get to the EPL area. Therefore, no new tracks will be created.

FINAL REMARKS AND CONCLUSION OF THE MEETING

Ms. Brandt thanked the attendees for their input and raising their concerns. She indicated to the attendees that all their comments, concerns and inputs have been noted down for consideration and addressing in the Environmental Scoping Assessment (ESA) Report as well as incorporating their recommendations into the draft EMP.

Furthermore, Ms. Brandt informed the attendees that the draft Environmental Assessment Report together with the meeting minutes, and Environmental Management Plan (EMP) will be shared with them for review and further comments. These documents will be made available through emails provided on the attendance register.

Once the review of the draft ESA Report and EMP is done, the documents will be finalized and submitted to the Environmental Commissioner at the Department of Environmental Affairs and Forestry (DEAF) for evaluation and consideration of an ECC.

Background Information Document (BID)

Project Name:

**ENVIRONMENTAL SCOPING ASSESSMENT (ESA)
FOR EXCLUSIVE PROSPECTING LICENSE (EPL) No.
7996 LOCATED NORTH-WEST OF ARANDIS,
ERONGO REGION**

Environmental Assessment Practitioner:

Excel Dynamic Solutions (Pty) Ltd

Proponent:

Ongava Mining and Prospecting CC

1 INTRODUCTION AND BACKGROUND

Ongava Mining and Prospecting CC (*The Proponent*), has applied to the Ministry of Mines and Energy (MME) to be granted the Exclusive Prospecting License (EPLs) No. 7996 on 12 December 2019. However, the approval and granting of the EPL is subject to an Environmental Clearance Certificate (ECC), thus the “pending ECC” status of the EPL. The area of EPL is 7185.5901 ha in size and it is located near Arandis in Erongo Region (**Figure 1**). The EPL is aimed at prospecting and exploration for Base and Rare Metals, Dimension Stone, Industrial Minerals, Nuclear Fuel Minerals, and Precious Metals.

Exploration and all mining-related activities are among the listed activities that may not be undertaken without an ECC under the Environmental Management Act (EMA) (2007) and its 2012 Environmental Impact Assessment (EIA) Regulations. The relevant listed activities as per EIA regulations are:

- 3.1 *The construction of facilities for any process or activities which requires a license, right of other forms of authorization, and the renewal of a license, right, or other form of authorization, in terms of the Minerals (Prospecting and Mining Act, 1992).*
- 3.2 *other forms of mining or extraction of any natural resources whether regulated by law or not.*
- 3.3 *Resource extraction, manipulation, conservation, and related activities.*

The Proponent is, therefore, required to obtain an ECC for the approval of the EPL and before the commencement of exploration works on the EPL. To fulfill the legal requirements, the Proponent has appointed Excel Dynamic Solutions (Pty) Ltd, an independent team of Environmental Consultants, to conduct the required Environmental Assessment (EA) process and submit the ECC application to the Department of Environmental Affairs and Forestry (DEAF) at the Ministry of Environment, Forestry & Tourism (MEFT).

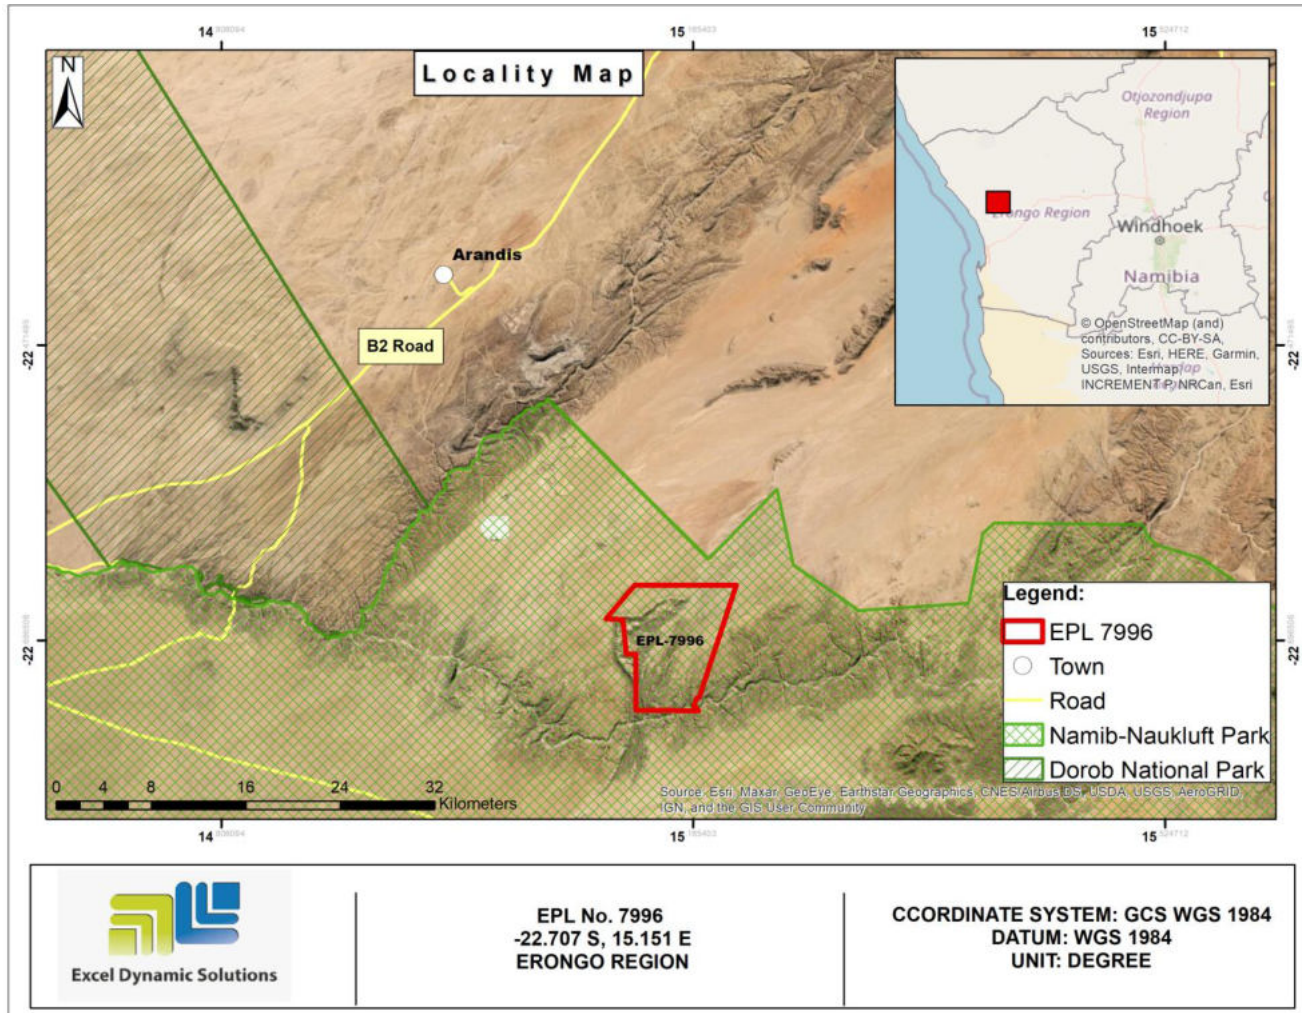

Figure 1: Locality map of EPL 7669 near Arandis

2 PURPOSE OF THIS DOCUMENT

It should be noted that the Background Information Document (BID) is not an EA Report but a non-technical summary of the EA, aimed for information purposes and a basis for public involvement from the beginning of the EA process. The motivation behind this document is to:

- Briefly introduce the proposed project and related activities to potential interested and affected parties (I&APs)/stakeholders.
- Give background information to I&APs of the task, along these lines giving a chance to them (I&APs) to get information, remark and raise issues concerning the approval measure.
- Invite members of the public to register as I&APs and get added to the EA database so that they can stay

informed about the EA's progress throughout its process; and

- Provide all I&APs with an opportunity to comment or provide inputs/concerns on the proposed project activities, which entails concerns/issues on the biophysical and socio-economic aspects, and any other issues of concern related to the proposed project. The information from I&APs will then form the basis of the EA and EMP documents that will help the regulatory and competent authorities (MEFT and Ministry of Mines & Energy (MME), respectively) to pass judgment on the acceptability of the undertaking.

3 NEED AND DESIRABILITY OF PROPOSED ACTIVITY

The mining sector plays a vital role in the economical development of many countries including Namibia. In Namibia, mining sectors form part of the backbone of the economy, given having a positive impact on the economy measured through job creation and income generation.

Mining is also an important source of government fiscal receipt and source of foreign exchange. In addition, the mining sector forms a vital part of some of Namibia's development plans, such as the Vision 2030, National Development Plan 5 (NDP5), and Harambee Prosperity Plans (HPPs) I and II. Mining contributes to meeting the ever-increasing global demand for minerals, and national prosperity. In Namibia, prospecting and exploration for mining purposes occur mainly within the private sector. Therefore, successful outcomes from prospecting and exploration on EPL 7669 will lead to the mining of the target commodities, which would feed into the national development plans.

4 PROJECT DESCRIPTION

The proposed activities will entail detailed exploration activities and delineating the mineral deposits to determine whether the deposits for targeted commodities are economically feasible (to advance to the resources development and mining phase).

The prospecting and exploration of minerals are the first components of any potential mining project. This is done to acquire the necessary data required for further decision-making

and investment options. These activities are anticipated to last for about three years. The planned activities and required resources and infrastructure are briefly described below. The detailed exploration methods (techniques) will be presented in the ESA Report.

The proposed phased approach for the exploration works is presented below. However, it should be noted that these activities will only be undertaken upon the approval of the ESA Report and issuance of an ECC by the Environmental commissioner.

Once the Proponent has been issued with an ECC and obtained all relevant and required permitting licensing (such as consent and land use agreements), and is ready to commence with the actual exploration activities (with financial, technical, and human resources in place), the planned activities will commence on site.

4.1 Project Processes

The proposed exploration activities (methods) are divided into the following categories:

- **Phase 1: Non-invasive techniques (prospecting)** - This phase includes geological field mapping and ground-based surveys, reviewing of existing geological maps and historical drilling data as well as field evaluation and sampling, to select and verify the target areas.
- **Phase 2: Invasive techniques (detailed exploration)**
 - The techniques involved herein include soil survey, rock sampling, trenching, and/ or pitting, and detailed exploration cutting.
- Once the target areas have been selected and verified under the prospecting phase, detailed exploration works will follow. The preferred extraction technique for this exploration program is quarrying via the cutting method.
- **Human resources and accommodation:** About 15 people will be employed on-site during the exploration phase. The workforce will include skilled, semi, and unskilled workers, as necessary to complete the work. The exploration workforce will be accommodated in Arandis upon reaching an agreement and consent is signed between the Proponent and the respective landowner or custodian (authority) before setting up accommodation structures (tented camps).
- **Working Space (Administration and Control):** Movable shade facility near the working spots and prefabricated temporary offices will be erected on-site (subject to the approval of the landowner/custodian or authority).
- **Water supply:** About 10,000 liters of water will be required per month for exploration activities. This water will be used for cooling down and washing equipment, drilling-related activities, and ablution. The water will be sourced from elsewhere and transported to the site. Therefore, no project-related water abstraction will be done onsite or within the site area.

4.2 Human Resources, Services, and infrastructure

The following services and infrastructure as provided below will be required for the project activities:

- Potable water will also be made available for the exploration crew (workers) on site.
- **Fuel Supply (machinery and equipment):** Diesel will be used for machinery and equipment and fuel generator.
- **Accessibility (roads):** the EPL are accessible via a B2 road from Arandis which then diverge into a gravel road that will lead to the EPL. Therefore, project-related vehicles will be using these existing roads to access the EPL. The Proponent may need to do some upgrades on the site access road to ensure that it is fit to accommodate project-related vehicles, such as heavy trucks.
- **Waste management:** the different waste will be handled as follows:
- **Sewage:** mobile chemical ablution facilities will be provided on-site. The wastewater will then be transported offsite to the treatment facility either by the Proponent or a designated/appointed external waste management contractor.
- **General and domestic waste:** Sufficient waste containers will be made available at both exploration sites and campsites for waste storage. The bins will be emptied into the main onsite container for disposal at the nearest landfill site, when necessary (upon reaching full capacity of the main waste container onsite).
- **Hazardous waste:** All vehicles, machinery, and fuel-consuming equipment will be provided with drip trays to capture potential fuel spills and waste oils. The waste fuel/oils will be carefully stored in a standardized container until such a time that they can be disposed of at the nearest approved hazardous waste management facility. The nearest considered facility town is Arandis; therefore, a waste disposal agreement will be reached between the Proponent and the Town Council.
- **Health and Safety:** Adequate and appropriate Personal Protective Equipment (PPE) will be provided to every project personnel while on and working at the site. A minimum of two first aid kits will be readily available at exploration sites to attend to potential minor injuries, while major injuries will need to be attended to further by transporting the injured to the nearest healthcare facility for treatment and necessary care.

- **Potential Accidental Fire Outbreaks:** A minimum of basic firefighting equipment, i.e., two fire extinguishers will be readily available in vehicles, at the working sites and campsite.

4.3 Project Equipment, Material, Machinery, and Vehicles

The following equipment and machinery will be required:

- 4X4 vehicles
- Truck
- Excavator / front-end loader
- Dozer/s (to clear vegetation along planned drilling site access roads)
- Drilling fluids stored in manufacturers approved containers
- Air compressors
- Generator for power supply

This equipment, machinery, and vehicles will be kept at a designated storage site that will be established within the EPL.

4.2 Decommissioning: Rehabilitation of Explored Site

Decommissioning refers to the cessation of exploration activities, either upon discovering an economically feasible and

worthy deposit or in the event of unsuccessful exploration results works. The Proponent will need to properly decommission the activity to either prepare the selected areas of the EPL for the next phase or upon unsuccessful exploration results, to rehabilitate the explored sites.

5 ENVIRONMENTAL ASSESSMENT

This ESA process is conducted following the provisions stated in the Environmental Management Act (No 7 of 2007) and it is Environmental Impact Assessment Regulations (2012). The primary objective of the EA will be to identify potential negative impacts associated with the proposed activity, assess them, and recommend practical and effective mitigation measures to be implemented by the Proponent, to minimize these impacts while maximizing positive impacts.

The main objectives of this ESA are to:

- Comply with Namibia's Environmental Management Act (2007) and its EIA regulations (2012).
- Identify potential impacts associated with the proposed activity.

- Inform Interested and Affected Parties (I&APs) and relevant authorities about the mining activities and provide them with a reasonable opportunity to participate during the EA process.
- Assess the significance of issues and concerns raised.
- Compile a report addressing all identified issues and potential impacts related to various aspects of the activity.
- Compile a Draft Environmental Management Plan (EMP) which includes impacts management and mitigation measures.
- Produce a trained workforce and small businesses that can service communities and may initiate related businesses,
- Boosting the local economic growth and regional economic development.
- Improved geological understanding of the area regarding targeted commodity, and
- Increased support for local businesses through the procurement of consumable items such as Personal Protective Equipment (PPE), machinery spare parts, lubricants, etc.

5.1 Potential Impacts

The following potential impacts have been identified so far for the surrounding towns, settlements, and property:

POSITIVE:

- Socio-economic development through employment creation and skills transfer,
- Opens up other investment opportunities and infrastructure-related development benefits,

NEGATIVE:

- **Potential disturbance of existing pastoral systems,**
- **Physical land/soil disturbance:** Invasive exploration activities could lead to soil disturbance. The potential damage to subgrade due to traffic compaction along access roads,

- **Impact on local biodiversity (fauna and flora) and habitat disturbance:** some vegetation may be disturbed e.g., by off-road driving or being removed to create access roads and working spaces. There are possibilities of illegal hunting (wildlife and domesticated animal) in the surrounding areas.
- **Potential impact on water resources and soils particularly due to pollution,**
- **Air quality issue:** dust may be generated from driving on-site, surface excavation, drilling, and diamond wire sawing could temporarily compromise the surrounding air,
- **Visual impacts due to scars** – May occur on the landscape and relief, especially on the affected sites of the EPL,
- **Potential occupational health and safety risks** May occur due to the movement / operating of machinery and equipment on site.
- **Vehicular traffic safety and impact on services infrastructure** such as local roads: the temporary potential increase in vehicular traffic during exploration may exert additional pressure on the local roads, especially by heavy vehicles such as trucks carrying project materials and equipment (drilling rigs),
- **Vibrations and noise** associated with drilling activities may be a nuisance to locals,
- **Environmental pollution** through different types of waste generated on the site, particularly from the mishandling of hydrocarbons (fuels) and wastewater,
- **Archaeological or cultural heritage impact** through unintentional uncovering of unknown archaeological objects or sites by certain project activities such as exploration drilling and excavation as well as known and marked heritage sites on targeted sites on the EPL and surroundings,

- **Potential social nuisance and conflicts** between affected farmers/landowners and or neighboring land users and Proponents due to the lack of communication or cooperation on raised issues and land use during exploration.

The potential impacts listed above are pre-identified and therefore should not be deemed as final or the only ones. Other potential impacts will be identified as the EA process progresses i.e., upon site visit and consultation with the public (I&APs). All impacts and public concerns/comments will be incorporated and addressed in the Environmental Assessment Report and EMP.

5.2 Public Consultation

Public consultation is an important part of the EA process. During the consultation process, interested or affected members of the public are allowed to find out more about the activity and raise any issues or concerns about the environmental assessment.

To comment or receive further information on the project, **please register with Excel Dynamic Solutions (Pty) Ltd** (contact details herein) as an Interested and Affected Party (I&AP) before or on **Monday, the 25 April 2022**

All registered I&APs will be kept informed throughout the various stages of the project and will be provided the opportunity to comment on the Scoping (ESA) Report.

Furthermore, you are hereby invited to the Public Consultation Meeting scheduled as follows:

- **Date:** 12 April 2022
- **Time:** 10:00
- **Venue:** Arandis Town Hall

NOTICE OF ENVIRONMENTAL IMPACT ASSESSMENT (EIA): ENVIRONMENTAL CLEARANCE CERTIFICATE FOR THE PROPOSED EXPLORATION ACTIVITIES ON THE EXCLUSIVE PROSPECTING LICENSE (EPL) No. 7381 LOCATED NORTHEAST OF HENTIES BAY, ERONGO REGION

Under the Environmental Management Act No. 7 of 2007 and its 2012 EIA Regulations, the proposed exploration activities on the EPL 7381 require an Environmental Clearance Certificate (ECC) from the Department of Environmental Affairs & Forestry (DEAF) before commencement.

The public is hereby notified, that an application for an ECC will be submitted to the Environmental Commissioner.

Brief Project Description: The proposed prospecting and exploration activities (the project) on Exclusive Prospecting License (EPL) No. 7381. Upon issuance of the ECC, the project activities will entail non-invasive (mapping and surface surveying) and invasive techniques (exploration trenching and drilling). The project activities are aimed to explore for Base and Rare Metals, Dimension Stone, Industrial Minerals, Nuclear Fuel Minerals, and Precious Metals.

Proponent: Log an Exploration & Investment CC.

Environmental Consultant: Excel Dynamic Solutions (Pty) Ltd

Members of the public are invited to register as Interested and Affected Parties (I&APs) to comment /r raise concerns or receive further information on the Environmental Assessment process.

A Public Consultation Meeting will be held. However, the specific details on the Date, Time and Venue will be communicated with all the registered Interested and Affected Parties (I&APs) in due course.

Registration requests and comments should be forwarded to Excel Dynamic Solutions (Pty) Ltd on the contact details below, before or on **15 April 2022**.

NOTICE

LAYOUT APPROVAL AND TOWNSHIP ESTABLISHMENT OF GROOTFONTEIN EXTENSION 6

Notice is hereby given in terms of the Urban and Regional Planning Act, 2018 that Stubenrauch Planning Consultants cc on behalf of the Grootfontein Municipality, the registered owner of Portion 23 of the Farm Grootfontein Townlands No. 814 has applied to the Grootfontein Municipality and intends on applying to the Urban and Regional Planning Board (URPB) for the following:

(a) Layout approval and Township Establishment on Portion 23 of the Farm Grootfontein Townlands No. 814 to be known as Grootfontein Extension 6; (b) Inclusion of the proposed Grootfontein Extension 6 in the next Zoning Scheme to be prepared for Grootfontein. Portion 23 of the Farm Grootfontein Townlands No. 814 is located along the B8 (T0802) Road leading to Rundu, north-east of Grootfontein; adjacent to Farm Andorra No. 1148 to the north and Farm Hangover No. 773 to the south. According to the Grootfontein Zoning Scheme, Portion 23 of the Farm Grootfontein Townlands No. 814 is zoned "Undetermined", making it suitable for the proposed township development.

The purpose of the application is to enable the Grootfontein Municipality to provide additional residential erven to help meet the demand for residential properties which have become scarce in the town of Grootfontein.

Please take notice that the application, locality map and its supporting documents lie open for inspection during normal office hours at the Grootfontein Municipality (Town Planning office) and SPC Office, 45 Feld Street; Windhoek.

Further take notice that any person objecting to the proposed application as set out above may lodge such objection together with the grounds thereof, with the Chief Executive Officer of the Grootfontein Municipality and with the applicant (SPC) in writing on or before Friday, 29th April 2022.

NOTICE

AMENDMENT OF TITLE CONDITIONS OF ERF 315, OHANGWENA FROM "RESIDENTIAL" USE TO "GENERAL RESIDENTIAL" USE WITH A DENSITY OF 1:100M² FOR THE DEVELOPMENT OF FLATS.

Notice is hereby given in terms of the Urban and Regional Planning Act, 2018 that Stubenrauch Planning Consultants cc on behalf of the registered owner of Erf 315, Ohangwena has applied to the Helao Nafidi Town Council and intends on applying to the Urban and Regional Planning Board (URPB) for the following:

AMENDMENT OF TITLE CONDITIONS OF ERF 315, OHANGWENA FROM "RESIDENTIAL" USE TO "GENERAL RESIDENTIAL" USE WITH A DENSITY OF 1:100M² FOR THE DEVELOPMENT OF FLATS.

Erf 315 is situated on the south eastern side of the neighbourhood of Ohangwena and measures 1 575m² in extent. According to the Conditions of Establishment of the township of Ohangwena, Erf 315 is reserved for "Residential" purposes only.

The purpose of the application is to enable the registered owner of Erf 315, Ohangwena to develop residential units on the subject erf for rental purposes.

Please take notice that the application, locality map and its supporting documents lie open for inspection during normal office hours at the Helao Nafidi Town Council (Town Planning office) and SPC Office, 45 Feld Street; Windhoek.

Further take notice that any person objecting to the proposed amendment of title conditions as set out above may lodge such objection together with the grounds thereof, with the Chief Executive Officer of the Helao Nafidi Town Council and with the applicant (SPC) in writing on or before Friday, 29th April 2022.

PUBLIC NOTICE

Notice is hereby given that Nghivelwa Planning Consultants (Town and Regional Planners) on behalf of the owners of Erf 2252, Kilimanjaro Street, Windhoek, intends applying to the Windhoek Municipal Council and the Urban and Regional Planning Board for the:

• Rezoning of Erf 2252, Kilimanjaro Street, Windhoek from "Residential" with a density of 1:900 to "Business" with a bulk of 0.4;

Erf 2252, is located in Kilimanjaro Street, Windhoek and currently measure 1022 m² in extent. The erf is currently zoned for "Residential" with a density of 1:900. It is the intention of the owners to rezone Erf 2252, Kilimanjaro Street, Windhoek from "Residential" with a density of 1:900 to "Business" with a bulk of 0.4. This will allow the owner to construct a business and office building on the rezoned property.

Should this application be successful, the number of vehicles for which parking must be provided on-site will be in accordance with the Windhoek Zoning Scheme.

The locality plans of the Erf lie for inspection on the town planning notice board of the Windhoek Municipality: Customer Care Centre, Main Municipal Offices, Rev. Michael Scott Street, Windhoek and the Applicant: Scripture Union Building, Ara Street, Windhoek. Any person objecting to the proposed use of the land as set out above may lodge such objection together with the grounds thereof, with the Windhoek Municipality and with the applicant (Nghivelwa Planning Consultants) in writing within 14 days of the last publication of this notice.

The last date for any objections is: 15 April 2022
