

2.4. PROJECT LOCATION

The location of the proposed Mining Claims area (537 m²) which constitute Mining Claims 71556, 71557 and 71558 is situated in Western Namibia (**Figure 5**), within the Dorob National Park in the Erongo Region and approximately 23 km East of Cape Cross.

The Molopo Petalite mine is an old abundant mine, the mine was shut down in 1972, in spite of large sorted mineralized materials (Ore containing Lithium, Tantalum and Tin **Left Behind**) as per the sample analysis results, ((up to 1cm) cassiterite crystals occurrence local concentration of tin in ore ranging from 0, 5- 1, 5% was not extracted because of primitive beneficiation recovery methods and rates).

Figure 5: Locality map of the proposed Mining Claims 71556, 71557 & 71558 in the Erongo Region, Namibia.

Table 3: Corner coordinates of the proposed development site

Corner point	Latitude	Longitude
A – MCs 71556-8 Point 1	-21.706696°	14.206093°
B – MCs 71556-8 Point 2	-21.706676°	14.211992°
C – MCs 71556-8 Point 3	-21.715041°	14.206090°
D – MCs 71556-8 Point 4	-21.714751°	14.211711°

2.4. SUPPORTING INFRASTRUCTURE

2.4.1 Basecamp

Given the location of the mining claims and that it is situated in a national park, a base-camp consisting of shipping containers (already on-site see **Figure 6**, left by previous mining site owners) to house the equipment and for employees to guard the facility will be established and will be enclosed in 100m x 100m fence facility. Otherwise, it is strictly recommended that other staff members are accommodated at the closest lodging facility at Cape Cross and or Henties Bay (whichever is practically suitable) and commute daily to and from the project site.
