Dear Sir

Re: Consent for the utilization of Borrow Pit (BP) 6 in Okanyowa Village towards the construction (upgrading) of DR3645: Engoyi-Omuntele from gravel to Low Volume Seal (LVS) standards in the Oshikoto Region

As the headman of Okanyowa Village where BP6 is situated on communal land, I hereby give consent for the continued use of the BP site to obtain construction materials needed for the construction of DR3645 from Engoyi to Omuntele.

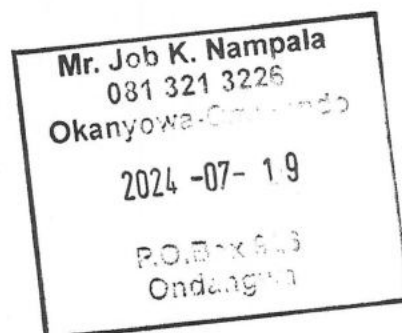

In addition to the above, on behalf of the community, I would like to request that the utilization of the borrow pit should be done in an environmentally and a social friendly and sustainable manner, and this include proper rehabilitation of the borrow pit to a safe state, once the material is depleted or activities are completed. Rehabilitation of the borrow pit should be done to ensure that it does not pose a threat to the people and livestock in the area in the long run. It will therefore be important to notify me when operations at the borrow pit have ceased so that we can forge a way forward regarding the pit. As per our engagement with the construction contractor (Roads Contractor Company), the community would like the borrow pit to be backfilled and or levelled to act as a rainwater holding dam for the livestock.

Thank you for your cooperation.

Yours Sincerely,

J. Namupala,

Mr. Job Namupala

Dear Sir

Re: Consent for the utilization of Borrow Pit (BP) 8A in Elonga Village towards the construction (upgrading) of DR3645: Engoyi-Omuntele from gravel to Low Volume Seal (LVS) standards in the Oshikoto Region

As the headman of Elonga Village where BP8A is situated on communal land, I hereby give consent for the continued use of the BP site to obtain construction materials needed for the construction of DR3645 from Engoyi to Omuntele.

In addition to the above, my understanding is that the borrow pit no longer serves a purpose to the project as its materials is too salty for the road construction, thus, operations at the site have ceased. Therefore, I would like to request that the borrow pit is rehabilitated (by backfilling and or levelling completely as far as practicable, fenced off) to a safe state to ensure that it does not pose a threat to the people and livestock in the area in the long run.

Thank you for your cooperation.

Yours Sincerely,

Re: Consent for the utilization of Borrow Pit (BP) 8B in Opembelonga Village towards the construction (upgrading) of DR3645: Engoyi-Omuntele from gravel to Low Volume Seal (LVS) standards in the Oshikoto Region

As the headman of Opembelonga Village where BP8B is situated on communal land, I hereby give consent for the continued use of the BP site to obtain construction materials needed for the construction of DR3645 from Engoyi to Omuntele.

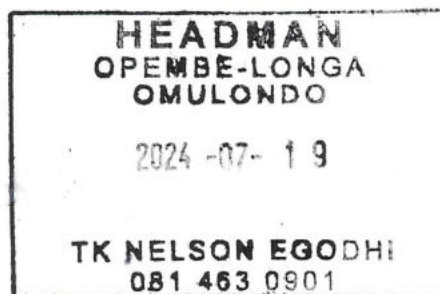

In addition to the above, my understanding is that the borrow pit no longer serves a purpose to the project as the desired material has been depleted and there is groundwater ingress, thus, operations have ceased at the BP site. Therefore, I would like to request that the borrow pit is rehabilitated (by backfilling and or levelling completely as far as practicable, fenced off) to a safe state to ensure that it does not pose a threat to the people and livestock in the area in the long run.

Thank you for your cooperation.

Yours Sincerely,

Mr. Nelson Egodhi

Re: Consent for the utilization of Borrow Pit (BP) 15 LHS in Okandombo Village towards the construction (upgrading) of DR3645: Engoyi-Omuntele from gravel to Low Volume Seal (LVS) standards in the Oshikoto Region

As the headman of Okandombo Village where BP15 LHS is situated on communal land, I hereby give consent for the continued use of the BP site to obtain construction materials needed for the construction of DR3645 from Engoyi to Omuntele.

In addition to the above, on behalf of the community, I would like to request that the utilization of the borrow pit should be done in an environmentally and a social friendly and sustainable manner, and this include proper rehabilitation of the borrow pit to a safe state, once the material is depleted or activities are completed. Rehabilitation of the borrow pit should be done to ensure that it does not pose a threat to the people and livestock in the area in the long run. It will therefore be important to notify me when operations at the borrow pit have ceased so that we can forge a way forward regarding the pit. The community may request for the borrow pit to be backfilled and or levelled completely as far as practicable, fenced off or to be rehabilitated to act as a rainwater holding dam for the livestock.

Thank you for your cooperation.

Yours Sincerely,

Mr. Petrus Enkali

Dear Sir

Re: Consent for the utilization of the two Borrow Pits (BP) 15 RHS & BP12 in Okwandja Village towards the construction (upgrading) of DR3645: Engoyi-Omuntele from gravel to Low Volume Seal (LVS) standards in the Oshikoto Region

As the headman of Okwandja Village where BP15 RHS and BP12 are situated on communal land, I hereby give consent for the continued use of the two borrow pit sites to obtain construction materials needed for the construction of DR3645 from Engoyi to Omuntele.

In addition to the above, on behalf of the community, I would like to request that the utilization of the borrow pits should be done in an environmentally and a social friendly and sustainable manner, and this include proper rehabilitation of the borrow pits to a safe state, once the material is depleted or activities are completed. The rehabilitation of the borrow pits should be done to ensure that they do not pose a threat to the people and livestock in the area in the long run. It will therefore be important to notify me when operations at the borrow pits have ceased so that we can forge a way forward regarding the pits. The community may request for the borrow pits to be backfilled and or levelled completely as far as practicable, fenced off or to be rehabilitated to act as rainwater holding dams for the livestock.

Thank you for your cooperation

Dear Sir

Re: Consent for the utilization of Borrow Pit (BP) 31 in Onamutayi Village (Onamutenya Area) towards the construction (upgrading) of DR3645: Engoyi-Omuntele from gravel to Low Volume Seal (LVS) standards in the Oshikoto Region

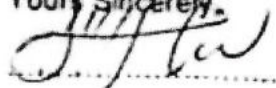

As the headman of Onamutayi Village where BP31 is situated on communal land, I hereby give consent for the continued use of the BP site to obtain construction materials needed for the construction of DR3645 from Engoyi to Omuntele.

In addition to the above, on behalf of the community, I would like to request that the utilization of the borrow pit should be done in an environmentally and a social friendly and sustainable manner, and this include proper rehabilitation of the borrow pit to a safe state, once the material is depleted or activities are completed. Rehabilitation of the borrow pit should be done to ensure that it does not pose a threat to the people and livestock in the area in the long run. It will therefore be important to notify me when operations at the borrow pit have ceased as the community requested if the new site borrow pit can be levelled after use and be used to capture rainwater for the livestock.

Furthermore, the community is requesting that the old borrow pit next to the BP31 site should be considered for rehabilitation, i.e., backfilling because it is a hazard and it is too close to the road. This is a big concern because two cars fell in the pit in 2022 and recently one donkey cart fell victim to the pit. Therefore, the borrow pit's complete backfilling or levelling should be considered for implementation.

Thank you for your cooperation.

Yours Sincerely,

Mr. Nicodemus Panduleni Nashandi
