Re: Environmental Assessment and Environmental Management Plan for Irrigation Based Agriculture Activities on Farm Old Smithfield, Oshikoto Region

Dear Sir/Madam

Geo Pollution Technologies (Pty) Ltd was appointed by Adrenalin Safari CC to undertake an environmental assessment for irrigation based activities on Old Smithfield FMB/01233, in the Oshikoto Region (see location map on page 2). The assessment will be conducted according to the Environmental Management Act of 2007 and its regulations as published in 2012.

**Project:** Environmental Scoping Assessment and Environmental Management Plan for Irrigation Based Agriculture Activities on Groot Boston, Oshikoto Region

**Proponent:** Adrenalin Safari CC

**Environmental Assessment Practitioner:** Geo Pollution Technologies (Pty) Ltd

The Proponent has collectively cleared approximately 70 ha for irrigation by means of centre pivot and drip irrigation systems. The main crops cultivated are vegetables, maize, apple and mangoes. Irrigation is from one production boreholes in line with a water abstraction permits as issued by the Ministry of Agriculture, Water and Land Reform. Pending the outcome of the environmental assessment and hydrogeological specialist assessment, an application to increase the total water abstraction per year, may be submitted.

The environmental scoping assessment will include all infrastructure and operational activities associated with the agricultural activities on the farm. This include land clearing, soil preparation, planting, pest control and fertilizer use, harvesting and support services such as electricity supply, staff accommodation and fuel storage.

Interested and affected parties or neighbours are invited to register with the environmental consultant, to receive further documentation and communication regarding the project, or to provide comments related to the project, for inclusion in the assessment. Please register or submit comments at:

**Fax:** 088-62-6368 or **E-Mail:** abenab@thenamib.com

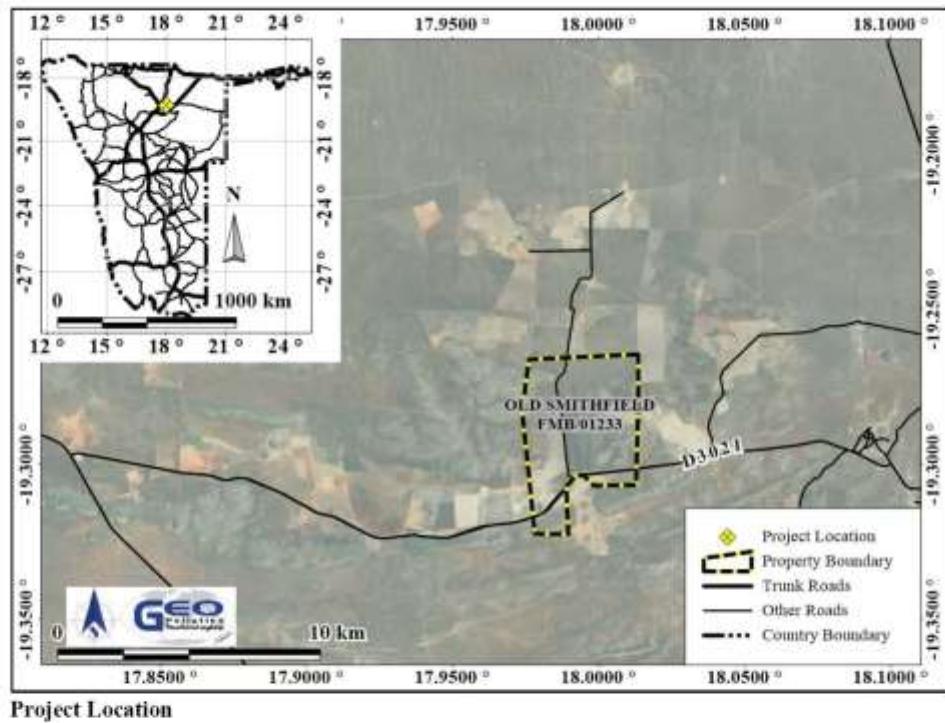

Should you require any additional information please contact Geo Pollution Technologies at telephone 061-257411.

Sincerely,  
**Geo Pollution Technologies**

**Quzette Bosman**

**March 2023**

## 1 INTRODUCTION

Geo Pollution Technologies (Pty) Ltd was appointed by Adrenalin Safari CC (the Proponent) to undertake an environmental assessment for irrigation activities on the Farm Old Smithfield FMB/01233 in the Oshikoto Region (Figure 1-1). Currently the Proponent irrigates a combined area of approximately 70 ha from production boreholes on. Pending the outcome of an environmental assessment, the total water abstraction per year, may be increased. Crop cultivation focus on vegetable, maize, apple and mangoes production which is mainly irrigated by means of centre pivot and drip irrigation systems.

An environmental clearance certificate (ECC) for the operations is required as per the Environmental Management Act No. 7 of 2007 (EMA). A scoping environmental assessment report (SR) and an environmental management plan (EMP) are proposed to be submitted to the Ministry of Environment, Forestry and Tourism's Department of Environmental Affairs (DEA) in support of an application for an ECC. The environmental assessment will include all operational activities associated with the agricultural activities of the Proponent.

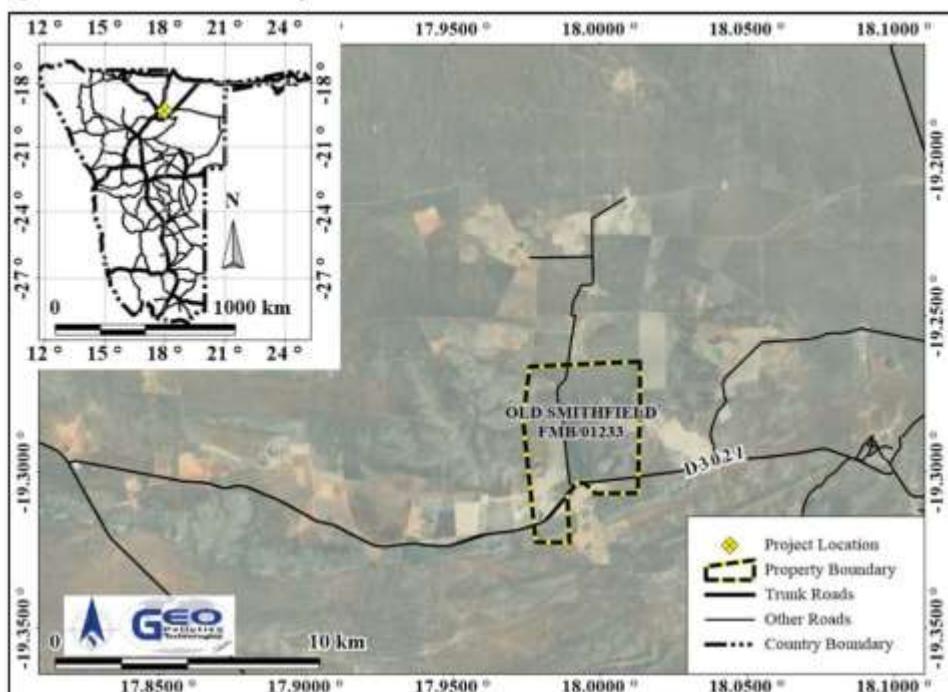

Figure 1-1 Project location

## 2 PURPOSE OF THE BID

With this background information document (BID), GPT aims to provide interested and affected parties (IAPs) with information about the project and interact with them regarding it. All IAPs are therefore invited to register with GPT for the project in order to:

- Provide GPT with additional information which should be taken into account in the assessment of impacts;
- Share any comments, issues or concerns related to the project; and
- Review and comment on the reports (SR and EMP).

### **3 PROJECT DESCRIPTION**

Activities associated with the project have been divided into the following phases: planning, maintenance/construction, operational and the decommissioning phase. A brief outline of expected activities for each phase is detailed below.

#### **3.1 PLANNING PHASE**

While planning for operations, construction / maintenance activities and decommissioning of the farm, it is the responsibility of the Proponent to ensure they are and remain compliant with all legal requirements. The Proponent must also ensure that all required management measures are in place prior to and during all phases, to ensure potential impacts and risks are minimised. Typical planning activities include:

- ◆ Obtain permits and approvals from local and national authorities including Ministry of Agriculture, Water and Land Reform.
- ◆ Make provisions to have a health, safety and environmental coordinator to implement the EMP.
- ◆ Ensure provisions for a fund to cater for environmental incidents (e.g. pollution) and ecological restoration are made.
- ◆ Ensure all appointed contractors and employees enter into agreements which include the EMP.
- ◆ Establish and/or maintain a reporting system to report on aspects of construction activities, operations and decommissioning as outlined in the EMP.

#### **3.2 CONSTRUCTION AND MAINTENANCE PHASE**

Some construction activities will form part of the development of the farm. Maintenance continues on a daily basis and may also include some construction activities. Maintenance include minor repairs to infrastructure, general upkeep of buildings, servicing of vehicles, etc.

#### **3.3 OPERATIONAL PHASE**

The main operational activities pertains to land clearing and preparation, planting, water abstraction and irrigation, pest control and harvesting. High value crops are produced in the form of vegetables, maize, apples and mangoes. Historically, areas of the farm were cleared for a combination of dryland and irrigation-based crop cultivation. However, current areas being irrigated, by means of centre pivot systems, amount to approximately 70 ha. Historically cleared areas for crop cultivation, excluding the existing and potential irrigation areas, amount to approximately 60 ha. Active rangeland improvement was and is continually conducted over portions of the farm. All areas which have undergone rangeland improvement (through bush-thinning) amount to approximately 235 ha. Water for irrigation is abstracted from one production borehole located on the farm. Operations also include activities typical of farming, inclusive of management of support services such as electricity supply, waste handling and domestic effluent disposal.

#### **3.4 DECOMMISSIONING PHASE**

Decommissioning is not foreseen during the validity of the ECC. Decommissioning will however be assessed. Should decommissioning occur at any stage, rehabilitation of the area may be required. Decommissioning will entail the complete removal of all infrastructure including buildings and underground infrastructure. Pollution present on the site, if any, must then be remediated.

#### **3.5 PRELIMINARY IDENTIFIED IMPACTS**

During the environmental assessment all components of the environment will be considered, however only those components which are being impacted on significantly, or are deemed to be sensitive, will be assessed. These include the following:

- ◆ Health and safety risks
- ◆ Soil and groundwater pollution
- ◆ Over abstraction of groundwater
- ◆ Fire risks
- ◆ Waste and effluent generation and disposal

- ◆ Traffic
- ◆ Noise
- ◆ Visual impact
- ◆ Ecosystem and biodiversity impacts
- ◆ Socio-economic contributions

#### **4 PUBLIC CONSULTATION**

GPT invites all IAPs to provide in writing, any issues and suggestions regarding the development. This correspondence must include:

- ◆ Name and surname,
- ◆ Organization represented or private interest,
- ◆ Position in the organization,
- ◆ Contact details, and
- ◆ Any direct business, financial, personal or other interest which you may have in the approval or refusal of the application.

All contributions become public knowledge and will be circulated along with the reports as per the EMA requirements.

The comments, inputs and suggestions will also be submitted to the DEA along with how any issues have been addressed in the SR. The public participation process will remain ongoing during the environmental assessment.

The project team may be contacted on the contact details below

**Your Rights as an IAP according to the Environmental Management Act, No7 of 2007, Government Notice No. 30 (Environmental Impact Assessment Regulations)**

*Section 23. (1) A registered interested or affected party is entitled to comment in writing, on all written submissions made to the Environmental Commissioner by the applicant responsible for the application, and to bring to the attention of the Environmental Commissioner any issues which that party, believes may be of significance to the consideration of the application, as long as -*

- (a) comments are submitted within 7 days of notification of an application or receiving access to a scoping report or an assessment report;*
  - (b) the interested and affected party discloses any direct business, financial, personal or other interest which that party may have in the approval or refusal of the application.*
- (2) Before the applicant submits a report compiled in terms of these regulations to the Environmental Commissioner, the applicant must give registered interested and affected parties access to, and an opportunity to comment in writing on the report.*
- (3) Reports referred to in sub regulation (2) include (a) scoping reports; (b) scoping reports amended and resubmitted; (c) assessment reports; and (d) assessment reports amended and resubmitted.*
- (4) Any written comments received by the applicant from a registered interested or affected party must accompany the report when the report is submitted to the Environmental Commissioner.*
- (5) A registered interested or affected party may comment on any final report that is submitted by a specialist reviewer for the purposes of these regulations where the report contains substantive information which has not previously been made available to a registered interested or affected party.*

*Section 24: The applicant responsible for an application must ensure that the comments of interested and affected parties are recorded in reports submitted to the Environmental Commissioner in terms of these regulations, and comments by interested and affected parties on a report which is to be submitted to the Environmental Commissioner may be attached to the report without recording those comments in the report itself.*

## NEWS IN SHORT

**Hippo meat aids vulnerable community**

A poached hippo was discovered in the Myunko area of the Zambezi Region last Sunday. Its meat was subsequently distributed to a vulnerable community.

According to spokesperson Romeo Muyunda, the environment ministry responded to a report of a dead hippo, and upon closer inspection by staff members, it was determined that the hippo had been shot. Muyunda said the meat from the hippo was distributed to a community in the Kyrekaan village, about 25 kilometres west of Katima Mulilo.

"The community there is in a destitute situation. They are a vulnerable community, since they are part of the San community. Over 90% of them do not work and therefore it was deemed necessary that we assist them."

— ENZO AMULE

**CONSERVATION INITIATIVE:** A report on the first-ever synchronised and coordinated aerial survey of Africa's largest savannah elephant populations will be made public by May/June.

The LGBTQI umbrella network hosted a media information-sharing workshop last weekend.

JERMAH NDEBELE  
WINDBROEK

The Diversity Alliance of Namibia (DAN) has reiterated its stance on what it called the "archaic" sodomy law.

Sodomy is criminalised by the Roman-Dutch common law of Namibia, which was inherited from South Africa at independence.

While the sentence for those found guilty under this law is not clear, currently, the legislation - along with the common law crime of "unnatural sexual offences" - criminalises consensual sexual acts between men. DAN, an umbrella network of over 10 LGBTQI human rights organisations in Namibia, made its stance clear at a media information-sharing workshop held at Heja Lodge last weekend.

A report detailing considerations from a panel discussion held early last year was also launched at the two-day media convening.

**THE TIME IS NOW:** The Diversity Alliance of Namibia launched a report on a discussion it held last year on the sodomy law. PHOTO: JERMAH NDEBELE

"Decriminalisation is not only for the repeal of the sodomy offence, but also to grant legal footing to LGBTQI persons to engage with different sectors, including economic empowerment, access to legal services beyond health, voting and civic participation in politics - especially when the person does not conform to the particulars given on their identity document."

"Discrimination [against these persons occurs] daily and is unrelenting, across services and sectors in all aspects of life," the report read.

Community airing their disdain about the lack of media coverage, further urging media practitioners to be more mindful about the way stories regarding the community are covered, and their use of language when doing so.

Additionally, the role the media plays in the decriminalisation of the sodomy law was also highlighted.

**Economic exclusion**

Members of the LGBTQI community emphasised the fact that they are economically excluded.

"We should understand that we cannot have a healthy, equal, equitable economy within the country if we do not have a healthy society; if we live in a society that does not want to unshun their modes of operation.

"So, this is why I think Namibia should strive for economic inclusion. When I speak about economic inclusion, I mean ensuring there is structural change that allows LGBTQI persons to be able to fully, equitably and equally participate in the economy."

"We are all serious about this country," one of the community members, who preferred to remain anonymous, said.

**HOUSING:** The construction of 70 affordable National Housing Enterprise homes is underway at Okahao.

**PROGRESS:** Okahao mayor Cornelia Iyambula.

PHOTOS: ENZO AMULE

**OKAHAO MAYOR APPLAUDS DEVELOPMENT**ENZO AMULE  
OKAHAO

Okahao mayor Cornelia Iyambula says she is satisfied with the influx of commercial entities at the town.

The town council will make land more affordable to attract investors in order to speed up development, she added.

Okahao was proclaimed a town in 2005 and the council started operations in 2006, with the mandate of providing services to residents.

In an interview with *Namibian Sun* this week, Iyambula said development in the town is progressing, fuelled by council, corporate institutions and the business community.

The town has about seven developmental projects underway, which includes the upgrading of a section of Fidel Castro Street from gravel to bitumen stand-

ard - to the tune of N\$1.2 million.

The recent upgrade of the town council's office added additional office space for a NaTIs centre, which enabled the town to provide vehicle registration and license renewal services.

"Our NaTIs office will start offering testing for learner's licences within the coming two weeks as we have just received equipment," Iyambula said.

She added that the council is set to add new vehicles to its operational fleet to improve service delivery.

**Boosting economy**

According to the mayor, the council recently allocated land for the construction of the International University of Management's (IUM) Omusati Region campus.

"This campus will boost the economy of the town as students will now be based in Okahao for ter-

tary education," she said.

"We have taken all our council staff members for training to ensure that we have a common understanding of the system in terms of organisational strategies and objectives," Iyambula noted.

Meanwhile, the town council is planning on reviving the Ebao Cultural Expo, which could not take place for the past three years due to the Covid-19 pandemic.

The expo, which - according to council - has the potential to drive raise funds and create a platform for the youth to showcase their skills or sell their products, is scheduled to take place from 26 June to 2 July.

Junia Jakob, the town's CEO, called on the youth to participate in the expo as it will enable them to expand their existing businesses and also network with other entrepreneurs.

**PUBLIC PARTICIPATION NOTICE****ENVIRONMENTAL SCOPING ASSESSMENT:  
SUBSIDY FOR AGRICULTURAL ACTIVITIES ON  
VARIOUS FARMS IN CARIBARAI, OMBODOTO, EXKOM**

Geo Pollution Technologies (Pty) Ltd can approach by Getchwa Farming CC, Lihl Potger, D. Binschaff and Admire Sefoti CC to undertake environmental scoping assessments for irrigation based activities on farms Boundary FMB#670, Portion 1 of Brinbari Noord FMB#1432, Cindaves Oos FMB#01278, Groot Bosua FMB#01343 and Oos Smithfield FMB#01233. Additional and location information can be obtained at <http://www.thereport.com/inquiries/first.html>

The environmental assessment will be conducted according to the Environmental Management Act of 2007 and its regulations as published in 2012.

The proponents irrigate by means of centre pivot, main spray systems and drip irrigation. Water for these purposes is abstracted from production boreholes. All relevant operational activities will be included in the assessments.

All interested and affected parties are invited to register with the environmental assessors. By registering you are provided with the opportunity to share any comments, issues or concerns related to the project for consideration in the environmental assessment. Additional information can be requested from Geo Pollution Technologies. All written comments and concerns should be submitted to Geo Pollution Technologies by 29 March 2023.

## NEWS IN SHORT

**Namibia 'must interrogate greenwashing'**

There is a lack of harmony between the policies and international treaties Namibia has signed and the country's ability to actually reach targets set out by these instruments.

This is according to political scientist and author Professor Andre du Pisani, who spoke at a recent panel discussion on corruption and greenwashing. "We are required to find and sign off on all these international agreements and we say we will meet these targets, but we know in our hearts of hearts that we would not be able to," he said.

He urged Namibians to move away from Western traditions and towards people-based, sustainable development with a focus on environmentalism.

Meanwhile, anti-corruption activist Professor Chuma Nwokolo said when Namibians look at the topic of greenwashing, they must ask themselves at what point they would assess whether an entity entering their industries is really a green enterprise. Greenwashing occurs when an organisation spends more time and money marketing itself as environmentally-friendly than actually minimising its environmental impact.

— JEMIMA BEJESU

**FMD control measures lifted in Zambezi**

All control measures for foot-and-mouth disease (FMD) were lifted in the Zambezi Region last week.

According to the agriculture ministry, these restrictive measures were imposed in the region as a result of an outbreak which occurred in Mbalasimbi in the Kabe South constituency last October. "The last confirmed case was reported on 29 November 2022 and according to Namibia's FMD contingency plan, restrictions in the infected zone can be lifted three months after the last confirmed case," the ministry's chief veterinary officer, Dr Albertina Shilongo, said.

"All FMD restrictive measures that were imposed as a result of the outbreak are therefore lifted with immediate effect."

She added that, to date, a 92% mass vaccination of cattle in the affected area has been achieved.

— ELAINE EEMIT

## • OTHER AIRLINE 'SIMPLY COMPETITIVE'

# Etosha hopes to fly by June

Fly Etosha plans to be up and running **within a few months**.

OGONE TLHAGE  
WINDHOEK

**F**ly Etosha says it intends to be airborne by June if all its ducks are in order.

These are the sentiments of representative William Ekandjo, who said the company has every intention of becoming operational soon, "despite an earlier bid by local aviation company FlyNamibia to challenge" its plans. FlyNamibia has since abandoned its objections.

According to Ekandjo, Fly Etosha ticks all the boxes in terms of

the regulatory requirements to become an airline.

FlyNamibia's complaint was simply due to the competitive nature of the aviation sector, he said.

Documents were submitted through FlyNamibia and Westair's attorneys, Ellis and Partners, opposing an application by Fly Etosha for a non-scheduled air transport service licence.

According to the documents, Ekandjo failed dismally to provide sufficient proof that he will be able to render a safe, satisfactory and reliable air service in respect of continuity, frequency, punctuality, reasonable charges and general efficiency.

**Focused**

"We are focused on what we are

doing. This is a field we know very well, so we didn't even bother [with FlyNamibia's opposition] because we are going in for competition," Ekandjo said.

"We satisfy all requirements," he added. "Funds, one could say 'OK, it's not enough,' maybe, but what amount [would be enough] because they could raise all the funds."

The team behind Fly Etosha was equally up to task, he said.

"Regulatory requirements, we are top class. We have been running these requirements for so many years. We shall make sure that this airline shall fly all over the world within two years," he added.

Ekandjo admitted that Fly Etosha may not immediately acquire all aircraft types it deemed necessary for its operations, but said this was not a concern for it to get operational approval.

"Equipment, those aeroplanes are available everywhere. Maybe the ones we are eyeing for the most, maybe they are difficult to get simply because of the demand for those aircraft."

**'I coined the name'**

Ekandjo further alleged that he initially coined the name FlyEtosha.

"I had the paperwork for FlyEtosha. All by surprise, I heard you have to get away from that name because that name was registered as a trademark and I foresaw that this thing is going to take long."

"If I am really aiming to have an air service licence by this year, an airline that must take off this year I think I must give that a break," he said.

**SARDAROV'S SCHOOL A BEACON OF HOPE**

JEMIMA NDÉBÉLE  
WINDHOEK

Russian billionaire and Marula Game Ranch owner Rashid Sardarov's pledge to build a combined school to the tune of N\$840 million has transformed the lives of farmworkers with hope.

The construction of the school will be privately funded by Sardarov.

"My client will spend N\$80 million per year in expenditures, salaries, administration, learners' care, tuition, boarding and clothing, etc," lawyer Sisa Namandje said.

He added that the school will essentially be for the children of farmworkers. The school - which will teach grades 0 to t2 - will carry all costs on behalf of learners.

"We are building the school for 140 workers' children, because it has happened so often that we lose good workers because there is no support for their children who do not live on the property. Currently, we are busy with the architectural work and we hope to start construction at the end of this month

and have it complete by next year," the ranch's general manager, Johan Kotze, said.

**Orphan programme**

Meanwhile, Namandje and Kotze said Sardarov is looking into an orphan programme, which will take in selected learners from all 14 regions of the country and cover the cost for their welfare and academic expenses.

"At this stage, the school will only be for workers' children and selected orphans. The idea is to break the cycle of workers' children being separated from their parents without the parents having to worry about costs," Namandje said.

Dordabis residents have shown great excitement for the new development, despite the initiative being limited to employees' children.

"We would also like our kids to attend the school and stand a chance at having a future brighter than what we currently have. We hope that this school can bring change to our community," community representative Alfies L'Amakab said.

Dit is ook een van net vier siklone wat die hele Indiese Osean van weg na oos kan deurkruis en binom 'n U-draai teen die Mosambiekiese kus maak en na die Mosambiek-kanaal teruggewoeg het.

**TOT SIENS, LA NIÑA**

Die La Niña-toestande in die tropiese Stille Osean het intussen ook tot 'n einde gekom en die Enso-toestande is nou neutraal, met internasionale klimaatmodelle wat voorspel dat dit tydens herfs neutral salbly, sedt die Australiese Bureau vir Meteorologie in hul jongste klimaatvoorsigtsondouing.

Die volg nadat La Niña-toestande vir drie jaar lank geheers het - wat op sigself ongewoon is.

Daar is egter tekene dat El Niño-toestande later vanjaar kan vorm. Daarom het die Australiese Bureau hul jongste klimaatvoorsigtsondouing op 'n El Niño-wag geplaas.

Enso staan vir die El Niño-Suidelike Oscillasieklimatepatroon en verwys na die interaksie tussen die tropiese Stille Osean en die atmosferiese toestande in die gesamentlike wêreldwye waarskynlikheid, wat gesamentlik 'n invloed op wêreldwyd klimaatpatrone het.

**VAN BL. 1**

Beelds met haar eerste modelvertoning waarnaar sy deelgemeentie het, is haar skeppings goed onthou, vertel Monah truks.

Muthu tweede modelvertoning het sy besluit om ook pluisgroote skeppings deel van die loopgrond te maak. "Ek glo elke vrou is mooi, ongeloofbaar."

Haar pad het met Doreos Valkonen op Facebook gekruis waar luugsmense in 'n berop op Namibiëse ontwerpers gesodoen het om ontwerp te kies wat daarvoor sy huur kreuse vir die leef-huisklikeheid sou maak.

Monah het vier sketses per e-pos gestuur en twee weke later het Valkonen laat weet sy gaan een van Monah

Creations se skeppings met die Namibiase landskap as inspirasie dra.

"Dis vir my baie belangrik dat my klente dieel van my ontwerp en konsep."

Sedert 2019 wat sy voltyds by Monah Creations betrekke is, verskaf sy werk aan sekere mense en erken "dit is baie werk, jy moet dit goed doen en ten volle toegewy word".

Haar gunsteling-kledingstuk om te ontwerp en te maak, is aandrokke, "maar doen alles. Dis belangrik dat die klant genaalklik en gefinsioneer word wanneer hy ontwerp dra."

Sy wil graag aan die Windhoekse Midweek-deelname een beplaaan om in die "stil-maande" kleere wat drage word is. Haar naam. Volg haar (Monah Creations) op Facebook en Instagram.

**ENVIRONMENTAL ASSESSMENT**

**IRRIGATION BASED AGRICULTURAL ACTIVITIES ON VARIOUS FARMS IN ARENAS, OSHAKATE REGION**

**GEO POLLUTION TECHNOLOGIES (PTY) LTD** was appointed by Grindewell Farming CC, LLM Projects, D Bussell and Associates Safar CC to undertake environmental scoping assessments for irrigation based activities on farms: Blesbok FM#B-670, Portion 1 of Blesbok Nood FM#B-1452, Cirkusbaan Dos FM#B-0128, Great Boston FM#B-0134 and Old Samson FM#B-0123. Additional and location information can be obtained at: [www.gptechs.com/projects/grants.html](http://www.gptechs.com/projects/grants.html)

The environmental assessments will be conducted according to the Environmental Management Act of 2007 and its regulations as published in 2012.

The Proponents mitigate by means of center pivot, micro sprayer systems and drip irrigation. Water for these purposes is abstracted from production boreholes. All relevant operational schedules will be included in the assessments.

All interested and affected parties are invited to register with the environmental consultant. By registering you are provided with the opportunity to share any comments, interests or concerns related to the project, for consideration in the environmental assessment. Additional information can be requested from Geo Pollution Technologies. All written comments and concerns should be submitted to Geo Pollution Technologies by 29 March 2023.

**PHOENIX EN KIE**

Tot hierdie hofsuik begin het, sedt die Kaapse aasvoëlkroopbruike wat by Best aangesloek was, een klein gehad wat intussen uitgebrei het. Die nege rooivrouls stuit daarom 'n Kaapse aasvoëlkruiken in, met die naam Phoenix.

Phoenix se ouers is ons die enigste broelpaar in amhulling in die land.

"Phoenix se noorfleg is moedwillig vir die wêreldbewaring van hierdie spesie," het N/a'anousie in November in 'n mediaverklaring gesê.

Die ander voëls sluit in Phoenix se ouers (Fallou en Noshir), twee roofvarend (Tom Tom en Acquilia) 'n bateleurvarend (Olly), 'n Afrikaanse goudvogel (Pintade), 'n reuseorouil en 'n gevlekte orouil.

**Kristian Kruger**

**D**ie N/a'an ku-sé stigting is nou die permanente tuiste van nou hidrologie roofvoëls ingesluit 'n bessieing van die Windhoekse hoersoel dat die voëls in hul song moet bly.

Die volg maakt N/a'an ku-sé op 18 Julie 2022 'n dringende aansoek teen die ministerie van omgewing, bosbou en toerisme ingedien het met die verzoek dat die voëls vanaf die Rare and Endangered Species Trust (Rest) na die stigting se wildreservaat geneem en daar versorg word.

Die Rest het in Oktober verlede jaar toegemak en wou die voëls aan N/a'an ku-sé skenk, maar die stigting kon nie bewering nie dat die vier eerste permissie van die ministerie verkyk om die voëls te vervoer en aan hou nie.

Die ministerie het die dringende aansoek toegestaan, maar regter George Coleman het in Julie 'n hoofbevel uitgereik dat die voëls na N/a'an ku-sé vervoer mag word en daarvan bly totdat die hoofuitspraak in die skaw-lewer.

In sy uitspraak Donderdag het Coleman finalis besluit dat die voëls in N/a'an ku-sé soeng mag bly.

"N/a'an ku-sé was suksesvol in sy geslaagde uitbragting van artikel 8(3)(c) van die Natuurbewaringsordonnansie, nr. 4 van 1975. Die artikel het gestel dat die Ministerie verplicht word om enige redes nie verskaf vir sy weiersing van 'n permissie, registrasie, goedkeuring of toestemming of vestiging nie. Die artikel is gevindlik om grootskale wortelaar.

**WETSARTIKEL VAL**

N/a'an ku-sé is van die mening dat die week van natuurbewarders belemmer word deur die onredelike optrede van die ministerie.

"N/a'an ku-sé is daartoe verbind om dierewelslys te verbeter om Nomibie se wêreldfeier in dienewelen en bewaring te maak," lei die mediaverklaring.

N/a'an ku-sé was suksesvol in sy geslaagde uitbragting van artikel 8(3)(c) van die Natuurbewaringsordonnansie, nr. 4 van 1975. Die artikel het gestel dat die Ministerie verplicht word om enige redes nie verskaf vir sy weiersing van 'n permissie, registrasie, goedkeuring of toestemming of vestiging nie. Die artikel is gevindlik om grootskale wortelaar.

NUUS 3

» Wêreldwaterdag is onlangs gevier

# Waterprobleme knel Groot Aub stéeds

Die regering is op soek na oplossings vir Groot Aub, waar die vraag na water groter is as wat boorgate kan voorsien, terwyl boerderybedrywigheid die beskikbare water besoedel.

■ Elvira Hattingh

**D**ie waterkwesties in Groot Aub is tweeledig. Eerstens onskryf die vraag na water verskaffing uit boorgate tot so'n mate dat daar nie amper water beskikbaar is nie, terwyl dit ook huurmeubel besoedel word as gevolg van menslike aktiwiteite.

Dit aldus die minister van landbou, water en grondhuurkassepie, Calle Schlettwein, tydens die viering van Wêreldwaterdag, osoek Wêreld-vleiende-dag, wat die afgelope Vrydag op Groot Aub gevier is.

"Dit is tyd vir die beroep van vleilandse," skeep "Versneling van verandering deur vennootskappe en samewerking" was die onderskeels temas vir dié wêrelddag.

Schlettwein het in sy toespraak gesê, sou voorgelees deur die ministerie se uitvoerende direkteur, Ndyakupi Ngithuwamata – dat die vraag na water by Groot Aub oor die afgelope drie geografiese gebiede uitstaan het vanweë die bevolkingsgroei wat in die nedersetting gevind word. Mensa het hulself hierom vastig op sokk na belasting en

Calle Schlettwein het in sy toespraak gesê dat die vraag na water by Groot Aub oor die afgelope jare gegroei het. PHOTOGRAPH BY JEREMY SCHAFFER

beter geleenthede.

Ify sé verder studies toon dat die water in die gebied byvoorbeeld nitrate bevat, wat met dieremis vereenvoudig word.

"Ons moet seker maak dat die beperkte water wat beskikbaar is, skoon gehou word deur mautreëls in stelsel sodat ons die water kan bewaar."

"Dit beteken ons moet gebiede uitstaan vir die aanbou van dierse en afval buslaar sodat dit nie in ons ondergrondse water beland nie."

"Om moet sanitasiedienste verbeter om 'bostoilette' te vermy en persoonlike higiëne te bevorder..."

Schlettwein het gesê hy en die minister van stedelike en landelike ontwikkeling, Erastus Utomi, het Groot Aub in Februarie besoek met vas te stel wat die probleem met die water is en moontlike oplossings te ondervind.

"Ons wou dat Groot Aub nuoe deel van die Windhoek-gebied is, en terselfdertyd word die gemeenskap

deur waterverskaffings- en sanitasiekwesties in die gesig gestuur."

Hy sê die regering en die Windhoekse munisipaliteit kan nie alleen probeer om gemeenskappe met aansluitende waterkwesties te help nie, maar benodig eensoet in die privaat sektor.

In tussen het Alka Bhatia, plaaslike verteenwoordiger van die Vereenigde Nasies se Ontwikkelingsprogramma (UNDP), daarop gewys dat Namibië die dryngste land suid van die Sêraten

is en terselfdertyd ook baie voorbaai vir klimaatsverandering is.

Terselfdertyd maak 80% van Namibië se nywerheide en inwoners op ondergrondse water vir watervoorsiening staan.

## Calle Schlettwein

OMGEWINGSMINISTER

"Ons moet sanitasiedienste verbeter om 'bostoilette' te vermy en persoonlike higiëne te bevorder..."

Sy het bygevoeg dat – om kwesbare gebiede soos Namibië te help om beter veerkrugtigheid teenoor klimaatsverandering te ton – ondersteun VN-agentskappe die regering met die volhoubare bestuur van natuurlike hulpbronne, veral as dit by ondergrondse water en vleilandse kom.

Sy het na kleiner projekte soos die Carkun-project verwys – wat werk doen vir verbeterde waterskeurteit en gemeenskapveerkrugtigheid in die aangrenzende Cuvelai- en Kumas-oorgrensriverkomme.

# Ons is moeg, sê Dordabis se inwoners

■ Jeremiah Ntshela

Die meeste inwoners van Dordabis - sowat 80 km oos van Windhoek - word "gedwing om in arm omstandighede te woon".

Die gemeenskap, wat geteister word deur gebrek aan werkgeleenthede, sanitasie en grond, is desperaat vir die regering om in te gryp om hul lewenstandaarde te verbeter. "Ons jongmense doen nie ensoet huusdag nie die sjebou. Dan is geen opleidingsgeriewe om hulle waarderhede te leer nie. Ons is moeg. Ons is omring deur private eiendoms soj vinnmaskhouer wat ons nie mag gebruik nie," se die 78-jarige gemeenskapverteender, Alfous "Vamus" tydens 'n besoek na die nedersetting.

"Die grond wat ons het, is nie groot genoeg om in boerdery- en voedselbehoeftes van elke huishouding te voorsien nie."

Volgens hom het inwoners meer grond nodig en hy het gevogel dat 'n herープ op die regering gedoen om die omliggende private grond te koop en dit in hervestigingsplane te onskapek.

Die nedersetting, wat die tuiste van sowat 1 000 mense is, val onder die Windhoek-omstredene-kiesafdeling.

Inwoners van Dordabis wil hê die regering moet ingryp. PHOTO: JEREMY SCHAFER

Dan is net 'n poskantoor, kliniek, polisiekantoor en 'n primêre skool. Leerlinge moet noodgevwoeg in koushuise in Windhoek, Rehoboth, Hoachanas, Groot Aub of Leonardville gaan bly om hul skoolopleiding voort te set.

"Ons is ongelukkig, ons het nie meer as

'n grond 7-rapport nie. Ons wil die kennis en vaardighede he wat ons lewensgehalte suwer maak vir ons kinders sal verlore. Ons is moeg daarvoor om net op te staan en niks anders te hê om te doen as om by die kroeg te sit en te gaan slaap wanneer die son sak nie," sê 'n 28-jarige ma van drie wat verlies om ascension te hê.

"Soms sitty net by die huis en drink daneman om myself dood te maak, want daar is milie om te doen nie. Om te drink, te rook en rond te slap, enks help nie. Politici kom net met verkiezingstoegang internasie en mysek bedoel ons. Ons wil resultate sien," het sy gesê.

Si is hang om in gemeenskapsvergaderings op te staan en raadslede te hervraagteken uit vrees vir vriktemming.

"Wanneer ons iets sê,veral jongmense, voel die raadslede ons respekteer hulle nie en kritiseer ons daaroor. Dit is aalkig."

Volgens hawwend baie van die jong meisies in die nedersetting hou totskewerken slap by man, wat uit Windhoek, Rehoboth en Gobabis die nedersetting kom besoek.

Kommunitair van die Windhoek landelike klesafdeling was teen druktyd nie beskikbaar nie.
