Dear Ms Amadhila

ZED Investment wants to install petrol storage at Enongo, Otamanzi Village. In order for the installation process to continue, the Ministry of Environment and Tourism would like to know and hear the opinions comments concerns and views of the public affected by this storage and handling of petrol and lubricant products in Otamanzi area. Hence, public participation in Environmental Impact Assessment is required for the issuing of the Environmental Clearance Certificate (ECC).

The Ministry of Mines and Energy also needs the ECC to finalize the Petroleum Consumer Installation license.

Please display the attached invitation on your office and at Otamanzi Headman location NOTICE BOARDS as well on WhatsApp Group.

Have a nice day

Thanks
