Dear Ms Amadhila

ZED Investment wants to install petrol storage at Enongo, Otamanzi Village. In order for the installation process to continue, the Ministry of Environment and Tourism would like to know and hear the opinions comments concerns and views of the public affected by this storage and handling of petrol and lubricant products in Otamanzi area. Hence, public participation in Environmental Impact Assessment is required for the issuing of the Environmental Clearance Certificate (ECC).

The Ministry of Mines and Energy also needs the ECC to finalize the Petroleum Consumer Installation license.

Please display the attached invitation on your office and at Otamanzi Headman location NOTICE BOARDS as well on WhatsApp Group.

Have a nice day

Thanks

Zenas lileka 0818154402

ENVIRONMENTAL IMPACT ASSESSMENT: I&APs STAKEHOLDERS ENGAGEMENT MEETING

Date: 20 June 2020

Time: 10 H00

Place: Otamanzi Constituency Office

Chairman: Hon. Johannes Iiyambo (Regional Councilor – Otamanzi Constituency)

Presenter: Mr. Iileka Zenas (Project Coordinator)

1. Apologies

No apologies received

2. Welcome

The Chairperson welcomed everyone and everyone introduced her/himself.

3. Matter arising

No matter arising.

4. The aim for the meeting

The Project Coordinator introduced the project background information and project description. He highlighted the importance of the project as to assist and enhance farming activities in Otamanzi Village. The Executive Summary for the project plan was discussed. The project document (Business Plan) was discussed in detail, especially regarding the project's impacts to the environmental.

5. Environmental Impact Assessment

The Environmental Assessment Practitioner (EAP) discussed the impact to the environment for the project during construction and operational stages. He considered the following in his presentation:

- a) Desktop assessment
- b) Site assessment
- c) Land use change
- d) Surface and ground water
- e) Air quality
- f) Agriculture
- g) Storage and handling of hazardous substances; and
- h) Importance of public participation.

He emphasized on the community to give and rise their give their comments, issues and concerns on environmental impacts, especially on negative impacts on environment.

6. Comments, issues and concerns received

One participant raised on the issue of controlling the wildfires which could happened, especially during summer. EAP replied that some wildfires are occur naturally. He advised that although some wildfires are caused by human behavior such as throwing cigarette butts to open field, such behavior could be controlled and minimized. Cut-out fire paths should be also constructed around the project site, to avoid fire into the project site.

Regional Councilor raised the issue of involving the community in the project, since there is no fuel station in the area. EAP replied that the license for Petroleum Consumer Installation is issued directly by the Ministry of Mines and Energy. Therefore, there are some conditions to be followed and adhered to.

The project coordinator further stated that the applied license is only for Petroleum Consumer Installation and not for retail license.

7. Closure

The chairman closed the meeting.

Minutes signed:

10. Matter arising

No matter arising.

11. The aim for the meeting

The Project Coordinator introduced the project background information and project description. He highlighted the importance of the project as to assist and enhance farming activities in Otamanzi Village. The Executive Summary for the project plan was discussed. The project document was discussed in detail, especially regarding the project's impacts to the environment.

12. Environmental Impact Assessment

The Environmental Assessment Practitioner discussed the impact to the environment for the project during construction and operational stages. He considered the following in his presentation:

- i) Desktop assessment
- j) Site assessment
- k) Land use change
- l) Surface and ground water
- m) Air quality
- n) Agriculture
- o) Storage and handling of hazardous substances; and
- p) Importance of public participation.

He emphasized on the community to give and rise their give their comments, issues and concerns on environmental impacts, especially on negative impacts on environment.

13. Comments, issues and concerns received

Regional Councilor commented that there was a need for petrol station in Otamanzi area. He wished if the project owner would come up with another idea to establish a fuel retail business. He also wanted the Ministry of Mines and Energy to come up with a solution because most of the inhabitants travelling long distances in search of fuel.

The project coordinator advised that the Ministry of Mines and Energy does not directly involving in retail of petroleum products, only regulate the products.

Another participant concerned over the job opportunities. She commented that job opportunities should be given to the locals. EAP responding that as per mitigation measures in social impacts, the preference would be given to the local people.

14. Closure

The chairman closed the meeting.
