# Business Sector Sees 0.5% Year-on-Year Growth in June

Staff writer

The business sector experienced a 0.5% year-on-year (y/y) growth in June, a significant slowdown from the 4.7% y/y recorded in May 2024, yet still above 2023 levels.

Analysis from Simonis Storm Securities' Halleluya Ndimulunde reveals this as the second slowest credit growth uptake for corporates in 2024.

Ndimulunde attributed this declaration to higher repayments in other loans and advances, as well as overdrafts, particularly within the commercial and services, fishing, manufacturing, and energy sectors, as per data provided by the Bank of Namibia (BoN).

"Other loans and advances, which constitute 40.6% of total credit uptake by corporates, saw growth of 13.9% y/y in June 2024, down from 17.7% y/y in May 2024," Ndimulunde observed.

However, she says this still represents a significant increase compared to the same period last year.

Meanwhile, overdrafts, which account for 17.2% of corporate credit uptake, continue on a negative trajectory, with credit growth at -26.0% y/y in June 2024. Mortgage loan credit growth also remains negative.

"On a quarterly basis, corporate credit growth stood at 1.9% in the second quarter, up from 0.9% in the first quarter.

This growth was primarily driven by the instalment and leasing category, supported by demand from the automotive sector, as well as other loans and advances," the economist said.

She attributed the increased demand for other loans and advances largely to the mining and quarrying sector during the first two months of the second quarter of the year.

Credit extended to the private sector in June declined to 1.8% y/y, down from 3.2% y/y in May 2024 and 2.9% y/y in June 2023. This decline, Ndimulunde says, was primarily driven by repayments from corporate borrowers.

Ndimulunde explained that when the repo rate exceeds the inflation rate, the cost of borrowing for businesses and households escalates.

"This results in higher interest rates on loans, mortgages, and other forms of credit, thereby dampening investment and consumption. Businesses may defer or cancel expansion plans due to the increased cost of financing, while households are likely to reduce significant expenditures and face higher monthly payment obligations."

The growth rate of private sector credit extension decelerates, as both borrowers and lenders adopt a more cautious stance, which she argues is evident in the current credit growth trends in Namibia.
