# **Appendix E: Background Information Document (BID)**

**Document Type:**

**Background Information Document (BID)**

**Project Name:**

**ENVIRONMENTAL SCOPING ASSESSMENT (ESA) ON  
EXCLUSIVE PROSPECTING LICENCE (EPL) No. 8581  
LOCATED NEAR OKOMBAHE, ERONGO REGION,  
NAMIBIA**

**Environmental Assessment Practitioner:**

**Excel Dynamic Solutions (Pty) Ltd**

**Proponent:**

**HD Mining CC**

## 1 INTRODUCTION AND BACKGROUND

HD Mining CC (hereinafter referred to as The Proponent), has applied to the Ministry of Mines and Energy (MME) for an Exclusive Prospecting Licence (EPL) No. 8581. An application was lodged on the 2<sup>nd</sup> of September 2021. However, the approval and granting of the EPL is subject to an Environmental Clearance Certificate (ECC), thus “pending ECC” status on the mining cadastre portal. EPL 8581 covers a surface area of The 14 767.3699 hectares (ha). The EPL is located about 15km near Okombahe in the Erongo Region (**Figure 1**).

The EPL covers (overlie) Farm Okarundu Sud No.138, Okarundu Nord No. 121, Okarundu Nord West No. 118 and Kowab No. 117 (**Figure 2**).

The targeted commodities for this EPL are **Base & Rare Metals, Dimension Stones, Industrial Minerals and Precious Metals**.

Exploration and all mining-related activities are among the listed activities that may not be undertaken without an ECC under the Environmental Management Act (EMA) (2007) and its 2012

Environmental Impact Assessment (EIA) Regulations. The relevant listed activities as per EIA regulations are:

- *3.1 The construction of facilities for any process or activities which requires a license, right of other forms of authorization, and the renewal of a license, right, or other form of authorization, in terms of the Minerals (Prospecting and Mining Act, 1992).*
- *3.2 other forms of mining or extraction of any natural resources whether regulated by law or not.*
- *3.3 Resource extraction, manipulation, conservation, and related activities.*

The Proponent is therefore, required to obtain an ECC before the commencement of exploration works on the EPL. To fulfill the legal requirements, the Proponent has appointed Excel Dynamic Solutions (Pty) Ltd, an independent team of Environmental Consultants, to conduct the required Environmental Assessment (EA) process and submit the ECC application to the Department of Environmental Affairs and Forestry (DEAF) at the Ministry of Environment, Forestry & Tourism (MEFT).

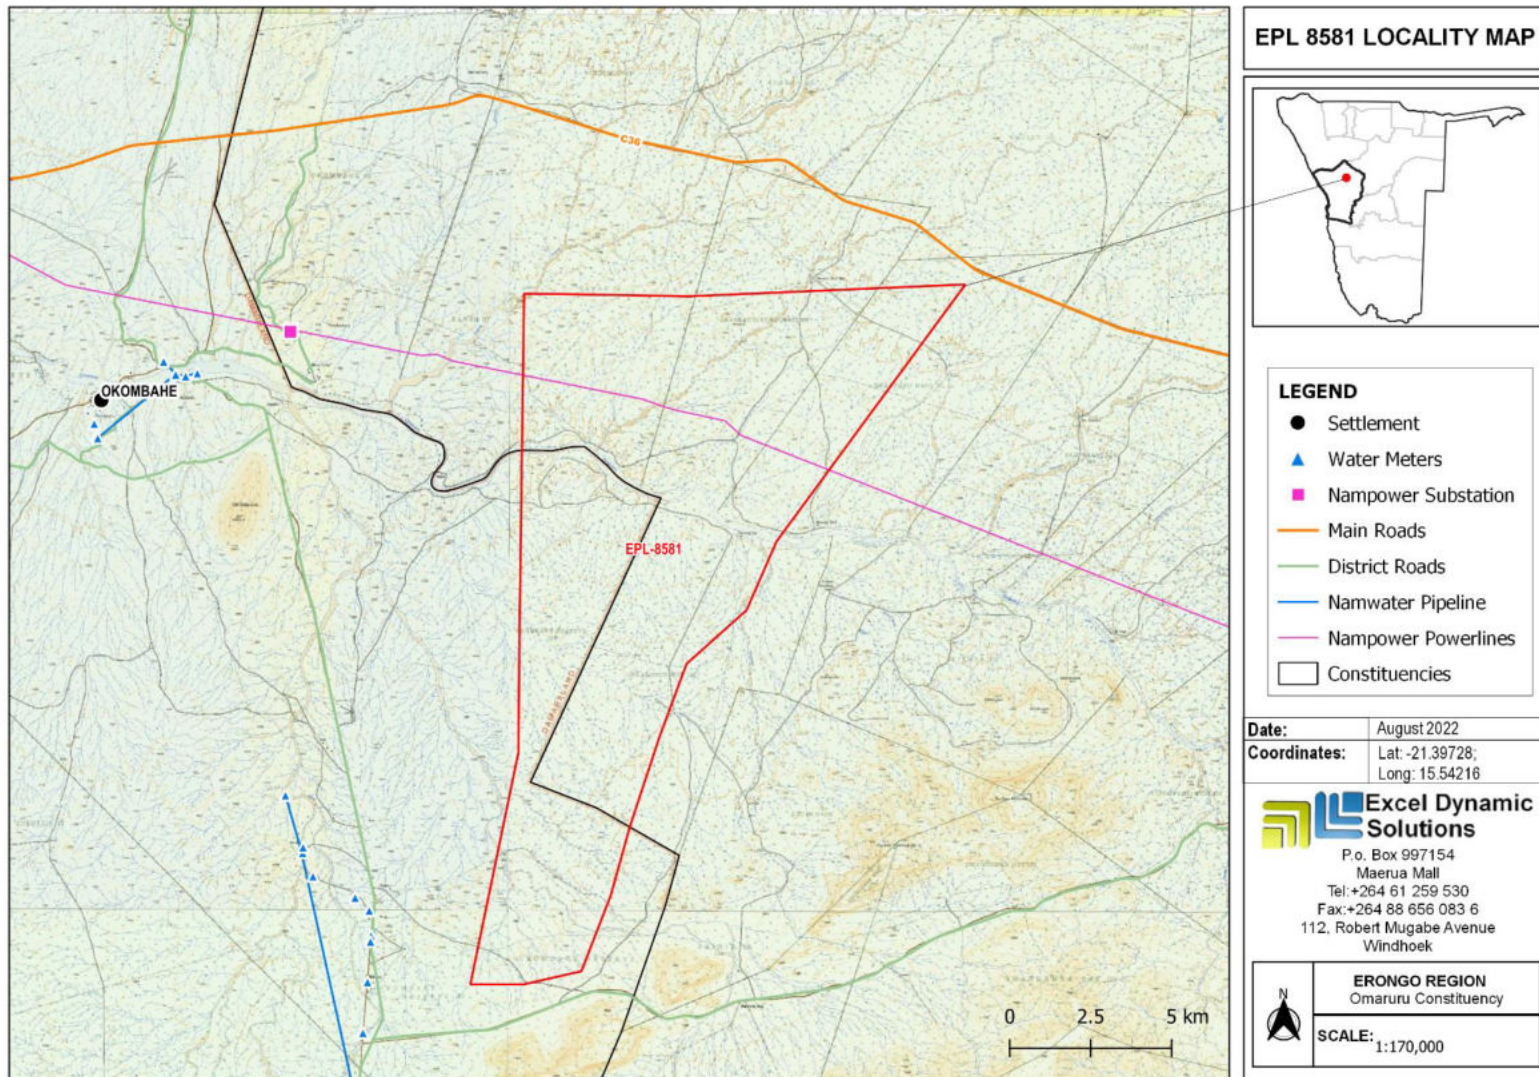

Figure 1: Locality map of EPL 8581 near Omaruru, Erongo Region

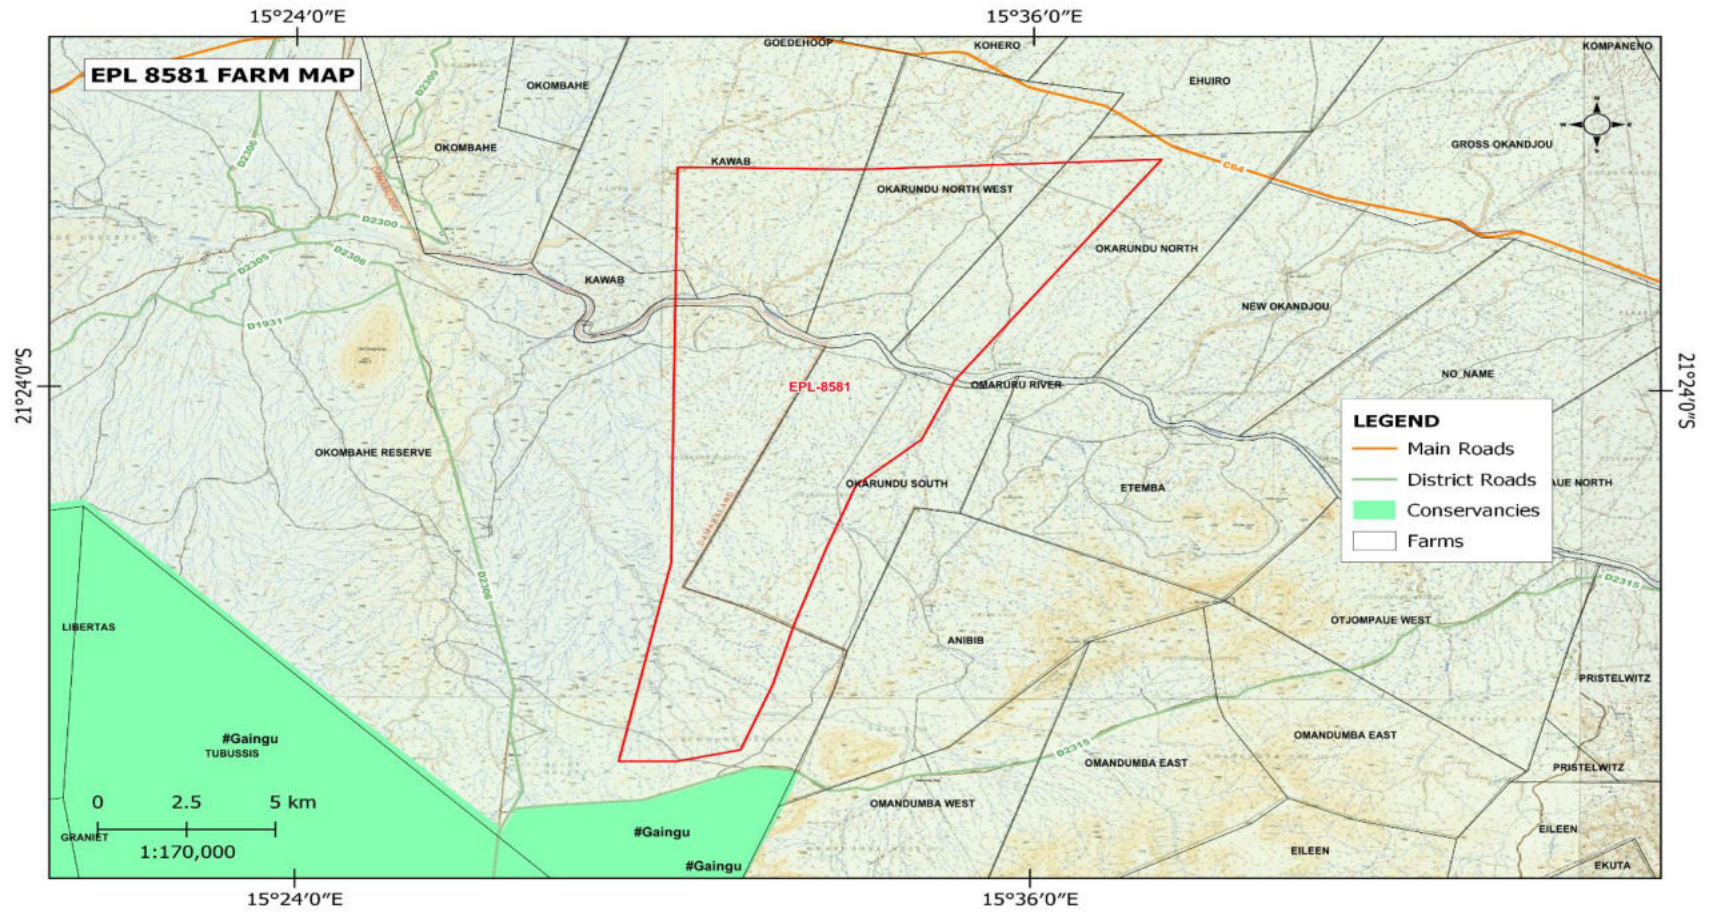

Figure 2 : Land Use (Farms) Map of EPL 8581

## 2 PURPOSE OF THIS DOCUMENT

It should be noted that the Background Information Document (BID) is not an EA Report but a non-technical summary of the EA, aimed for information purposes and a basis for public involvement from the beginning of the EA process. The motivation behind this document is to:

- Give background information of the proposed activity to I&APs, and give I&APs a chance to get information, remark and raise issues concerning the approval measure.
- Give background information to I&APs of the task, along these lines giving a chance to them (I&APs) to get information, remark and raise issues concerning the approval measure.
- Invite members of the public to register as I&APs and get added to the EA database in order to stay informed about the EA's progress throughout its process; and
- Provide all I&APs with an opportunity to comment or provide inputs/concerns on the proposed project activities, which entails concerns/issues on the biophysical and socio-economic aspects, and any other issues of concern related to the proposed project. The information from I&APs will form the basis of the EA and EMP documents which help the regulatory and competent authorities MEFT and MME, respectively; to pass judgment on the acceptability of the undertaking.

### 3 NEED AND DESIRABILITY OF THE ACTIVITY

The mining industry is one of the largest contributors to the Namibian economy; therefore, it contributes to the improvement of livelihoods. In Namibia, exploration for minerals is done mainly by the private sector. Exploration activities have a great potential to enhance and contribute to the development of other sectors and its activities do provide temporary employment, and taxes that fund social infrastructural development. The minerals sector yields foreign exchange and accounts for a significant portion of gross domestic product (GDP). Additionally, the industry produces a trained workforce and small businesses that can serve communities and may initiate related businesses. Several associated activities that are fostered include, such as manufacturing of exploration and mining equipment, provision of engineering and environmental services and others. The mineral exploration sector forms a vital part of some of Namibia's development plans, namely: Vision 2030, National Development Plan 5 (NDP5) and Harambee Prosperity Plans (HPPs) I and II. Therefore, successful exploration on EPL 8581 would lead to the target commodity, which would feed into the national development plans.

### 4 PROJECT DESCRIPTION

The proposed activities entail detailed exploration activities and delineating the mineral deposits to determine whether the deposits for targeted commodities are economically feasible (to advance to the resources development and mining phase).

The prospecting and exploration of minerals are the first components of any potential mining project. This is done to acquire the necessary data required for further decision-making and investment options. These activities are anticipated to last for about three years or more, depending on the programmes and subsequent actual exploration processes. The planned activities and required resources and infrastructure are briefly described below. The detailed exploration methods (techniques) will be presented in the Environmental Scoping Report.

The proposed phased approach for the exploration works is presented below. However, it should be noted that these activities will only be undertaken upon the approval of the ESA Report and issuance of an ECC by the Environmental commissioner.

Once the Proponent has been issued with an ECC and obtained all relevant and required permitting licensing (such as consent and land use agreements), and is ready to commence with the

actual exploration activities (with financial, technical, and human resources in place), the planned activities will commence on site.

#### 4.1 Project Processes

The proposed exploration activities (methods) are divided into the following categories:

- **Phase 1: Non-invasive techniques (prospecting)** - This phase includes geological field mapping and ground-based surveys, reviewing of existing geological maps and historical drilling data as well as field evaluation and sampling, to select and verify the target areas.
- **Phase 2: Invasive techniques (detailed exploration)** – The techniques involved herein include soil survey, rock sampling, trenching, drilling and/ or pitting.
- Once the target areas have been selected and verified under the prospecting phase, detailed exploration works will follow.

#### 4.2 Human Resources, Services and infrastructure

The following services and infrastructure as provided below will be required for the project activities:

- **Human resources and accommodation:** About 15 -20 people will be employed on-site during the exploration phase. The workforce will include 5-8 exploration staff and 10-12 drilling crew. The exploration workforce will be accommodated in Omaruru upon reaching an agreement and consent is signed between the Proponent and the respective landowner or custodian before setting up accommodation structures (tented camps).
- **Working Space (Administration and Control):** Movable shade facility near the working spots and prefabricated temporary offices will be erected on-site (subject to the approval of the landowner/custodian or authority).
- **Water supply:** About 4 000 liters of water will be required per month for exploration activities. This water will be used for cooling down and washing equipment, drilling-related activities, and ablution. Potable water will also be made available for the exploration crew (workers) on site in industry water storage tanks.
- The water will be sourced from elsewhere and transported to the site. Therefore, no project-related water abstraction will be done onsite or within the site area.

- **Fuel Supply (machinery and equipment):** Diesel will be used for machinery and equipment and fuel generator.
- **Accessibility (roads):** The EPL is accessible via the C36 road. Therefore, project-related vehicles will be using these existing roads to access the EPL. The Proponent may need to do some upgrades on the site access road to ensure that fits to accommodate project-related vehicles, such as heavy trucks.

**Waste management:** Different waste will be handled as follows:

- **Sewage:** Mobile chemical ablution facilities will be provided on-site. The wastewater will then be transported offsite to the treatment facility either by the Proponent or a designated/appointed external waste management contractor.
- **General and domestic waste:** Sufficient waste containers will be made available at exploration sites and campsites for waste storage. The bins will be emptied into the main onsite container for disposal at the nearest landfill site, when necessary (upon reaching full capacity of the main waste container onsite).

- **Hazardous waste:** All vehicles, machinery, and fuel-consuming equipment will be provided with drip trays to capture potential fuel spills and waste oils. The waste fuel/oils will be carefully stored in a standardized container until such a time that they can be disposed of at the nearest approved hazardous waste management facility. The nearest considered facility town is Omaruru; therefore, a waste disposal agreement will be reached between the Proponent and the Town Council.
- **Health and Safety:** Adequate and appropriate Personal Protective Equipment (PPE) will be provided to every project personnel while working at the site. A minimum of two first aid kits will be readily available at exploration sites to attend to potential minor injuries, while major injuries will need to be attended by transporting the injured to the nearest healthcare facility for treatment and necessary care.
- **Potential Accidental Fire Outbreaks:** A minimum of basic firefighting equipment, i.e., two fire extinguishers will be readily available in vehicles, at the working sites and campsite.

**4.3 Project Equipment, Material, Machinery, and Vehicles**

The following equipment and machinery will be required:

- 4X4 vehicles
- Truck
- Drill rigs
- Excavator / front-end loader
- Dozer/s (to clear vegetation along planned drilling site access roads)
- Drilling fluids stored in manufacturers approved containers
- Air compressors
- Generator for power supply

This equipment, machinery, and vehicles will be kept at a designated storage site that will be established within the EPL.

**4 DECOMMISSIONING: REHABILITATION OF EXPLORED SITE**

Decommissioning refers to the cessation of exploration activities, either upon discovering an economically feasible and worthy deposit or in the event of unsuccessful exploration results works.

The Proponent will need to properly decommission the activity to either prepare the selected areas of the EPL for the next phase or upon unsuccessful exploration results, to rehabilitate the explored sites.

**5 ENVIRONMENTAL ASSESSMENT**

This ESA process is conducted following the provisions stated in the Environmental Management Act (No 7 of 2007) and its Environmental Impact Assessment Regulations (2012). The primary objective of the EA will be to identify potential negative impacts associated with the proposed activity, assess them, and recommend practical and effective mitigation measures to be implemented by the Proponent, to minimize these impacts while maximizing positive impacts.

The main objectives of this ESA are to:

- Comply with Namibia’s Environmental Management Act (2007) and its EIA regulations (2012).
- Identify potential impacts associated with the proposed activity.

- Inform Interested and Affected Parties (I&APs) and relevant authorities about the mining activities and provide them with a reasonable opportunity to participate during the EA process.
- Assess the significance of issues and concerns raised.
- Compile a report addressing all identified issues and potential impacts related to various aspects of the activity.
- Compile a Draft Environmental Management Plan (EMP) which includes impacts management and mitigation measures.
- Produce a trained workforce and small businesses that can service communities and may initiate related businesses,
- Boosting the local economic growth and regional economic development.
- Improved geological understanding of the area regarding targeted commodity, and
- Increased support for local businesses through the procurement of consumable items such as Personal Protective Equipment (PPE), machinery spare parts, lubricants, etc.

**5.1 Potential Impacts**

The following potential impacts have been identified so far for the surrounding towns, settlements, and property:

**Positive:**

- Socio-economic development through employment creation and skills transfer,
- Opens up other investment opportunities and infrastructure-related development benefits,

**Negative:**

- Potential disturbance of existing pastoral systems,
- Physical land/soil disturbance: Invasive exploration activities could lead to soil disturbance. The potential damage to subgrade due to traffic compaction along access roads,

- Impact on local biodiversity (fauna and flora) and habitat disturbance: some vegetation may be disturbed e.g., by off-road driving or being removed to create access roads and working spaces. There are possibilities of illegal hunting (wildlife and domesticated animal) in the surrounding areas.
- Potential impact on water resources and soils particularly due to pollution,
- Air quality issue: dust may be generated from driving on-site, surface excavation, drilling, and diamond wire sawing could temporarily compromise the surrounding air,
- Visual impacts due to scars – May occur on the landscape and relief
- Potential occupational health and safety risks- May occur due to the movement / operating of machinery and equipment on site.
- Vehicular traffic safety and impact on services infrastructure (local roads): the temporary potential increase in vehicular traffic during exploration may exert additional pressure on the local roads, especially by heavy vehicles such as trucks carrying project materials and equipment (drilling rigs),
- Vibrations and noise associated with drilling activities may be a nuisance to locals,
- Environmental pollution through different types of waste generated on the site, particularly from the mishandling of hydrocarbons (fuels) and wastewater,
- Archaeological or cultural heritage impact through unintentional uncovering of unknown archaeological objects or sites by certain project activities such as exploration drilling and excavation as well as known and marked heritage sites on targeted sites on the EPL and surroundings,

- Potential social nuisance and conflicts between affected farmers/landowners and or neighboring land users and Proponents due to the lack of communication or cooperation on raised issues and land use during exploration.

The potential impacts listed above are pre-identified and therefore should not be deemed as final or the only ones. Other potential impacts will be identified as the EA process progresses i.e., upon site visit and consultation with the public (I&APs). All impacts and public concerns/comments will be incorporated and addressed in the Environmental Assessment Report and EMP.

## 5.2 Public Consultation

Public consultation is an important part of the EA process. During the consultation process, interested or affected members of the public are allowed to find out more about the activity and raise any issues or concerns about the environmental assessment.

To comment or receive further information on the project, **please register with Excel Dynamic Solutions (Pty) Ltd** (contact details herein) as an Interested and Affected Party (I&AP) before or on **Friday, 30 September 2022**

All registered I&APs will be kept informed throughout the various stages of the project and will be provided the opportunity to comment on the Scoping (ESA) Report.

**Please note that a Public Consultation meeting is scheduled as follows:**

- **Date:** Tuesday, 06 September 2022
- **Time:** 09H00
- **Venue:** Omaruru Constituency Office

**Excel Dynamic Solutions**

**Contact:** Mr. Silas David / Ms. Iyaloo Nakale

**Notices Legal Notices**

**NOTICE OF ENVIRONMENTAL SCOPING ASSESSMENT (ESA) FOR: THE PROPOSED EXPLORATION ACTIVITIES ON THE EXCLUSIVE PROSPECTING LICENCE (EPL) NO. EPL 7011 LOCATED SOUTHWEST OF ARANDIS, ERONGO REGION**

Under the Environmental Management Act No. 7 of 2007 and its 2012 Environmental Management Assessment (EIA) Regulations, an Environmental Clearance Certificate (ECC) will be submitted to the Environmental commissioner. The project is a listed activity that cannot be undertaken without an ECC from the Department of Environmental Affairs and Forestry (DEAF).

**Project Type & Location:** The proposed prospecting & exploration of Nuclear Fuel Minerals on EPL 7011. The 2613.1823 hectares (ha) EPL is located about 9 km southwest of Arandis in Erongo Region. Proponent: PennyWort Investments (Pty) Ltd.

**NOTICE**

**CREATION OF NEW PORTIONS ON THE REMAINDER OF THE FARM GROOTFONTEIN TOWNLANDS NO. 814**

Notice is hereby given in terms of the Urban and Regional Planning Act, 2018 that **Stubenrauch Planning Consultants cc** on behalf of the Grootfontein Municipality, the registered owner of the Remainder of the Farm Grootfontein Townlands No. 814 has applied to the Grootfontein Municipality and intends on applying to the Urban and Regional Planning Board (URPB) for the following:

**(a) Subdivision of the Remainder of the Farm Grootfontein Townlands No. 814 into Portions A to O and Remainder;**

**(b) Rezoning of Portions A to E from "Undetermined" to "Institutional";**

**(c) Reservation of Portions N to O as "Street";**

**(d) Inclusion of the rezonings in the next Zoning Scheme to be prepared for Grootfontein.**

The Remainder of the Farm Grootfontein Townlands No. 814 is located north of the Grootfontein town and directly east of the C42 Road to Tsumeb. It is currently zoned for "Undetermined" purposes in accordance with the Grootfontein Zoning Scheme.

The purpose of this application is to enable the Grootfontein Municipality to make provision for various land uses that will cater to the needs of the present and future urban population of Grootfontein, through the creation of thirteen (13) mixed land use portions located north of the Remainder of the Farm Grootfontein Townlands No. 814. Please take notice that the application, locality map and its supporting documents lie open for inspection during normal office hours at the Grootfontein Municipality (Town Planning Office) and SPC Office, 45 Feld Street; Windhoek.

Further take notice that any person objecting to the proposed application as set out above may lodge such objection together with the grounds thereof, with the Chief Executive Officer of the Grootfontein Municipality and with the applicant (SPC) in writing on or before **Friday, 09th September 2022**.

### NOTICE

**CREATION OF NEW PORTIONS ON THE REMAINDER OF THE FARM GROCCOTSHOEK TOWNLANDS NO. 814**

Notice is hereby given in terms of the Urban and Regional Planning Act, 2019 that Shubensuch Planning Consultants cc on behalf of the Grocottshoek Municipality, the applicant owner of the Remainder of the Farm Grocottshoek Townlands No. 814 has applied to the Grocottshoek Municipality and intends on applying to the Urban and Regional Planning Board (URPB) for the following:

- (a) Subdivision of the Remainder of the Farm Grocottshoek Townlands No. 814 into Portions A to D and Remainder;
- (b) Rezoning of Portions A to E from "Residential" to "Industrial";
- (c) Rezoning of Portions B to D as "R2000";
- (d) Revision of the rezoning in the next Zoning Scheme to be prepared for Grocottshoek.

The Remainder of the Farm Grocottshoek Townlands No. 814 is located north of the Grocottshoek town and directly east of the C42 Road to Tsumbe. It is currently zoned for "Industrial" purposes in accordance with the Grocottshoek Zoning Scheme.

The purpose of this application is to enable the Grocottshoek Municipality to make provision for various land uses that will cater to the needs of the present and future urban population of Grocottshoek, through the creation of Portion (T) and land use patterns related north of the Grocottshoek town, on the Grocottshoek Townlands No. 814.

Please take notice that the application, locality map and its supporting documents be open for inspection during normal office hours at the Grocottshoek Municipality (Town Planning Office) and SPC Office, 45 Field Street, Windhoek.

Further take notice that any person objecting to the proposed application as set out above may lodge such objection together with the grounds thereof, with the Chief Executive Officer of the Grocottshoek Municipality and with the applicant (SPC) in writing on or before Friday, 09<sup>th</sup> September 2022.

Ode to a mother of stars - Maria Tjhero

Maria Tjhero

DISCIPLINARIAN, strict, a strategist, loving and caring are just some of the adjectives used by Kapena Tjheronde to describe her late mother Maria Tjhero during an exclusive interview with The Namibian on Sunday.
Tjhero siblings succumbed to illness on 6 August 2022, and will be held to rest at Okavango village, in the Okavango region, on Sunday, 30 August.
Maria Tjhero, who passed on in 2005, having the pouring rains of her late children's study in the hands of her mother, a disappointed because she helped shape the lives of her children, who all grew up to become very prominent sport personalities and members of society.
The Tjhero siblings are: Ayasha Hango (deceased); Gebheri; the played rugby at Dabest; Albert Hango (captain); Albert Svan, South West Africa national; Eric Hango (played football); and Tjhero (played football).
She was a very protective over us, maybe we would share some of the things you do for our own sleep and for the sake of our own interest, she would say...
She says her mother was a very personal person, and everything had to be done the right time and in the correct way - being "She clearly made us used to how the wants things to be done. We would do our homework at a specific time, eat at a specific time, bath at a specific time, and do the things that she wanted us to do because to use the symbols.
"There was a very soft hearted, loving and caring, mean hiding behind the strict disciplinarian. She showed her love and address to people outside our family and she would fight for the rights of others, including the Sank community, after the death of her father."
Tjhero was interested in her 100-year-old Sank people, she worked with them with herbs and small livestock at Okavango. Her purpose, we believe, was to be productive and fruitful and to provide and care for others.
"Her death will also leave a void in their lives."

Meme Kuku Sofia Naapope Asifo (Nujoma)

In Memorial

14 August 2020 marks two years since Darest's mother passed to the heavens. In our hearts you will live forever. Your teachings and guidance will forever be in our memories and a guide in our lives.

**Appendix G: Consultation Meeting Minutes**

**06 Sept 2022**

## **PUBLIC CONSULTATION MEETING MINUTES:**

### **ENVIRONMENTAL SCOPING ASSESSMENT (ESA) FOR THE PROPOSED PROSPECTING & EXPLORATION ACTIVITIES ON EXCLUSIVE PROSPECTING LICENCE (EPL) No. 8581, LOCATED NEAR OKOMBAHE IN THE ERONGO REGION**

**Date:** Monday, 05 September 2022

**Time:** 10:35 – 12:00

**Venue:** People's House- Okombahe

The public consultation meeting was attended by 13 people, including two environmental consultants and an archaeologist from Excel Dynamic Solutions (Pty) Ltd (EDS) - **Please refer to the attached attendance register.**

## **INTRODUCTION AND WELCOMING REMARKS**

The meeting was opened by the environmental consultant with an introductory of the team, who they are and the purpose as to why they are consulting affected parties of the proposed prospecting and exploration activities on EPL 8581. The meeting attendance register was then circulated for the attendees to write down their names, contact details and sign so that they could be added to the list of interested and affected parties (I&APs) and receive further information on the ESA process.

## **MEETING AGENDA AND PRESENTATION**

The agenda of the meeting included the following main points:

## **2.1 Brief Description of the Project**

Mr David provided a short description of the planned project and its associated activities, the Environmental Scoping Assessment (ESA) process, and the reason the proponent appointed Excel Dynamic Solutions (Pty) Ltd (EDS), an independent environmental consultant to carry out the EIA and apply for the Environmental Clearance certificate (ECC).

## **2.2 Presentation of Potential Project Impacts**

To ensure transparency and clarity for the attendees, the Environmental Consultants also presented the potential pre-identified potential positive & negative environmental and social impacts.

## **2.3 Public Open Discussion (Interactive Session)**

Mr David provided the meeting attendees the opportunity to raise their concerns/issues and or comment on the proposed project activities. The issues and comments recorded are presented in **Table 1** below.

**Table 1: Comments and issues raised during the public consultation meeting, 05<sup>th</sup> of September 2022**

Comment/ issue No.	Commenter name & issue / comment / question	Response and name of responder:
1.	<p><b>Commenter 1:</b> How far is the EPL area from the //Khan-heb Mountain?</p> <p>It should be noted that //Khan-heb Mountain is considered a heritage site for us, and should not disturbed.</p> <p>What is the difference of between the an EPL and a Mining license (ML)?</p>	<p><b>Mr. Silas David (SD):</b> The EPL is located about 15 km from the //Khab-heb Mountain and it is not located near or within the //Khan-heb Mountain area. Therefore, the chances of disturbance on the mountain is very low.</p> <p>The difference between an EPL and ML, is for an EPL one conducts exploration activities to determine the economic viability of the minerals one potential intends to mine, whereas, a ML is where one conducts full mining activities.</p>
2.	<p><b>Commenter 2:</b> It is very important for company details of the EPL owner to be presented to the communities, to avoid confusion within the communities. Taking into account the number explorations companies operating near Okombahe.</p>	<p><b>Mr. SD:</b> Noted, with thanks.</p>
3	<p><b>Commenter 3:</b> Many exploration companies come into our jurisdiction without any information given to the leaders of Okombahe, about the proposed</p>	<p><b>Mr. SD:</b> Thank you for raising such an important concern. We acknowledge that, Thank you.</p>

Comment/ issue No.	Commenter name & issue / comment / question	Response and name of responder:
	<p>activities. It is good that your company has taken this approach.</p> <p>Some exploration companies do not rehabilitate their trenches and drilling holes. There are many incidents where animals fall in these trenches when it rains and die. Such aspects do not stand right with the communities and the leader of Okombahe.</p>	
4	<p><b>Commenter 4:</b> The people of Okombahe are angry because of past incidents that have been happening around Okombahe.</p>	<p><b>Mr. SD:</b> Noted.</p>
6	<p><b>Commenter 5:</b> Was the chief consulted before you came to conduct these meeting with us (Okombahe community) and was a consent already given to when you came here?</p>	<p><b>Mr. SD:</b> No, the reason why this was done was to ensure first the leaders and community on ground first are consulted by EDS. Before we go and consult the chief given with the fact that he has an idea or picture of what was discussed by the leaders and community members of Okombahe; to make his decision.</p>

Comment/ issue No.	Commenter name & issue / comment / question	Response and name of responder:
7	<p><b>Commenter 6:</b> We would like to inform you that we would like to cancel the meeting with community members and it would not be possible for you to host it today and we would like to re-schedule it.</p>	<p><b>Mr. SD:</b> Communications about the planning of these meetings was done and everyone was informed. We need to also take into account the cost involved in this.</p> <p>Instructions were followed as per your requests for an initial meeting with the leaders/seniors before the meeting with the communities.</p>
8	<p><b>Commenter 7:</b> We fully understand that and we apologize for the inconvenience this may have caused. Things on the ground are very unstable at the moment and the leaders of Okombahe should first try neutralize some matters and also try sensitize the community about the meeting. The reason behind this is to allow and provide a platform for EDS to have a successful and fruitful meeting.</p> <p>Once this matter has been resolved we the leader of Okombahe will invite you for a meeting.</p>	<p><b>Mr. SD:</b> Noted.</p>

## **FINAL REMARKS AND CONCLUSION OF THE MEETING**

Mr. David thanked the attendees for their input through comments and for raising their concerns. He indicated to the attendees that all their comments, concerns and inputs had been noted down for consideration and addressing in the Environmental Scoping Assessment (ESA) Report as well as incorporating their recommendations into the draft EMP, as necessary.

Furthermore, Mr. David informed the attendees that the draft meeting minutes, Environmental Assessment Report, and Environmental Management Plan (EMP) will be shared with them for review and further comments. These documents will be made available through emails provided on the attendance register.

Once the review of the draft ESA Report and EMP is done, the documents will be finalized and submitted to the Environmental Commissioner at the Department of Environmental Affairs and Forestry (DEAF) for evaluation and consideration of an ECC.

The meeting adjourned at 12h00.
