NOTICE OF ENVIRONMENTAL SCOPING ASSESSMENT (ESA) FOR: THE PROPOSED PROSPECTING & EXPLORATION ACTIVITIES ON EXCLUSIVE PROSPECTING LICENCE (EPL) NO. 8507 LOCATED NORTHWEST OF OKANGWATI, IN THE KUNENE REGION.

Under the Environmental Management Act No. 7 of 2007 and its 2012 EIA Regulations, the proposed prospecting and exploration activities on EPL 8507 require an Environmental Clearance Certificate (ECC) from the Department of Environmental Affairs and Forestry (DEAF) before commencement.

The public is hereby notified that an application for an ECC will be submitted to the Environmental Commissioner.

Brief Project Description: The environmental scoping process will identify potential positive and negative impacts stemming from the proposed exploration activities on EPL 8507. The targeted commodity on the EPL is **Precious Stones**.

Proponent: Codebreak Investments (Pty) Ltd

Environmental Consultant: Excel Dynamic Solutions (Pty) Ltd
Members of the public are invited to register as Interested and Affected Parties (I&APs) in order to comment/raise concerns or receive further information on the Environmental Assessment process.

Public Consultation meeting details will be communicated with all the registered I&APs

Registration requests and comments should be forwarded to Excel Dynamic Solutions (Pty) Ltd on the contact details below, before or on **7 October 2022**.
Contact: Ms. Aili lipinge

12 October 2022

PUBLIC & STAKEHOLDERS' CONSULTATION MEETING MINUTES:

ENVIRONMENTAL SCOPING ASSESSMENT (ESA) FOR THE PROPOSED MINERAL EXPLORATION ACTIVITIES ON EXCLUSIVE PROSPECTING LICENSE (EPL) NO. 8508 LOCATED WEST OF KAMANJAB IN THE KUNENE REGION, NAMIBIA

PROJECT PROPONENT: CODEBREAK INVESTMENTS (PTY) LTD

Date: Wednesday, 12 October 2022

Time: 10h30 for 11h00

Venue: Anker Settlement Community Hall

The Consultation Meeting was attended by twenty-four (24) people as provided in the attendance register **attached hereto**. Some of the attendees opted not to sign the attendance register, and their choice was respected by the Environmental Consultant.

INTRODUCTION AND WELCOMING REMARKS

The meeting was officially opened by Ms. Fredrika Shagama (Environmental Consultant) and welcomed everyone to the meeting. The Secretary for the Gaio-Daman Traditional Authority, Mr. Manfred Katjoko provided translations from English to Nama-Damara Language and vice-versa throughout the meeting.

The meeting attendance register was circulated for the attendees to write down their names, contact details to be added to the list of I&APs and receive further information on the EIA process. The copies of the Background Information Document (BID) were circulated to the attendees for self-reading and ask questions after the presentation by the Environmental Consultant.

MEETING AGENDA AND PRESENTATION

The agenda of the meeting included the following main points:

- **Explanation of what an ESA is, its Process and the Public Role in the Process:** The purpose of the meeting was given to the attendees with reference to the Environmental Management Act (EMA) No. 7 of 2007 and its 2012 Environmental Impact Assessment (EIA) Regulations on Public Consultation. Ms. Shagama further explained what an ESA is and that the proposed exploration activities are one of the listed activities in the 2012 EIA Regulations of the EMA that cannot be undertaken without an Environmental Clearance Certificate (ECC) from the Environmental Commissioner. She further clarified that the Proponent (Codebreak Investments) has not been granted the rights to explore in the area yet, pending an ECC. Therefore, the Ministry of Mines and Energy (MME) has only gave the Proponent a provisional grant (intention to grant the EPL).
- **Brief Description of the Project:** Ms. Shagama informed and showed meeting attendees the areas covered by the EPL, i.e., #Khoadi-/Hôas Conservancy, which covers communal farms such as Farm Condor No. 617, Farm Emmanuel No. 613, Farm No. 612, Farm Deo Volento No. 610, and Farm Atlanta No. 618. It was found that Farm Bruno 614 and Ombonde 616 are commercial farms (to be consulted). She further presented a summary of the proposed prospecting and exploration methods to give the attendees an idea of what the project will entail. She also indicated that the Proponent applied to be granted for the rights to prospect & explore for Base & Rare Metals, Dimension Stone, Industrial Minerals, and Precious Metals.
- **Presentation of Potential Project Impacts:** The Environmental Consultant (Ms. Shagama) also presented the potential pre-identified potential positive & negative environmental and social impacts associated with the proposed project activities.
- **Public Open Discussion (Interactive Session):** The meeting attendees were provided an opportunity to raise their concerns/issues and or comments for consideration in the Environmental Assessment Report and its Environmental Management Plan. The issues and comments recorded are presented in **Table 1** below.

Table 1: Comments and issues raised during the Consultation Meeting at Anker Community Hall on the 12th of October 2022.

No.	Comment / Issue / Question or Concern	Name of Responder & Response:
1.	<p>Mr. Gabriel /Goagoseb (Chairperson of Communal Farmers Association): Some of the farmers are not well represented in this meeting. Therefore, the EPL holder should consult with the people/farm owners or occupiers of the land such as Farm Condor, Emmanuel, and Atlanta before any work is done on the land to avoid conflicts.</p>	<p>Ms. Fredrika Shagama (Ms. FS - EDS Consultant): Noted. The EPL holder will still need to meet with the landowners and Traditional Authority before moving into the area (after the ECC is issued)</p>
2.	<p>Traditional Councillor Michale /Gomeb: According to the Communal Land Reform Act No. 5 of 2002, a consent letter needs to be issued to the project projects. We understand that this an EIA process but Codebreak Investments should have been here too to introduce themselves to communities.</p>	<p>Ms. FS: You are right, Councillor. Yes, a consent letter is required for the submission of the EIA documents to the Ministry of Environment, Forestry and Tourism for evaluation. Codebreak will need to meet the Traditional Authority and possibly the other communities as part of their introductory trip into the area.</p>
3.	<p>Mr. Gerson Khoaseb (Farm Condor): (a) If Codebreak is granted the rights to explore in the area, and the community helps them to locate the areas where they can potentially find good or feasible commodities, how will they compensate them? -(b) can the mining claim owner inside the EPL apply for the same commodity?</p>	<p>(a) Ms. FS: From experience with other proponents' consultation meetings for exploration EIAs, the proponents usually indicate that they would be willing to enter into agreements with communities (landowners) and themselves (proponents). However, not to speak for Codebreak, they will need to clarify this in the next introductory meetings. -(b) Usually the Ministry of Mines and Energy does not issue the rights to mine or explore the same commodity groups for an EPL owner and mining claim holder. This is probably to avoid conflicts.</p>

No.	Comment / Issue / Question or Concern	Name of Responder & Response:
4.	<p>Mr. Moses G: The community are aware that the area is rich in these commodities, but how will they benefit from this project if they are also surviving on the semi-precious stones?</p>	<p>Ms. FS: The EPL holder/ Proponent will only focus on exploring for the commodities for which they have rights over. In other words, the EPL holder does not have the rights to explore or mine the semi-precious stones. The only thing is encouraged is cooperation to work together in harmony without conflicts.</p>
5.	<p>Mr. Nikodemus Uiseb: (a) How long will it take for the Proponent to get the ECC after submitting the EIA Report to the Environmental Commissioner at MEFT?</p> <p>-(b) If the Proponent finds the semi-precious stone during exploration, will they give this to the community?</p>	<p>Ms. FS: (a) the decision on the issuance of the ECC currently takes about 5 months or more. This also depends on the process and documents required and their submission to MEFT during EIA Report evaluation before approval by the ECC.</p> <p>-(b) I believe this should be done like that since the Proponent does/will not have the rights to mine semi-precious stones.</p>
6.	<p>Mr. Ismael Richtem: (a) Some of the other communities are not here and we cannot speak nor suggest for them. How will they be consulted by the Proponent?</p> <p>-(b) was there someone on the ground to prospect and choose this area specifically?</p>	<p>Ms. FS: (a) This is noted. We will also convey the request to the Proponent to cover this gap during their introductory meeting and consultation with the Traditional Authority.</p> <p>-(b) There has not been any groundwork done on the ground yet because the ECC is not yet issued. The EPL areas are chosen based on the geology in that area. The Proponent then applies for the exploration rights with the MME in the area. However, the exploration rights cannot be granted without the EIA Study done and an ECC issued. This is the reason we are conducting this process and apply for the ECC on behalf of the Proponent.</p>

No.	Comment / Issue / Question or Concern	Name of Responder & Response:
7.	<p>Mr. Rudolf Hoeseb): (a) some people from some of the affected farms are not in this meeting. I also feel like the Traditional Authority is not well-prepared. The Traditional Authority should have sat with Codebreak and then the community.</p>	<p>(a) Ms. FS: Noted. We will advise the Proponent to set up a meeting with the traditional authority and communities.</p>
8.	<p>Senior Traditional Councillor Titus Gaogab: (a) There is an existing dispute for dimension stone mining in the area on EPL8588 as appeared in <i>Die Republikein</i> newspaper in April 2022. The dispute is on the EPL neighbouring Codebreak's EPL. Therefore, it would be good for the Consultant to show the Traditional Authority where EPL8508 ends and EPL8588 ends, especially at the Atlanta and Condor areas.</p> <p>-(b) I do not think it is for the MME to give provisionally grants or full rights to the EPL before the Proponents go to Traditional Authority.</p>	<p>Ms. FS: (a). Thank you for this information. We did not know of the dispute in the area, but we have now taken note of it. This would also be helpful to Codebreak to build on and avoid making the same mistakes that would result in the same disputes.</p> <p>The map is here with us, and we will show these boundaries.</p> <p>-(b) The MME are granting provisional and or full rights to EPL as they are mandated by the Minerals Act under which they exercise this power. However, the granting is subject to Traditional Authorities when they need to issue consents to accompany EIA documents to Environmental Commissioner.</p>
9.	<p>Traditional Councillor Rebekka Nanuses: We welcome the developments in the country, but they should be done to benefit communities as well. Therefore, let us do things the right way and avoid conflicts in communities.</p>	<p>(a) Ms. FS: Noted for incorporation.</p>
10	<p>Mr. Adolf Uirab: I would like to add that the EPL area might fall under the Conservancy but there are no exclusive wildlife areas. There are only mixed livestock farming.</p>	<p>Ms. FS: Noted for our reporting too.</p>

No.	Comment / Issue / Question or Concern	Name of Responder & Response:
11	<p>Mr. Markus Oxurub: Corporate Social Responsibility (CSR) should be part of the project and the locals should be the ones making submissions for proposals of what communities needs and how they can be assisted. Therefore, Codebreak should remember to draw up (develop) a Social Plan.</p>	<p>Ms. FS: Noted and we will convey this to Codebreak and incorporate this into the Environmental Management Plan (EMP) for implementation.</p>
12	<p>Mr. Rudolf Hoeseb): The people would want to see the owners of the EPL. In case of disputes and conflicts at least people to know them prior.</p>	<p>Ms. FS: Noted.</p>
13	<p>Mr. Michael Gomeb: (a) Proponents usually do wrong by coming outsiders to work on these types of projects at the expense of locals. Therefore, they should consider locals for jobs and not just people from outside.</p> <p>(b) Some proponents try to overlie areas such as mining claims that feed families. The mining claims should not be affected and rather encourage peaceful co-existence.</p> <p>(c) Are there any mining claims within EPL8508? If so, then the EPL holder should try to assist the poor communities, however, they can especially with equipment while onsite, when they encounter the sought semi-precious stones mined by mining claims owners. These communities are also trying to make a living from these claims and at times it is hard to access the stones due to lack of technical resources.</p>	<p>Ms. FS: The three points have been noted for incorporation.</p>

No.	Comment / Issue / Question or Concern	Name of Responder & Response:
<p style="text-align: center;">FINAL REMARKS AND CONCLUSION OF THE MEETING</p> <p><u>Way forward:</u> the Traditional Authority will sit with the affected communities (farmers) and the Proponent to meet with Traditional Authority and communities before the consent letter is issued.</p> <p>Excel Dynamic Solutions will update the list of Interested and affected parties (IAPs) with the names of the meeting attendees for further information sharing and notifications on the progress of the EIA Study.</p> <p><u>Conclusion and Closing Remarks by Environmental Consultant (EDS):</u> Ms. Shagama thanked the attendees for their crucial input through comments and raising their concerns. She indicated to the attendees that all their comments, concerns and inputs had been noted down for consideration and addressing in the Environmental Report and EMP.</p> <p>Furthermore, Ms Shagama informed the attendees that the Meeting Minutes will be prepared and shared for review and further questions/ comments. The Environmental Assessment documents will be shared with the public for review and further comments before their submission to the Environmental Commissioner at the Department of Environmental Affairs and Forestry (DEAF) for consideration of the ECC.</p> <p>The meeting was adjourned at 13h00.</p>

2ND PUBLIC & STAKEHOLDERS' CONSULTATION MEETING MINUTES:

ENVIRONMENTAL SCOPING ASSESSMENT (ESA) FOR THE PROPOSED MINERAL EXPLORATION ACTIVITIES ON EXCLUSIVE PROSPECTING LICENSE (EPL) NO. 8508 LOCATED WEST OF KAMANJAB IN THE KUNENE REGION, NAMIBIA

PROJECT PROPONENT: CODEBREAK INVESTMENTS (PTY) LTD

Date: Tuesday, 29 November 2022

Time: 12h00 to 14h20

Venue: Farm Emmanuel Pos 2 (Koekemur), Community Gathering Tree

The Consultation Meeting was attended by forty (40) people as provided in the attendance register **attached hereto.**

INTRODUCTION AND WELCOMING REMARKS

The meeting was officially opened by Ms. Fredrika Shagama (Environmental Consultant) and welcomed everyone to the meeting. Ms. Marcheline Podewiltz from the #Khoadi-//Hôas Conservancy provided translations from English to Nama-Damara Language and vice-versa throughout the meeting.

The meeting attendance register was circulated for the attendees to write down their names, contact details to be added to the list of I&APs and receive further information on the EIA process.

MEETING AGENDA AND PRESENTATION

The agenda of the meeting included the following main points:

- **Explanation of what an ESA is, its Process and the Public Role in the Process:** The purpose of the meeting was given to the attendees with reference to the Environmental Management Act (EMA) No. 7 of 2007 and its 2012 Environmental Impact Assessment (EIA) Regulations on Public Consultation. Ms. Shagama further explained what an ESA is and that the proposed exploration activities are one of the listed activities in the 2012 EIA Regulations of the EMA that cannot be undertaken without an Environmental Clearance Certificate (ECC) from the Environmental Commissioner. She further clarified that the Proponent (Codebreak Investments) has not been granted the rights to explore in the area yet, pending an ECC. Therefore, the Ministry of Mines and Energy (MME) has only given the Proponent a provisional grant (intention to grant the EPL).
- **Brief Description of the Project:** Ms. Shagama informed and showed meeting attendees the areas covered by the EPL, i.e., #Khoadi-//Hôas Conservancy, which covers communal farms such as Farm Condor No. 617, Farm Emmanuel No. 613, Farm No. 612, Farm Deo Volento No. 610, and Farm Atlanta No. 618. It was found that Farm Bruno 614 and Ombonde 616 are commercial farms (to be consulted). She further presented a summary of the proposed prospecting and exploration methods to give the attendees an idea of what the project will entail. She also indicated that the Proponent applied to be granted for the rights to prospect & explore for Base & Rare Metals, Dimension Stone, Industrial Minerals, and Precious Metals as indicated on the Namibia Mining Cadastre.
- **Presentation of Potential Project Impacts:** The Environmental Consultant (Ms. Shagama) also presented the potential pre-identified potential positive & negative environmental and social impacts associated with the proposed project activities.
- **Public Open Discussion (Interactive Session):** The meeting attendees were provided an opportunity to raise their concerns/issues and or comments for consideration in the Environmental Assessment Report and its Environmental Management Plan. The issues and comments recorded are presented in **Table 1** below.

Table 1: Comments and issues raised during the Consultation Meeting at Farm Emmanuel on the 29th of November 2022.

No.	Comment / Issue / Question or Concern	Name of Responder & Response:
1.	<p>Ms. Elfriede !Hoases (Farm Emmanuel Opstal):</p> <p>(a) If the community approves or agree to the EPL activities, then they find minerals near houses, what will happen to the affected houses?</p> <p>(b) If the EPL is granted, will the community / locals get work opportunities?</p> <p>(c) When the need for employees arises, I think apart from notifying the Traditional Authority, perhaps also include the local committees on the farm to mobilize the young people who can work to be consider.</p>	<p>Ms. Fredrika Shagama (Ms. FS - EDS Consultant):</p> <p>(a) The exploration activities hardly require relocation of homes. Relocation can only be considered during the mining phase, if gets to that stage. However, an EPL is not to be confused with a Mining License. An EPL EIA Study only focuses on the prospecting and exploration activities, and it ends there, because one cannot mine on an EPL. Should the exploration activities turn out positive (the results indicate an economic feasibility of a commodity(ies), the Proponent would then notify the Ministry of Mines and Energy and apply for a Mining License. A different and extensive EIA Study to apply for a mining ECC will also be commissioned for that stage with further community consultations as this. Where there are homes that would be potentially affected by mining, this would be discussed in the Mining License consultations (EIA consultation process) and the affected parties (homes) will be consulted in detail to reach amicable solutions.</p> <p>(b) Yes, priorities of works that can be done by the locals will be given to the locals. Codebreak is also confirming this that they would want to empower the local communities to also maintain a social license and work in harmony for the good of the area.</p> <p>(c) Yes. I would also recommend that the communities organize themselves to create community development committee or</p>

No.	Comment / Issue / Question or Concern	Name of Responder & Response:
		something like that to facilitate the process. This will also include compiling proposals for community projects that Codebreak can assist with while working in the area.
2.	<p>Ms. Aletta Binda (Emmanuel Pos 1):</p> <p>(a) Does the community have the right to say yes or no to the EPL application?</p> <p>(b) If the Proponent finds something for instance at a mountain or site near a house, is it necessary to always relocate people?</p>	<p>Ms. FS: (a) Yes, as a community, you do have the right to. However, your objection, being no or yes should be accompanied by valid reasons or justifications, that we will need to address for presentation to the Environmental Commissioner.</p> <p>(b) It is not always necessary to relocate people, but the relocation is mainly for the health and safety of the residents or communities in the area. This is because it would be a nuisance, or a risk having people living next to a mine on daily basis, where you have noisy equipment and vehicles, possible dust emissions from operations and having children playing around such sites (safety risks).</p>
3.	<p>Ms. Mevolin Shituleni (Farm Emmanuel Koekemur Pos 2):</p> <p>(a) If exploration turns out positive, and some people would need to be relocated, who will be responsible for the relocation/resettlement costs?</p> <p>(b) Why is the meeting at Farm Emmanuel?</p>	<p>Ms. FS: (a) The Proponent would be responsible for that by following the existing laws and policies on relocating people, such as the National Compensation Policy and other legal requirements.</p> <p>(b) Senior Traditional Councillor Thitus Gaochab: I chose the meeting venue because Emmanuel is the central point for the affected farms.</p>

No.	Comment / Issue / Question or Concern	Name of Responder & Response:
4.	Ms. Regina Luntadila (Farm Emmanuel): Can an individual buy share in Codebreak?	Mr. Ignatius Kapia (Codebreak Investments/Proponent Representative): That can be considered, but it would make more sense during mining, if it gets there. However, it would also be viable to do it through a Community Trust to benefit the whole community, and not individually.
5.	Ms. Caroline /Nuas (Farm Emmanuel): As a community, we need to consider the future of our children and their children when we make decisions on things like these.	Ms. FS: (a) You are right, Ms. /Nuas. Hence, the mitigation measures of activities will need to be effectively implemented.
6.	Mr. Otto Hamaseb (Farm Emmanuel): Who found the commodities in the area and when or how did Codebreak know that there is such commodity potential?	Ms. FS: There has not been any groundwork done on the ground yet because the ECC is not yet issued. The EPL areas are chosen based on the geology in that area that can host potential commodities. The Proponent then applies for the exploration rights with the MME in the area to further confirm the potential of the EPL by sampling, trenching and drilling during exploration. However, the exploration rights cannot be granted without the EIA Study done and an ECC issued.
7.	Mr. Paulus Lakale (Farm Condor): The EPL could be a good thing for us if it is done in an environmental and social friendly manner (sustainably), without significant negative impacts.	(a) Ms. FS: Noted, and you are right, Sir. This is the aim of the mitigation and management measures in the EMP. However, this would depend on the commitment to implement by Codebreak.
8.	Ms. Thusnelda Gui-daroas (Farm Neuland): There was some iron mining in the area, and they had water supply challenges, which is also the same challenge with us. Therefore, we hope that when Codebreak starts exploration, they would assist us with this.	Ms. FS: Noted, and Codebreak have also noted this.

No.	Comment / Issue / Question or Concern	Name of Responder & Response:
9.	<p>Ms. Fredrika Shagama: Given that the EIA Study also includes the mapping and protection of archaeological and heritages resources. Are there any known sites of this nature on the farms that we need to take note of?</p>	<p>Ms. Elfriede !Hoases: Yes, there are the following sites:</p> <ul style="list-style-type: none"> -Two burial sites (graveyards, old and new) on this farm (Emmanuel Koekemur Pos 2) -On Farm Condor, there are also two burials sites (graves). -Cultural significant tree (known as the “tree with breasts”) -rock engraving on one mountain <p>We would like to also request Codebreak not to explore on the site planned for the community campsite, soccer field and the horse racing area.</p>

FINAL REMARKS AND CONCLUSION OF THE MEETING

Conclusion and Closing Remarks by Environmental Consultant (EDS): Ms. Shagama thanked the attendees for their crucial input through comments and raising their concerns. She indicated to the attendees that all their comments, concerns and inputs had been noted down for consideration/incorporation into the Environmental Assessment Report and EMP.

Furthermore, Ms Shagama informed the attendees that the Meeting Minutes will be prepared and shared to the email addresses provided. The Environmental Assessment documents will be submitted to the Environmental Commissioner at the Department of Environmental Affairs and Forestry (DEAF) for consideration of the ECC and subsequently consideration of MME to grant Codebreak the rights to prospect and explore on the EPL. The Environmental Assessment Report and EMP will be shared with the Traditional Authority, Conservancy and send to the email addresses provided in the meeting attendance register.

The meeting was adjourned at 14h10.
