# ENVIRONMENTAL IMPACT ASSESSMENT (EIA) FOR THE CONSTRUCTION AND OPERATION OF KETU TWO THOUSAND SERVICE STATION AT ETUNDA VILLAGE, OMUSATI REGION

## BACKGROUND INFORMATION DOCUMENT (BID)

### PURPOSE OF THE DOCUMENT

The purpose of this BID is to brief Interested and affected parties (I&APs) about the EIA that is being conducted for the proposed service station for Ketu Two Thousand Service Station CC.

In addition to supporting information about the proposed project and the EIAs this BID also provides I & APs with the opportunity to

- Register as stakeholders in the public participation process and
- Comment on and make contributions to the proposed project

The EIA will identify and evaluate potential impacts, recommend measures to avoid or reduce negative impacts and to enhance positive impacts. The EIA decision making authority is the Ministry of Environment and Tourism.

Please register by 11 October 2019

When you register you will be included on the stakeholder database and receive further documents for comments when they are available. Complete and submit the enclosed comment sheet, write a letter, call or email the Public Participation Office

A Public meeting has been scheduled to take place as follow:

Date: 04 October 2019

Time: 12:00 AM

Venue: At Etunda Irrigation scheme gate

### Public Participation Office

### BACKGROUND

Ketu Two Thousand Service station CC proposes to construct and operate a service station at Etunda Village, at the junction of C46 main road of Ruacana - Outapi, Omusati Region. The proposed service station will consist of two (2) underground tanks, of Diesel (50 ppm) and Petrol (ULP)) each with the capacity of 46m<sup>3</sup>. Suitable dispensing pumps and fuel network will be constructed according to the Ministry of Mines and Energy specified standards for fuel service stations.

The proponent is conducting an EIA for the above mentioned project in a bid to abide with Namibian laws which promote environmental sustainability such as the Environmental Management Act (2007).

### MOTIVATION FOR PROJECT

The motivation for Namibia to support the project is economic and strategic in nature. The project has the potential to benefit the country, society and surrounding communities both directly and indirectly. Direct economic benefits will be derived from wages, taxes and profits. Indirect economic benefits will be derived from the procurement of goods and services and the increased spending power of employees through the creation of new jobs at the service station.

Fuel will be easily accessible in Etunda and nearby villages.

### The objectives of the EIA include:

- To determine the potential environmental impacts derived from the construction, operation and decommissioning phase of the project.
- To consult with key, interested and affected stakeholders so that their concerns are considered in the formulation and implementation of the EMP.
- To comply with Namibia's relevant laws, policies and regulations.
- To propose alternative measures where it is noticed that adverse effects may occur.
- To set up an EMP that will govern all activities of the project for the better protection of the environment.

The development will also pave way for community development

The project will go under three phases namely: construction, operation and probably decommissioning phase. During construction phase, there will be building of structures and installation of tanks. During operation phase, fuel will be sold to customers and during decommissioning phase the site will be rehabilitated.

Conclusively, the establishment of the service station in Etunda Village is necessary as it will ensure additional fuel supply in the area.

# Thomas Cook customers to fly

booked their flights and accommodation through the travel agent.

"At the moment, Thomas Cook have not been in contact, so we are in the dark," Ruth says.

"I know we are protected by Atol, but I'm unsure about the things we bought from third parties through Thomas Cook, like the decorations. They cost me £4,000."

Ruth says she had planned her "dream wedding" for two years. What makes it doubly hard is that much

close as possible" to their booked return date, the Department for Transport (DfT) has said. The DfT added that a "small number" of passengers might need to book their own flight home and reclaim the costs.

Customers have been urged not to cut short their holiday or go to the airport without checking the website for more information about their return journey.

The CAA is also contacting hotels accommodating Thomas Cook customers, who have booked as part of a package, to tell them that the cost of their accommodation will be covered by the government's Air Travel Trust Fund and Air Travel Organiser's Licence scheme (Atol).

Tim Johnson, policy director of the CAA, told BBC News that customers whose future holidays had been cancelled would be informed of how they can claim a refund on the website.

Business Secretary Andrea Leadsom has said she will write to the Insolvency Service urging them to "fast-track" their investigation into the circumstances surrounding Thomas Cook's going into liquidation.

The investigation will also consider the conduct of top directors, who have been paid a combined £20m in salaries and bonuses since 2014.

A Cabinet spokesman said: "People will rightly look at the size of bonuses to some of the directors and have serious concerns about that."

"There's a broader issue at play about collapsing firms and director pay and we are looking that more broadly as a government."

-BBC

## We are relocating.

As part of our commitment to improve our service to you, Bank Windhoek Mariental Branch is relocating and will be closed from **14h00 on 27 September 2019** and reopen for business on **30 September 2019** at the new premises.

### Our New Location:

**Stand 208  
Dr Sam Nujjoma Ave.  
Mariental**

We apologise for any inconvenience our relocation may have caused.

# Windhoek undertakes risk assessment survey

*The team... Windhoek Municipality chief of emergency management Raymond Kopia, strategic executive for economic development and community services Fillemon Hambunda and chief executive officer Robert Kahimise with the enumerators.*

■ Selma Ikela

**W**INDHOEK - The City of Windhoek has called on residents to permit their enumerators into their homes as it is busy carrying out a two-month community risk assessment. Phase 2 of the community risk assessment started on September 17 and lasts until December 7.

development and community services Fillemon Hambunda told the media that for them to come up with policies and budget to minimize the risk in the community they need to do a risk assessment.

Hambunda said policies and practices for the disaster risk assessment should be based on an understanding of the disaster risk in all its dimensions of

elements out there that would want to misuse this opportunity, so also be vigilant. We have correct number of... City Police to call (061-302 302) if you are in doubt," said Hambunda.

He explained that the community risk assessment also provides a basis for the development of disaster risk reduction action plans and resource allocation. "We also know that an effective risk

**SPORT**

games and country.

**NEW STARS EMERGE AT IAAF WORLD A**

Some of the biggest names in the sport have cemented their legendary status by adding to their career medal haul at the IAAF World Athletics Championships Doha 2019.

**B**ut along with the established stars, several new names have emerged over the first five days of competition at the Khalifa International Stadium.

Having dominated the event on the international circuit over the past two years, USA's Noah Lyles became the youngest ever winner of the men's 200m at the World Championships, earning his maiden senior global title on Tuesday with a 19.83 run.

"Don't say I'm the new Bolt," said Lyles. "I'm me. If you like me, I'll happily entertain you. It's my time."

Earlier that evening, Lyles' teammate and fellow 22-year-old Donovan Brazier broke the championship and North American records to win the 800m in 1:42.34.

"I've said all season that my goal was to get the gold here and to break this record, and that's what I did," said Brazier, who had a winning margin of 1.13. "It means the world to me. To be world champion at 22 years old, I can't believe it."

The women's 800m had a surprise winner in the form of Uganda's Halimah Nakaayi. The 24-year-old pro-

duced the performance of her life to pass the pre-race favourites on the home straight, winning in 1:58.04. Compatriot Winnie Nanyondo, the fourth-place finisher, joined Nakaayi on a lap of honour, stopping every now and again to perform a celebratory dance.

"They will be very happy back home in Uganda, especially in the central part," said Nakaayi. "They are dancing now. It is a historic day."
