Appendix E: Background Information Document (BID)

Background Information Document (BID)

Project Name: **Environmental Scoping Assessment Study for the Proposed Mineral Exploration Activities on Exclusive Prospecting Licence (EPL) No. 8793 located near Aussekehr in Karas Region, Namibia**

Proponent: **Oa Ta Ra Development (Pty) Ltd**

Consultant: **Excel Dynamic Solutions Pty Ltd**

1 INTRODUCTION: BACKGROUND

Oa Ta Ra Development (Pty) Ltd (hereinafter referred to as the Proponent) has applied to the Ministry of Mines and Energy (MME) to be granted an Exclusive Prospecting Licence (EPL) No. 8793 on the 07th of March 2022. However, the approval and granting of the EPL is subjected to an Environmental Clearance Certificate, thus “pending ECC” status on the mining cadaster portal here <https://portals.landfolio.com/namibia/>.

The 19 356.7597 hectares (ha) EPL is located about 30.94 km from Aussekehr in Karas Region (**Figure 1**), and covers (overlies) Farm Goeie Hoop No. 255, Middlepos No.252, Ysterputs No. 254 and Tafelkop No. 364.

The Proponent is interested in Base & Rare Metals, Dimension Stones, Industrial Minerals, Non-Nuclear Fuel, Nuclear Fuel Minerals, Precious Metals & Semi-Precious Stones.

Exploration and all mining-related activities are among the listed activities that may not be undertaken without an Environmental Clearance Certificate (ECC) under the Environmental Management Act (EMA) (2007) and its 2012 Environmental Impact Assessment (EIA) Regulations. The relevant listed activities as per EIA regulations are as follows:

-3.1 The construction of facilities for any process or activities which requires a license, right of other forms of authorization, and the renewal of a license, right or other form of authorization, in terms of the Minerals (Prospecting and Mining Act, 1992).

-3.2 other forms of mining or extraction of any natural resources whether regulated by law or not.

-3.3 Resource extraction, manipulation, conservation and related activities.

The Proponent is, therefore, required to obtain an ECC for the approval of the EPL and before the commencement of works on the EPL. To fulfill the legal requirements, the Proponent has appointed Excel Dynamic Solutions (Pty) Ltd, an independent team of Environmental Consultants / Assessment Practitioners (EAP), to conduct the required Environmental Scoping Assessment (ESA) process and submit the ECC application to the Department of Environmental Affairs and Forestry (DEAF) at the Ministry of Environment, Forestry & Tourism (MEFT).

2 PURPOSE OF THIS DOCUMENT

This Background Information Document (BID) is a non-technical document of the ESA and not an ESA Report. The BID is aimed at:

-Introducing the proposed project and related activities to potential interested and affected parties (I&APs) and stakeholders, and provide them an opportunity to raise issues/concerns and submit comments about the proposed project.

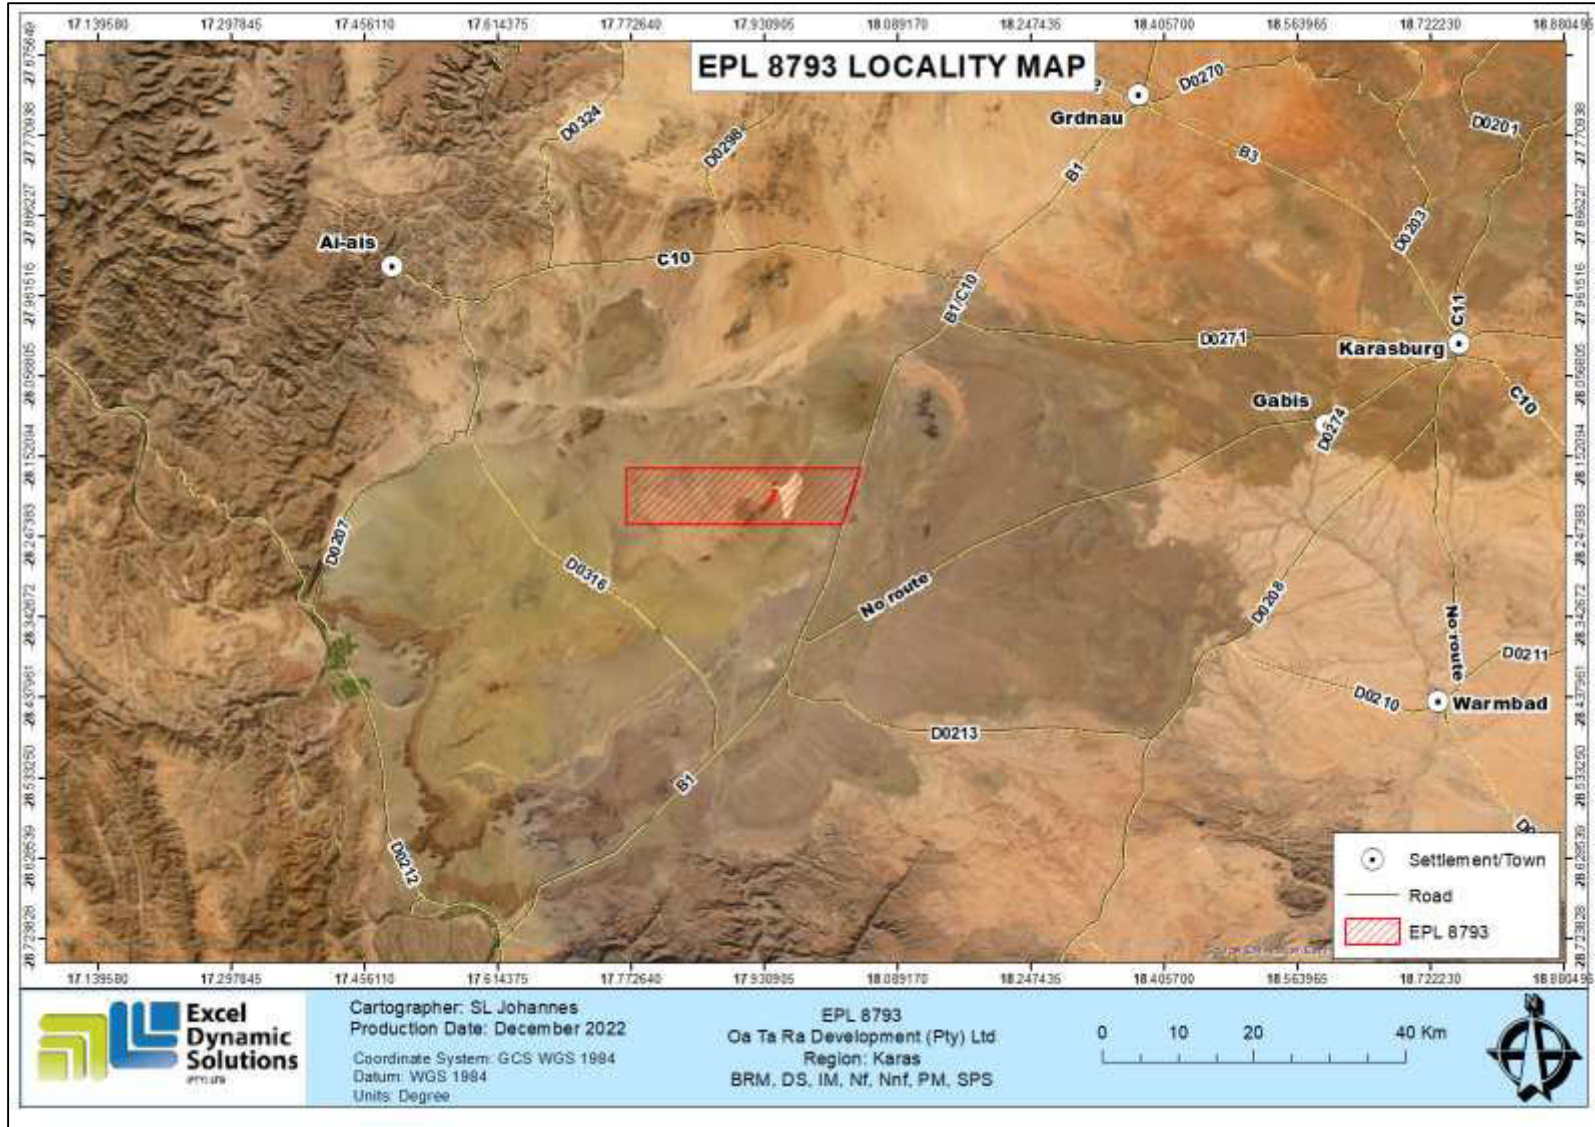

Figure 1: The locality map of EPL - 8793 located near Aussekehr, Karas Region

3 PROJECT DESCRIPTION

Once the Proponent has been issued with an ECC and has obtained all required and relevant permits such as land use consents, and the proposed project is ready to commence the exploration activities, the planned activities will commence.

The proposed activities entail prospecting and detailed exploration activities to delineate the mineral deposits. This is to determine whether the deposit for the targeted commodities is economically feasible (to advance to the resources development and mining phase).

The prospecting and exploration of minerals are the first components of any potential mining project. This is done to acquire the necessary data required for further decision-making and investment options.

Exploration activities are anticipated to last for about three years or sometimes longer (depending on the various factors such as turnaround between exploration data analysis and availability of funds between project phases, etc.).

3.1 Project Activities

The proposed prospecting and exploration activities (methods) are divided into the following categories:

-Phase 1: Non-invasive techniques (prospecting) – mapping / surveys.

-Phase 2: Invasive techniques (detailed exploration) – soil sampling, trenching and exploration drilling.

Once the target areas have been selected and verified under the prospecting phase, detailed exploration works will follow.

3.2 Human Resources, Services and Infrastructure

The following services and infrastructure as provided below will be required for the project activities:

-Human resources and accommodation:
Around 5-10 people will be employed on-site during the exploration phase and will be accommodated in tented camps or accommodate in the nearby Aussekehr.

-Working Space (Administration and Control)

-Water supply: Water will be required for the project activities such as drilling, equipment cooling, washing, and drinking. However, the estimate volumes will be confirmed and provided in the ESA report.

-Fuel Supply (machinery and equipment):
Diesel will be used for machinery and equipment and fuel generator.

-Accessibility (roads): The EPL is accessible via the B1, D0212 and D0316 road.

-Waste management:

Sewage: Mobile chemical ablution facilities will be provided on-site. The wastewater will be transported offsite for treatment at a facility.

Solid waste: Sufficient waste bins (containers) will be made available at exploration sites and campsites for waste storage and later disposal at the nearest approved waste facility.

Hazardous waste: The waste fuel/oils will be carefully stored in a standardized container for disposal at an approved hazardous waste management facility in the nearest Town/Settlement.

-Health and Safety: Adequate and appropriate Personal Protective Equipment (PPE) will be provided to project personnel. A minimum of two first aid kits will be readily available onsite.

-Potential Accidental Fire Outbreaks: Fire extinguishers will be readily available in vehicles, at the sites and campsite.

-Project Equipment, Material, Machinery, and Vehicles: Among others two or three 4X4 vehicles, drilling supporting truck, excavator / front-end loader, dozer, air compressor, drilling fluids stored in manufacturers approved containers, generator for power supply, etc.

Upon completion of exploration works, the disturbed sites will be rehabilitated as practically possible. This will include backfilling of exploration trenches, boreholes, levelling of stockpiled topsoil and cleaning of site areas.

4 ENVIRONMENTAL ASSESSMENT

This ESA process is conducted in accordance with the provisions stated in the EMA No. 7 of 2007 and its 2012 EIA Regulations.

The primary objective of the ESA is to identify potential negative impacts associated with the project and assess them. Practical and effective mitigation measures will be recommended for implementation.

The main objectives of this ESA are to:

-Identify potential impacts associated with the proposed Activity.

-Inform I&APs and relevant authorities about the project and provide them with an opportunity to participate during the ESA process.

-Assess the significance of issues and concerns raised.

-Compile a report addressing all identified issues and potential impacts.

-Compile a Draft Environmental Management Plan (EMP) which includes impacts management and mitigation measures.

4.1 Potential Impacts

The following potential impacts have been identified:

4.1.1 Positive:

-Socio-economic development: employment creation and skills transfer.

-Investment opportunities/infrastructure-related development benefits,

-Produce a trained workforce and small businesses in the area.

-Boosting the local economic and regional economic development.

-Increased support for local businesses through the procurement of locally available goods and services.

4.1.2 Adverse (Negative) Impacts:

-Disturbance of existing communal grazing areas,

- Physical land/soil disturbance and prone to erosion.
- Impact on fauna and flora (habitat disturbance and poaching).
- Water resources (over-abstraction of water) and soils pollution.
- Air quality issue owing to dust generation
- Occupational and community health and safety risks/hazards.
- Vehicular traffic safety and services infrastructure (local roads).
- Vibrations and noise associated with drilling activities.
- Environmental pollution from poor waste management,
- Archaeological or cultural heritage impact
- Potential social nuisance and land use conflicts.

Other potential impacts may be identified as the ESA process progresses. All impacts and public concerns/comments will be incorporated and addressed in the Environmental Report and EMP.

4.2 Public Consultation Registration

Public consultation is an important part of the EA process. During the consultation process, I&APs are given an opportunity to raise any issues or concerns pertaining to the project activities.

To comment or receive further information on the project, **please register with Excel**

Dynamic Solutions (Pty) Ltd (contact details herein) as an Interested and Affected Party (I&AP) **before or on Tuesday, 31 January 2023.**

Furthermore, the Consultation Meeting details will be communicated to registered I&APs.

For comments and or further information requests, please contact the EDS Consultant on the details provided below:

TODAY IS... DAY OF RECONCILIATION

They say that all good things come to an end, thankfully this remains true for horrid atrocities as well. One such ending took place in 1991 with the ending of apartheid, a system of racial segregation that existed in South Africa on the back of legislation introduced by the National Party. The Day of Reconciliation was introduced in 1994 as a way to heal the rift between the people of South Africa, and bring harmony to a nation still suffering from decades of injustice.

Appendix G: Public Consultation Meeting Minutes

07 February 2023

PUBLIC CONSULTATION MEETING MINUTES:

ENVIRONMENTAL SCOPING ASSESSMENT (ESA) FOR THE PROPOSED PROSPECTING & EXPLORATION ACTIVITIES ON EXCLUSIVE PROSPECTING LICENCE (EPL) No.8793 LOCATED NEAR AUSSENKEHR, //KARAS REGION.

Date: Tuesday, 07 February 2023

Time: 10:00 – 10:45

Venue: Aussenkehr Community Centre

The public consultation meeting was attended by 66 people, including one (1) Environmental Consultant and one (1) Archaeologist from Excel Dynamic Solutions (Pty) Ltd (EDS) - **Please refer to the attached attendance register.**

1. INTRODUCTION AND WELCOMING REMARKS

The meeting was opened by the environmental consultant with an introduction of the team, who they are, and why they are consulting affected parties of the proposed prospecting and exploration activities on EPL 8793. The meeting attendance register was then circulated for the attendees to write down their names, and contact detail so that they could be added to the list of interested and affected parties (I&APs) and receive further information on the ESA process.

2. MEETING AGENDA AND PRESENTATION

The agenda of the meeting included the following main points:

2.1 Brief Description of the Project

The Environmental Scoping Assessment (ESA) and the reason that the Proponent appointed Excel Dynamic Solutions (Pty) Ltd (EDS), an independent Environmental Consultant to carry out the ESA and apply for the Environmental Clearance certificate (ECC).

2.2 Explanation of what an ESA is, its Process, and the Public Role in the Process

Mr. Silas David explained to the attendees the purpose of the meeting and why they were invited (with reference to the Environmental Management Act (EMA) No. 7 of 2007 and its 2012 Environmental Impact Assessment (EIA) Regulations on Public Consultation). Mr. David further explained what an ESA is and that the proposed exploration activities are one of the listed activities in the 2012 EIA Regulations of the EMA that cannot be undertaken without an ECC from the Environmental Commissioner.

2.3 Presentation of Potential Project Impacts

To ensure transparency and that the attendees understand both sides of the proposed project activities, the Environmental Consultants also presented the potential pre-identified potential positive & negative environmental and social impacts.

2.4 Public Open Discussion (Interactive Session)

Mr. David allowed the meeting attendees to raise their concerns/issues and/or comments on the proposed project activities. The concerns/issues and comments recorded are presented in **Table 1** below.

Table 1: Comments and issues raised during the public consultation meeting, 07th of February 2023

Comment/ issue No.	Commenter name & issue/comment / question	Response and name of responder:
1.	Commenter 1: Farm Tafelkop No. 364 will not be prospected and explored.	<p>Mr. Silas David (SD): Thank you, we have received your comments through your legal representative and we have taken note of the matter.</p> <p>Proponent: We do not intend to explore on Farm Tafelkop No. 364, the EPL only covers (overlay) a small portion of the Farm.</p>
2.	Commenter 2: How long will the proposed project take, once an ECC is granted?	<p>Mr. SD: An ECC is only valid for three (3) years, whereby within those years the proponent should ensure that prospecting and exploration activities are conducted.</p> <p>Every six (6) months of the issuance of an ECC, an Environmental Audit must be conducted by an Environmental Consultant to ensure the mitigation measures outlined in the Environmental Management Plan (EMP) are adhered to.</p>

Comment/ issue No.	Commenter name & issue/comment / question	Response and name of responder:
3.	Comment 2: How many people will be employed by the Project?	Mr. SD: The project intends to employ 5 – 10 people during the exploration phase. This includes semi-skilled, unskilled, and skilled labour.
4.	Comment 3: I believe that the community support the project, due to the fact it will have less impact.	Mr. SD: Noted.

FINAL REMARKS AND CONCLUSION OF THE MEETING

Mr. David thanked the attendees for their crucial input through comments and raising their concerns. He indicated to the attendees that all their comments, concerns, and inputs had been noted down for consideration and addressing in the Environmental Scoping Assessment (ESA) Report as well as incorporating their recommendations into the draft EMP.

Furthermore, Mr. David informed the attendees that the draft meeting minutes, Environmental Assessment Report, and Environmental Management Plan (EMP) will be shared with them for review and further comments. These documents will be made available through emails provided on the attendance register.

Once the review of the draft ESA Report and EMP is done, the documents will be finalized and submitted to the Environmental Commissioner at the Department of Environmental Affairs and Forestry (DEAF) for evaluation and consideration of an ECC.

The meeting adjourned at 10h45.
