Under the Environmental Management Act No. 7 of 2007 and its 2012 EIA Regulations, the proposed prospecting & exploration activities on the EPLs No. 7166, 7181, 7324, 7675, 7676, 7781 and 7794 LOCATED NEAR GROOTFONTEIN, OTJONDONDJUPAREGION require an Environmental Clearance Certificate (ECC) from the Department of Environmental Affairs & Forestry (DEAF) before commencement.

The public is hereby notified that an application for an ECC will be submitted to the Environmental Commissioner.

**Brief Project Description:**  
The proposed prospecting and exploration activities (the project) on Exclusive Prospecting Licences (EPLs) No. 7166, 7181, 7324, 7675, 7676, 7781 and 7794, the project activities will entail non-invasive (mapping and surface surveying), and invasive techniques (exploration trenching and drilling).

The project activities are aimed to explore for Base and Rare Metals and Precious Metals only.

**Proponent:** Resource Five Hundred Namibia (Pty) Ltd  
**Environmental Consultant:** Excel Dynamic Solutions (Pty) Ltd

Members of the public are invited to register as Interested and Affected Parties (I&APs) to comment raise concerns or receive further information on the Environmental Assessment process. A Public Consultation Meeting will be held. However, the specific details on the Date, Time and Venue will be communicated with all the registered Interested and Affected Parties (I&APs) in due course.

Registration requests and comments should be forwarded to Excel Dynamic Solutions (Pty) Ltd on the contact details below, before or on 28 April 2022.

Any objection or written submission in terms of section 28 of the Act in relation to the application must be sent or delivered to the Secretary of the Committee to reach the Secretary not later than 21 days before the date of the meeting of the Committee at which the application will be heard.

**NOTICE OF ENVIRONMENTAL IMPACT ASSESSMENT (EIA)**

**ENVIRONMENTAL CLEARANCE CERTIFICATE FOR THE PROPOSED PROSPECTING & EXPLORATION ACTIVITIES ON THE EXCLUSIVE PROSPECTING LICENSES (EPLs) No. 7166, 7181, 7324, 7675, 7676, 7781 AND 7794 LOCATED NEAR GROOT FONTEIN, OTJOZONDJUPA REGION**

Under the Environmental Management Act No. 7 of 2007 and its 2012 EIA Regulations, the proposed prospecting & exploration activities on the EPLs No. 7166, 7181, 7324, 7675, 7676, 7781 and 7794 require an Environmental Clearance Certificate (ECC) from the Department of Environmental Affairs & Forestry (DEAF) before commencement.

The public is hereby notified, that an application for an ECC will be submitted to the Environmental Commissioner.

**Brief Project Description:**

The proposed prospecting and exploration activities (the project) on Exclusive Prospecting Licenses (EPLs) No. 7166, 7181, 7324, 7675, 7676, 7781 and 7794, upon the issuance of the ECC, the project activities will entail non-invasive (mapping and surface surveying), and invasive techniques (exploration trenching and drilling).

The project activities are aimed to explore for Base and Rare Metals and Precious Metals only.

**Proposed Resource Five Hundred Namibia (Pty) Ltd**  
Environmental Consultant: Excal Dynamic Solutions (Pty) Ltd

Members of the public are invited to register as interested and Affected Parties (I&APs) to comprehensive concerns or receive further information on the Environmental Assessment process. A Public Consultation Meeting will be held. However, the specific details on the Date, Time and Venue will be communicated with all the registered interested and Affected Parties (I&APs) in due course.

Registration, requests and comments should be forwarded to Excal Dynamic Solutions (Pty) Ltd on the contact details below, before or on 28 April 2022.

**REPUBLIC OF NAMIBIA**  
**MINISTRY OF TRADE & INDUSTRY LIQUOR ACT, 1988**  
**NOTICE OF APPLICATION TO A COMMITTEE IN TERMS OF THE LIQUOR ACT, 1988**  
(Regulations 14, 28 & 33)

Notice is given that an application in terms of the Liquor Act, 1988, particulars of which appear below, will be made to the Regional Liquor Licensing Committee, Region: **KARANGU WEST**

**EMBANDI NITE CLUB**

1. Name and postal address of applicant.  
2. Name of business or proposed business to which applicant wishes to apply for licence.  
3. Address/location of premises to which application relates.  
4. Nature and details of application.  
5. Date of the court with which application will be lodged.  
6. Date on which application will be heard.  
7. Date of meeting of Committee at which application will be heard.

**28 APRIL 2022**

Any objection or written submission in terms of section 28 of the Act in relation to the application must be sent or delivered to the Secretary of the Committee to reach the Secretary not later than 21 days before the date of the meeting of the Committee at which the application will be heard.

**PUBLIC CONSULTATION MEETING MINUTES:**

**ENVIRONMENTAL SCOPING ASSESSMENT (ESA) FOR THE PROPOSED PROSPECTING & EXPLORATION ACTIVITIES ON EXCLUSIVE PROSPECTING LICENCES(EPLs) NO. EPL 7166, 7181, 7324, 7675, 7676, 7781 & 7794 LOCATED NEAR GROOTFONTEIN, OTJOZONDJUPA, NAMIBIA**

**Date:** Friday, 13 May 2022

**Time:** 09h00 – 10h26

**Venue:** Agriculture Show Hall

The Public Consultation Meeting was attended by eight (8) people, including two Environmental Consultants and one Archaeologist from Excel Dynamic Solutions (Pty) Ltd (EDS) and a representative from Resource Five Hundred Namibia (Pty) Ltd (Proponent). - **Please refer to the attached attendance register.**

**COVID-19 REGULATIONS ADHERENCE**

To ensure that the meeting, as a form of gathering complies with the COVID-19 Regulations, the attendees wore face masks and the chairs were set up in a way that social distancing between the people is observed.

**INTRODUCTION AND WELCOMING REMARKS**

The meeting was officially opened by Mr. Phillip Andrews from Resource Five Hundred Namibia (Pty) Ltd. He expressed gratitude to everyone in attendance for making time to attend the meeting. Mr. Phillip Andrews also explained shortly what the overall aim of the project is and how it will aim to benefit the community and country at large.

Introducing the project, Mr. Phillip Andrews mentioned that new shareholders will have to be brought on board because the volume for capital is high as Uranium and Vanadium are some of the minerals the Proponent is interested in.

The meeting attendance register was then circulated for the attendees to write down their names, and contact details and sign so that they could be added to the list of interested and affected parties (I&APs) and receive further information on the ESA process.

## **MEETING AGENDA AND PRESENTATION**

The agenda of the meeting included the following main points:

### **2.1 Brief Description of the Project**

Mr. Phillip Andrews gave a background presentation (**referencing BID**) of his project as well as current and future milestones to be achieved. The Environmental Impact Assessment (EIA) or ESA and the reason that the proponent appointed Excel Dynamic Solutions (Pty) Ltd (EDS), an independent environmental consultant to carry out the EIA and apply for the Environmental Clearance Certificate (ECC).

### **2.2 Presentation of Potential Project Impacts and Identified Geological Structure**

Mr. Andrew further explained on the area selected, The Proponent will be looking at geological trends going east to west. East of Grootfontein the exploration has been identified little because the sediments of the Kalahari sands make it difficult for exploration. The contact zone of geological structures where mineralization can occur, The Proponent have purchased geophysical data from the Ministry of Mines and Energy (MME), from a geophysical survey that was carried out about 20 years ago around the project area. It gave certain target points of the physical anomalies that recognized the magnetic qualities of the rocks.

There was an acquisition of data from a remote sensing perspective which captures high and low long and short waves infrared reflectance. Furthermore, a South African mathematician conducting geological work, interprets the data of those responses and captures them in a database of minerals, and identifies the strength of the mineral in the area.

The first step is for a geologist to take soil samples, and the second runs ground geophysics (cutting lines through the dense vegetation).

To ensure transparency and that the attendees understand both sides of the proposed project activities, the Environmental Assessment Practitioner (EAP) presented the potential pre-identified potential positive and negative environmental and social impacts.

### **2.3 Explanation of what an ESA is, its Process and the Public Role in the Process**

Mr. Nerson Tjelos explained to the attendees what the meeting was all about and why they were invited (with reference to section 21- 24 of the Environmental Management Act (EMA) No. 7 of 2007 and its 2012 Environmental Impact Assessment (EIA) Regulations on Public Consultation). Mr. Tjelos further explained what an EIA or ESA is and that the proposed exploration activities are one of the listed activities in the 2012 EIA Regulations of the EMA that cannot be undertaken without an ECC from the Environmental Commissioner.

### **2.4 Public Open Discussion (Interactive Session)**

Mr. Andrews simultaneously provided the meeting attendees with the opportunity to raise their concerns/issues and or comment on the proposed project activities. The issues and comments recorded are presented in **Table 1** below.

**Table 1: Comments and issues raised during the public meeting in Grootfontein, on the 13<sup>th</sup> of May 2022**

Comment/ issue No.	Commenter name & issue / comment / question	Response and name of responder:
1.	<b>Mr. Tjelos</b> Mr. Johan Van Heerden has circulated the locality maps and has communicated with the affected parties that the venue for the meeting is at Grootfontein Agriculture Show Hall.	<b>Mr. Phillip Andrews (PA):</b> You (Nerson) need to email Mr. Johan to ask to communicate with the stakeholders once again about the meeting venue.
2.	<b>Commenter 1:</b> Is the Proponent only going to do the first phase	<b>Mr. PA:</b> The first phase will determine the second phase and so on.
3.	<b>Commenter 2:</b> The letter it says the Proponent is going to use the proclamation road, what is the Proponent going to do when they move into privately farm owned road? Affected farmers need to have a contract with the Proponent to ensure that damages on farms are addressed.	<b>Mr. PA:</b> Any work need to be transparent, the Proponent knows what they are doing, and know what is wanted from each affected farms.

Comment/ issue No.	Commenter name & issue / comment / question	Response and name of responder:
	<p><b>Commenter 2:</b> Due to past exploration activities, cattle have been lost due to plastic bag pollution which was consumed by cattle, resulting in their death. What is the plan for the Proponent to address this issue? To ensure this does not happen to our cattle?</p>	<p><b>Mr. PA:</b> In the exploration work, there have been good changes with respect to environmental responsibility. Ensuring that mineral wastes and domestic waste produced on site are managed and disposed of in an environmental manner, and these are the things The Proponent clearly outlined in the program that The Proponent would like farmers to be involved in. When work commence with the geologist, certain amount of assistance will be needed. negotiation with the affected farmers to employ quality control staff members and others to do the physical work will be a need. To make sure that affected farmers know what is are doing on their farms.</p>
4.	<p><b>Commenter:</b> During the prospecting phase, certain aspects need to addressed, in advance. To avoid addressing issues last minute.</p>	<p><b>Mr. PA:</b> Once the plan is finalized, the Proponent will communicate with the farmers that are on targeted areas. The plan takes 3-4 months, we need to budget, talk to our investors and organize the logistics. There are certain times of the year when any work should not be done like the rainy season in January.</p> <p>The other thing is with the work we will be doing, are there any benefits for the farmers, maybe cutting those lines and cutting the wood can be beneficial for your local employees as firewood. If we drill boreholes, can they be used as water holes.</p>

Comment/ issue No.	Commenter name & issue / comment / question	Response and name of responder:
5.	<p><b>Commenter:</b> Affected farmers should be provided with the prospecting program before a specific phase commences, that will enable the farmers to manage his own risks or the impact after that. There should be an agreed access to control movements because, that is how farmers lose cattle, pumps and etc. How will that be negotiated with the farmers?</p> <p>There has to be clarity of who accepts liability, for losses incurred or suffered by the farmers? Because we do not want to hear from the Proponent that proof is needed.</p>	<p><b>Mr. PA:</b> That was clear. Once we prepare our concept, we will share it with you.</p> <p><b>Mr. PA:</b> If something happens, we are to be responsible and we want to have a long term relationship with all farmers. It would be unrealistic to say prove it to us. We have contingency plans for everything like properties. For instance, if one of our employees steals a chicken from one of the farms that would be considered a criminal case and they will be charged and fired because he/she is damaging my reputation and the cost of that is higher than the chicken's.</p>

Comment/ issue No.	Commenter name & issue / comment / question	Response and name of responder:
6.	<p><b>Commenter:</b> I had a contract with the last explorer, they give a certain amount a month (N\$ 5 000) to explore, whether you come in for one day or 30 days' a month, that is for the first phase.</p> <p>Your document (BID) states that the exploration workforce will be accommodated in Grootfontein, will there be no campsite on the farms?</p>	<p><b>Mr. PA:</b> Yes, honestly if the farmer had accommodation we will remunerate the farmers for that.</p>
7.	<p><b>Nerson Tjelos:</b> Firstly, we would like to apologize for the venue but nonetheless, we will organize a follow up meeting.</p> <p>We will validate the information shared here, unfortunately this is from the government ministries, association office and then prepare an accurate final database that will be circulated.</p>	<p><b>Responder:</b> For the sake of clarity, please circulate new maps with correct information.</p>
8.	<p><b>Commenter:</b> Send out maps for the East as well.</p>	<p><b>Mr. Nerson Tjelos (NT):</b> Noted.</p>

Comment/ issue No.	Commenter name & issue / comment / question	Response and name of responder:
	<p><b>Ms. Renate:</b> Let me have a list of the farms on your EPL and I will try to relate the email addresses to the farms that I know.</p>	<p><b>Mr. NT:</b> Noted.</p>
	<p><b>Mr. Philip Andrews:</b> What can be done is to send the maps, license area with farms in respect of each EPL to make it easier. label the farms in each EPL and see how we can contact them.</p>	<p><b>Mr. NT:</b> Noted. So, we will create individual maps for each EPL and list all the farms.</p>
<p><b>9.</b></p>	<p><b>Mr. Nerson Tjelos:</b> From the Environmental Impact Assessment (EIA) perspective, the proponent is expected to conduct an EIA before any work is done. It does not have to be invasive /non-invasive as long it is for him to get on site and carry out exploration work, he/she should have an Environmental Clearance Certificate (ECC).</p> <p>Between the Proponent, the Ministry of Mines &amp; Energy (MME) and Ministry of Environment, Forestry and Tourism (MEFT), there is a contract that is signed called the pro-forma contract; which allow or</p>	

Comment/ issue No.	Commenter name & issue / comment / question	Response and name of responder:
	<p>lay out the conditions when the Proponent conduct exploration activities and such environmental aspects should be adhered to. These aspects emanate to form the assessment being done. The core of the assessment is the issues raised, example ground water, and see the extent of the problem; if anything goes wrong, how long will it last, i.e. a month and the mitigation measure to be taken.</p> <p>In the environmental scoping assessment (ESA)report, there is always an issue, what needs to be done by who and when. After the assessment, there is a document that we produce which is the Environmental Management Plan and should always be in possession of the proponent on site. The monitoring becomes an issue when the manager is not taking them serious.</p> <p>The Environmental Management Act (EMA) 7 of 2007 lays out factors such as dust pollution mitigations and when it doesn't</p>	

Comment/ issue No.	Commenter name & issue / comment / question	Response and name of responder:
	<p>happen, there is a table stipulating the consequences. MEFT only grants the clearance certificate, same as the Exploration license for only three (3) years. Furthermore, they require the proponent to provide an audit or monitoring reports every six (6) months, which should be done by an independent consultant and not one of the Proponent team members. The entire report process will determine if the Proponent received a renewal to move on to other phases.</p> <p>In the first six month of the project operating and if the engaged farmers are not happy, that project can be stopped. The MEFT also allows the affected parties/farmers to approach them directly and raise concerns. You do not have to fight the proponent as they will send their officials on site.</p> <p>The Heritage Council also needs a report on the archaeological and heritage assessment found on the area, if any.</p>	

Comment/ issue No.	Commenter name & issue / comment / question	Response and name of responder:
10.	<p><b>Ms. Renate:</b> Your function is to produce a preliminary report which is sent to farmers to comment but, how do you gather your data for the issues? Are you going to visit the site?</p>	<p><b>Mr. NT:</b> There are obvious issues, if we look at the national level –there is a list of areas that are considered negative impacts by MEFT. The government has a huge interest in analyzing what chemicals are used for exploration activities.</p>
11.	<p><b>Commenter:</b> As long as you state in the report that the farmers are collaborative and have strict conditions.</p> <p>First thing you are going to do is you will identify where you will explore? September is rainy season, so if you want to start it should be next year May</p>	<p><b>Mr. NT:</b> Noted</p> <p><b>Mr. PA:</b> Early September exploration will hopefully begin. The early part of the rainy season, some light exploration work can be done (Geochemical sampling) and no heavy machinery will be used.</p>

### FINAL REMARKS AND CONCLUSION OF THE MEETING

Mr. Tjelos thanked the attendees for their crucial input through comments and raising their concerns. He indicated to the attendees that all their comments, concerns and inputs had been noted down for consideration and addressing in the Draft Environmental Scoping Assessment (ESA) Report as well as incorporating their recommendations into the draft EMP. He also indicated that the draft EIA will be worked on, shared with all

stakeholders for a week, then work on the second last draft before the final report to be submitted to the MEFT. MEFT will not review the report for 14 days to allow interested and affected parties to directly engage the ministry.

Furthermore, Mr. Tjelos informed the attendees that these documents will be made available through emails provided on the attendance register and the farmer that are not present, their contacts will be retrieved with assistance from the Agricultural Farmers Union and be provided with the updated documents.

The meeting was adjourned at 10h26
