NOTICE:

75% to 90% on Erf 3417, (No.

18, Parsons Road), Windhoek

as prescribed and provided

for by the Windhoek Town

Erf 3417 (No. 18), Windhoek

is situated along Parsons

Road, on the western edge

of the Windhoek CBD in the

neighbourhood of the Windhoek

Southern Industrial Area, located

to the south-western part of

the larger Windhoek. The Erf

measures 1,532m<sup>2</sup> in extent and

is currently zoned 'Restricted

Business' with a bulk factor of

2.0. The requested increase of

coverage from 75% to 90% is

to enable the expansion of the

current open parking area to

provide for under-roof parking

purposes, thus influencing the

allowable coverage of 75% for

Erf 3417, Windhoek. Access

to the Erf will continue to be

obtained from the existing and

approved access of Parsons

Road located to the western

side of the Erf. Parking will be

provided in accordance with the

requirements of the Windhoek

Further note that the locality

plan of the erf is available for

inspection on the Town Planning

Notice Board at the Customer

Care Centre, Municipal Offices,

Rev. Michael Scott Street,

Windhoek and at the offices of

Urban Green Town and Regional

Planning Consultants, No. 40,

Further take note that any

person objecting to the proposed

consent use for business

building set out above may

lodge such objection, together

with the grounds thereof, with

the City Council (Urban Planner

516) and with the applicant in

writing within 14 days after the

appearance of the last notice

(final date for objection is

27 February 2023).

## PUBLIC CONSULTATION MEETING MINUTES

ENVIRONMENTAL SCOPING ASSESSMENT (ESA) FOR THE PROPOSED PROSPECTING & EXPLORATION ACTIVITIES ON EXCLUSIVE PROSPECTING LICENSES (EPLs) No.8717 and 8718 LOCATED NEAR GRUNAU, //KARAS REGION.

Date: Wednesday, 08 February 2023

**Time:** 09:30 – 10:50

Venue: Grunau Country Hotel

The public consultation meeting was attended by 23 people, including one (1) Environmental Consultant and an Archaeologist from Excel Dynamic Solutions (Pty) Ltd (EDS) - **Please refer to the attached attendance register.** 

### INTRODUCTION AND WELCOMING REMARKS

Mr. Bernatus Waterboer, the Chief Administrative Officer (CAO) of Karasburg Town Council opened the meeting by introducing the Councilor of the //Karas Region, the Grunau settlement officials, farm representatives, the farmers and all those who were present. The environmental consultant (Mr. Silas David) made a short introduction of the team, who they are and the purpose for consulting affected parties of the proposed prospecting and exploration activities on EPLs 8717 and 8718. The meeting attendance register was circulated for the attendees to provide their names and contact details so that they may be added to the list of interested and affected parties (I&APs) and receive further information on the ESA process.

### **MEETING AGENDA AND PRESENTATION**

The agenda of the meeting included the following main points:

### 2.1 Brief Description of the Project

The Environmental Scoping Assessment (ESA) process and the reason why the Proponent appointed Excel Dynamic Solutions (Pty) Ltd (EDS), an independent Environmental Consultant to carry out the ESA and apply for the Environmental Clearance certificate (ECC).

#### 2.2 Explanation of what an ESA is, its Process, and the Public Role in the Process

Mr. David explained to the attendees the objective of the meeting and why they were invited (with reference to the Environmental Management Act (EMA) No. 7 of 2007 and its 2012 Environmental Impact Assessment (EIA) Regulations on Public Consultation). Mr. David further explained what an ESA is and that the proposed exploration activities are one of the listed activities in the 2012 EIA Regulations of the EMA that cannot be undertaken without an ECC from the Environmental Commissioner.

### 2.3 Presentation of Potential Project Impacts

To ensure transparency and that the attendees understand both sides of the proposed project activities, the Environmental Consultant also presented the potential pre-identified potential positive & negative environmental and social impacts.

### 2.4 Public Open Discussion (Interactive Session)

Mr. David provided the meeting attendees the opportunity to raise their concerns/issues and or comment on the proposed project activities. The issues and comments recorded are presented in **Table 1** below.

Comment/	Commenter name & issue / comment / question	Response and name of responder:
issue No.		
1.	Councillor Anseline Beukes (AB): The //Karas Region has so many mines but none of them have	<b>Mr. Silas David (SD):</b> Thank you Honorable Councillor, we have taken note of your comments and concerns. One aspect we need to take into account is whether the
	contributed to the social and economic wellbeing of the //Karas communities. Why must we give consent while our people are not benefiting from the mines that are already in the Region? -Things are not in place and am not the only one that decides on behalf of the //Karas Region but we also have management committee councilors at the regional level who must be part and parcel of	project is mining or prospecting. At this stage, this project proposes to prospect and explore and if the results are deemed favorable, then we can have a different conversation in terms of mining. The Councillor has stated that there are many different mines within the region that have contributed less to the Corporal Social Responsibilities (CSR), unfortunately that is something I cannot comment on regarding this project. We are here to discuss and for you to raise your views on the social impacts and environmental impacts that this project can have on the communities affected if it commences.
	<ul> <li>the decision making in the matter of issuing consents but for me, it is a 'No'.</li> <li>I wrote a letter to the minister of Mines and Energy concerning these activities and until today, I have not received a response. Therefore, before we can move on with this EPL.</li> <li>I do not see representatives from the Ministry of Environment, Forestry and Tourism (MEFT) here but they need to be present so they can explain what the ministry of mines is doing when it comes to EPLs. Since you are just here on behalf of the Proponent. My stand is that I want the</li> </ul>	<ul> <li>-Another aspect we need to look into is when these mines commenced with their operations and when the Environmental Management Act of 2007 was introduced. So, if there were no EIAs conducted before the commencement of these operations, then consultations pertaining to the involvement of interested and affected parties regarding CSR can be questioned.</li> <li>-In terms of the letters you have addressed to the Ministry of Mines and Energy (MME), I think it is best you take it up directly with the line ministry, unfortunately, that is something I cannot comment on further as it is out of my scope of work.</li> </ul>

Table 1: Comments and issues raised during the public consultation meeting, 08<sup>th</sup> of February 2023

Comment/	Commenter name & issue / comment / question	Response and name of responder:
issue No.		
	representatives of MEFT and MME to come and explain to us the process of how they issue licenses.	
2.	<b>Commenter 2:</b> (translated from Afrikaans to English) This is not the first EPL in these areas, there are a lot. We are not against the EPL. The issue is the scarcity of water in these areas of the country. You are looking at around 50,000 liters of water a month for this project, which is also a challenge.	<b>Mr. SD:</b> We take note of sensitive resources such as water scarcity. This is just an estimate of the water needed, the actual liters are well defined in the scoping report and the proponent will have to look into other means of sourcing water elsewhere through the Ministry of Agriculture, Water and Land Reform (MAWLR), by way of a permit.
	The Canyon is a tourist attraction and helps generate income for many. Tourists are not coming to look at mining activities but want to see the beauty of this country, so it is hard to give a 'Yes' with these kinds of challenges at hand.	
3.	<b>Commenter 3:</b> Another concern is that there are about 13 boreholes in the area. This part of the country is extremely arid even now while the rest of the country is receiving plenty of rain, the rain patterns are not favorable in the southern parts.	Mr.SD: Noted.

Comment/	Commenter name & issue / comment / question	Response and name of responder:
issue No.		
4.	<b>Commenter 4:</b> As a commercial farmer I am more concerned about the safety, security, and monitoring of these activities on my farm. I do not have enough money and resources to make sure that once farm access is granted, no negative impacts will affect my livestock. How can we control/prevent this from happening?	<b>Mr.SD:</b> Once the project commences it comes with an Environmental Management Plan (EMP), which is a document consisting of mitigation measures, to which the Proponent should adhere. In the case that an ECC is granted, it remains active for 3 years, and it may be required that every six (6) months during that period, an environmental audit is conducted to ensure that the proponent has been adhering to the guidelines of the EMP. The audits are submitted to MEFT for verification. The EMP will be shared with the interested and affected parties to ensure that the proponent complies with the mitigation measures once the prospecting and exploration of the project begin. Furthermore, once a License is issued you as the landowner can have an access agreement with the EPL holder including the terms and conditions as well as the penalties for non-compliance.
5.	Commenter 5: How is the Ministry of Mines and Energy giving out EPLs in these kinds of areas that are known for farming, which is a source of survival for our people? The sizes of the EPLs are big. In a world of advanced technology why can the ministry not use satellite techniques to locate where exactly the minerals are on the farm instead of damaging the environment/farms?	<ul> <li>Mr.SD: We take note of your concern. There are two phases, prospecting and exploration and this comes after the EPL is issued and ECC.</li> <li>The prospecting phase includes non-invasive techniques, where geological mapping, further studies of the bio-physical environment and surveying take place; and the exploration phase which includes invasive techniques (detailed), where soil sampling, trenching, and exploration drilling take place.</li> <li>Take into account that not all farms covered by the EPL will be targeted for exploration activities. Usually, if there are e.g. 10 farms covered by the EPL, the proponent can target 5 to 6 farms. If the sample taken to the laboratory for testing is not economically viable then the area is rehabilitated. If the samples are economically viable, then social impact specialists, hydrologists, geologists, and</li> </ul>

Comment/	Commenter name & issue / comment / question	Response and name of responder:
issue No.		
		environmentalists become part of the project to that any activities that might occur
		due to the proposed activities do not hinder the livelihoods of the affected
		communities.
6.	Commenter 4: Who is the owner of this EPL?	Mr.SD: The EPL Proponent is Mr. Dalton Ashikoto, a Namibian national and it is a
	Dash Trading Pty Ltd. About 10 years ago, we had	local owned business. For further information, one can approach BIPA or go on their
	someone with a similar name, but we later found	website and inquire further about the company details. In addition, the line ministries
	out it was people from China.	can be contacted to verify the connection between the EPL and the Proponent.
7.	Commenter 4: What if I am okay with the	Mr.SD: That can be stipulated in the access agreement between you and the EPL
	prospecting but once the exploration starts and I	holder. In terms of section 52 of the Mining Minerals Act, an EPL holder has no right
	cannot protect my livestock from harm how can I	to exercise his mineral rights within 100 meters of a garden, river/pan, cattle post,
	be compensated?	and even boreholes that are already established. In your agreement, you can
		charge for damages.
8.	Commenter 6: Where can we submit our points in	Mr. SD: After the consultation meeting, we will share the meeting minutes draft with
	writing?	the attendees (emails provided on the register) and stakeholders for review. If you
		have additional comments and issues to raise after the consultation meeting, you
		can email them to us on the email provided on the Background Information
		Background (BID) before the due date.
9.	<b>Commenter 7:</b> Can the officials of the Ministry of	Mr. SD: It is up to the Ministry of Mines and Energy to decide whether to attend
	Mines and Energy be present at public meetings?	public meetings depending on their budget and the need to do so given the number
		of meetings across the country.

Comment/	Commenter name & issue / comment / question	Response and name of responder:
issue No.		
10.	Commenter 7 (follow up): Can you explain the	Mr.SD: Exploration comes after prospecting. Before exploration, an access
	exploration process?	agreement must be in place as per the law. In case of conflict, one party can
		approach the Minerals Auxiliary Rights Committee (MARC) to resolve the issue.
		There is always a solution for both parties to have a way forward.
11.	Commenter 8: I have concerns with granting	Mr.SD: All the concerns are taken note of.
	access to my farm.	
12.	Commenter 9: What is the nature of this meeting;	Mr.SD: Environmental Clearance Certificate (ECC) is a permit. An ECC is issued to
	is it a public consultative or individual consultative	the proponent by the MEFT for activities that cannot be conducted without the ECC.
	meeting, given the fact that only one	It is issued after the MEFT has studied all concerns raised during the consultation
	representative of the covered farms is present at	process and how they have been given mitigation measures accordingly. There's
	the meeting? What is the difference between the	also a difference between Environmental Scoping Assessment (ESA) and
	ECC and EIA?	Environmental Impact Assessment (EIA). An ESA is done when conducting a
		prospecting phase to assess environmental concerns and all social impacts for a
		proposed project. An EIA, is a full environmental management impact report for a
		mining license whereby specialists assess all aspects of the project and its potential
		impacts such as traffic, air pollution, and ecological groundwater. But the current
		project is about the ESA assessing issues and how they will be mitigated. This will
		translate into an EMP; which the proponent will act accordingly upon.
13.	Commenter 9 (Follow up): So, consultants	Mr.SD: Yes and share with the public to review and give comments accordingly.
	recommend the mitigation methods?	

Comment/	Commenter name & issue / comment / question	Response and name of responder:
issue No.		
14.	<b>Commenter 9 (Follow up):</b> How does one measure or assess the quality of mitigation measures of the project?	<b>Mr.SD:</b> The Proponent might need permits such as water extraction permits from the settlement office or the Ministry of Agriculture, Water and Land Reform. If such permits are acquired, they may come with conditions. Additionally, in terms of vegetation removal, it is prohibited to remove some specific species of plants even if found located on the target area – the Proponent needs to apply for a 'removal permit' for such plant species.
15.	<b>Commenter 9 (Follow up):</b> Once the prospecting process begins and the agreement is in place, will there be financial guarantees in the agreement? Guarantees of resources, reservoirs, and sustenance – will they be in the final contract?	<b>Mr.SD:</b> That may be part of the access agreement or a separate contract between the proponent and land owners, where these terms and conditions can be stipulated. For example, if a farmer requires that holes to be dug on his farm must be rehabilitated and the proponent signs the agreement, then it is expected of the proponent to adhere to it. Contracts may also include charges for using farms e.g. monthly. Once the contract is signed and authenticated, it becomes a living document and is applicable in a court of law.
16.	<b>Commenter 10:</b> Will there be a particular date whereby all parties concerned (the farmers, proponents, and the ministries) will meet before the commencement of the entire prospecting or exploration phase? Again, it is not about the farm but rather about the resources and damages.	<b>Mr.SD:</b> The consultation process is a continuous process. There will be a period whereby the public will have the chance to give comments on the minutes and report drafts. Also, the MME and MEFT are public offices deemed approachable by the general public for any questions or concerns as well as complaints. These ministries can be approached for all matters concerning the proposed project – and they make their own decisions and actions accordingly. In terms of meeting with officials of ministries, proponents and farmers, we will continue to communicate with the affected communities in terms of comments from the beginning to the end of the report – and submit all the reports to the MME and MEFT to make their decisions, We do not make decisions. Once the ministries have

Comment/	Commenter name & issue / comment / question	Response and name of responder:
issue No.		
		made their decisions they will ensure an usingt the president housed on the exposure
		made their decision; they will approve or reject the project based on the concerns
		and mitigation measures proposed. Once the ECC is granted to the Proponent; the
		Proponent must establish legal contracts/agreements with the affected parties,
		which may include access and compensation. If the parties cannot reach an
		agreement than the MARC comes in to assist the two parties reach an agreement.

#### FINAL REMARKS AND CONCLUSION OF THE MEETING

Mr. David thanked the attendees for their input through comments and raising their concerns. He indicated to the attendees that all their comments, concerns, and inputs have been noted down for consideration and addressing in the Environmental Scoping Assessment (ESA).

Furthermore, Mr. David informed the attendees that the draft meeting minutes, Environmental Assessment Report, and Environmental Management Plan (EMP) will be shared with them for review and further comments. These documents will be made available through the emails provided on the attendance register.

Once the review of the draft documents is complete, the documents will be finalized and submitted to the Environmental Commissioner at the Department of Environmental Affairs and Forestry (DEAF) for evaluation and consideration for an ECC.

The meeting adjourned at 10h50.
