

## 2.4. PROJECT LOCATION

The location of the proposed EPL 8949 is situated in Western Namibia (**Figure 10**, and corner coordinates provided in **Table 3**), within the Dorob National Park in the Erongo Region and approximately 23 km East of Cape Cross. To enhance potential impact mitigation, the proponent demarcated and marked a portion of the EPL into an area of 537 m<sup>2</sup> (herein referred to as Area of Interest (AOI)) which constitute.

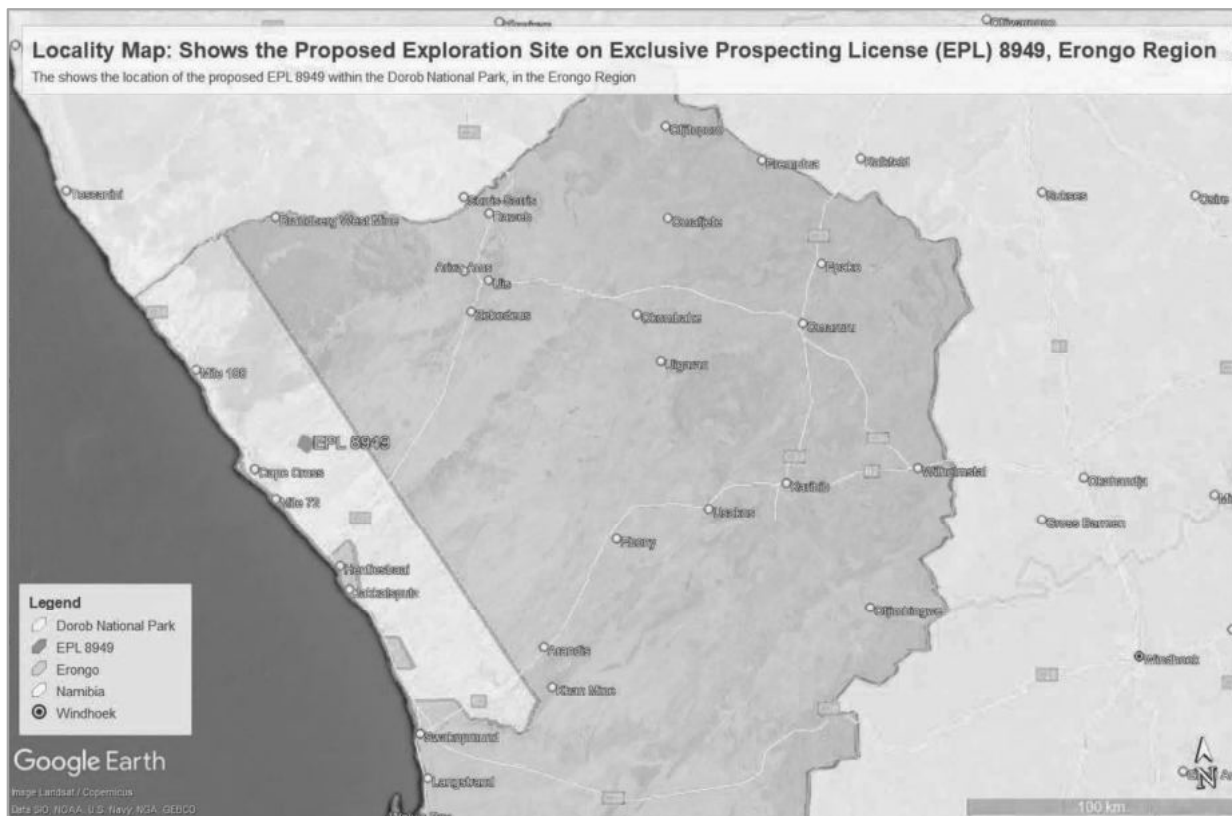

Figure 10: Locality map of the proposed AOI (Mining Claims) on EPL 8949 area in the Erongo Region, Namibia.

*Table 3: Corner coordinates of the proposed development site*

Corner point	Latitude	Longitude
E – EPL 8949 Point 1	-21.681111°	14.197500°
F – EPL 8949 Point 2	-21.716667°	14.179722°
F – EPL 8949 Point 3	-21.740556°	14.205556°
F – EPL 8949 Point 4	-21.737778°	14.214444°
F – EPL 8949 Point 5	-21.700000°	14.235000°

## 2.4. SUPPORTING INFRASTRUCTURE

### 2.4.1 Basecamp

Given the location of the EPL and that it is situated in a national park, a base-camp consisting of shipping containers (already on-site see **Figure 11**, left by previous mining site owners) to house the equipment and for employees to guard the facility will be established and will be enclosed in 100m x 100m fence facility. Otherwise, it is strictly recommended that other staff members are accommodated at the closest lodging facility at Cape Cross and or Henties Bay (whichever is practically suitable) and commute daily to and from the project site.

*Figure 11: Shows current status of the Base-camp facility consisting of old shipping containers left by previous license holder*

During the prospecting period, it is anticipated that about 15 – 20 persons will be employed, although only four staff are allowed to lodge on-site on an alternating (rotating) basis. The project specialists such as geologists, field assistants, geo-technicians and sampling crew, will be hosted on either a daily or special visit basis, and thus might not all be on-site simultaneously.

Therefore, it is highly recommended that temporary ablution facilities must be provided and limited to within the existing base-camp footprint pre-identified national park campsites, and the necessary authorization must be obtained prior to installation of any such facility.

### 2.4.2 Water supply

Water will, at this stage only be required mainly for domestic use and will be sourced from the Henties Bay Municipality and transported by truck in 10 000 litres water tanks (**Figure 12**),
