

maximising wildlife returns by minimising threats...

Performance Indicators

Management performance in 2019

Category	Performance
1 Adequate staffing	Good
2 Adequate expenditure	Good
3 Audit attendance	Good
4 NR management plan	Good
5 Zonation	Good
6 Leadership	Good
7 Display of material	Good
8 Event Book modules	Good
9 Event Book quality	Good
10 Compliance	Good
11 Game census	Good
12 Reporting & adaptive management	Good
13 Law enforcement	Good
14 Human Wildlife Conflict	Weak/Bad
15 Harvesting management	Weak/Bad
16 Sources of NR income	Good
17 Benefits produced	Good
18 Resource trends	Weak/Bad
19 Resource targets	Weak/Bad

Key to performance indicators

Performance is assessed on a scoring system from zero (none) to a maximum of between 3 and 6 (strong/excellent) depending on the indicator.

Indicators 1-17 reflect the performance of the management team in place in the conservancy and an efficient team can achieve a good rating in all 17 indicators. Indicators 18 & 19 are influenced by external factors and are not considered a reflection of conservancy management. They indicate the current status of wildlife in the conservancy in relation to a theoretical optimal situation.

Human wildlife conflict

Human wildlife conflict trend

the chart shows the total number of incidents each year, subdivided by species, grouped as herbivores and predators

Most troublesome problem animals 2017-2019

the chart shows the number of incidents per species for the last 3 years; the darkest bar (on the right) indicates the current year for each species

Type of damage by problem animals 2017-2019

the chart shows the number of incidents per category for the last 3 years; the darkest bar (on the right) indicates the current year for each type

Poaching

Number of incidents per year

Commercial poaching is a serious threat to conservancy benefits. The chart shows the number of incidents per category

Traps and firearms recovered

number of incidents per category

Arrests and convictions

number of incidents per category

Wildlife removals – quota use and value

Potential value estimates (N\$) for species are based on:

• **Potential trophy value** - the average trophy value for that species in the conservancy landscape

trophy values vary depending on trophy quality, international recognition of the hunting operator and the hunting area

• **Potential other use value** - the average meat value for common species

or

the average live sale value of each high value species (indicated with an *). High value species are never used for meat

Fractions of animals indicate that a quota of 1 animal was awarded with conditions i.e. a) over a period of several years and/or b) is shared with other conservancies

Species	Quota 2019			Animals actually used in 2019						Potential Trophy Value N\$	Potential Other use Value N\$
	Total	Trophy	Other Use	Trophy	Own Use & Premium	Shoot & Sell	Capture & Sale	Problem Animal	Total Use		
Baboon	5	5								600	
Caracal	1	1								2,700	
Cheetah	2	2								11,100	
Gemsbok	27	10	17							4,300	2,592
Giraffe	1	1								10,600	
Jackal	5	5								400	
Klipspringer	2	2								5,500	
Kudu*	10	5	5							9,900	64,930
Ostrich	15	5	10							2,000	720
Springbok	50	10	40							2,700	624
Steenbok	2	2								1,700	
Mtn Zebra	20	5	15							6,300	3,984
Hartebeest	3	3									

Effective monitoring is key to understanding the status of wildlife in the conservancy and for the effective management of these resources.

Conservancies reduce environmental costs while increasing environmental returns. Returns from wildlife can far outweigh human wildlife conflict costs.

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

Species	Animals Seen 2019	Estimated population range	Wildlife Status		
			Count Trend	National Guideline	Desired Status
Elephant	3		Abundant	Abundant	Abundant
Gemsbok	84	635 - 1040	Abundant	Abundant	Abundant
Giraffe	8	16 - 20	Abundant	Abundant	Abundant
Jackal	3		Abundant	Abundant	Abundant
Klipspringer			Abundant	Abundant	Abundant
Kudu	2	9 - 30	Abundant	Abundant	Abundant
Mtn. zebra	48	368 - 640	Abundant	Abundant	Abundant
Ostrich	27	197 - 330	Abundant	Abundant	Abundant
Springbok	85	533 - 1380	Abundant	Abundant	Abundant
Steenbok	5	36 - 400	Abundant	Abundant	Abundant

Desired Number – gives the species status in the conservancy based on what the conservancy would like to have.

dark green (abundant) – reduce a lot;
light green (common) – reduce a little;
yellow (uncommon) – keep numbers the same;
light orange (rare) – double numbers;
dark orange (very rare) – more than double numbers.

Wildlife status summary in 2019

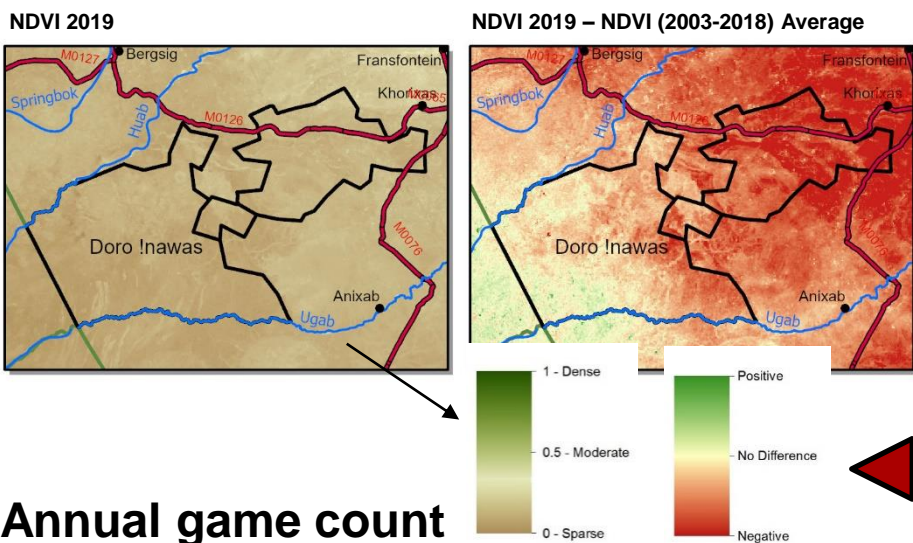

Key to wildlife status

Vegetation monitoring

Green vegetation index (NDVI). Maps show vegetation cover during Feb-Apr of the current year and the difference between the current year and the long term average (2003-2018)

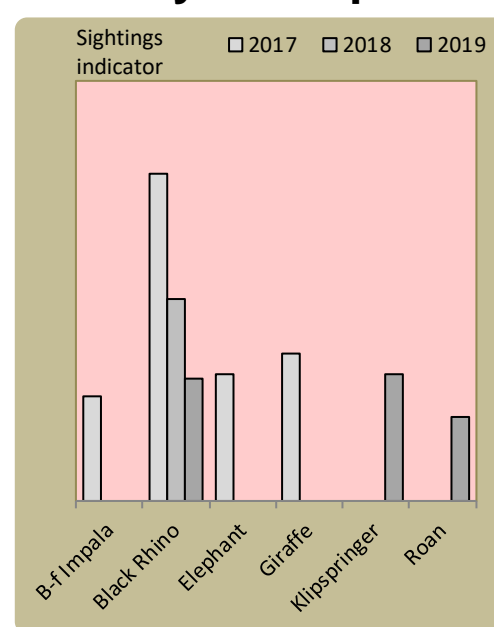

Wildlife mortalities

Flags

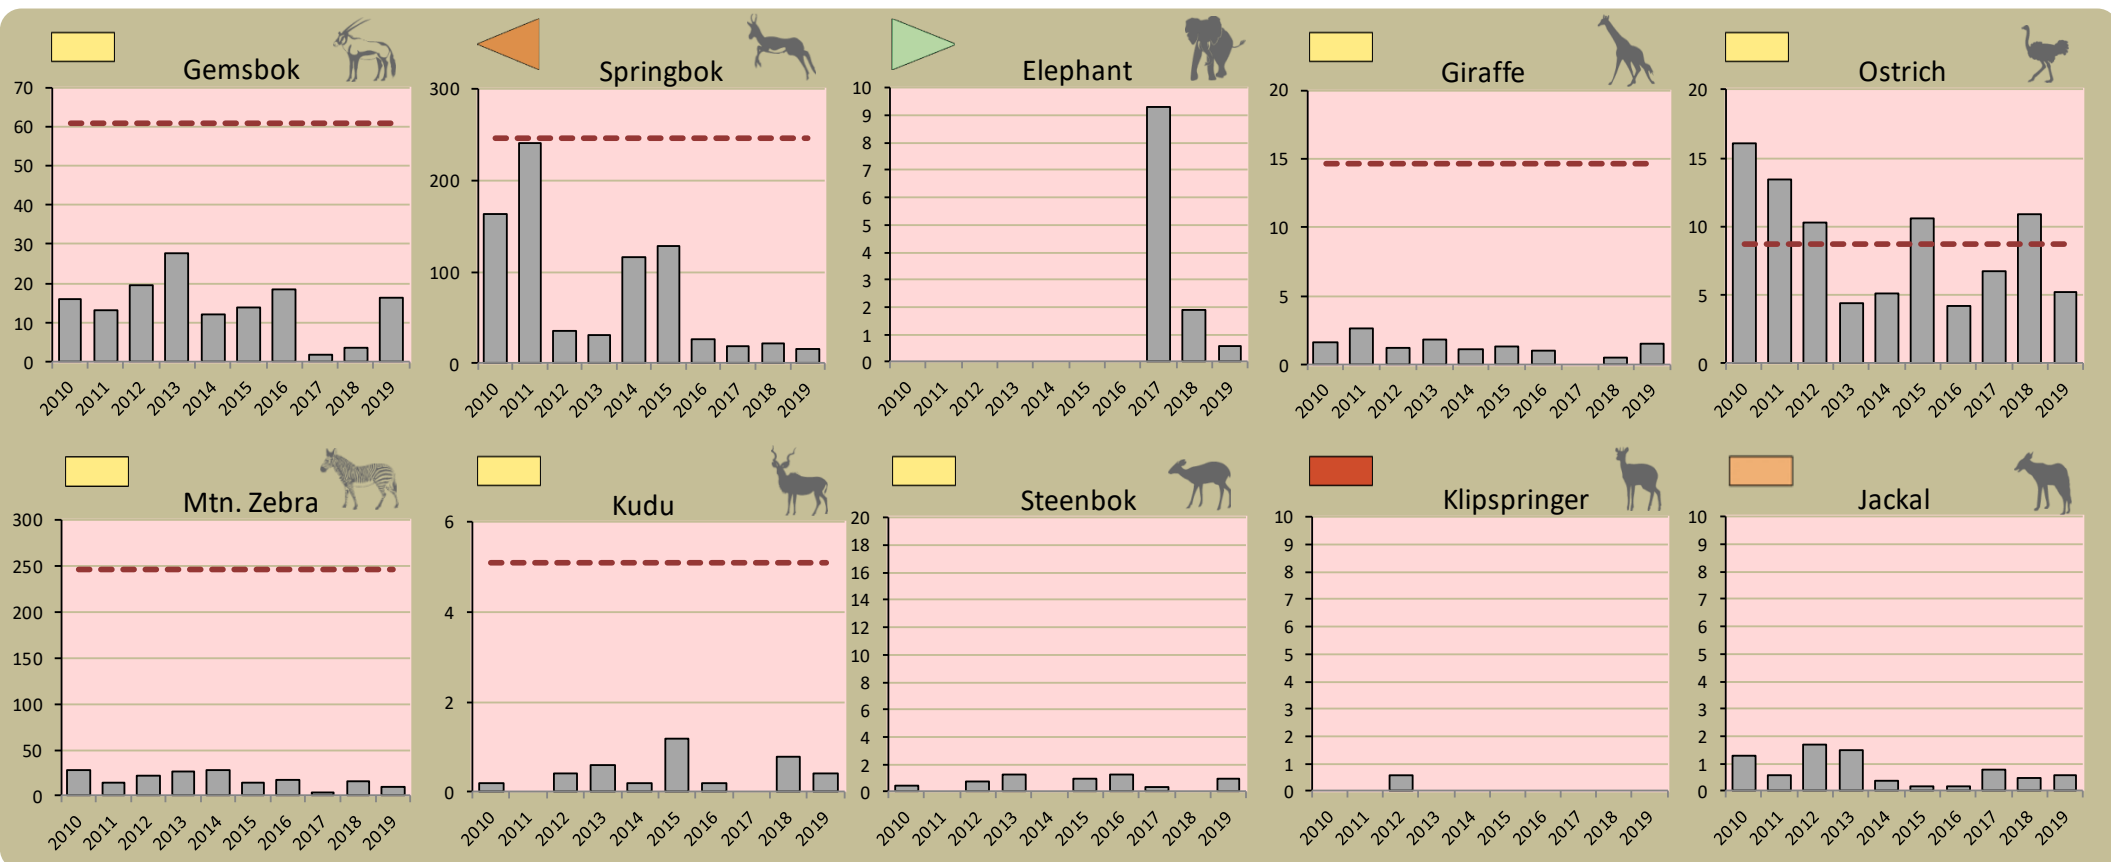

Locally rare species

Locally rare species are not found very often in the conservancy and need special conservation attention.

Annual game count

Charts show the number of animals seen each year per 100 km driven during the game count. As a point of reference the dashed horizontal line represents the combined 10 year average in Palmwag and Etendeka concessions. Status flags reflect the general count trend over the last 5 years.

Predator monitoring

charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings trend over the last 5 years

Wildlife provides a wide range of benefits. Some wildlife can cause conflicts, but all wildlife is of value to tourism, trophy hunting and a healthy environment.

By using all the available information and adapting and improving activities, threats such as human wildlife conflict, poaching and other issues can be minimised.

Enabling wise conservancy governance...

Conservancy Statistics

Date Registered:	December 1999
Population (2011 census):	1110
Size (square kilometres):	4135
Registered members:	400

Key Compliance Requirements

Was an AGM held?	✗
Were elections held?	N/A
Were benefits distributed according to the BDP?	✓
Is game managed according to the GMUP?	✓
Was the financial report presented and approved?	✗

Conservancy Governance

	Male	Female	Total
Number of management committee members	10	6	16
Attendance at AGM			
Date of the last AGM:			
Date of the next AGM:	02/2020		
Other important issues			
Budget approved?			
Work plan approved?			
Annual conservancy report approved?			

Benefit Distribution

Type	Description	Beneficiary	Number
Social Benefits	Area Member Training	People	60
	Food Combo- Old Age And Disabled		
	Funeral Assistance	People	22
	Poultry And Gardening Project	People	400
Other Benefits	Hwc Offset	People	131
	Ta Offset	People	1

Employment

	Male	Female	Total
Conservancy staff (Incl. CGG & CRM)	7	3	10
Number of Community Game Guards	4	1	5
Number of Community Resource Monitors			
Lodge staff	23	25	48

Governance Performance Rating How well did the conservancy perform in the past year?

Performance Category	This Year	Prev. Year	Explanation of performance category
1 Member engagement	Strong		The conservancy is adequately engaging its members
2a Benefit planning	Exceptional		The conservancy developed its BDP in a transparent and participatory manner
2b Benefit distribution	Exceptional		The conservancy distributes benefits to its members in a fair, transparent and equitable manner
3 Accountability	Exceptional		Conservancy members are holding the management committee accountable
4 Compliance	Weak		The conservancy is compliant with the standard operating procedures (SOPs)
5 Stakeholder engagement	Exceptional		The conservancy maintains relationships with key external stakeholders
6 Financial management	Weak		The conservancy is effectively managing its finances
