New from **CORNELL UNIVERSITY PRESS**

THE EAGLE WATCHERS

Observing and Conserving Raptors around the World

EDITED BY **RUTH E. TINGAY** AND **TODD E. KATZNER**

WITH FOREWORDS BY **KEITH L. BILDSTEIN** AND **JEMIMA PARRY-JONES, MBE**

"Eagles are the most riveting of all the world's wild birds—and eagle biologists, who brave some of the harshest conditions on the planet, are among the most intrepid of scientists. *The Eagle Watchers* explores the twinned worlds of observer and observed, from the rain forests of Asia, Africa and South America to the steppes of Kazakhstan and the mountains of Alaska, with dozens of ornithologists who recount experiences with poachers, land mines, wilderness camps, guerillas and even a tense face-off between warring New Guinea tribesmen—all to learn more about some of the world's 75 species of eagles."

—SCOTT WEIDENSAUL, AUTHOR, *OF A FEATHER*

The Eagle Watchers features personal narratives by twenty-nine leading eagle researchers in which they share their remarkable experiences of studying eagles around the world. This book covers twenty-four species on six continents, from well known (bald eagle), to obscure (New Guinea harpy eagle), and from common (African fish eagle) to critically endangered (Philippine eagle), and it features stunning colour photographs, information on raptor conservation, a global list of all eagle species with ranges and conservation status, and a colour map of sites discussed.

ISBN 978-0-8014-4873-7 | 256 pages | £18.95 cloth
14 colour photographs, 29 halftones | A COMSTOCK BOOK
