

# Memorandum

---

**Subject: FINAL SCOPING REPORT FOR THE PROPOSED OPUWO COBALT MINING PROJECT (APP-0076):**

## **ENVIRONMENTAL MANAGEMENT PLAN**

---

As noted in the Final Scoping Report, for projects with sufficient information at the scoping stage, impact assessments can be provided and an Environmental Management Plan (EMP) compiled. However, for the current project, an assessment is not possible at this stage as specialist studies still need to be undertaken (refer to Chapter 8 of the Final Scoping Report for the specialist Terms of Reference).

It is also not possible to compile the EMP at this stage, as management and mitigation measures which will be contained in the EMP, will be based on the findings and recommendations of the specialist studies.

Thus, an EMP will be compiled in the next stage of the EIA process and included in the EIA Report.
