

maximising wildlife returns by minimising threats...

Performance Indicators

Management performance in 2019

Category	Performance
1 Adequate staffing	Weak
2 Adequate expenditure	Weak
3 Audit attendance	Weak
4 NR management plan	Weak
5 Zonation	Weak
6 Leadership	Weak
7 Display of material	Weak
8 Event Book modules	Weak
9 Event Book quality	Weak
10 Compliance	Weak
11 Game census	Reasonable
12 Reporting & adaptive management	Weak
13 Law enforcement	Weak
14 Human Wildlife Conflict	Weak
15 Harvesting management	Weak
16 Sources of NR income	Good
17 Benefits produced	Good
18 Resource trends	Weak
19 Resource targets	Weak

Key to performance indicators

Performance is assessed on a scoring system from zero (none) to a maximum of between 3 and 6 (strong/excellent) depending on the indicator.

Indicators 1-17 reflect the performance of the management team in place in the conservancy and an efficient team can achieve a good rating in all 17 indicators. Indicators 18 & 19 are influenced by external factors and are not considered a reflection of conservancy management. They indicate the current status of wildlife in the conservancy in relation to a theoretical optimal situation.

Human wildlife conflict

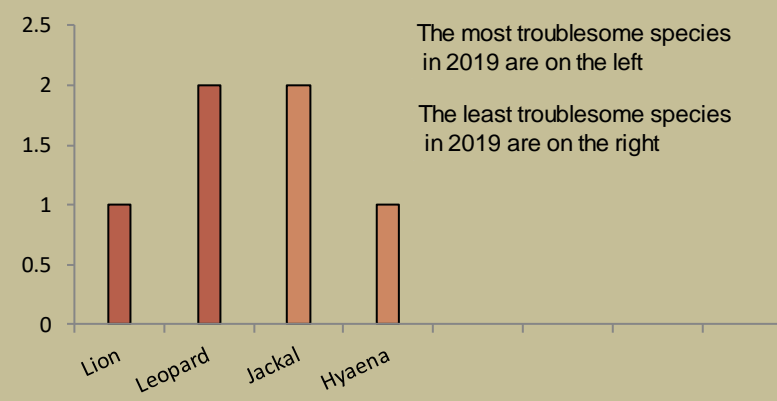

Human wildlife conflict trend

the chart shows the total number of incidents each year, subdivided by species, grouped as herbivores and predators

Most troublesome problem animals 2017-2019

the chart shows the number of incidents per species for the last 3 years; the darkest bar (on the right) indicates the current year for each species

Type of damage by problem animals 2017-2019

the chart shows the number of incidents per category for the last 3 years; the darkest bar (on the right) indicates the current year for each type

Poaching

Number of incidents per year

Commercial poaching is a serious threat to conservancy benefits. The chart shows the number of incidents per category

Traps and firearms recovered

number of incidents per category

Arrests and convictions

number of incidents per category

Wildlife removals – quota use and value

Potential value estimates (N\$) for species are based on:

• **Potential trophy value** - the average trophy value for that species in the conservancy landscape

trophy values vary depending on trophy quality, international recognition of the hunting operator and the hunting area

• **Potential other use value** - the average meat value for common species

or

the average live sale value of each high value species (indicated with an *). High value species are never used for meat

Fractions of animals indicate that a quota of 1 animal was awarded with conditions i.e. a) over a period of several years and/or b) is shared with other conservancies

Species	Quota 2019			Animals actually used in 2019						Potential Trophy Value N\$	Potential Other use Value N\$
	Total	Trophy	Other Use	Trophy	Own Use & Premium	Shoot & Sell	Capture & Sale	Problem Animal	Total Use		
Baboon	5	5								600	
Cheetah	1	1								4,800	
Gemsbok	1	1								2,700	
Jackal	5	5								600	
Klipspringer	2	2								1,300	
Kudu*	3	2	1							6,300	12,986
Leopard	1	1								10,100	
Ostrich	5	2	3							1,500	720
Springbok	70	10	60							900	624
Steenbok	2	2								1,100	
Mtn Zebra	5	2	3							2,600	3,984

Effective monitoring is key to understanding the status of wildlife in the conservancy and for the effective management of these resources.

Conservancies reduce environmental costs while increasing environmental returns. Returns from wildlife can far outweigh human wildlife conflict costs.

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

Species	Animals Seen 2019	Estimated population range	Wildlife Status		
			Count Trend	National Guideline	Desired Status
Elephant			Dark Orange	Yellow	
Gemsbok			Dark Orange	Orange	
Giraffe			Dark Orange	Yellow	
Jackal	1		Yellow	Yellow	
Klipspringer			Dark Orange	Orange	
Kudu			Dark Orange	Orange	
Mtn. zebra			Dark Orange	Orange	
Ostrich	7	55 - 90	Yellow	Orange	
Springbok	247	2116 - 5500	Dark Orange	Orange	
Steenbok	2	13 - 140	Orange	Orange	

Desired Number – gives the species status in the conservancy based on what the conservancy would like to have.

dark green (abundant) – reduce a lot;
light green (common) – reduce a little;
yellow (uncommon) – keep numbers the same;
light orange (rare) – double numbers;
dark orange (very rare) – more than double numbers.

Wildlife status summary in 2019

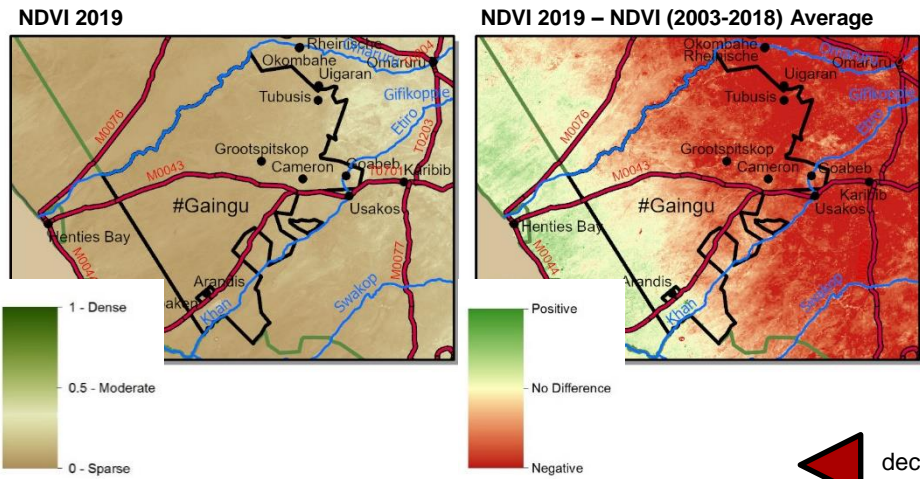

Key to wildlife status

Vegetation monitoring

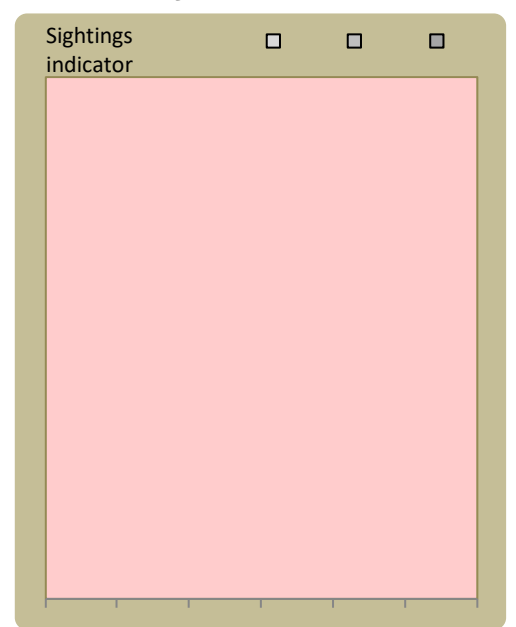

Green vegetation index (NDVI). Maps show vegetation cover during Feb-Apr of the current year and the difference between the current year and the long-term average (2003-2018)

Wildlife mortalities

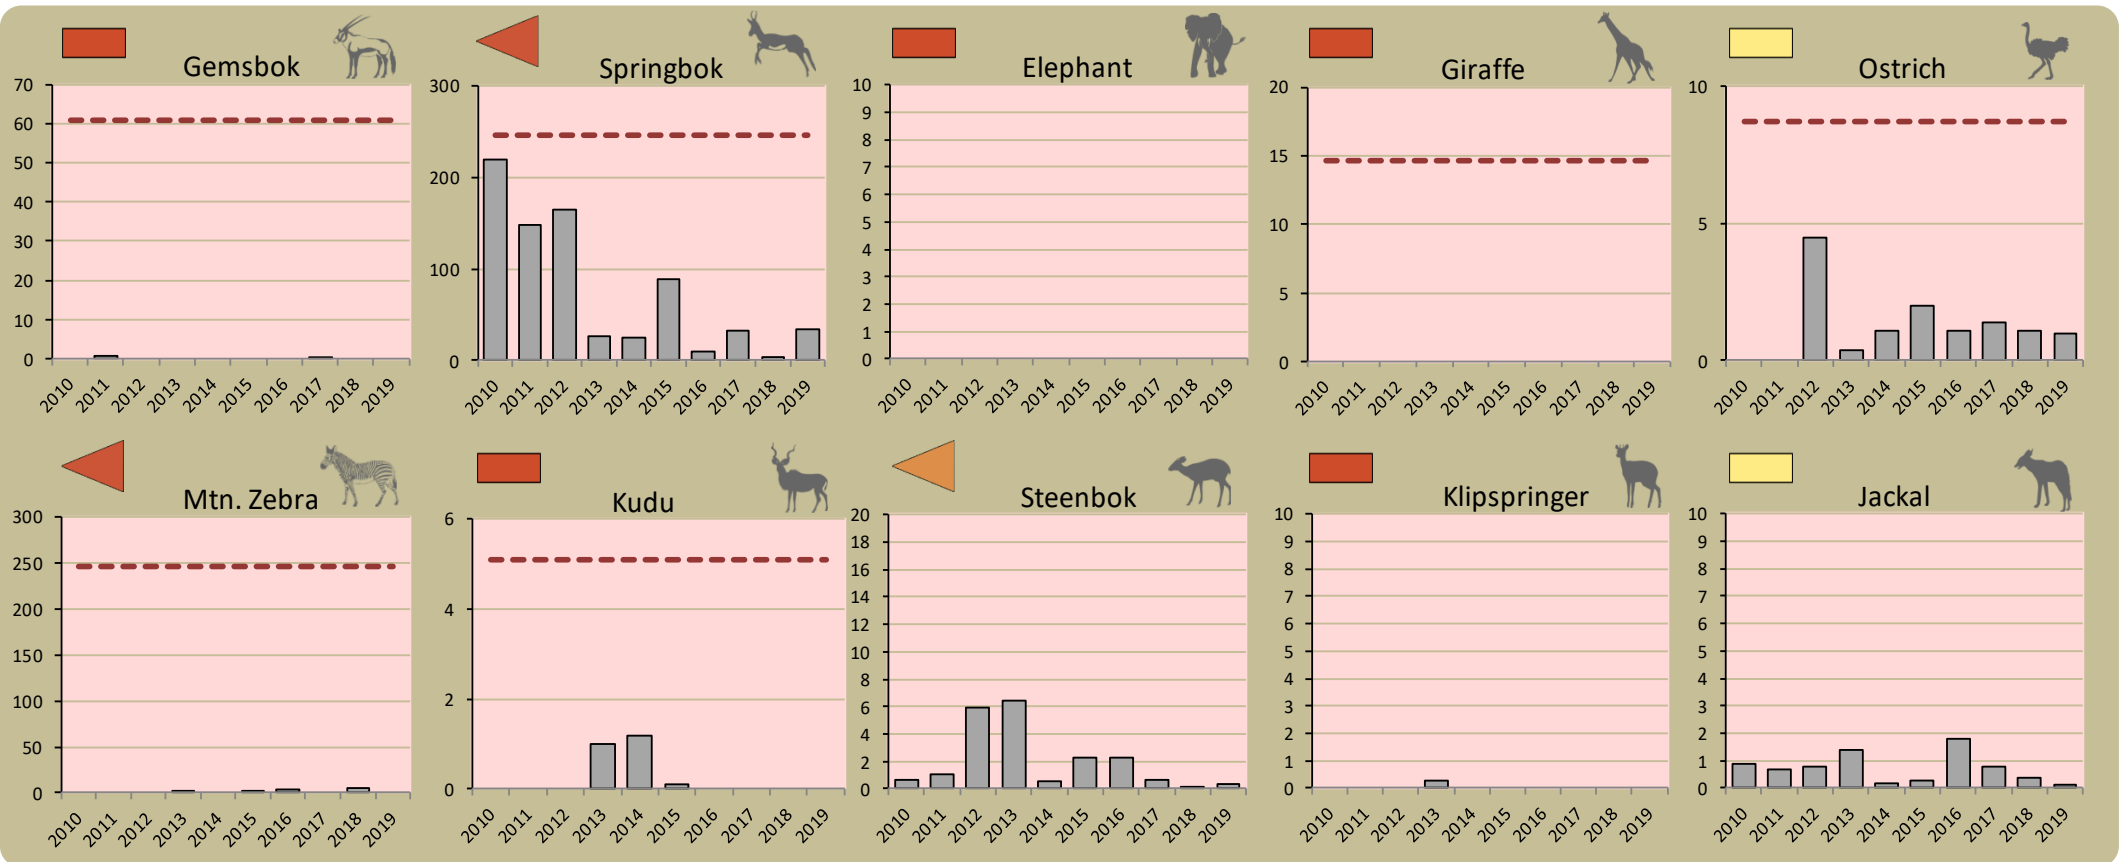

Locally rare species

Annual game count

Charts show the number of animals seen each year per 100 km driven during the game count. As a point of reference the dashed horizontal line represents the combined 10 year average in Palmwag and Etendeka concessions. Status flags reflect the general count trend over the last 5 years.

Locally rare species are not found very often in the conservancy and need special conservation attention.

Predator monitoring

charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings trend over the last 5 years

Wildlife provides a wide range of benefits. Some wildlife can cause conflicts, but all wildlife is of value to tourism, trophy hunting and a healthy environment.

By using all the available information and adapting and improving activities, threats such as human wildlife conflict, poaching and other issues can be minimised.

Enabling wise conservancy governance...

Conservancy Statistics

Date Registered:	March 2004
Population (2011 census):	2570
Size (square kilometres):	7731
Registered members:	700

Key Compliance Requirements

Was an AGM held?	✗
Were elections held?	N/A
Were benefits distributed according to the BDP?	✗
Is game managed according to the GMUP?	✗
Was the financial report presented and approved?	✗

Conservancy Governance

	Male	Female	Total
Number of management committee members	5	4	9
Attendance at AGM	89	89	178
Date of the last AGM:			
Date of the next AGM:	03/03/2020		
Other important issues			
Budget approved?			
Work plan approved?			
Annual conservancy report approved?	✓		

Benefit Distribution

Type	Description	Beneficiary	Number
------	-------------	-------------	--------

Employment

	Male	Female	Total
Conservancy staff (Incl. CGG & CRM)	2		2
Number of Community Game Guards	1		1
Number of Community Resource Monitors			
Lodge staff	4	21	25

Governance Performance Rating How well did the conservancy perform in the past year?

Performance Category	This Year	Prev. Year	Explanation of performance category
1 Member engagement	exceptional		The conservancy is adequately engaging its members
2a Benefit planning	weak		The conservancy developed its BDP in a transparent and participatory manner
2b Benefit distribution	moderate		The conservancy distributes benefits to its members in a fair, transparent and equitable manner
3 Accountability	moderate		Conservancy members are holding the management committee accountable
4 Compliance	moderate		The conservancy is compliant with the standard operating procedures (SOPs)
5 Stakeholder engagement	exceptional		The conservancy maintains relationships with key external stakeholders
6 Financial management	moderate		The conservancy is effectively managing its finances
