

maximising wildlife returns by minimising threats...

Performance Indicators

Category	Performance
1 Adequate staffing	
2 Adequate expenditure	
3 Audit attendance	
4 NR management plan	
5 Zonation	
6 Leadership	
7 Display of material	
8 Event Book modules	
9 Event Book quality	
10 Compliance	
11 Game census	
12 Reporting & adaptive management	
13 Law enforcement	
14 Human Wildlife Conflict	
15 Harvesting management	
16 Sources of NR income	
17 Benefits produced	
18 Resource trends	
19 Resource targets	

Key to performance indicators

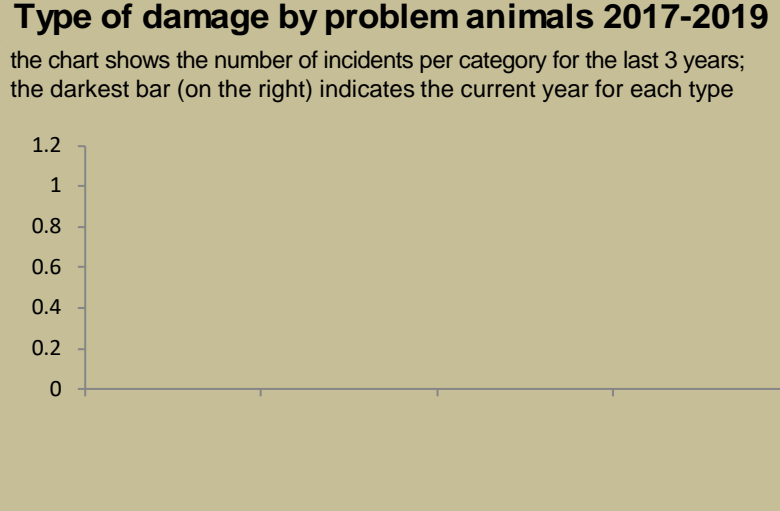

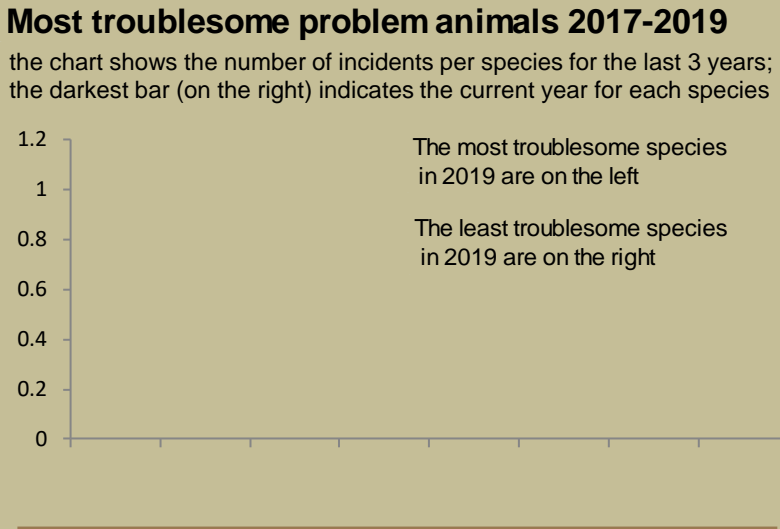

weak/bad	reasonable	good

Performance is assessed on a scoring system from zero (none) to a maximum of between 3 and 6 (strong/excellent) depending on the indicator.

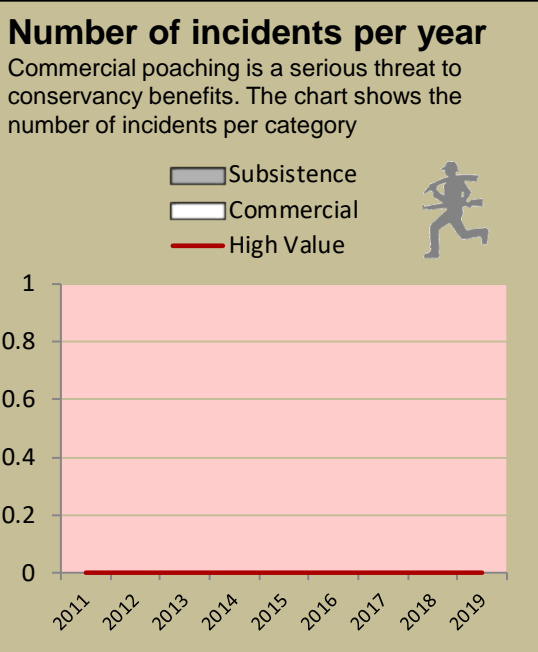

Indicators 1-17 reflect the performance of the management team in place in the conservancy and an efficient team can achieve a good rating in all 17 indicators.

Indicators 18 & 19 are influenced by external factors and are not considered a reflection of conservancy management. They indicate the current status of wildlife in the conservancy in relation to a theoretical optimal situation.

Human wildlife conflict

Poaching

Wildlife removals – quota use and value

Potential value estimates (N\$) for species are based on:	Species	Quota 2019			Animals actually used in 2019					Potential Trophy Value N\$	Potential Other use Value N\$	
		Total	Trophy	Other Use	Trophy	Own Use & Premium	Shoot & Sell	Capture & Sale	Problem Animal			Total Use
<p>• Potential trophy value - the average trophy value for that species in the conservancy landscape</p> <p>trophy values vary depending on trophy quality, international recognition of the hunting operator and the hunting area</p> <p>• Potential other use value - the average meat value for common species</p> <p>or</p> <p>the average live sale value of each high value species (indicated with an *). High value species are never used for meat</p> <p>Fractions of animals indicate that a quota of 1 animal was awarded with conditions i.e.</p> <p>a) over a period of several years and/or</p> <p>b) is shared with other conservancies</p>	Gemsbok					2				2		
	Springbok					5				5		

Effective monitoring is key to understanding the status of wildlife in the conservancy and for the effective management of these resources.
Conservancies reduce environmental costs while increasing environmental returns. Returns from wildlife can far outweigh human wildlife conflict costs.

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

Species	Animals Seen 2019	Estimated population range	Wildlife Status		
			Count Trend	National Guideline	Desired Status
Elephant			dark orange	orange	
Gemsbok	9	29 - 70	orange	orange	
Giraffe			dark orange	orange	
Jackal			dark orange	light green	
Klipspringer			dark orange	orange	
Kudu			dark orange	orange	
Mtn. zebra			dark orange	orange	
Ostrich	14	44 - 100	dark green	yellow	
Springbok	26	80 - 130	orange	yellow	
Steenbok			dark orange	yellow	

Desired Number – gives the species status in the conservancy based on what the conservancy would like to have.

dark green (abundant) – reduce a lot;
light green (common) – reduce a little;
yellow (uncommon) – keep numbers the same;
light orange (rare) – double numbers;
dark orange (very rare) – more than double numbers.

Wildlife status summary in 2019

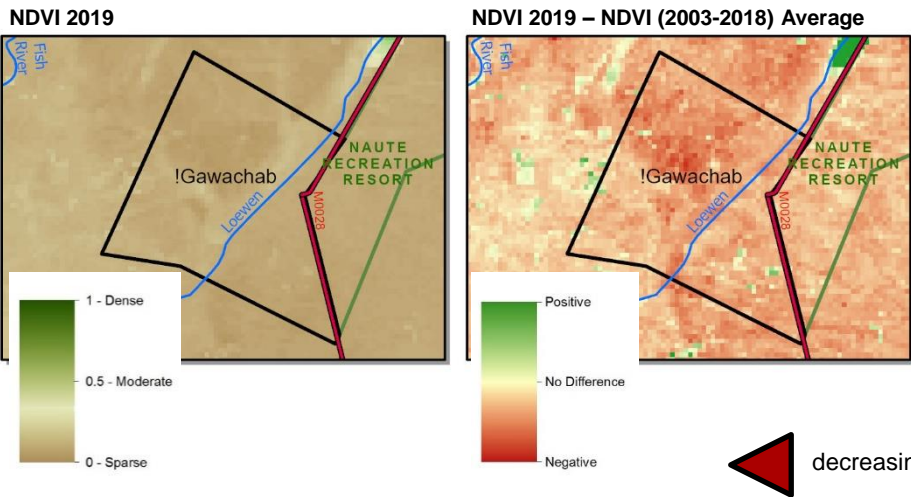

Key to wildlife status

Vegetation monitoring

Green vegetation index (NDVI). Maps show vegetation cover during Feb-Apr of the current year and the difference between the current year and the long-term average (2003-2018)

Wildlife mortalities

Flags

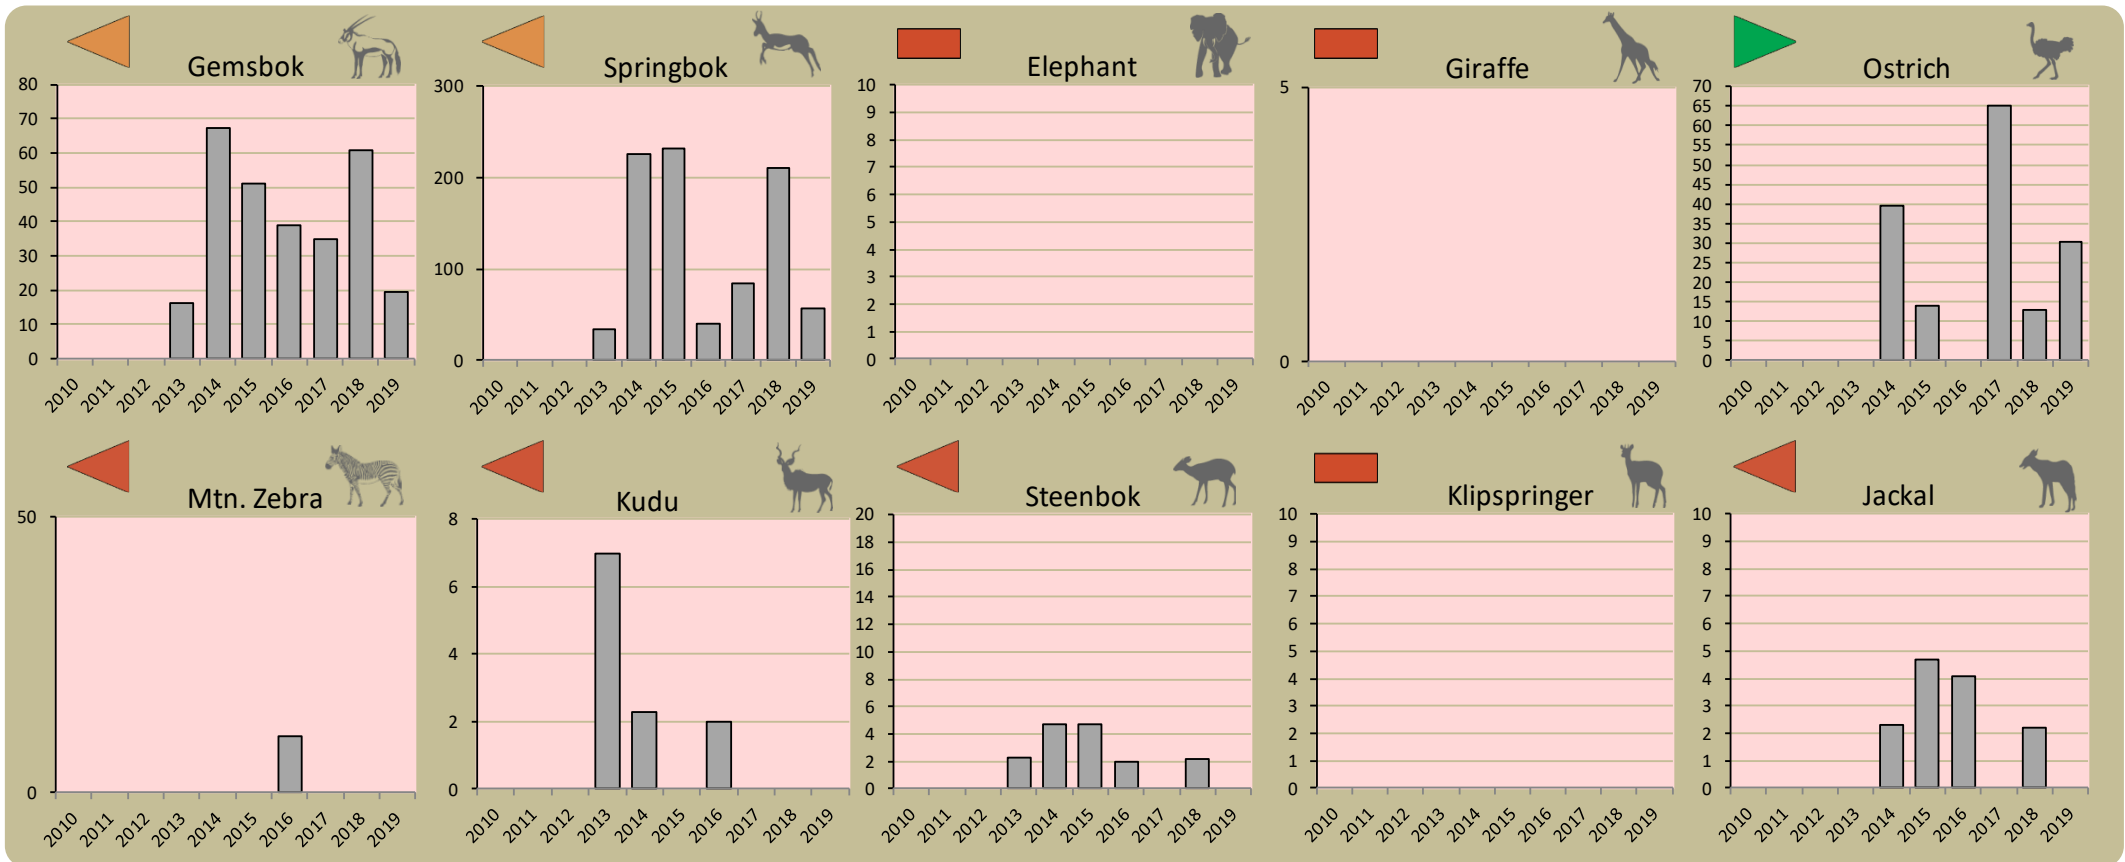

Locally rare species

Locally rare species are not found very often in the conservancy and need special conservation attention.

Annual game count

Charts show the number of animals seen each year per 100 km driven during the game count. As a point of reference the dashed horizontal line represents the combined 10 year average in Palmwag and Etendeka concessions. Status flags reflect the general count trend over the last 5 years.

Predator monitoring

charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings trend over the last 5 years

Wildlife provides a wide range of benefits. Some wildlife can cause conflicts, but all wildlife is of value to tourism, trophy hunting and a healthy environment.

By using all the available information and adapting and improving activities, threats such as human wildlife conflict, poaching and other issues can be minimised.

Enabling wise conservancy governance...

Conservancy Statistics

Date Registered:	September 2005
Population (2011 census):	200
Size (square kilometres):	132
Registered members:	32

Key Compliance Requirements

Was an AGM held?	✗
Were elections held?	N/A
Were benefits distributed according to the BDP?	✔
Is game managed according to the GMUP?	✗
Was the financial report presented and approved?	✗

Conservancy Governance

	Male	Female	Total
Number of management committee members	5	4	9
Attendance at AGM			
Date of the last AGM:			
Date of the next AGM:	26/02/2020		
Other important issues			
Budget approved?			
Work plan approved?			
Annual conservancy report approved?			

Benefit Distribution

Type	Description	Beneficiary	Number
Meat Distribution	Meat Distribution To Conservancy Members	People	32

Employment

	Male	Female	Total
Conservancy staff (Incl. CGG & CRM)			0
Number of Community Game Guards			0
Number of Community Resource Monitors			

Governance Performance Rating How well did the conservancy perform in the past year?

Performance Category	This Year	Prev. Year	Explanation of performance category
1 Member engagement			The conservancy is adequately engaging its members
2a Benefit planning			The conservancy developed its BDP in a transparent and participatory manner
2b Benefit distribution			The conservancy distributes benefits to its members in a fair, transparent and equitable manner
3 Accountability			Conservancy members are holding the management committee accountable
4 Compliance			The conservancy is compliant with the standard operating procedures (SOPs)
5 Stakeholder engagement			The conservancy maintains relationships with key external stakeholders
6 Financial management			The conservancy is effectively managing its finances
