

maximising wildlife returns by minimising threats...

Conservancy status summary

Returns from natural resources in 2017

the chart shows the main sources of returns and values and their percentage of the total returns

Approximate Total Returns N\$

Two of the most significant returns for the conservancy: ✓ cash income to the conservancy to cover running costs and invest in developments ✓ employment benefits to conservancy residents

Conservancy income	N\$
Employment	Private Sector / Conservancy

Cost of natural resource conflicts in 2017

estimates are based on average national values

Estimated human wildlife conflict cost	N\$ 19,040
Estimated poached high value species loss	N\$ 0
Total conflict cost estimate	N\$ 19,040

Natural resource cost-return ratio in 2017

the chart shows the approximate ratio of returns to costs

Management performance in 2017

Category	Performance
1 Adequate staffing	Good
2 Adequate expenditure	Weak
3 Audit attendance	Weak
4 NR management plan	Weak
5 Zonation	Weak
6 Leadership	Weak
7 Display of material	Weak
8 Event Book modules	Weak
9 Event Book quality	Good
10 Compliance	Weak
11 Game census	Good
12 Reporting & adaptive m/ment	Good
13 Law enforcement	Good
14 Human Wildlife Conflict	Weak
15 Harvesting management	Good
16 Sources of NR income	Good
17 Benefits produced	Weak
18 Resource trends	Good
19 Resource targets	Weak

Wildlife status summary in 2017

Key to the status barometer

Human wildlife conflict

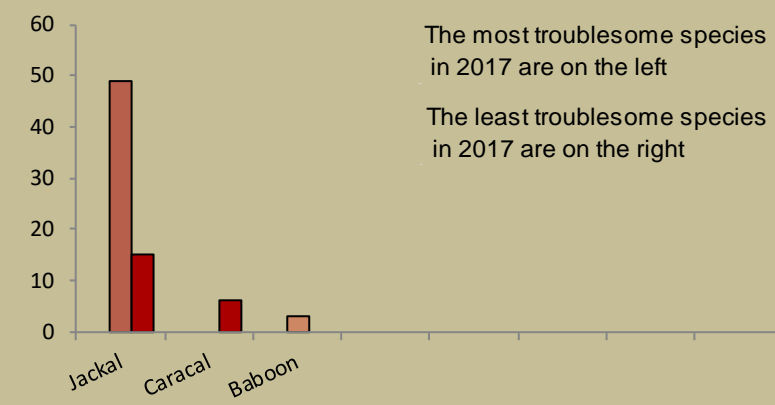

Human wildlife conflict trend

the chart shows the total number of incidents each year, subdivided by species, grouped as herbivores and predators

Most troublesome problem animals 2015-2017

the chart shows the number of incidents per species for the last 3 years; the darkest bar (on the right) indicates the current year for each species

Type of damage by problem animals 2015-2017

the chart shows the number of incidents per category for the last 3 years; the darkest bar (on the right) indicates the current year for each type

Poaching

Number of incidents per year

Commercial poaching is a serious threat to conservancy benefits. The chart shows the number of incidents per category

Traps and firearms recovered

number of incidents per category

Arrests and convictions

number of incidents per category

Wildlife removals – quota use and value

Species	Quota 2017			Animals actually used in 2017						Potential Trophy Value N\$	Potential Other use Value N\$
	Total	Trophy	Other Use	Trophy	Own Use & Premium	Shoot & Sell	Capture & Sale	Problem Animal	Total Use		
Jackal	10		10								
Springbok	40		40						10		624

Potential value estimates (N\$) for species are based on:

- Potential trophy value - the average trophy value for that species in the conservancy landscape - trophy values vary depending on trophy quality, international recognition of the hunting operator and the hunting area
- Potential other use value - the average meat value for common species
- the average live sale value of each high value species (indicated with an *) [high value species are never used for meat]

Conservancies reduce environmental costs while increasing environmental returns. Returns from wildlife can far outweigh human wildlife conflict costs.

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

Species	Animals Seen 2017	Estimated population range	Wildlife Status		
			Count Trend	National Guideline	Desired Status
Elephant			Red		
Gemsbok			Red	Yellow	
Giraffe			Red	Red	
Jackal	1		Red	Green	
Klipspringer			Red	Yellow	
Kudu	1	10	Red	Orange	
Mtn. zebra			Red	Yellow	
Ostrich			Red	Yellow	
Springbok	96	816 - 1160	Orange	Yellow	
Steenbok	8	64 - 250	Green	Yellow	

Wildlife Status

Count trend – gives the species status in the conservancy based on game count trend data.

Landscape status– gives the species status in the focal landscape; for example, kudu may be seen regularly in the conservancy but may be rare at landscape level.

Desired number – gives the species status in the conservancy based on what the conservancy would like to have.

dark green (abundant) – there should be less;
light green (common) – the desired number is reached;
yellow (uncommon) – there should be more;
light orange (rare) – there should be more than double;
dark orange (very rare) – there should be more than triple;
red (extinct) – the species needs to be reintroduced.

Locally rare species

Sightings indicator

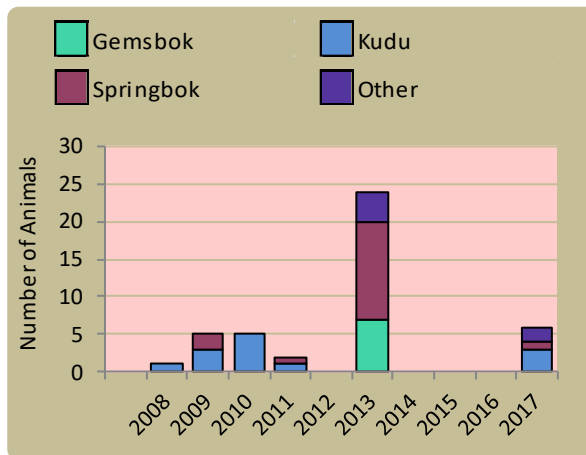

Locally rare and endangered species are not found very often in the conservancy and need special conservation attention.

Wildlife introductions

Wildlife mortalities

Annual rainfall

Annual game count

charts show the number of animals seen each year per 100 km driven during the game count status barometers reflect the general count trend over the last 5 years

Predator monitoring

charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings trend over the last 5 years

Wildlife provides a wide range of benefits. Some wildlife can cause conflicts, but all wildlife is of value to tourism, trophy hunting and a healthy environment.

By using all the available information and adapting and improving activities, threats such as human wildlife conflict, poaching and other issues can be minimised.

Enabling wise conservancy governance...

Conservancy statistics

Date Registered:	May 2008
Population (2011 census):	700
Size (square kilometres):	1923

Conservancy Governance

Number of management committee members:	Men: 4; Women: 6
Date of last AGM:	Sat, June 24, 2017
Attendance at AGM:	Men: 14; Women: 17
Date of next AGM:	Fri, November 30, 2018
Other important issues	
Financial report approved?	✓
Budget approved?	✗
Work plan approved?	✓
Chairperson's report approved?	✓

Key Compliance Requirements

Was an AGM held?	✓
Were elections held?	✗
Is there a Benefit Distribution Plan?	✗
Is there a Game Management and Utilisation Plan?	✗
Was an Annual Financial Report produced?	✓

Employment

Conservancy staff: Male	7
Female	0
Community game guards:	7
Community resource monitors:	0
Lodge staff: Male	0
Female	0

Cash

In Kind

Meat Distribution (10 Springboks)

Conservancy Self Evaluation

How well does the conservancy consider it has performed in the past year?

<i>Effectiveness of implementation</i>	<i>Poor</i>	<i>Fair</i>	<i>Good</i>	<i>Prev. Year</i>	<i>Explanation of effectiveness rating</i>
Game Management and Utilisation			✓	✗	Activities carried out and implemented as planned
Zonation Plan	✗				No plan in place
Benefit Distribution		✗			The only benefits went to the TA
Human Wildlife Conflict Management	✗			✓	No activities were implemented
Sustainable Business and Financial Planning	✗				No activities were implemented
Tourism		✗		✗	Agreement not finalised yet
Staff Management	✗			✗	Plan not implemented
Assets Management/Register	✗				Activities not implemented
HIV/AIDS	✗				Still planning activities regarding HIV/AIDS
Communication			✓	✗	Communication with all members including different stakeholders
