

Introduction

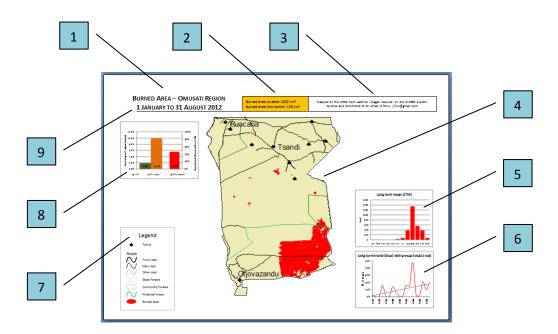

This burned area report is issued by the Directorate of Forestry's National Remote Sensing Centre on a monthly basis from June to December, and complements the active fire bulletins that are produced and distributed daily. Each report presents the burned area situation from the start of the fire season <u>up to</u> the preceding month. The first report is issued in June and shows burned areas and statistics for the period from January to May. The last report appears in December and presents the situation for the entire season up to the end of November.

Burned areas in Namibia have been mapped from NOAA AVHRR and MODIS satellite data since 1994. This 18 year data archive was used to calculate long term mean (LTM) values for each of the 13 political regions in Namibia. These LTM values represent the "normal" or expected situation in the same way that we often hear or read in the papers: "Normally, 'so many' hectares burn every year". The burned area reports compare the current situation to these "normal" values, and also present the current situation in map form. This allows the reader to see at a glance, whether the current situation in a particular region is better, worse or the same as "normal".

<u>Map layout</u>

The report has one map sheet per political region¹. All map sheets contain the following elements:

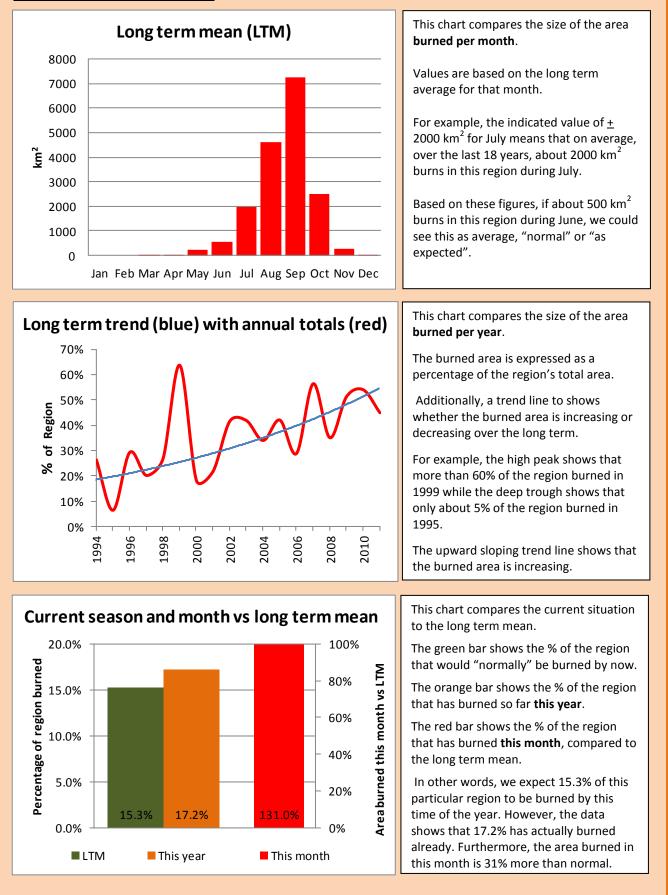

- 1. Title and political region
- 2. Burned area figures
- 3. Acknowledgement
- 4. Burned area map
- 5. Simple column chart
- 6. Line chart
- 7. Map legend
- 8. Combination column chart
- 9. Reporting period

Please note that the legend and charts may be in different positions on the map sheets, in order to fit around the shape of the region.

¹ Only those regions with a monthly LTM burned area greater than 100 km² are included in the report

Interpreting the charts

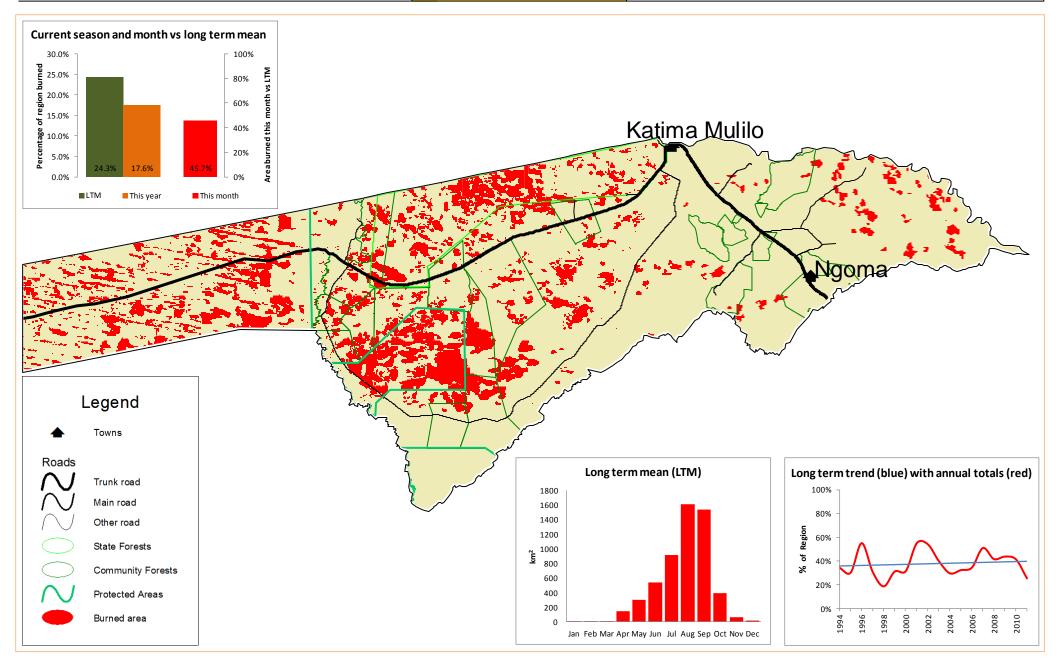

Mapping is currently done from data received on the AMESD system at the National Remote Sensing Centre.

AMESD (African Monitoring of the Environment for Sustainable Development) is implemented by the AUC and funded by the EU.

The contents of this newsletter is the sole responsibility of the NRSC and can under no circumstances be regarded as reflecting the position of the European Union.

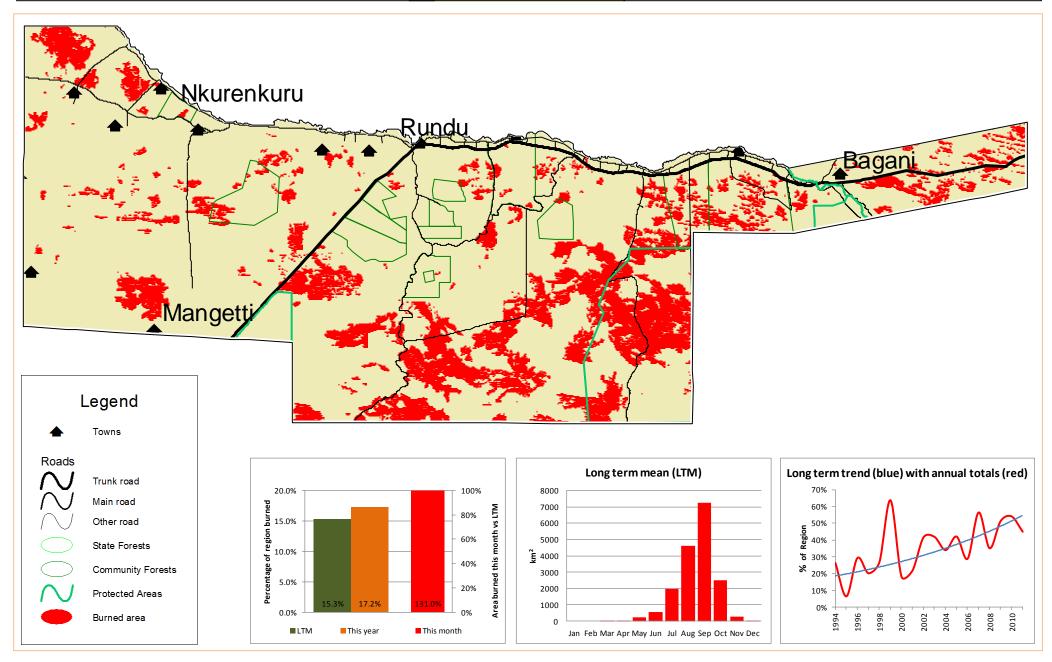

BURNED AREA – CAPRIVI REGION 1 JANUARY TO 31 AUGUST 2012

Burned area to date: 2543 km² Burned area this month: 737 km²

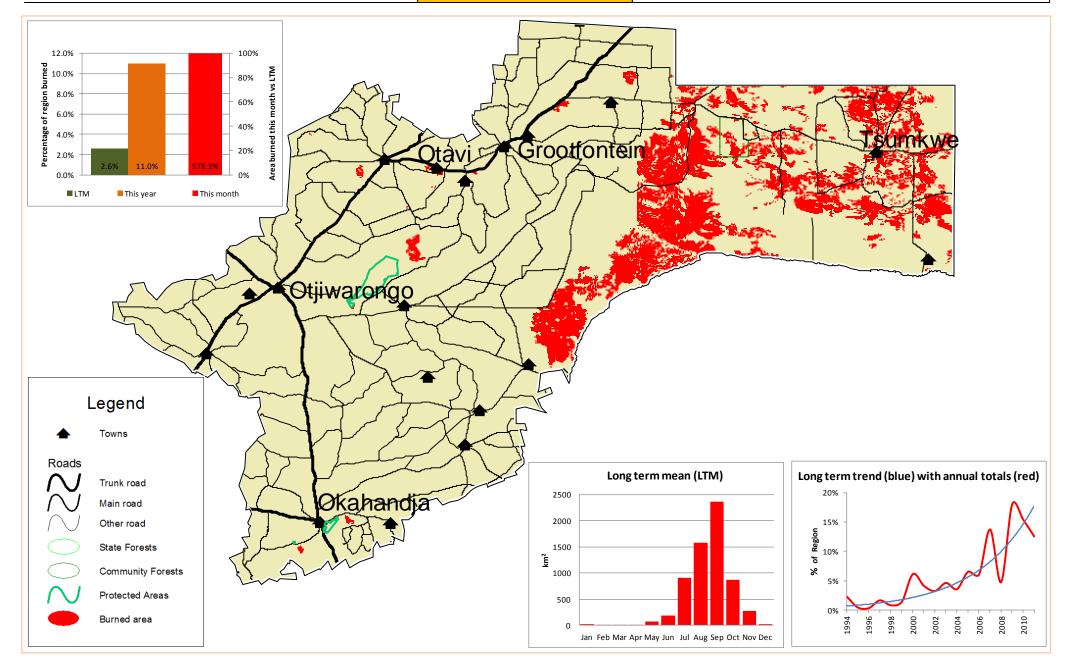

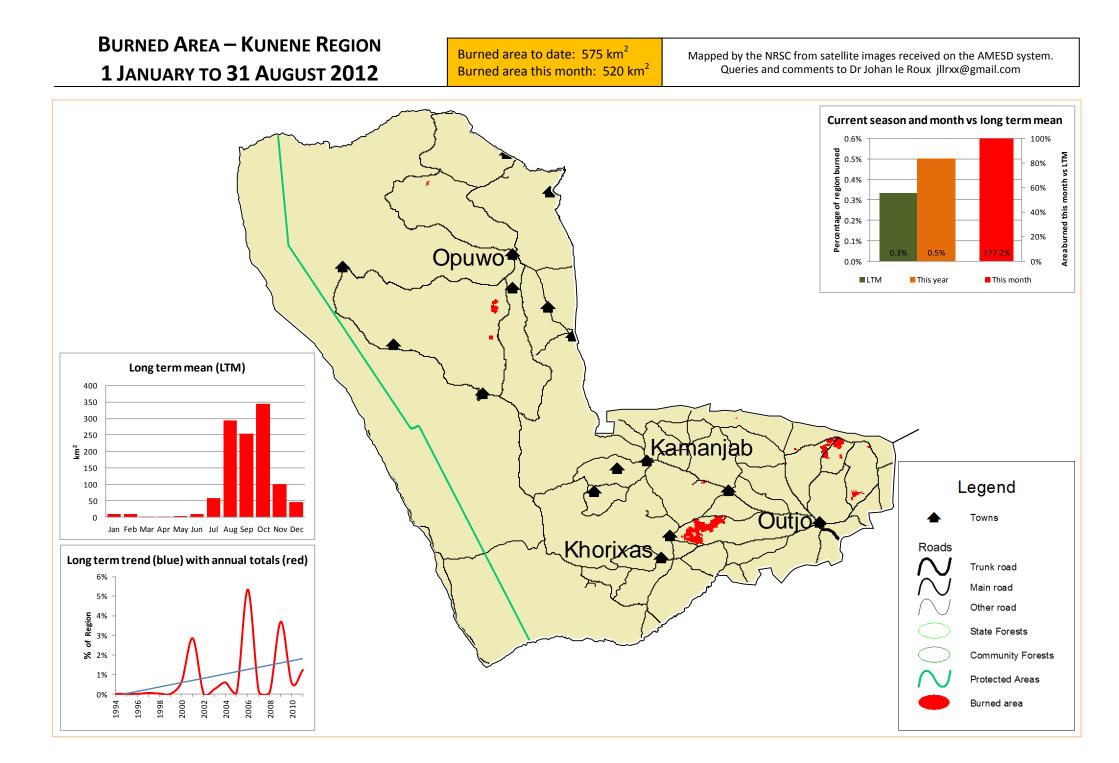

BURNED AREA – KAVANGO REGION 1 JANUARY TO 31 AUGUST 2012

Burned area to date: 8357 km² Burned area this month: 6046 km²

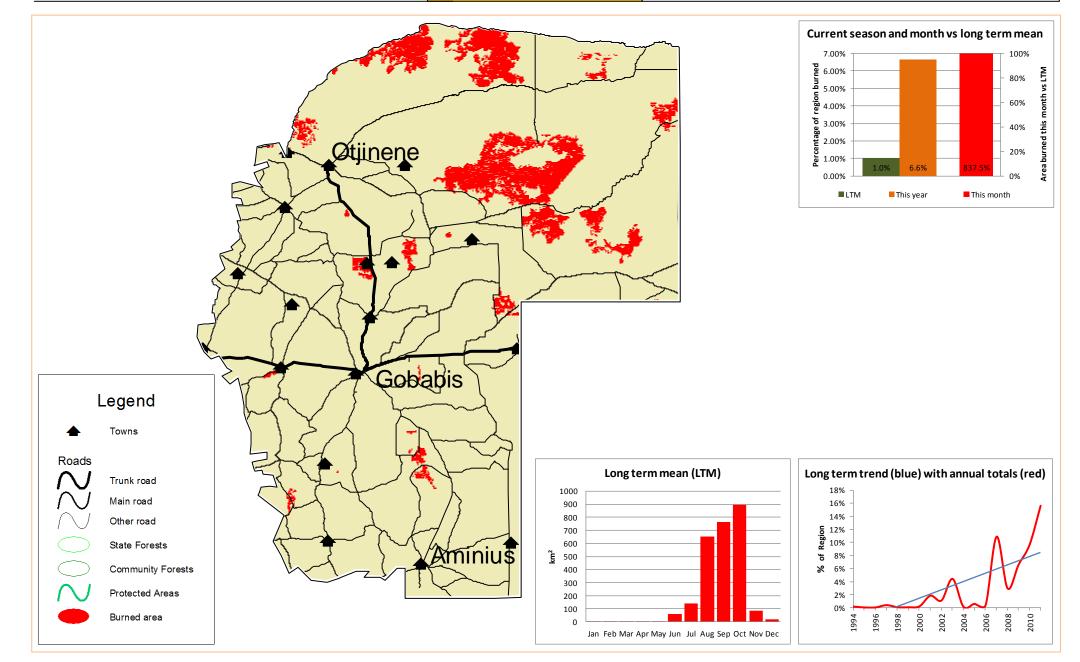

Burned area to date: 11590 km² Mapped by the NRSC from satellite images received on the AMESD system. 1 JANUARY TO 31 AUGUST 2012 Burned area this month: 9141 km² Mapped by the NRSC from satellite images received on the AMESD system.

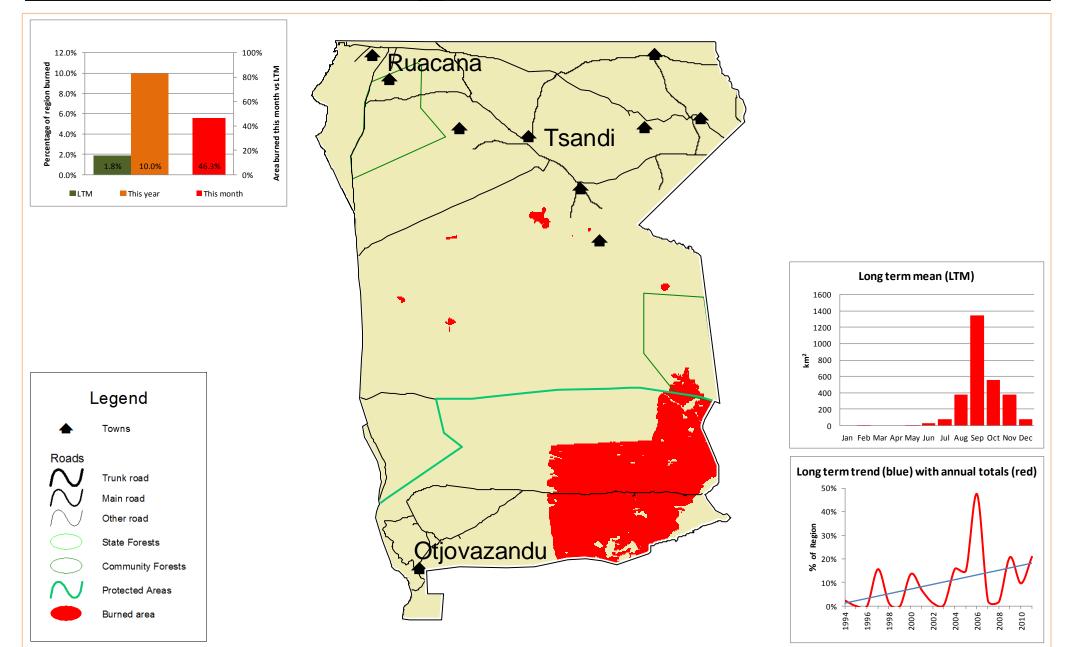

BURNED AREA – OMAHEKE REGION 1 JANUARY TO 31 AUGUST 2012

Burned area to date: 5617 km² Burned area this month: 5455 km²

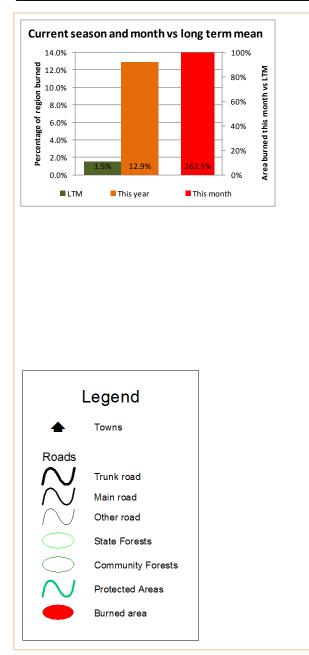

BURNED AREA – OMUSATI REGION 1 JANUARY TO 31 AUGUST 2012

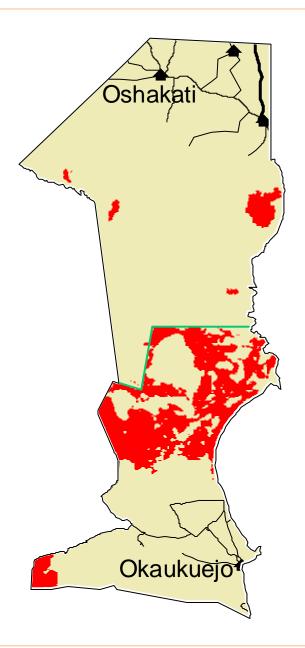

Burned area to date: 2652 km² Burned area this month: 176 km²

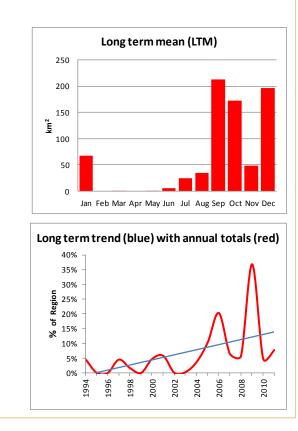

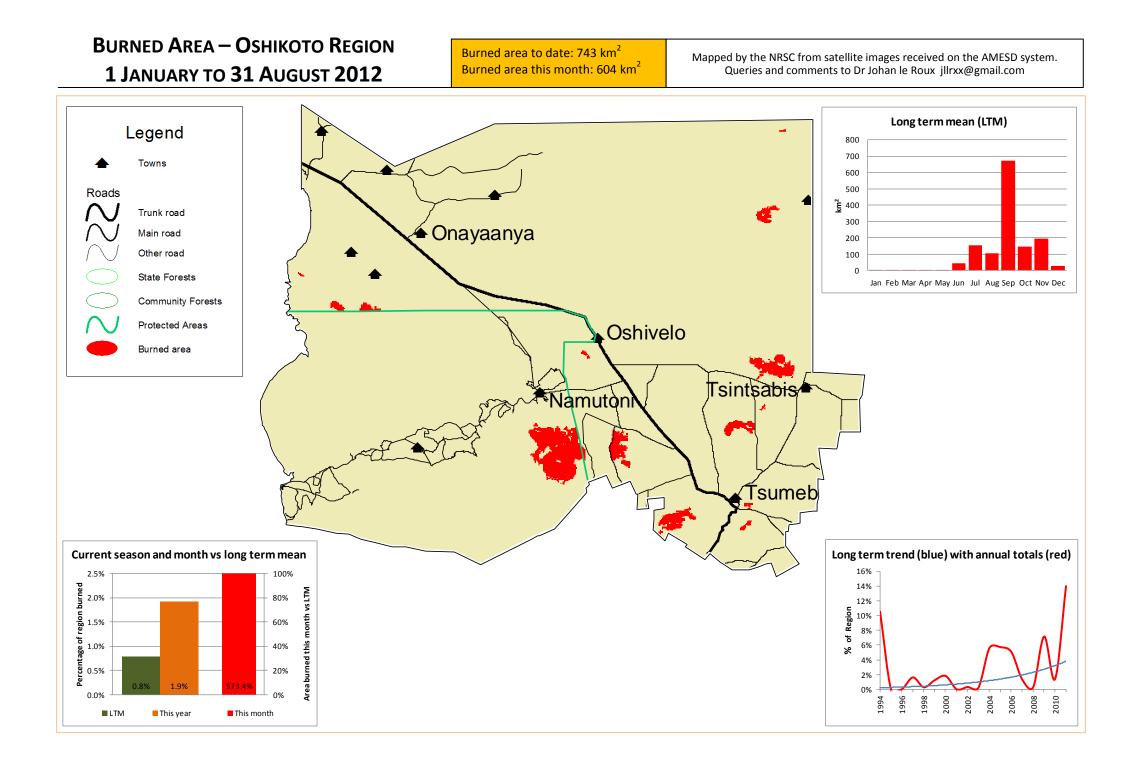

BURNED AREA – OSHANA REGION 1 JANUARY TO 31 AUGUST 2012

Burned area to date: 1119 km² Burned area this month: 93 km²
