

NARREC

Advocating human and animal welfare through cooperation by all Namibians within the framework of relevant legislation.

Two line functions:

Rehabilitation of wildlife with professional care and appropriate facilities.

Environmental Education (education for sustainable development) as both center based and outreach.

NARREC **responds to queries** and problems raised by members of the public for a range of reptile, bird and mammal species.

NARREC **encourages a cross curricular** approach to education using nature and birds of prey as the point of departure.

NARREC **provides public information** in support of biodiversity safety.

Network with MET, MAWF and PRU:

Network with international organizations:

Network with NGOs:

Network with interest groups:

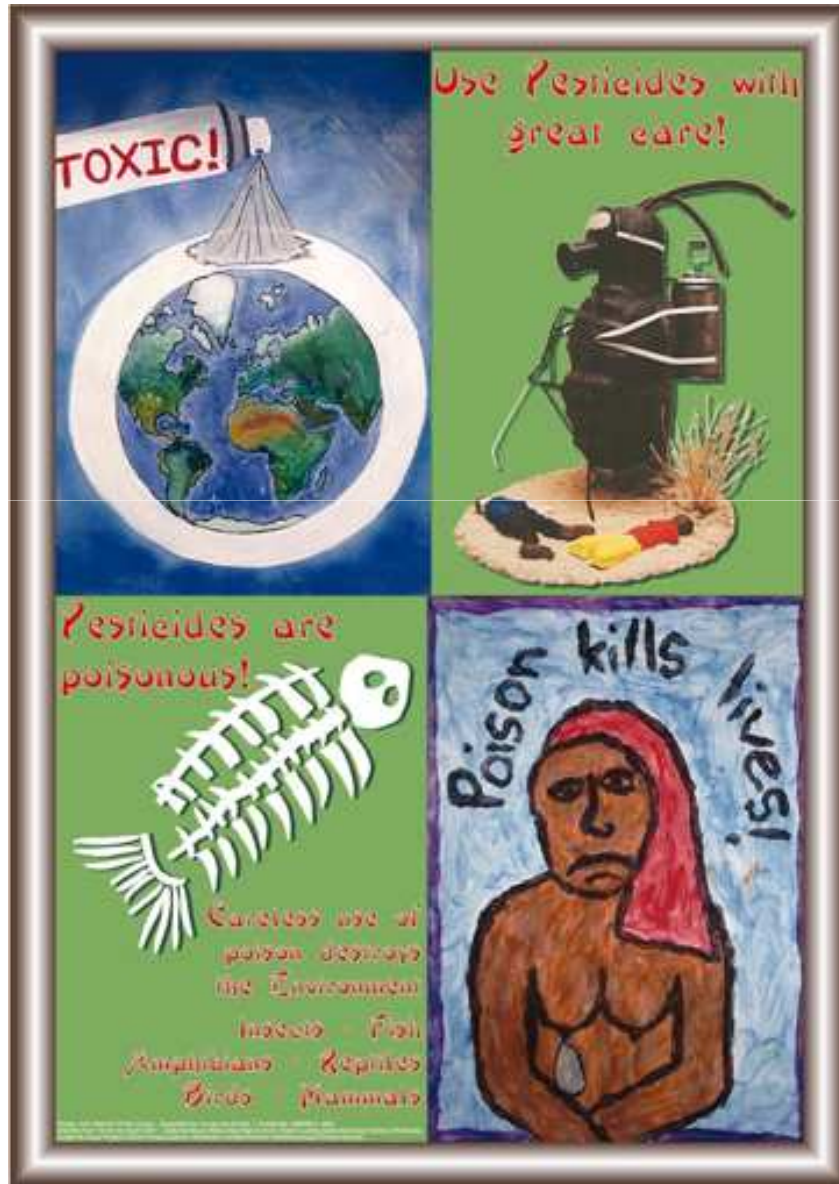

- *Poison events

- *Illegal capture and trade

- *Inappropriate holding facilities

- *Irregularities concerning CITES species

- *Facilitating general awareness

POISONS AND PESTICIDES: USING THEM RESPONSIBLY AND SAFELY

Group 1a

VERY TOXIC

Group 1b

TOXIC

Group 2

HARMFUL

Group 3

CAUTION

Group 4

Working towards advocacy and cooperation from land users concerning the use of poisons and pesticides.

BURN ANY CARCASS FOUND BLEEDING FROM THE NOSE AND/OR RECTUM.

POISONS ARE DEADLY

All poisons that kill mammalian predators will poison birds, whether the bird feeds directly on the poison bait or on an animal that has died from eating poison bait.

THE OWLS OF NAMIBIA

THE SIZE COMPARISON OF NAMIBIAN OWLS

DIE EULEN VAN NAMIBIA • DIE HULE VAN NAMIBIA • OVISIWI YVANAMIBIA • LESI ZA NAMIBIA • LAUM MAMIBIAI DIN
 ONAZOVI ANAMIBIA • OLANHWIYO DANAMIBIA • OAKAKOVI VANAMIBIA • MERVUCI YA NAMIBIA

Open to school, youth and family groups for center based information and fun.

From preprimary students through to tertiary level. NARREC provides a live animal display of about 20 species in a natural environment setting to facilitate the understanding of basic ecology, individual conservation issues and development using alternate methods and technologies.
