TWO male suspects were arrested on Thursday in connection with the poaching of 11 rhinos in Etosha National Park.

This was confirmed by the Ministry of Environment, Forestry and Tourism spokesperson, Romeo Muyunda.

"They were arrested yesterday and, at this stage, no further information can be given as investigations are still premature," Muyunda said.

Earlier this week, the ministry issued a statement saying the carcasses were discovered during ongoing operations in Etosha National Park.

The carcasses are suspected to be three weeks and older, according to the report.
