

GAME COUNTS IN NORTH-WEST NAMIBIA

Hobatere concession

May 2023

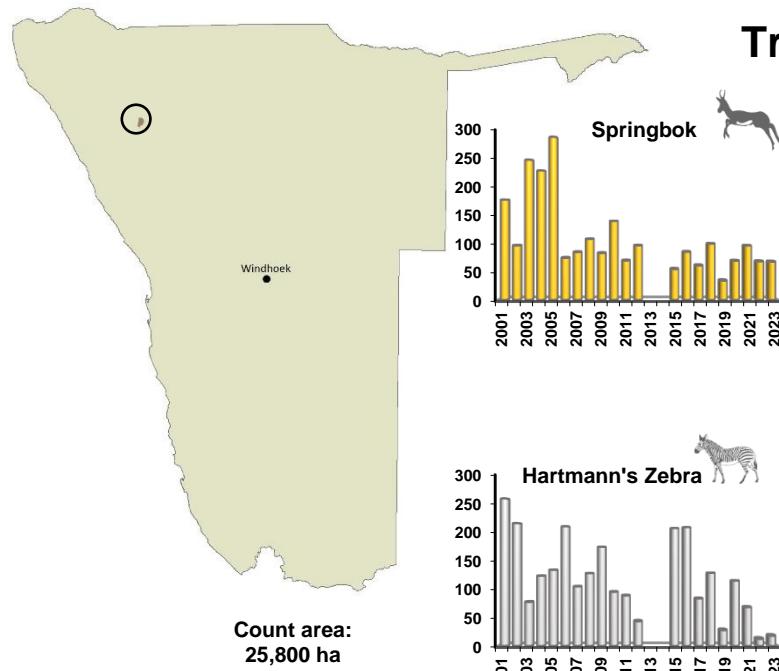

No counts were undertaken in 2013 and 2014.

Total Population Estimates

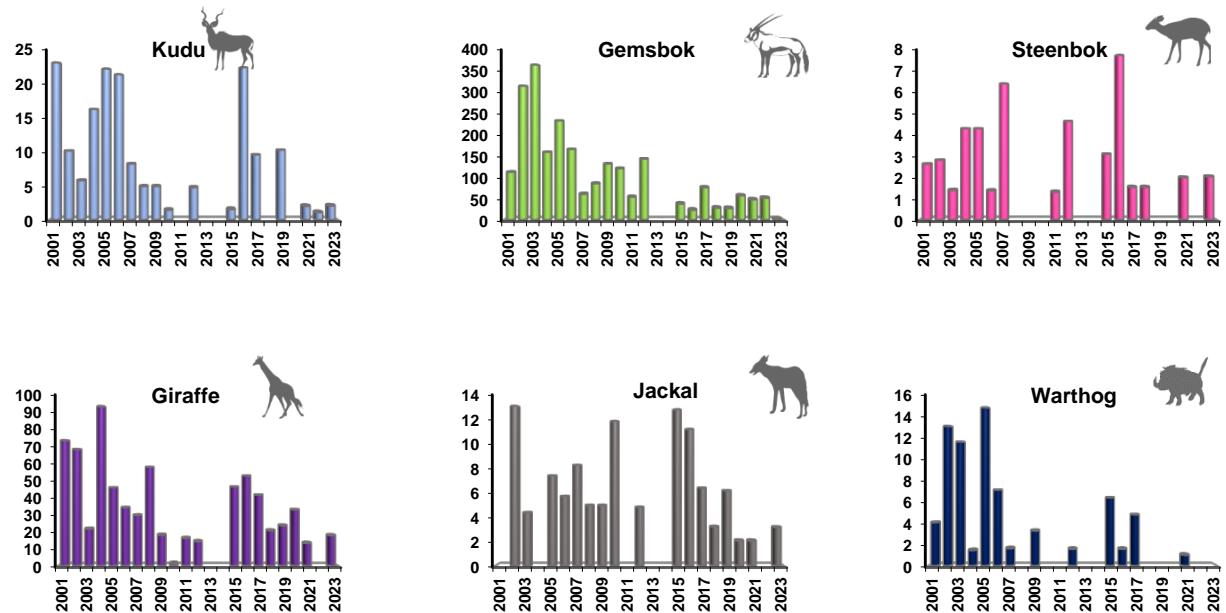

Species	Population estimate	Upper 95% CL
Gemsbok (U)	14	180
Kudu (HN)	16	76
Springbok (HN)	507	2,580
Hartmann's Zebra (HN)	73	230

All above estimates are derived using DISTANCE analysis. This takes account of drop off in detection with distance from the transect line. Model selection: U = uniform key; HN = half normal

Species	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2015	2016	2017	2018	2019	2020	2021	2022	2023

Trends - Number of animals per 100km

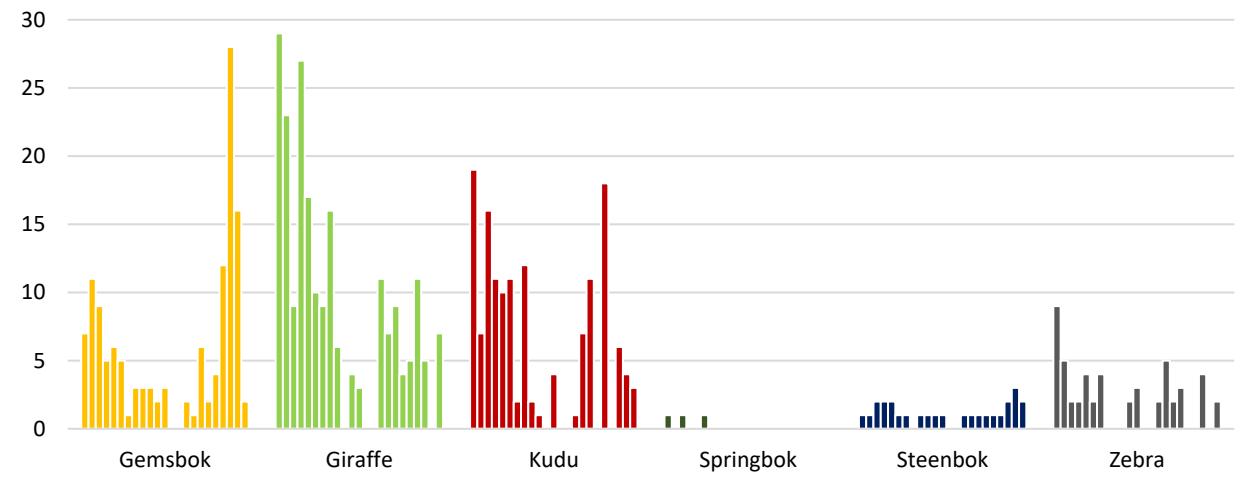

Animals seen during this count and minimum estimates

Values without brackets are numbers of animals seen along transects. Values inside brackets are minimum estimates assuming all animals within 500m on each side of the transect line are detected i.e. there is no adjustment for drop off in detection with distance from the transect line.

These values are significantly lower than the totals indicated in the top left table as the total estimates take account of species detection curves.

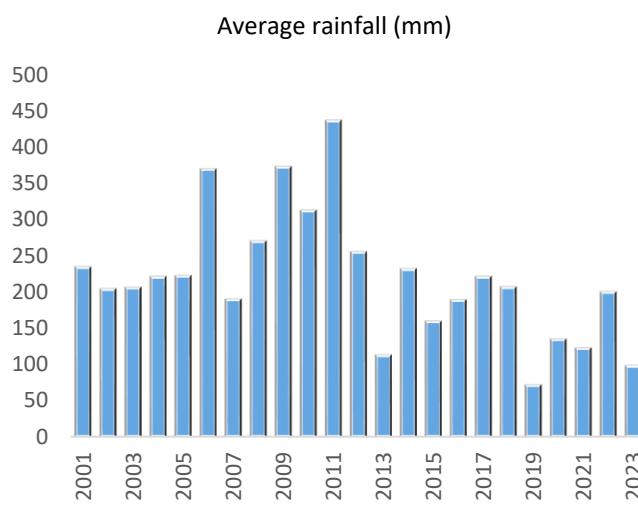

Species	Gemsbok	1 (7)
Giraffe	17 (35)	
Kudu	2 (5)	
Ostrich		
Springbok	64 (148)	
Steenbok	2 (4)	
H. Zebra	13 (16)	

Percentage of all animals counted in the NW (north of the vet fence): 2001-2023

The dramatic spike in the proportion of gemsbok seen in Hobatere relative to the rest of the north-west reflected the overall decline in animal numbers in communal conservancies. By 2023 numbers of gemsbok in all sub areas of the north-west were very low, even in the concession areas.

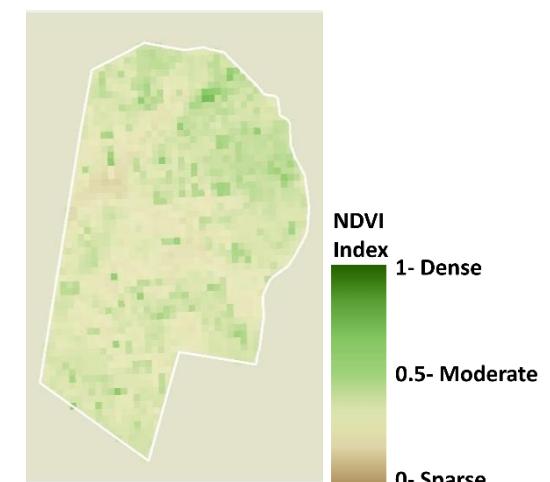

Rainfall

The rainfall season is from July to June and values are an average for the whole area.

Vegetation

NDVI - percentage difference from long term mean

NDVI is a measure of the density of chlorophyll in vegetation cover. It can be used as an indicator of the amount of biomass available to wildlife. The map shows the NDVI status in the current year (Feb-Apr) and the trend indicates the average deviation of the concession from the long-term mean, in each year.
