

Conservancy status

the chart shows the main benefit sources and values and their percentage of the total benefits

| Benefit Category | Amount (N\$) | Percentage (%) |
|--------------------------------|--------------|----------------|
| Combined tourism benefits | N\$ 0 | 0 % |
| Combined hunting benefits | N\$ 36,900 | 21 % |
| Veld product benefits | N\$ 15,860 | 9 % |
| Other benefits (e.g. interest) | N\$ 125,870 | 70 % |

Two of the most significant benefits for the conservancy:

- ✓ cash income to the conservancy to cover running costs and invest in developments
- ✓ employment benefits to conservancy residents

| | | | |
|------------------------|----------------|----------|-------------|
| Conservancy income | | | N\$ 178,630 |
| Employment benefits | Private Sector | | |
| | Conservancy | 14 staff | N\$ 55,350 |

estimates are based on average national values

| | |
|---|-------------------|
| Estimated human wildlife conflict cost | N\$ 22,410 |
| Estimated poached high value species loss | N\$ 0 |
| Total conflict cost estimate | N\$ 22,410 |

the chart shows the approximate ratio of benefits to costs

* The annual data collection process results in a lag of 1 year for income data *

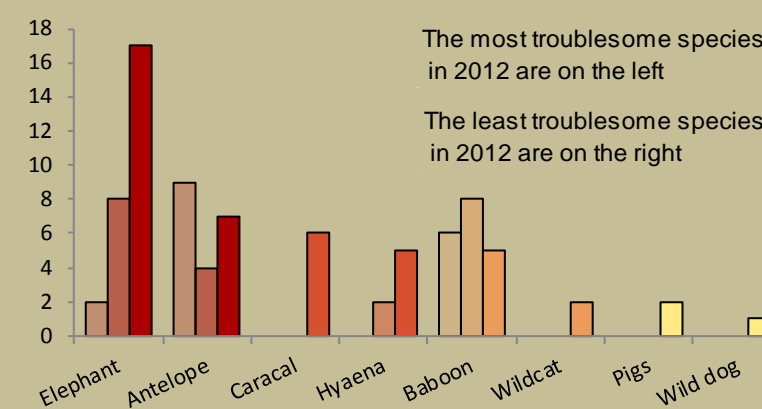

| Category | Score | Performance | | |
|--------------------------------|-------|-------------|--|--|
| 1 Adequate staffing | 2 | | | |
| 2 Adequate expenditure | 2 | | | |
| 3 Audit attendance | 5 | | | |
| 4 NR management plan | 2 | | | |
| 5 Zonation | 2 | | | |
| 6 Leadership | 2 | | | |
| 7 Display of material | 2 | | | |
| 8 Event Book modules | 3 | | | |
| 9 Event Book quality | 2 | | | |
| 10 Compliance | 2 | | | |
| 11 Game census | 2 | | | |
| 12 Reporting & adaptive m/ment | 2 | | | |
| 13 Law enforcement | 2 | | | |
| 14 Human Wildlife Conflict | 3 | | | |
| 15 Sources of NR income | 2 | | | |
| 16 Benefits produced | 2 | | | |
| 17 Resource Sustainability | 2 | | | |

| Animal | Number of Sightings |
|----------|---------------------|
| B. Zebra | 2 |
| Duiker | 4 |
| Elephant | 10 |
| Giraffe | 4 |
| Impala | 2 |
| Kudu | 10 |
| Roan | 4 |
| Sable | 2 |
| Steenbok | 10 |
| Warthog | 4 |

the chart shows the total number of incidents each year, subdivided by species, grouped as herbivores and predators

the chart shows the number of incidents per species for the last 3 years;
the darkest bar (on the right) indicates the current year for each species

the chart shows the number of incidents per category for the last 3 years; the darkest bar (on the right) indicates the current year for each type

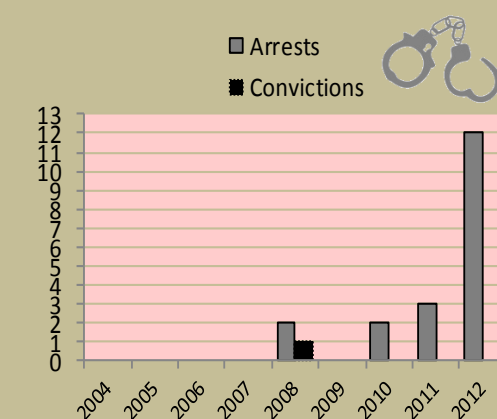

Commercial poaching is a serious threat to conservancy benefits. The chart shows the number of incidents per category

number of incidents per category

number of incidents per category

[illegible]

Potential value estimates (N\$) for quotas are based on:

- **Potential trophy value** - the average national trophy value of each trophy species multiplied by the quota number
- **Potential other use value** - the average national meat value of each common species multiplied by the quota number
 - the average live sale value of each high value species (indicated with an *) multiplied by the quota number
 - high value species are never used for meat

Wildlife status

extinct very rare rare uncommon common abundant

weak/bad reasonable good

Management performance & other data

Success/threat flags

 success/
benefit created

 weakness/
action needed

Conservancies reduce environmental costs while increasing environmental benefits. Benefits from wildlife can far outweigh human wildlife conflict costs.

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

| Species | Animals Seen | Estimate | Wildlife Status | | |
|----------|--------------|----------|-----------------|--------------------|----------------|
| | | | Count Trend | National Guideline | Desired Number |
| B. Zebra | | | | | |
| Duiker | | | | | |
| Elephant | | | | | |
| Giraffe | | | | | |
| Impala | | | | | |
| Kudu | | | | | |
| Roan | | | | | |
| Sable | | | | | |
| Steenbok | | | | | |
| Warthog | | | | | |

Wildlife Status

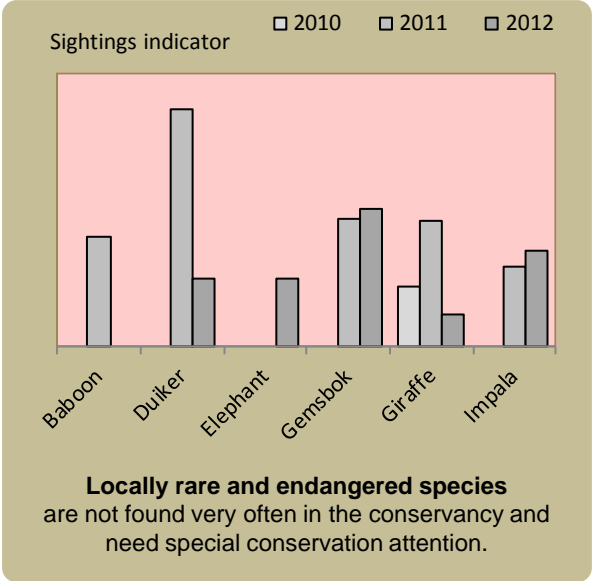

Count trend – gives the species status in the conservancy based on game count trend data.

National guideline – gives the species status in the conservancy using national guidelines for the conservancy; for example, lions may cause local problems, but are of high value and are rare at landscape level.

Desired number – gives the species status in the conservancy based on what the conservancy would like to have.

dark green (abundant) – there should be less;
light green (common) – the desired number is reached;
yellow (uncommon) – there should be more;
light orange (rare) – there should be more than double;
dark orange (very rare) – there should be more than triple;
red (extinct) – the species needs to be reintroduced.

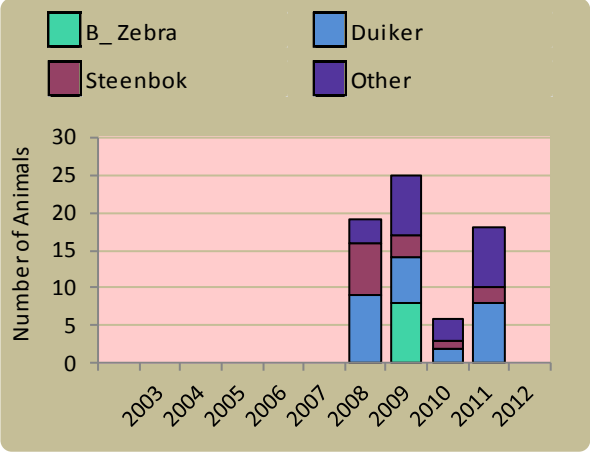

Locally rare species

Wildlife introductions

Wildlife mortalities

Annual rainfall

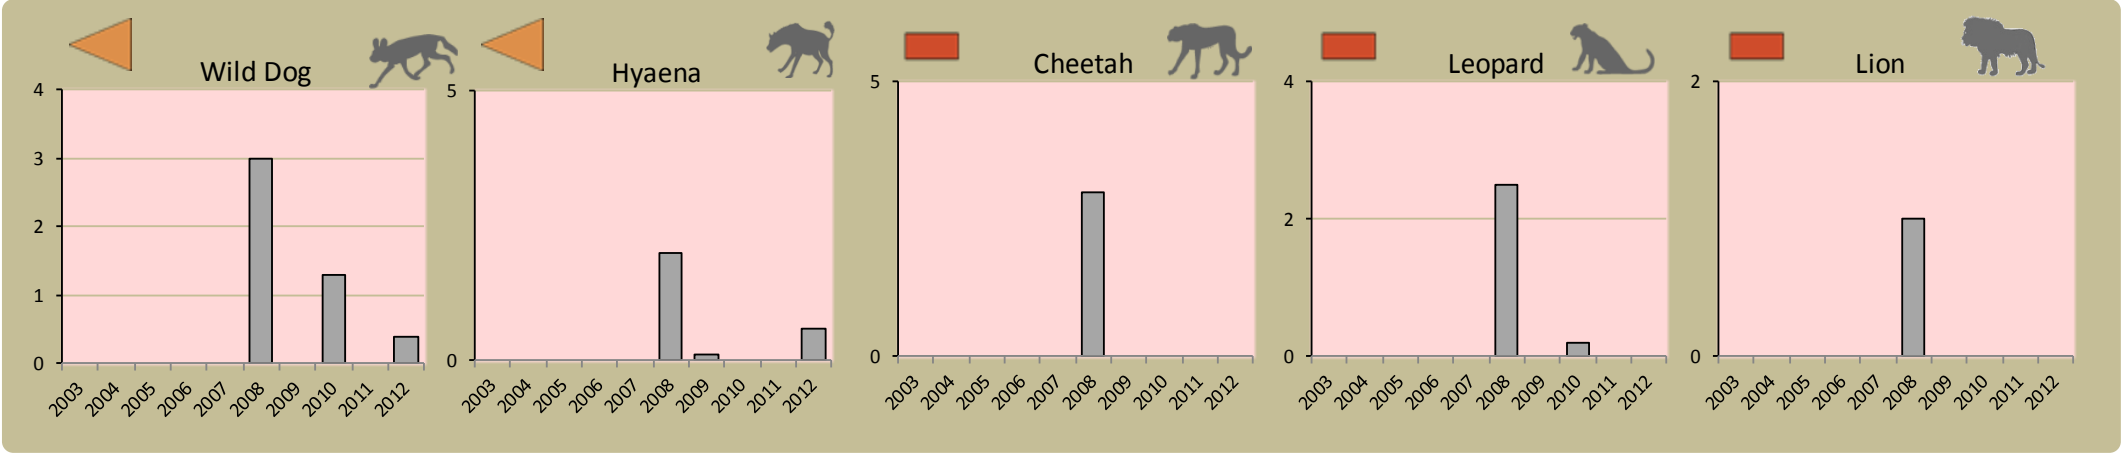

Fixed route patrols

charts show the number of sightings of each species per fixed route foot patrol each year

Predator monitoring

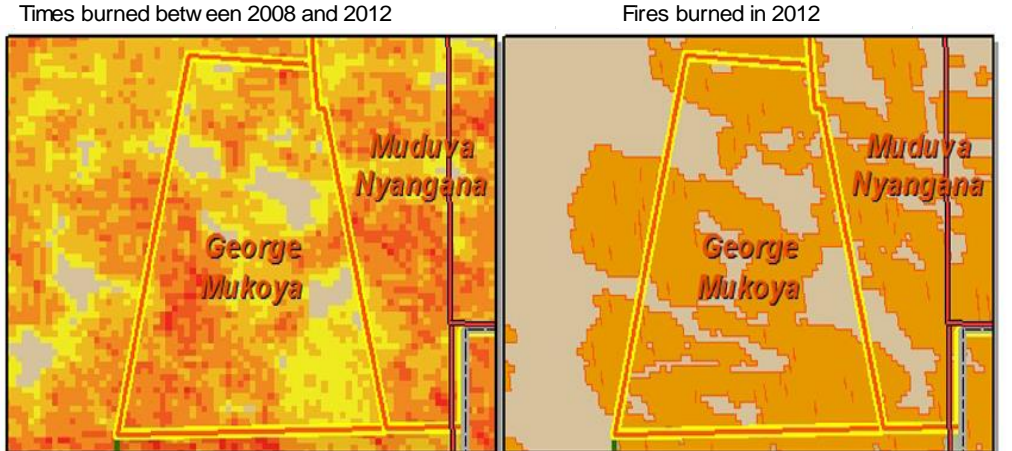

charts show the average number of animals seen per Event Book each year
status barometers reflect the general sightings trend over the last 5 years

Vegetation monitoring

Fire monitoring

Wildlife provides a wide range of benefits. Some wildlife can cause conflicts, but all wildlife is of value to tourism, trophy hunting and a healthy environment.

By using all the available information and adapting and improving activities, threats such as human wildlife conflict, poaching and other issues can be minimised.
