Wildlife Use

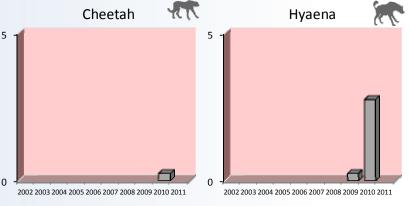

Wildlife Introductions

Mortalities

Species	Quota		Utilisation						Year	Species	Number	
	Total	Trophy	Own Use / Premium	Trophy	Shoot & Sell	Capture	Problem	Total Used	2009	Gemsbok	37	
							Animal		2009	Hartebeest	37	

<u>iviortanties</u>					
Species	Animals dead				

Predator sightings

The index (Y-axis) is calculated as the number of sightings per event book

Wild Dog Leopard 1 2002 2003 2004 2005 2006 2007 2008 2009 2010 2011

Locally rare species are those which are currently infrequently observed in the conservancy. Mortalities are dead animals found on patrol

Species	Animals seen

Natural Resource Management

Performance:

Perio	rmance
Weak	Good

Red bars indicate weak areas in the conservancy management performance which need to be addressed. Green bars indicate positive management performance.

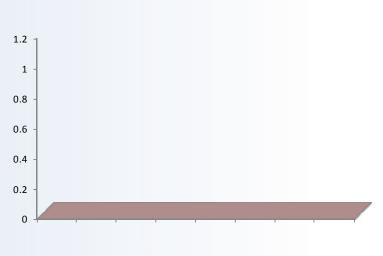

Effort: Number of Community Game Guards:

Threats

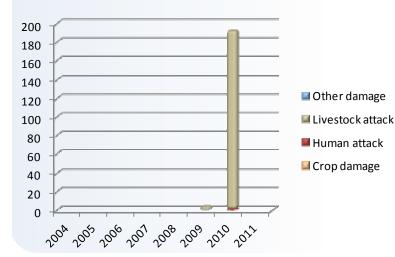

Human-Wildlife Conflict

Species	2004	2005	2006	2007	2008	2009	2010	2011
Cheetah							1	
Hyaena						1	18	
Jackal						2	75	
Leopard							4	
Wild dog							5	

Species

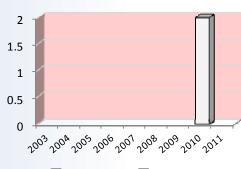

Damage

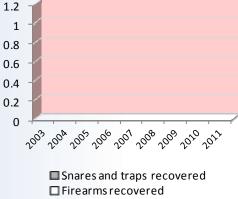

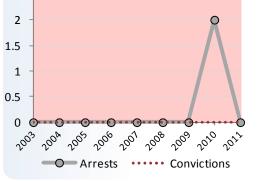

Poaching

□ Commercial □ Subsistence

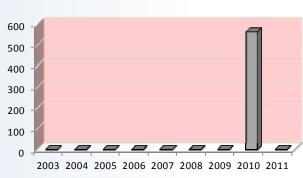

The species chart indicates the most troublesome to least troublesome conflict species in the conservancy. The Y-axis in **HWC** and poaching charts represents number of incidents.

Environmental monitoring

Rainfall (mm)

Years with no bars indicate gaps in data collection
