maximising wildlife benefits by minimising threats...

Conservancy status

Benefits from natural resources in 2011

the chart shows the main benefit sources and values and their percentage of the total benefits

Approximate Total Benefits N\$ 1,057,990

Two of the most significant benefits for the conservancy:

- √ cash income to the conservancy to cover running costs and invest in developments
- ✓ employment benefits to conservancy residents

Conservancy	145 033,33U		
Employment	Private Sector	11 staff	N\$ 98,400
benefits	Conservancy	41 staff	N\$ 499,920

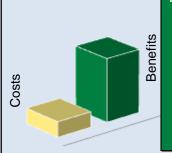

Cost of natural resource conflicts in 2011

estimates are based on average national values

Total conflict cost estimate	N\$ 256,220
Estimated poached high value species loss	N\$ 169,220
Estimated human wildlife conflict cost	N\$ 87,000

Natural resource cost-benefit ratio in 2011

the chart shows the approximate ratio of benefits to costs

Natural resource benefits outweigh approximate conflict costs

Total benefits: N\$ 1,057,990

Approximate conflict costs: N\$ 256,220

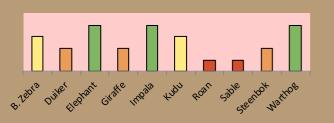

Approximate positive ratio 4 : 1

* The annual data collection process results in a lag of 1 year for income data *

Management performance in 2012

Category	Score	Performance				
1 Adequate staffing	3					
2 Adequate expenditure	3					
3 Audit attendance	6					
4 NR management plan	1					
5 Zonation	1					
6 Leadership	3					
7 Display of material	2					
8 Event Book modules	4					
9 Event Book quality	2					
10 Compliance	3					
11 Game census	3					
12 Reporting & adaptive m/ment	4					
13 Law enforcement	4					
14 Human Wildlife Conflict	3					
15 Sources of NR income	2					
16 Benefits produced	2					
17 Resource Sustainability	2					

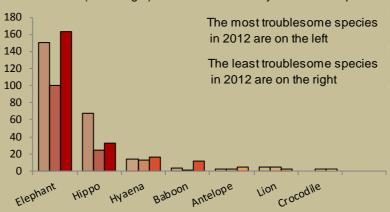

Wildlife status summary in 2012

Human wildlife conflict

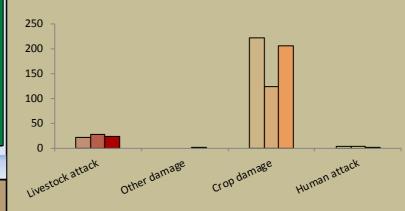

Most troublesome problem animals 2010-2012

the chart shows the number of incidents per species for the last 3 years; the darkest bar (on the right) indicates the current year for each species

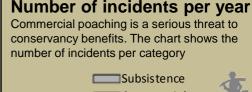

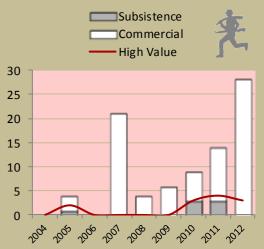

Type of damage by problem animals 2010-2012

the chart shows the number of incidents per category for the last 3 years; the darkest bar (on the right) indicates the current year for each type

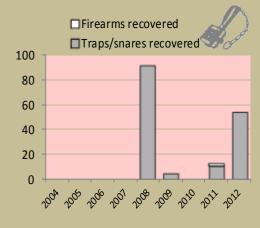

Poaching

Traps and firearms recovered

number of incidents per category

Arrests and convictions

number of incidents per category

Wildlife removals – quota use and value

	Quota 2012					Animals actually used in 2012						
Species	Total	Potential Total Value N\$	Trophy	Potential Trophy Value N\$	Other Use	Potential Other use Value N\$	Trophy	Own Use & Premium	Shoot & Sell	Capture & Sale	Problem Animal	Total Use
Buffalo	4	159,275	3	159,000	1	275						
Elephant*	9	744,486	6	734,946			6	3			2	12
Нірро	4	60,089	3	59,814	1	275	1				2	3
Hyaena	2	5,962	2	5,962								
Impala	25	17,950	10	17,440	15	510	1	7				11
Kudu	3	8,601	2	8,472	1	129		1				1
Warthog	9	7,587	3	7,467	6	120		4				4
Waterbuck	1		1				1		1			2
Wildebeest	5	14,870	4	14,740	1	130	1	2				3
B. Zebra	80	51,590	10	39,340	70	12,250	4			70		74

Potential value estimates (N\$) for quotas are based on:

- Potential trophy value the average national trophy value of each trophy species multiplied by the quota number
- Potential other use value the average national meat value of each common species multiplied by the quota number the average live sale value of each high value species (indicated with an *) multiplied by the quota number
- high value species are never used for meat

Key to the status barometer

weak/bad reasonable good Management performance & other data

Success/threat flags

action needed

Conservancies reduce environmental costs while increasing environmental benefits.

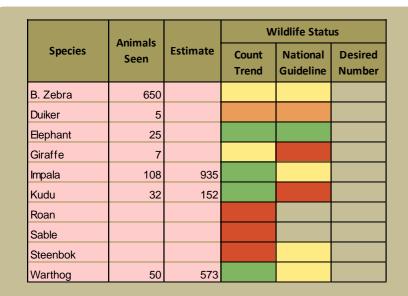

Benefits from wildlife can far outweigh human wildlife conflict costs.

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

40

20

Wildlife Status

Count trend – gives the species status in the conservancy based on game count trend data.

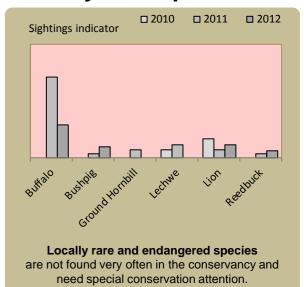

National guideline - gives the species status in the conservancy using national guidelines for the conservancy; for example, lions may cause local problems, but are of high value and are rare at landscape level.

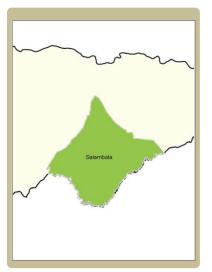

Desired number – gives the species status in the conservancy based on what the conservancy would like to have.

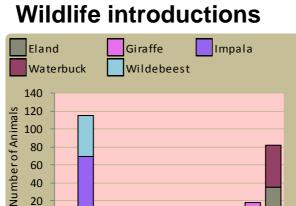

dark green (abundant) - there should be less; light green (common) - the desired number is reached; yellow (uncommon) - there should be more;

light orange (rare) - there should be more than double; dark orange (very rare) - there should be more than triple; red (extinct) - the species needs to be reintroduced.

Locally rare species

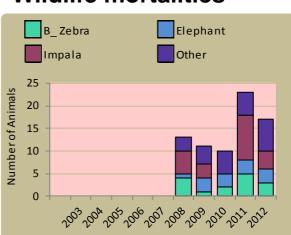

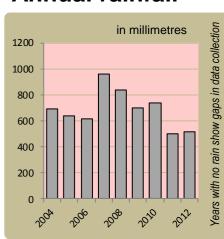

2003 2004 2005 2006 2001 2008 2019 2019

Wildlife mortalities

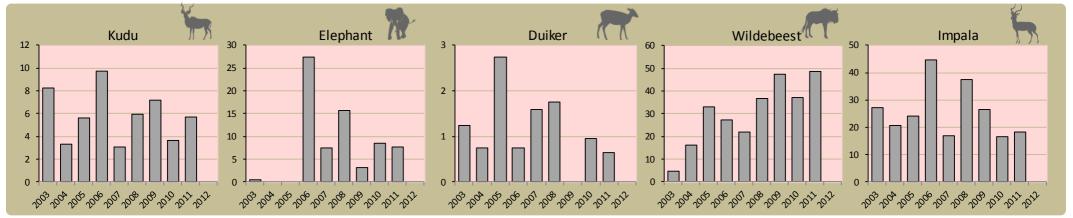

Annual rainfall

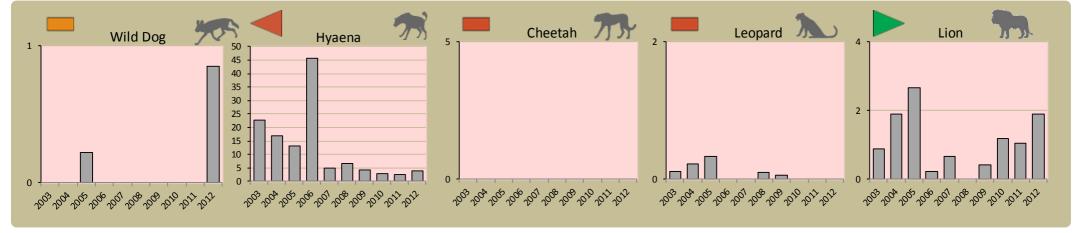

Fixed route patrols

charts show the number of sightings of each species per fixed route foot patrol each year

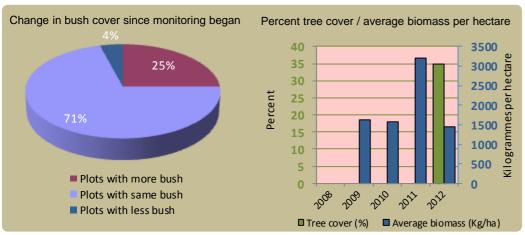

Predator monitoring

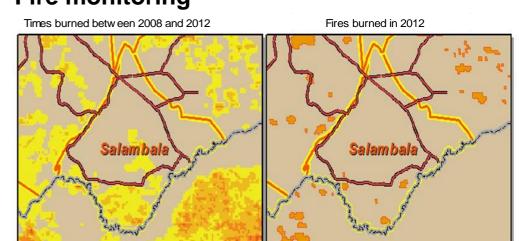

charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings trend over the last 5 years

Vegetation monitoring

Fire monitoring

Wildlife provides a wide range of benefits. Some wildlife can cause conflicts, but all wildlife is of value to tourism, trophy hunting and a healthy environment.

By using all the available information and adapting and improving activities, threats such as human wildlife conflict, poaching and other issues can be minimised.
