Sesfontein

Annual Natural Resource Report

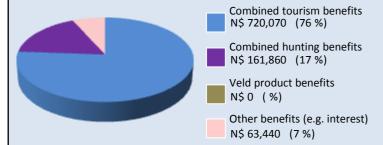

maximising wildlife benefits by minimising threats...

Conservancy status

Benefits from natural resources in 2011

the chart shows the main benefit sources and values and their percentage of the total benefits

Approximate Total Benefits N\$ 945,370

Two of the most significant benefits for the conservancy:

- √ cash income to the conservancy to cover running costs and invest in developments
- ✓ employment benefits to conservancy residents

Conscivancy	149 300,400		
Employment	Private Sector	21 staff	N\$ 250,400
benefits	Conservancy	12 staff	N\$ 190,250

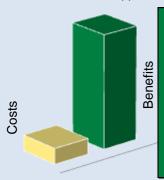

Cost of natural resource conflicts in 2011

estimates are based on average national values

· ·			
Estimated human wildlife conflict cost	N\$ 129,980		
Estimated poached high value species loss	N \$ 0		
Total conflict cost estimate	N\$ 129,980		

Natural resource cost-benefit ratio in 2011

the chart shows the approximate ratio of benefits to costs

Natural resource benefits outweigh approximate conflict costs

> **Total benefits:** N\$ 945.370

Approximate conflict costs: N\$ 129,980

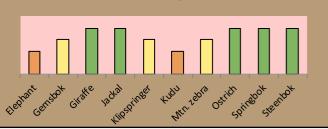

Approximate positive ratio 7:1

* The annual data collection process results in a lag of 1 year for income data *

Wildlife status summary in 2012

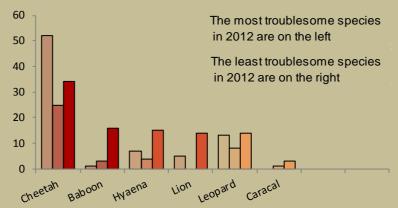

Human wildlife conflict

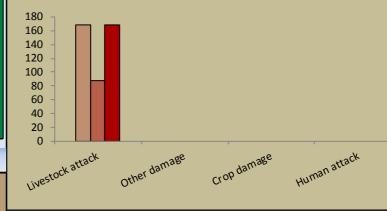

Most troublesome problem animals 2010-2012

the chart shows the number of incidents per species for the last 3 years; the darkest bar (on the right) indicates the current year for each species

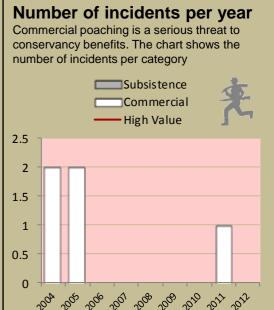

Type of damage by problem animals 2010-2012

the chart shows the number of incidents per category for the last 3 years; the darkest bar (on the right) indicates the current year for each type

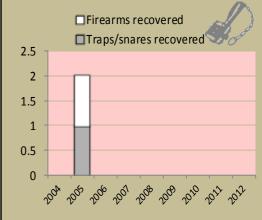

Poaching

Traps and firearms recovered

number of incidents per category

Arrests and convictions

number of incidents per category

Wildlife removals – quota use and value

	Quota 2012						Animals actually used in 2012					
Species	Total	Potential Total Value N\$	Trophy	Potential Trophy Value N\$	Other Use	Potential Other use Value N\$	Trophy	Own Use & Premium	Shoot & Sell	Capture & Sale	Problem Animal	Total Use
Baboon	4	1,076	4	1,076								
Cheetah	1		1									
Gemsbok	90	55,680	20	48,120	70	7,560		19	40			59
Giraffe	2	14,110	2	14,110								
Hyaena	1	2,981	1	2,981								
Jackal	2	314	2	314								
Ostrich	4	2,134	2	2,074	2	60			2			2
Springbok	135	30,410	20	27,420	115	2,990		30	76			106
Mtn Zebra	10	18,280	5	17,450	5	830			5			5

Potential value estimates (N\$) for quotas are based on:

- · Potential trophy value the average national trophy value of each trophy species multiplied by the quota number
- · Potential other use value the average national meat value of each common species multiplied by the quota number
- the average live sale value of each high value species (indicated with an *) multiplied by the quota number
- high value species are never used for meat

Key to the status barometer

Wildlife status extinct very rare rare uncommon common abundant weak/bad reasonable good Management performance & other data

Success/threat flags

success/ benefit created

weakness/

action needed

Conservancies reduce environmental costs while increasing environmental benefits. Benefits from wildlife can far outweigh human wildlife conflict costs.

Not all data or species are shown on this report; use your Event Book for more information

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

	Animals Seen 2012	Raı	nge	Wildlife Status			
Species		Minimum Estimate	Likely Estimate	Count Trend	National Guideline	Desired Number	
Elephant	5	5 -	40				
Gemsbok	233	1178 -	- 2370				
Giraffe	27	41 -	- 80				
Jackal	4	4 -	30				
Klipspringer							
Kudu							
Mtn. zebra	49	174 -	- 170				
Ostrich	41	224 -	- 330				
Springbok	316	1837 -	- 4370				
Steenbok	6	4 -	40				

Wildlife Status

Count trend – gives the species status in the conservancy based on game count trend data.

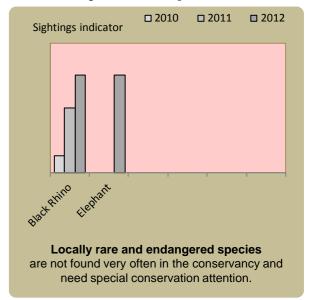

National guideline – gives the species status in the conservancy using national guidelines for the conservancy; for example, lions may cause local problems, but are of high value and are rare at landscape level.

Desired number – gives the species status in the conservancy based on what the conservancy would like to have.

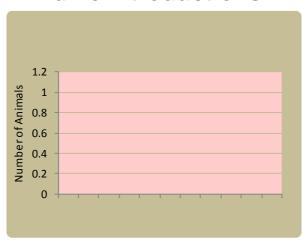

dark green (abundant) - there should be less; light green (common) - the desired number is reached; yellow (uncommon) - there should be more;

light orange (rare) – there should be more than double; dark orange (very rare) – there should be more than triple; red (extinct) – the species needs to be reintroduced.

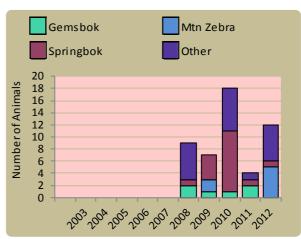

Locally rare species

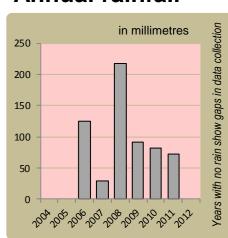

Wildlife introductions

Wildlife mortalities

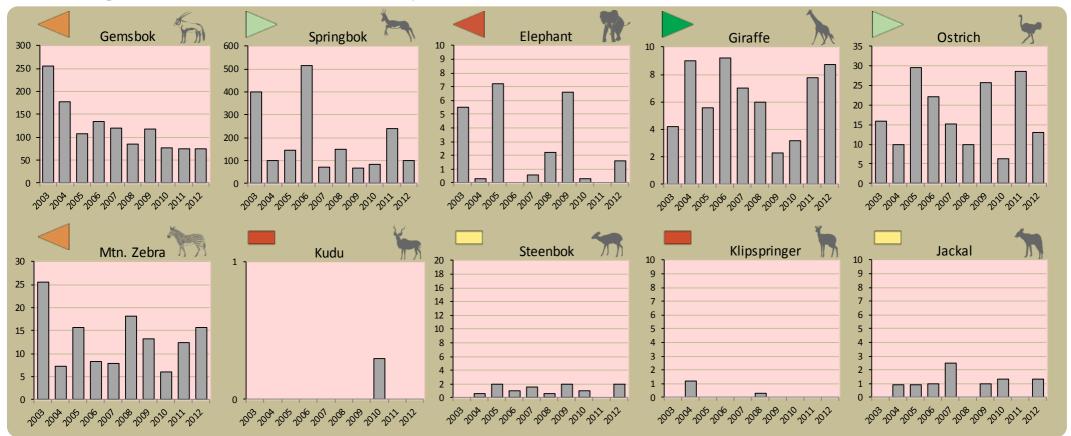

Annual rainfall

Annual game count

charts show the number of animals seen each year per 100 km driven during the game count status barometers reflect the general count trend over the last 5 years

Predator monitoring

charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings trend over the last 5 years
