

# Annual Natural Resource Report

## Wildlife Trends

## Game counts

## Wildlife Populations

## Locally rare species

*Locally rare species  
are those which are  
currently  
infrequently  
observed in the  
conservancy.*

## *Mortalities recorded during patrols*

## Mortalities

*Data from the annual game count. The Y-axis represents the number of animals seen per 100km driven.*

Photo: V. Guillemin

## Predator sightings

The index (Y-axis) is calculated as the number of sightings per event book

## Wildlife Use

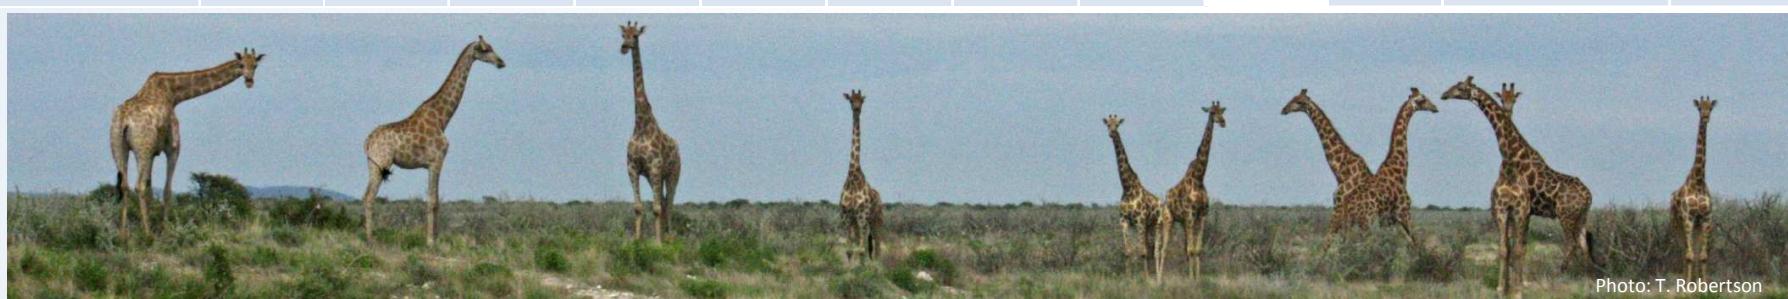

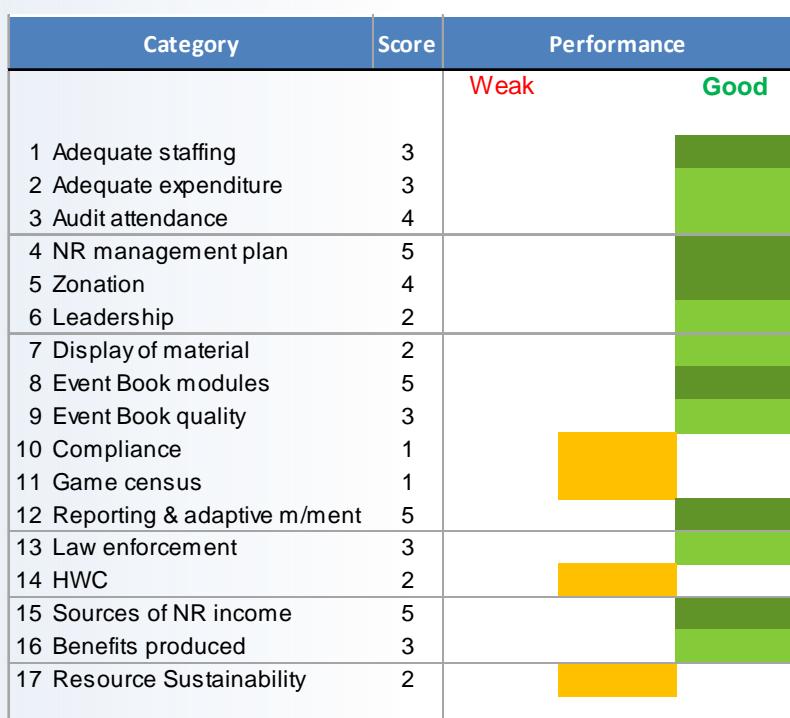

Photo: T. Robertson

## Wildlife Introductions

## Natural Resource Management

## Performance:

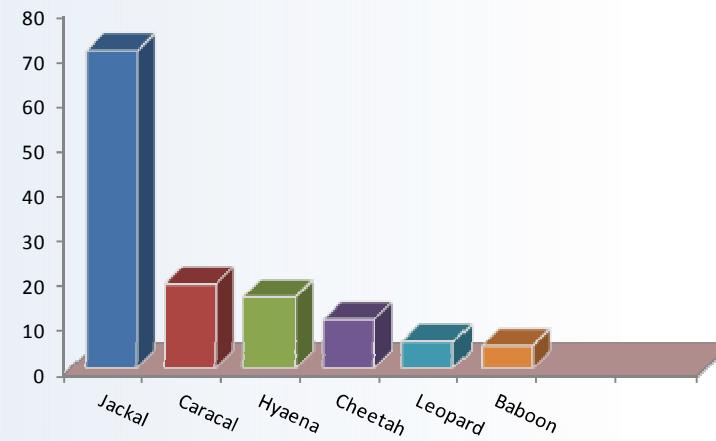

*Red bars indicate weak areas in the conservancy management performance which need to be addressed. Green bars indicate positive management performance.*

**Effort:** Number of Community Game Guards: 6

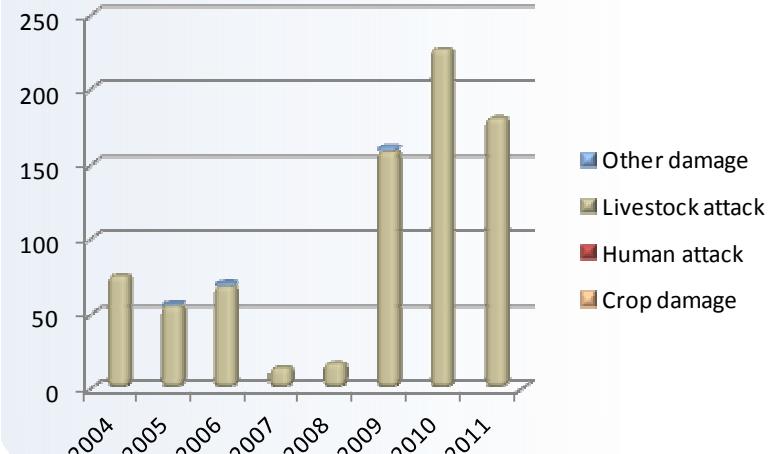

## Threats

# Human-Wildlife Conflict

## Species

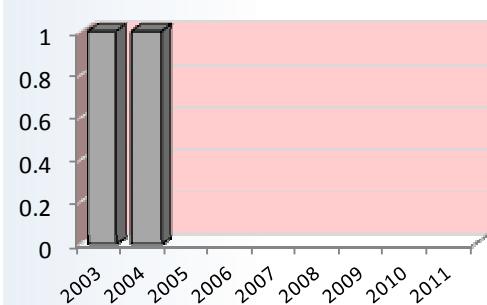

## Damage

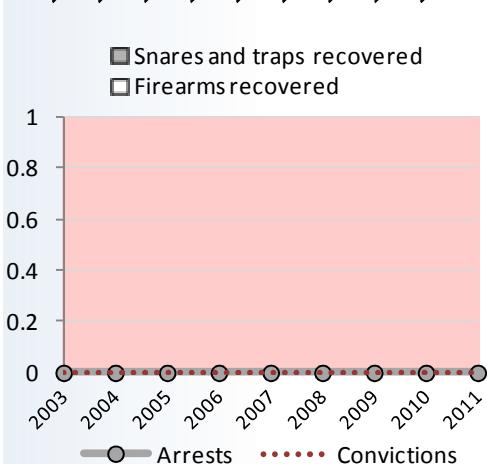

## Poaching

## Incidents

A bar chart titled 'New cases' showing the number of new cases per year from 2003 to 2011. The y-axis represents the number of cases, ranging from 0 to 5. The x-axis represents the years. The chart shows two bars: one for 2003 with a value of approximately 1.1, and one for 2005 with a value of approximately 5.2.

Year	New cases
2003	1.1
2005	5.2

*The species chart indicates the most troublesome to least troublesome conflict species in the conservancy. The Y-axis in HWC and poaching charts represents number of incidents.*
