### **Performance Indicators**

Management performance in 2019						
Category	Performance					
1 Adequate staffing						
2 Adequate expenditure						
3 Audit attendance						
4 NR management plan						
5 Zonation						
6 Leadership						
7 Display of material						
8 Event Book modules						
9 Event Book quality						
10 Compliance						
11 Game census						
12 Reporting & adaptive management						
13 Law enforcement						
14 Human Wildlife Conflict						
15 Harvesting management						
16 Sources of NR income						
17 Benefits produced						
18 Resource trends						
19 Resource targets						

#### Key to performance indicators

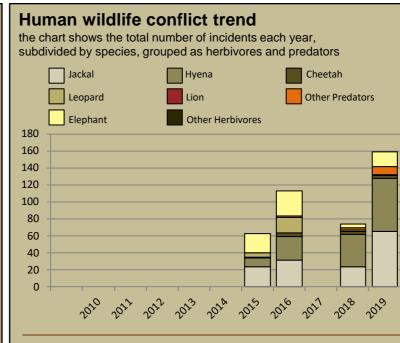

weak/bad	reasonable	good
		i de la companya de la

Performance is assessed on a scoring system from zero (none) to a maximum of between 3 and 6 (strong/excellent) depending on the indicator.

Indicators 1-17 reflect the performance of the management team in place in the conservancy and an efficient team can achieve a good rating in all 17 indicators.

Indicators 18 & 19 are influenced by external factors and are not considered a reflection of conservancy management. They indicate the current status of wildlife in the conservancy in relation to a theoretical optimal situation.

### Human wildlife conflict

Most troublesome problem animals 2017-2019

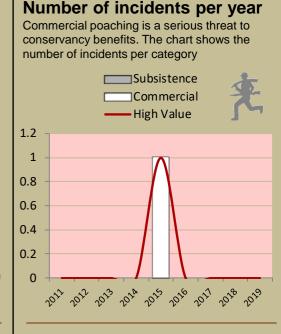

the chart shows the number of incidents per species for the last 3 years; the darkest bar (on the right) indicates the current year for each species

The most troublesome species

The least troublesome species in 2019 are on the right

in 2019 are on the left

### Poaching

**A1** 

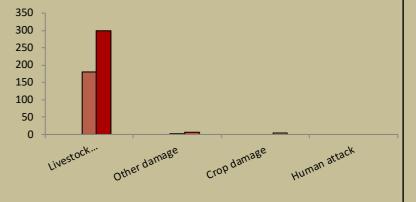

Traps and firearms recovered number of incidents per category

#### Type of damage by problem animals 2017-2019

Huaena Bapoon Elephant Caracal Cheetan Leopard

the chart shows the number of incidents per category for the last 3 years; the darkest bar (on the right) indicates the current year for each type

### Arrests and convictions

Arrests Convictions

### Wildlife removals - quota use and value

### Potential value estimates (N\$) for species are based on:

• **Potential trophy value** - the average trophy value for that species in the conservancy landscape

trophy values vary depending on trophy quality, international recognition of the hunting operator and the hunting area

• **Potential other use value** - the average meat value for common species

or

the average live sale value of each high value species (indicated with an \*). High value species are never used for meat

Fractions of animals indicate that a quota of 1 animal was awarded with conditions i.e. a) over a period of several years and/or b) is shared with other conservancies

	C	Quota 2019	)			nals actua	ally used i	n 2019		Potential	Potential
Species	Total	Trophy	Other Use	Trophy	Own Use & Premium	Shoot &	Capture & Sale	Problem Animal	Total Use	Trophy Value N\$	Other use Value N\$
Caracal	1	1								2,700	
Gemsbok	2	2								4,300	
Hyaena	1	1								6,200	
Jackal	2	2								400	
Klipspringer	5	5								5,500	
Kudu*	7	2	5							9,900	64,930
Ostrich	7	2	5							2,000	720
Springbok	8	3	5							2,700	624
Steenbok	2	2								1,700	

Effective monitoring is key to understanding the status of wildlife in the conservancy and for the effective management of these resources.

Conservancies reduce environmental costs while increasing environmental returns. Returns from wildlife can far outweigh human wildlife conflict costs. 2019

## Natural Resource Report continued...

# monitoring numbers and trends for a healthy conservancy...

### Current wildlife numbers and status

	0 minute la	Estimated population range	Wildlife Status			
Species	Animals Seen 2019		Count Trend	National Guideline	Desired Status	
Elephant						
Gemsbok						
Giraffe						
Jackal						
Klipspringer						
Kudu						
Mtn. zebra						
Ostrich						
Springbok						
Steenbok						

Desired Number - gives the species status in the conservancy based on what the conservancy would like to have.

dark green (abundant) - reduce a lot; light green (common) - reduce a little; yellow (uncommon) - keep numbers the same; light orange (rare) - double numbers; dark orange (very rare) - more than double numbers.

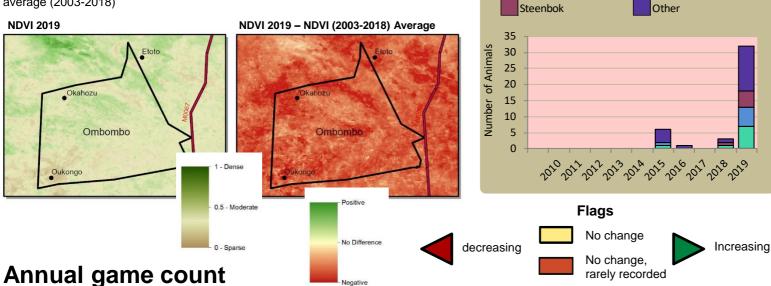

#### Key to wildlife status

Kudu

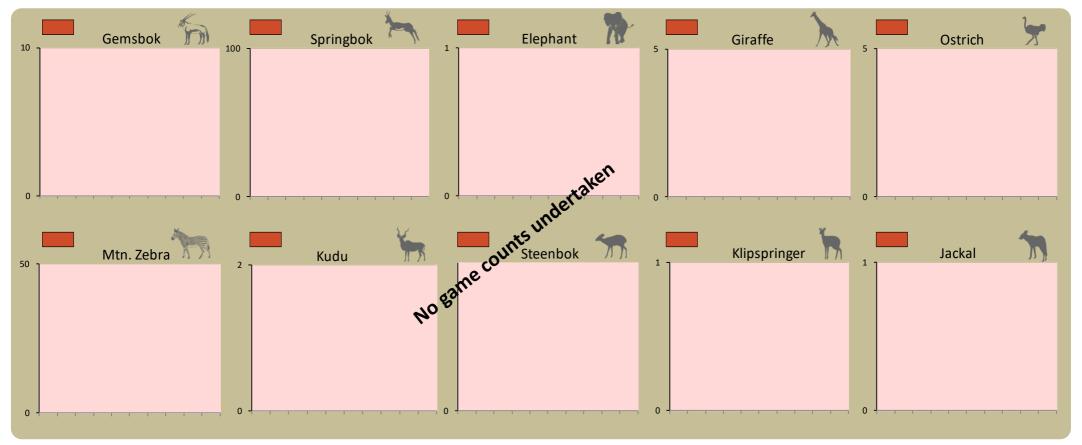

### **Vegetation monitoring**

Green vegetation index (NDVI). Maps show vegetation cover during Feb-Apr of the current year and the difference between the current year and the long-term average (2003-2018)

## Charts show the number of animals seen each year per 100 km driven during the game count. As a point of reference the

dashed horizontal line represents the combined 10 year average in Palmwag and Etendeka concessions. Status flags reflect the general count trend over the last 5 years.

### Wildlife mortalities

Ostrich

### Locally rare species

Mtn. zet the

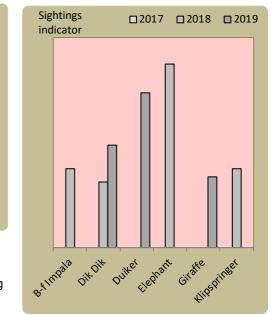

OSt

Wildlife status summary in 2019

Jacka

inspring

tiephant censbot Graff

Locally rare species are not found very often in the conservancy and need special conservation attention.

#### **Predator monitoring**

charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings trend over the last 5 years

Wildlife provides a wide range of benefits. Some wildlife can cause conflicts, but all wildlife is of value to tourism, trophy hunting and a healthy environment. By using all the available information and adapting and improving activities, threats such as human wildlife conflict, poaching and other issues can be minimised.

## Enabling wise conservancy governance...

#### **Conservancy Statistics**

Date Registered:	October 2014
Population (2011 census):	2450
Size (square kilometres):	1487
Registered members:	437

#### **Conservancy Governance**

	Male	Female	Total	
Number of management committee members	6	1	7	
Attendance at AGM	80	83	163	
Date of the last AGM:	20/06/2019			
Date of the next AGM:	31/05/2020			
Other important issues				
Budget approved?				
Work plan approved?	×			
Annual conservancy report approved?				

### Employment

	Male	Female	Total
Conservancy staff (Incl. CGG & CRM)	9		9
Number of Community Game Guards	9		9
Number of Community Resource Monitors			

### **Key Compliance Requirements**

Was an AGM held?	<
Were elections held?	N/A
Were benefits distributed according to the BDP?	×
Is game managed according to the GMUP?	<b>V</b>
Was the financial report presented and approved?	×

#### **Benefit Distribution**

Туре	Description	Beneficiary	Number

#### Governance Performance Rating How well did the conservancy perform in the past year?

Performance Category	This Year	Prev. Year	Explanation of performance category		
1 Member engagement			The conservancy is adequately engaging its members		
2a Benefit planning		The conservancy developed its BDP in a transparent and participatory manner			
2b Benefit distribution			The conservancy distributes benefits to its members in a fair, transparent and equitable manner		
3 Accountability			Conservancy members are holding the management committee accountable		
4 Compliance			The conservancy is compliant with the standard operating proceedures (SOPs)		
5 Stakeholder engagement	agement The conservancy maintains relationships with key external stakeholders				
6 Financial management			The conservancy is effectively managing its finances		
Colour codes: none weak	modera	ite	strong exceptional N/A
