maximising wildlife returns by minimising threats...

Wildlife removals – quota use and value

vindine removais – quota use and value												
Potential value estimates (N\$) for			Quota 2019	•		Anir	nals actua	ally used i	n 2019		Potential	Potential
species are based on:Potential trophy value - the average	Species	Total	Trophy	Other Use	Trophy	Own Use & Premium	Shoot & Sell	Capture & Sale	Problem Animal	Total Use		Other use Value N\$
trophy value for that species in the conservancy landscape	Baboon	5	5								600	
tronhy values vary depending on tronhy	Caracal	1	1								2,700	
trophy values vary depending on trophy quality, international recognition of the	Cheetah	1	1								4,800	
hunting operator and the hunting area	Jackal	5	5								600	
Potential other use value - the average meat value for common species	Kudu*	2	1	1		1				1	6,300	12,986
meat value for common species	Ostrich	15	5	10							1,500	720
or	Springbok	60	10	50		4				4	900	624
the average live sale value of each high value species (indicated with an *). High value species are never used for meat	Warthog	3	3								2,300	
Fractions of animals indicate that a quota of 1 animal was awarded with conditions i.e. a) over a period of several years												
and/or												
b) is shared with other conservancies

A2

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

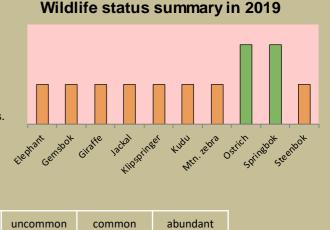

Desired Number – gives the species status in the conservancy based on what the conservancy would like to have.

dark green (abundant) - reduce a lot; light green (common) - reduce a little; yellow (uncommon) - keep numbers the same;

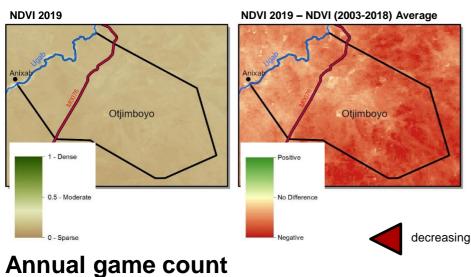

light orange (rare) – double numbers; dark orange (very rare) - more than double numbers.

Key to wildlife status

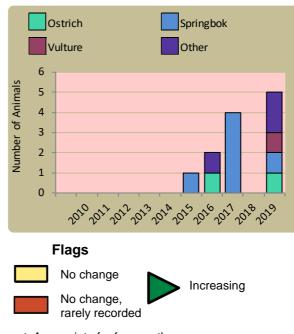

Vegetation monitoring

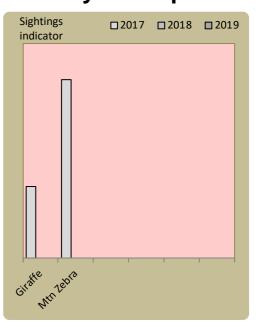

Green vegetation index (NDVI). Maps show vegetation cover during Feb-Apr of the current year and the difference between the current year and the long-term average (2003-2018)

Wildlife mortalities

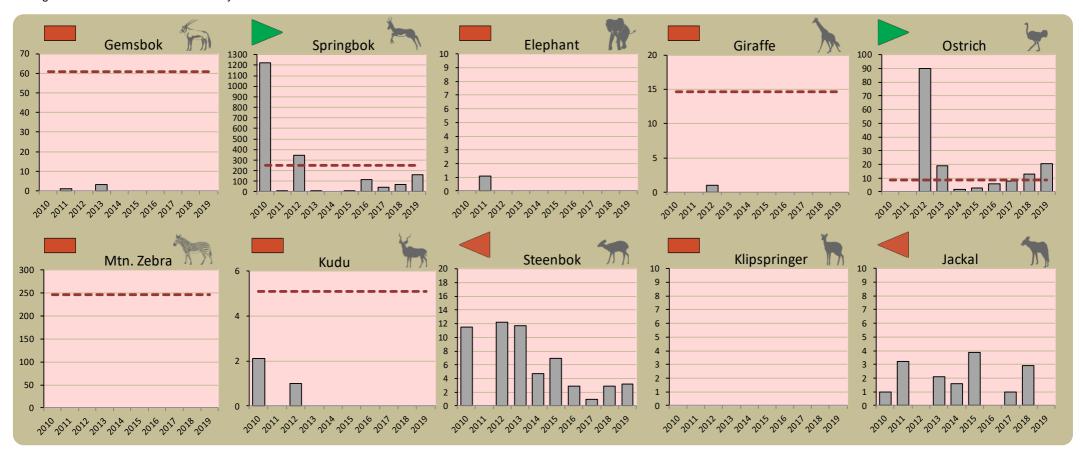

Locally rare species

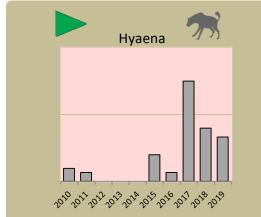

Locally rare species are not found very often in the conservancy and need special conservation attention.

Charts show the number of animals seen each year per 100 km driven during the game count. As a point of reference the dashed horizontal line represents the combined 10 year average in Palmwag and Etendeka concessions. Status flags reflect the general count trend over the last 5 years.

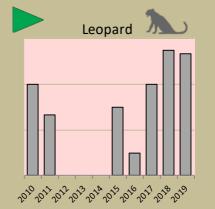

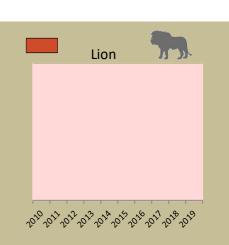

Predator monitoring

charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings trend over the last 5 years

Wildlife provides a wide range of benefits. Some wildlife can cause conflicts, but all wildlife is of value to tourism, trophy hunting and a healthy environment. By using all the available information and adapting and improving activities, threats such as human wildlife conflict, poaching and other issues can be minimised.

Employment

	Male	Female	Total
Conservancy staff (Incl. CGG & CRM)	3		3
Number of Community Game Guards	3		3
Number of Community Resource Monitors			

Governance Performance Rating How well did the conservancy perform in the past year?

Per	rformance Cate	egory	This Year	Prev. Year	Explanation of performance category					
1 Member eng	agement				The conservancy is adequately engaging its members					
2a Benefit plan	nning				The conservancy developed its BDP in a transparent and participatory manner					
2b Benefit dist	ribution				The conservancy distributes benefits to its members in a fair, transparent and equitable manne					
3 Accountabilit	·y				Conservancy members are holding the management committee accountable					
4 Compliance					The conservancy is compliant with the standard operating proceedures (SOPs)					
5 Stakeholder engagement					The conservancy maintains relationships with key external stakeholders					
6 Financial management					The conservancy is effectively managing its finances
