R100 000 reward offered to anyone who has information about poachers of two rhinos

By Dizaldo (self media writer) | 11 hours ago

There is a R100 000 reward that is up for grabs for information leading to the poachers of two rhinos at Sibuya Game Reserve.

Their carcasses were only found on Thursday.

At least 14 other rhinos have been killed in the [Eastern Cape](#) since December, leading to suspicion that a single syndicate may be responsible for the attacks.

The reward has been posted by the [Buffalo Kloof Game Reserve](#), in nearby [Makhanda](#), whose owner, [Warne Rippon](#), said he hoped it would help bring the perpetrators to justice.

"We just have to do things ourselves now," Rippon said.

On its website, the Buffalo Kloof Game Reserve states its objectives as the conservation and protection of critically endangered animals.

Police spokesperson Warrant Officer Majola Nkohli could not confirm whether the latest killings were linked to a poaching ring in the province.

"We have no leads at this stage and therefore cannot confirm anything," Nkohli said.

Binky and Noelle were orphaned in 2016 when poachers raided the Sibuya Game Reserve.

Now Binky's calf, Mimi, just more than a year old, has suffered the same fate and is being monitored by the reserve but may end up at an orphanage.

A rhino is dependent on its mother for about two years.

Sibuya Game Reserve owner and manager Nick Fox said the females were killed at about 7pm on Tuesday.
