Population estimates for conservancies:

Estimates were calculated using DISTANCE. Values with no brackets take account of drop off in detection of animals with distance from the transect line. Values inside brackets represent the lower 95% confidence limit.

Species	1. !Han/Awabi	2. !Khob! Naub	3. //Gamaseb	4. !Gawachab	5. Huibes	6. Oskop

Note: For most estimates confidence limits are wide and great care should be taken when using these data for quota setting.
