2. **Disaster Risk Management Coordinator**

City of Windhoek

August 2011 to July 2016

Main responsibilities:

- Supervision of work/activities of staff members in my Section
- Plan and implement budgetary provisions and procurements for the Section Activities
- Conduct training on disaster preparedness, mitigation, response, recovery and rehabilitation approaches
- Conduct Risk Assessment and device management programmes to reduce disaster risks in the City
- Design and disseminate information on disaster risk reduction practices
- Act as Emergency Coordinator during hazardous material spills or any other environmental disasters.

3. **Senior Environmental Officer**

Namibia Diamond Corporation (NAMDEB)

December 2009 - July 2011

My main task was to ensure the implementation and maintenance of ISO14001:2004.

- Ensuring all EMPs from EIAs and risk assessments are reflected in the EMS database.
- Rendering hands-on leadership in directing a corporate environmental compliance program.
- Ensuring company adherence to environmental/certification requirements to projects and operational sites to ensure the company retain certification for its operations.
- Ensuring that the Company complies with different permit conditions such as Water Act, Environmental Act, and Waste Management Act etc.
- Conducting relevant environmental training and awareness according to the environmental training plan (e.g. Environmental Inductions & Environmental Policy Training).
- Ensuring that the Environmental Management System is kept up-to-date (Database and ISO 14001 EMS file)
- Investigating environmental incidents and determine root causes.
- Conducting operational self-check audits and internal compliance audits as per audit schedule.

- Facilitating onsite environmental management review, documenting changes and incorporating those into the EMS.

4. **Fisheries Biologist**

Ministry of Fisheries and Marine Resources

January 2006 – January 2008

Main responsibilities:

- Supervising the Section Staff Members in Swakopmund and Luderitz
- Drafting stock assessment reports for Large Pelagic
- Collecting and assessing landing catch data on Large Pelagic
- Submitting data and acting as liaison Officer between the Ministry and ICCAT program
- Participating in Seals stock assessments and research work
- Enforcing Line fish catches regulations

**Some key EIA Projects involved in with other consultants**

- Construction and Operation of two waste buy-back centres on Erf 10173 Katutura, Windhoek, Khomas Region (2022).
- Environmental Management Plan for removal of alluvium and gravel materials in Otjomuise, Windhoek, Khomas Region (2021).
