

REPUBLIC OF NAMIBIA

ENVIRONMENTAL QUESTIONNAIRE FOR MINING CLAIMS IN NAMIBIA

BEING APPENDIX A TO THE ENVIRONMENTAL CONTRACT

1. BACKGROUND INFORMATION

- 1.1 Companies/Natural persons applying for MINING CLAIMS must complete this questionnaire. (Please fill in ALL questions).
- 1.2 The answers provided in this questionnaire shall be regarded as commitments which will become part of the Environmental Contract between the Holder and the Government of the Republic of Namibia, duly represented by the Ministry of Environment and Tourism (MET) and the Ministry of Mines and Energy (MME).
- 1.3 Once the Holder has completed this questionnaire MET and MME will either accept/reject/request further information regarding the environmental commitments made therein. MET and MME reserve the right to add further conditions.
- 1.4 Once agreed to by all parties concerned, the completed questionnaire shall form part of the Environmental Contract.
- 1.5 Please attach a map of the mining claim area and a copy of the application to renew mining claims.

2. Holder details

2.1 Name of Holder	Anel Pool
2.2 Name of Mining Claim Holder (if different from 2.1)	
2.3 Telephone, Fax, Cell Phone and/or E-Mail	Cell: 081 600 6086 Fax: E-Mail:
2.4 Postal Address Residential/Registered Address	67 Uis 692 Duine weg Henties Bay
2.5 Reference Number	NEPL No: 9241 Expiry: 04 April 2025
2.6 Registered Number(s)	
2.7 Location (Farm, District, Region) of mining claim(s)	Erongo Region
2.8 Group(s) of Mineral(s) to be mined	Semi Precious Stones

2.9	How many	people will	work on	your mining	claim, and	where will	they	live?
-----	----------	-------------	---------	-------------	------------	------------	------	-------

Number of people	Where will they live?
6	4 will stay in Us Villiage
	2 will stay on the claims

3. Environmental commitments

- 3.1 Pollution and Waste
- 3.1.1 What will you do with normal litter (e.g. Kitchen spoils, cans, bottles, paper, etc.)?

lieu di	be	col	lected	and	Removed	to
ان عنا	ilige	e c	amel	hear	X5	

3.1.2 What industrial waste will be generated and what will you do with it (e.g. old machinery, vehicles, building rubble, batteries, paint, thinners, vehicle oil, etc.)?

3.1.3 Describe what type of toilet facilities will be provided.

Pitt Watrine

- 3.2 Vehicle, earthmoving equipment, drilling and blasting
- 3.2.1 List the type and quantity of vehicles, earthmoving equipment, drilling equipment, and other machinery likely to be used on your mining claim (e.g. 2 x bakkies; 1 x bulldozer, etc.)

Vehicles:

IX Conpressor
IX Darda Hyplyawic Rock Splitter
2x Pakkies

Earthmoving equipment:

TOB

Drilling equipment:

Compessor

Sw	all tools L Hammer
3.2.2	Describe the environmental damage that is likely to result from the use of vehicles and machinery within the mining claim area (e.g. on the landscape in general, soil, vegetation, noise, dust, etc.).
Alm	eady existing Roads so no new ads.
3.2.3	How will you control the movement of vehicles and machinery in order to minimise environmental damage?
	re are already existing roads
9	mage,
3.2.4 intend	Which routes will be used by vehicles to get to your mining claim and state whether you making new roads or tracks (both to your mining claim and within your mining claim)?
HO 3	on his with the proclamation, roads

ENVIRONMENTAL IMPACT CONSIDERATION:

We defined the term, impact as a chance that will affect the biophysical characteristics of the environment, such as destruction of natural habitat at the mining site, or destruction of adjacent habitats as a result of waste disposal and/or the influx of settlers.

At Uisminlap we will embarked on an environmental programme with the ultimate aim of instituting an environmental management plan for all our mining and processing. This plan, embodied within the business strategic management plan, will ensure responsible abstraction of semi-precious stones with a minimum of damage to the environment and will allow for rehabilitation of mined-out areas, where required.

Our development planning process took careful note of the fact that the Namib Desert is a unique phenomenon and the oldest desert in the world, with an incomparable unspoilt natural beauty, very interesting ecologies and a unique fauna and flora. It is therefore without a doubt that the long-term economic development of the area would be within an integrated conservation approach.

Uisminlap acknowledges that the environment represents a strategic resource for both current and future generations. By placing a high value on environmental management and control, the business strive to minimise the impact of its activities on the environment. In this regard, all operations will be conducted in accordance with acceptable environmental standards and practices and the relevant mining act. Will always be of critical importance, since it is through the provisions of this act. That the conditions applicable to our mining actions are prescribed.

Therefore, in order to achieve sustainable mining activities we will address potential environment impact, such as, erosion and pollution, at an early stage and focus on the control of environment hazards of on-going and future projects.

That's why, we recognise that mining is temporary land use, and therefore our rehabilitation objective is consistent with the projected future land use, and it will be clearly defined in accordance of government policies on the subject.

Progressive rehabilitation during our production period will greatly reduce future rehabilitation cost therefore, the mining method used by Uisminlap is a sub-level back filling method, designed so that it automatically rehabilitate the mined area, and it includes the following steps-

- A] The restoration of land, so that the pre-mining conditions are replicated, and to reduce the area of disturbance by limiting the clearing of natural soil and vegetation to the absolutely necessary for the safe operation of mining activities
- B] Control of run-of water and erosion by filling-up the erosion points with waste, which we generate during our mining operations, which not only reduce erosion, but, also encourage water infiltration, which results at higher levels of ground water.
- C] Remodelling of the area, so that pre-mining land use and ecological values can be re-established in similar conditions.
- D] Drainage channels with gentle slopes will be used to reduce velocity of run-of and allow settling and where site limitations prevent the formation of stable slope profile, counter benches or similar erosion control methods will be applied.

I hereby declare that the information provided in this questionnaire, is to the best of my knowledge, accurate and correct, and that I'm prepared to keep to the commitments stated therein.

The Ministry of mines and Energy P/Bag 13297 Windhoek Republic of Namibia

Att: The Commissioner of Mines:

RE: CONSENT ON THE APPLICATION FOR MINING CLAIMS.

The above matter refers:

The Dâure Daman Traditional Authority is hereby established by Act of Parliament Traditional Authorities Act, Act 25 of 2000 sect. 2(1) and Government recognized and Gazette, and is having jurisdiction over two regions, being Erongo Region, within Dâures Constituency, and Kunene Region within Khorixas Constituency.

This letter serves to inform the Ministry of Mines and Energy that the Dâure Daman Traditional Authority acknowledge and support the application for new mining claims by Ms. Anel Pool, with identification no: 86120100016 in my area of jurisdiction (Erongo region, Daures constituency).

- Upon your application to the Ministry of Mines and Energy being successful, kindly be mindful of the following, namely that:
 - a. Preference should be given to the inhabitants of this area, in respect of employment opportunities;
 - b. An Environmental Impact Assessment must be completed;
 - All parties affected or likely to be affected must be taken into cognizance, including (but not limited to) MEFT, NACOMA, Conservancy and the SRT;

In conclusion, we foresee that the granting of the mining claims will enhance the livelihood of local community.

Counting on your timely and positive consideration in the above regard.

Best regards,

Chief Zacharias Seibeb CHIEF

Dâure Daman Traditional Authority
