# 1 PUBLIC ENGAGEMENT AND COMMENTS FROM I&APS

## 1.1 INTRODUCTION

Environmental Compliance Consultancy (Pty) Ltd (ECC) has been engaged by Paratus Telecommunications (Pty) Ltd (hereto referred to as Paratus or the Proponent) to conduct an environmental and social impact assessment (ESIA) in accordance with the Environmental Management Act, No. 7 of 2007 and its Regulations of 2012, for which an application for an environmental clearance certificate has been submitted for the proposed construction and operation of the base transceiver station (BTS) tower and associated infrastructure on Erf 398, Outjo East, Kunene Region, Namibia.

This document outlines the outcomes of the public engagement phase and provides records of engagements held with identified key stakeholders and interested and affected parties (I&APs). This report also provides a summary of the comments raised during the public engagement phase and the environmental assessment practitioner's (EAP) responses. This report will be submitted to the competent authority (i.e. Ministry of Information, Communication and Technology (MICT) and the Ministry of Environment, Forestry and Tourism (MEFT)) as an appendix to the Project's environmental scoping with impact assessment report for their review towards issuing a record of decision on the Project.

## 1.2 PUBLIC CONSULTATION

Public consultation is a compulsory and critical element of the ESIA process as it provides a platform to engage the I&APs and enhance the scope of the impact assessment. In accordance with section 21 of the Environmental Management Act No.7 of 2007 (EMA), the stakeholders and I&APs were engaged through various channels, which are outlined in the following sections.

### 1.2.1 NEWSPAPER ADVERTISEMENTS

Public consultation and I&APs registration for the Project commenced on 17 December 2024 upon publication of the first newspaper advert. The second newspaper advert was published on 23 December 2024. These advertisements were placed across three national newspapers (The Republikein, Namibian Sun and Allgemeine Zeitung). The purpose of these advertisements were to initiate the public engagement process by informing the public and I&APs to register with the Project and an invitation to the public meeting. The records of the newspaper advertisements are provided in Appendix A.

### 1.2.2 SITE NOTICE

In addition to the newspaper advertisements, a site notice was erected on site to inform the public about the Project (Appendix B).

### 1.2.3 PUBLIC MEETING

The identified stakeholders were engaged through formal letters and were invited to attend the public meeting (see the stakeholder letter provided in Appendix C). The public meeting was scheduled for 14 January 2025 at the Outjo Community Hall. However, despite the EAP's effort in organising to engage the public members, no public member attended, despite having been properly invited. This lack of participation was noted, and as result, alternative engagement methods were considered. Subsequently, the EAP practitioner (Mr Samuel Shinyemba) conducted door-to-door engagements with the residents in the vicinity of Erf 398 (identified as the directly affected parties). The (MICT) has formally requested, in its capacity as the competent authority, to be provided with the full ESIA report, along with all appendices, for their review and consideration. The letter received from the MICT is provided Appendix C and the list of the residents who were engaged are provided in Appendix D.

## 1.3 KEY FEEDBACK ON ISSUES OF CONCERN – RESIDENTS ENGAGEMENT

The comments and concerns received from the residents who were engaged presented useful and valuable input in setting out the scope of the environmental and social impact assessment process. From an overall review of the recorded statements, the key common themes of concern that were raised can be summarised in the following categories:

### 1.3.1 EMPLOYMENT OF RESIDENTS

Majority of the residents raised concerns whether the Proponent would consider employing some of the unemployed locals. The EAP clarified that it is unlikely that such opportunities will be available as the scope of work requires specialised skills. Contractors and subcontractors will be hired for these activities and will likely have their own employees. This may also include employees that will be required for unskilled or semi-skilled tasks, such as concrete mixing.

### 1.3.2 RISK OF PUBLIC EXPOSURE TO NON-IONISING RADIATION

The residents raised questions on the potential risk of the public being exposed to radiation emitted by the telecommunication tower. The EAP addressed these concerns by assuring the residents that this aspect will be thoroughly evaluated. The evaluation will include an assessment of buffer zones, which specify the minimum distance that telecommunication towers must be located from public areas to minimise the potential risk of radiation exposure.

### 1.3.3 LOSS OF RECREATIONAL SPACE (FOOTBALL FIELD)

The residents highlighted that a portion of the Project site has been transformed into a football field and that public access to the sport field will be limited as the Project progresses. In response, the EAP clarified that the Project footprint is relatively small (approximately 100 m<sup>2</sup>) and therefore, a significant portion of the Erf, which overall is approximately 9 140 m<sup>2</sup>, is expected to remain

undisturbed. Additionally, this social impact will be thoroughly evaluated in the impact assessment.

#### 1.3.4 PUBLIC REVIEW PERIOD

The draft scoping with impact assessment was issued to all registered I&APs for their review and commentary from 12 February 2025 to 19 February 2025 (seven days review period). No comments were received from the I&APs.

---

## **2 DETAILED COMMENTS AND RESPONSES**

ECC acknowledges that constructive feedback from I&APs contribute to a more comprehensive ESIA. The consultation process ensures that the Project is better understood by I&APs. Additionally, I&AP feedback enhances the scope of the assessment, as it may highlight impacts that were not fully considered or included during the screening phase.

The I&APs comments are summarised in Table 1.

**Table 1 – Response to comments raised during the door-to-door engagements with the Outjo residents**

Stakeholder Details	Question/Comment	Response/Clarification
Stanley Kaizani  Resident of Herero Location	Paratus must consider market pricing because the target market may lack the financial means to afford higher service prices.	<b>EAP:</b> Comment noted, thank you.  The Proponent will strategically balance setting affordable pricing that aligns with the financial realities of its target market, while ensuring the company can recover costs and maintain profitability.
Nadia Kandjeo  Resident of Herero Location	When will the Project commence?	<b>EAP:</b> The commencement of the Project depends on several factors. The Project activities are listed under the Environmental Management Act No. 7 of 2007, which should not be undertaken without an environmental clearance certificate. The approval of the environmental clearance certificate application, which is underway, may take anywhere from a few months to several months. Once the reports are submitted, the Ministry of Environment, Forestry, and Tourism (MEFT) takes approximately three to six months to issue a record of decision (RoD) for projects similar to this.
	A portion of the Project site has been transformed into a small football field. Will our children be restricted from accessing this field?	<b>EAP:</b> The Project footprint is relatively small, covering approximately 100 m <sup>2</sup> , compared to the total size of the Erf that is approximately 9 140 m <sup>2</sup> . The site may be inaccessible at some stage as the Project develops.  This impact will be evaluated, and other alternative sites will also be considered.

Stakeholder Details	Question/Comment	Response/Clarification
	We have no objection to the Project. Competition among service providers is beneficial will result in improved service delivery.	<b>EAP:</b> Comment noted, thank you.  Competition among network operators is expected. This impact will be assessed during the impact assessment phase.
	The impact assessment must also assess the potential risk of public exposure to radiation emitted by the telecommunication tower.	<b>EAP:</b> Comment noted, thank you.  This impact will be evaluated. The evaluation will consider the required minimum distances that telecommunication towers must be located away from public areas or homesteads to minimise the potential risk of radiation exposure.
Lesly Narebeb  Blue-Sky Training Academy	When will Paratus open a branch in Outjo?	<b>EAP:</b> As part of its corporate economic objective, Paratus aims to expand its services and operations across all regions within Namibia. As the Project progresses, a branch will be opened in Outjo.
	Will this be a 5G telecommunication tower?	<b>EAP:</b> No. Although 5G technology is the next step in the evolution of telecommunication, this tower will focus on 4G services, which remain a widely used and effective solution for meeting current communication needs.
	What is the height of the telecommunication tower?	<b>EAP:</b> The telecommunication tower will be 30 m.
Julin Nuumba	We have no objections to the Project. When will the Project commence?	Noted, thank you.

Stakeholder Details	Question/Comment	Response/Clarification
Etoshapoort Erf 428		<b>EAP:</b> The commencement of the Project depends on several factors. The Project activities are listed under the Environmental Management Act No. 7 of 2007, which should not be undertaken without an environmental clearance certificate. The approval of the environmental clearance certificate application may take anywhere from a few months to several months. Typically, the Ministry of Environment, Forestry, and Tourism (MEFT) takes approximately three to six months to issue a record of decision (RoD) for projects similar to this.
Petrus Uiseb Etoshapoort Erf 430	What will be the reception buffer zone of the telecommunication tower?	<b>EAP:</b> The reception buffer zone for the telecommunication tower will be approximately 4 km, although signal reception can also be acquired at distances up to 10 km, depending on factors such as terrain and environmental conditions.
	Will the Proponent employ some people from the local area?	<b>EAP:</b> The scope of work requires specialised skill sets that may not be readily available locally. Contractor companies will be hired during the construction phase, and they will have their own employees to carry out the necessary tasks.
	Is there a guarantee that network interruptions will not occur during bad weather?	<b>EAP:</b> Efforts will be made to ensure reliable network services. There is no absolute guarantee that there will be no network interruptions during bad weather (e.g. during times of heavy rain or high winds which impact

Stakeholder Details	Question/Comment	Response/Clarification
		signal strength or cause temporary outages). However, backup systems will be in place and efforts will be made to quickly restore services in the event of disruptions.

**VACANCIES**

**Specializing in the following opportunities, based on the underground mining market**

**MINE MANAGER - UNDERGROUND**

- Underground Mining (with a minimum of 10 years of underground mining experience)
- Minimum of 7 years of relevant experience, if not underground mining
- Cost and Mining related to take teams underground to work underground

**UNDERGROUND ENGINEER**

- Engineer or equivalent (with a minimum of 5 years of underground mining experience)
- Minimum of 7 years relevant experience of underground mining

**MINE PLANNER - UNDERGROUND**

- A recognized mining engineering professional
- Minimum 7 years experience of an underground mining planning role
- Planning, technical, financial, production and mining team design and scheduling software

**SR. GEOTECHNICAL ENGINEER**

- A Bachelor's Degree in Geotechnical Engineering or Civil Engineering, a master's
- 5-6 years of relevant experience in a similar role in mining or engineering industry

**All applications meeting minimum requirements must be accompanied by up-to-date CV, copies of qualifications and all documents, which are non-refundable**

If you are what we are looking for please forward your application to [recruitment@bntn.co.za](mailto:recruitment@bntn.co.za)

**CLOSURE DATE: 20 DECEMBER 2014**

Please sharing vacancies to [info@bntn.co.za](mailto:info@bntn.co.za) (bntn.co.za) or by telephone group and are engaged to supply. Any other jobs in a candidate will be a concern.

VACANCY

## CLIENT EXECUTIVE:

### tourismUS

Tourism & Agronomizer

**Position Grade: C1**

**NOTE:** An applicant must be employed by the following company for admission and complete process with Resumes (strategic):

**Key Responsibilities:**

- Participating in weekly call center support for clients (inbound & outbound effective sales techniques and call center services in support of client portfolio)
- Meeting sales targets and objectives in meeting and sales setting
- Provide strong personal and customer service - maintaining positive attitude
- Communicating with clients via presentation (both through email, phone, social media, video and other forms)
- Planning and coordination of accountability of team client and reporting processes of account
- Keeping up to date knowledge of the USA products, its products services, the market and current US & its health and safety and the current information
- To assist in managing of the various social media platforms (facebook, twitter, etc) to increase sales
- Sales / Business programs aligned to USA Marketing and Client portfolio
- Create value chain and deliver client support to fully aligning sales and service
- Generating sales opportunities through knowledge of client sales and managing clients through sales and service setting and selling client loyalty
- Sales and client support services and the client list of the Company

**Interested candidates who qualify for the above position can forward their CV with verified copies of educational data and relevant documentation to:**

ECC-43-542-LET-04-A

10 January 2025

### IDENTIFIED STAKEHOLDER AND POTENTIALLY INTERESTED AND AFFECTED PARTY:

**NOTICE OF AN ENVIRONMENTAL AND SOCIAL IMPACT ASSESSMENT AND PUBLIC MEETING FOR THE PROPOSED CONSTRUCTION AND OPERATION OF A BASE TRANSCIVER STATION (BTS) TOWER AND ASSOCIATED INFRASTRUCTURE FOR PARATUS TELECOMMUNICATIONS (PTY) LTD ON ERF 397, OUTJO EAST, KUNENE REGION, NAMIBIA**

Dear Mr Sir/ Madam

Environmental Compliance Consultancy (Pty) Ltd (ECC) has been engaged by Paratus Telecommunications (Pty) Ltd as the independent environmental assessment practitioner (EAP) to conduct an environmental and social impact assessment (ESIA) for the proposed construction and operation of a BTS telecommunication tower on Erf 397, Outjo East, Kunene Region. The application for an environmental clearance certificate and the assessment process is undertaken in terms of the Environmental Management Act No. 7 of 2007 and its 2012 Regulations.

This letter intends to engage potentially interested and affected parties (I&APs) for the Project and provide a platform and means of communication with ECC. You have been identified as a potential interested or affected party and therefore ECC wishes to engage with you throughout the ongoing ESIA process.

The background information document (BID) can be downloaded from our website via the following link:  
<https://eccenvironmental.com/download/the-proposed-construction-and-operation-of-a-base-transceiver-station-bts-tower-and-associated-infrastructure-for-paratus-telecommunications-pty-ltd-on-erf-397-outjo-east-kunene-region-namibia/>

As part of the ongoing assessment process, ECC is pleased to extend a formal invitation for you to attend the upcoming public meeting. The public meeting is scheduled as follows:

Date: 14 January 2025  
Venue: Outjo Community Hall  
Time: 18:00

To register as an I&APs, please complete the registration form available on the ECC website through the link provided above. Alternatively, you can register by emailing us at [info@eccenvironmental.com](mailto:info@eccenvironmental.com) or by phoning our office at +264 81 669 7608.

Registered I&APs will be notified of the availability of the draft scoping and impact assessment report, as well as the environmental management plan (EMP) for review before the reports are submitted to the competent authority and the Ministry of Environment, Forestry and Tourism (MEFT) for a record of decision.

Should you have any questions please do not hesitate to contact us and we will gladly assist.

16 January 2024

Mr. Stephan Bezuidenhout,  
Principal Environmental Practitioner,  
Environmental Compliance Consultancy (Pty) Ltd,  
PO Box 91193,  
KLEIN WINDHOEK.

Dear Mr. Bezuidenhout,

**ENVIRONMENTAL SCOPING ASSESSMENT (ESA) FOR THE PROPOSED  
CONSTRUCTIONS AND OPERATION OF A BASE TRANSCEIVERS STATION TOWERS  
AND ASSOCIATED INFRASTRUCTURE AT OUTJO EAST, KUNENE REGION**

Reference is made to your letter dated 26 November 2024 regarding  
the above-mentioned subject matter.

The Ministry of Information and Communication Technology hereby  
advices your institution to submit the following documents to our office for  
review prior to submission to the Environmental Commissioner. This is to ensure  
compliance with the Environmental Act, 2007 (Act No. 7 of 2007) and its  
regulations.

- Scoping Reports,
- Meeting minutes with the affected parties.
- Signed attendance register from the public consultations,
- Environment Management Plans (EMP) for proposed projects.

The Ministry would equally appreciate if the schedules of consultative  
meetings can be shared for ease of planning our attendance.

Sincerely,

  
Andri Mathe  
EXECUTIVE DIRECTOR

All official correspondence must be addressed to the Executive Director.
