## Legal

ronmental Management Act No. 7 of 2007 and its 2012 EIA Regulations, the proposed exploration and mining activities on a portion earmarked for Mining Licence (ML) application over EPL 7950 require an Environmental Clearance Certificate (ECC) from the Department of Environmental Affairs and Forestry (DEAF) before commencement. The public is notified that an ECC application will be submitted to the Environmental Commissioner. **Brief Project Description:** The environmental scoping process will identify potential positive and negative impacts of the proposed mining activities once an ML is granted on a portion of EPL 7950 (<2,000.00 ha area size) located near Karibib Town in the Erongo Region, Namibia. The target commodity is Dimensional Stones. **Proprietor:** Uranus Mining CC **Environmental Consultant:** Excel Dynamic Solutions (Pty) Ltd Public members are invited to register as Interested and Affected Parties to comment/raise concerns or receive further information on the Environmental Assessment process. The details of the public Consultation meeting will be communicated to all the registered I&APs. Registration requests should be forwarded to Excel Dynamic Solutions (Pty) Ltd on the contact details below, before or on 10 February 2025. ## Notice

### Legal Notice

#### PUBLIC NOTICE FOR THREE STOREY DWELLING UNIT

Take notice that the owners, Quarto Investments Twenty Six CC, of Erf 3924, Klein Windhoek (Avis), intend to apply to the Windhoek Municipal Council for the construction of a three-storey dwelling on Erf 3924, Klein Windhoek (Avis).

The proposed construction will allow the owner to erect a three-storey dwelling unit on Erf 3924, Klein Windhoek (Avis). Should this application be successful, the number of vehicles for which parking must be provided on-site will be determined by the City of Windhoek Municipal Council in accordance with the City of Windhoek Town Planning Scheme (now known as the City of Windhoek Zoning Scheme). The owner's current intentions are to erect and use the building for residential purpose.

Kindly take notice that the plan of the erf lies open for inspection at the town planning notice board in the Customer Care Centre, Main Municipal Offices, Rev. Michael Scott Street, Windhoek. Further take notice that any person objecting to the proposed use of the land as set out above may lodge such objection together with the grounds thereof, with the City of Windhoek, fifth floor, office 524 and with the applicant (SPC) in writing within 14 days of the last publication of this notice. Dated at Windhoek this 10 day of January of 2025.

The last date for any objection is 7 February 2025.  
Owner Name: Quarto Investments Twenty Six CC  
Postal address: P.O. Box 6838 Windhoek

#### REZONING OF ERF 7113, NO. 420 INDEPENDENCE AVENUE, WINDHOEK FROM 'RESIDENTIAL' WITH A DENSITY OF 1 DWELLING PER 900m² TO 'BUSINESS WITH A BULK OF 1.0

**DU TOIT TOWN PLANNING CONSULTANTS**, are applying on behalf of the Executors of the Estate of the owner of Erf 7113, No. 420 Independence Avenue, Windhoek in terms of the stipulations of the Urban and Regional Planning Act, 2018 (Act No. 5 of 2018), to the Windhoek City Council and the Urban and Regional Planning Board for:

□ Rezoning of Erf 7113, No. 420 Independence Avenue, Windhoek from 'residential' with a density of 1 dwelling per 900m² to 'business' with a bulk of 1.0

Erf 7113, Windhoek is located in Independence Avenue on the corner of Independence and Luther Street, adjacent to the Government Office Park to the east. The erf is 537m² in extent and although it's been used for a second hand car dealership for many years, it is still zone 'residential' with a density of 1 dwelling per 900m².

In order to finalise the Estate of the late owner, the erf needs to be rezoned to 'business' with a bulk of 1.0 to obtain compliance for the buildings and transfer of the property. The erf to the north of Erf 7113 are all zoned 'business' with a bulk of 1.0, while the properties to the south have higher bulk factors. The parking provision will be in line with the requirements of the City of Windhoek. The rezoning is not expected to have any negative influence on the character of the neighbourhood.

Any person objecting to the proposed use of land as set out above may lodge such objection together with the grounds thereof with the City Council (the Urban Planner-Town House, Fifth Floor, Room 516) and the applicant within 14 days of the last publication of this notice (final date for objections is 7<sup>th</sup> February 2025).

Should you require additional information you are welcome to contact our office.

Applicant: **DU TOIT TOWN PLANNING CONSULTANTS**  
P.O. Box 6871 AUSSPANNPLATZ WINDHOEK, Tel: 061-248010  
Email: [planner1@dutoitplan.com](mailto:planner1@dutoitplan.com)

Any person objecting to the proposed use of land as set out above may lodge such objection together with the grounds thereof with the City Council (the Urban Planner-Town House, Fifth Floor, Room 516) and the applicant within 14 days of the last publication of this notice (final date for objections is 06<sup>th</sup> February 2025).

Should you require additional information you are welcome to contact our office.

Applicant: **DU TOIT TOWN PLANNING CONSULTANTS**  
P.O. Box 6871 AUSSPANNPLATZ WINDHOEK, Tel: 061-248010  
Email: [planner1@dutoitplan.com](mailto:planner1@dutoitplan.com)

#### SUBDIVISION OF PORTION 138 (A PORTION OF PORTION 2 (SONNLEITEN) OF FARM ONDEKAREMBA NO.78 INTO PORTION A AND REMAINDER; AND SUBSEQUENT REZONING OF THE SUBDIVIDED PORTION A FROM 'AGRICULTURE' WITH A GROSS DENSITY OF 1:10HA TO 'TOURIST ESTABLISHMENT'

**DU TOIT TOWN PLANNING CONSULTANTS**, is currently applying on behalf of the owner of the portion, Marton Investments CC (Sole member Andrea Giel) in terms of the stipulations of the Urban and Regional Planning Act, 2018 (Act No. 5 of 2018), to the City of Windhoek and the Urban and Regional Planning Board for the:

□ Subdivision of Portion 138 (a Portion of Portion 2 (Sonnleiten)) of Farm Ondekaremba No. 78 into Portion A (±200,1341ha) and Remainder (±290,3348ha); and  
□ Subsequent rezoning of the subdivided Portion A from 'Agriculture' with a gross density of 1:10ha to 'Tourist Establishment' for the operation of a lodge

The project area lies south of the Trans-Kalahari Highway (B6) and the under-construction Windhoek-Hosea Kutako Road, about 10km from Hosea Kutako International Airport. Portion 138 is 490,4675ha in extent and is currently zoned as 'Agriculture' under the Kappsfarm Zoning Scheme, with a density of 1:10ha. The client plans to establish a lodge on a part of Portion 138, necessitating its subdivision to create Portion A for the lodge and a remainder of Portion 138. Portion A will be rezoned from 'Agriculture' to 'Tourist Establishment' to accommodate the lodge.

Remainder Portion 2 (Sonnleiten) of Farm Ondekaremba No. 78 (and by implication also Portion 138 and Portion 139) currently has direct access from the main road, but the ongoing construction of a Future Trunk Road, forming its northern boundary, will affect access. A new intersection northeast of the current access point is proposed, which the Roads Authority has reviewed without objection. They recommend using the existing access until the new intersection becomes operational.

Any person objecting to the proposed use of land as set out above may lodge such objection together with the grounds thereof with the City Council (the Urban Planner-Town House, Fifth Floor, Room 516) and the applicant within 14 days of the last publication of this notice (final date for objections is 06<sup>th</sup> February 2025).

Should you require additional information you are welcome to contact our office.

**PUBLIC NOTICE FOR THREE STOREY DWELLING UNIT** Take notice that the owners, Quarto Investments Twenty Six CC, of Erf 3924, Klein Windhoek (Avis), intend to apply to the Windhoek Municipal Council for the construction of a three-storey dwelling on Erf 3924, Klein Windhoek (Avis). The proposed construction will allow the owner to erect a three-storey dwelling unit on Erf 3924, Klein Windhoek (Avis). Should this application be successful, the number of vehicles for which parking must be provided on-site will be determined by the City of Windhoek Municipal Council in accordance with the City of Windhoek Town Planning Scheme (now known as the City of Windhoek Zoning Scheme). The owner's current intentions are to erect and use the building for residential purpose. Kindly take notice that the plan of the erf lies open for inspection at the town planning notice board in the Customer Care Centre, Main Municipal Offices, Rev. Michael Scott Street, Windhoek. Further take notice that any person objecting to the proposed use of the land as set out above may lodge such objection together with the grounds thereof, with the City of Windhoek, fifth floor, office 524 and with the applicant (SPC) in writing within 14 days of the last publication of this notice. Dated at Windhoek this 10 day of January of 2025 The last date for any objection is 7 February 2025. Owner Name: Quarto Investments Twenty Six CC Postal address: P.O. Box 6838 Windhoek Contact details: 061 388 800 / 081 1278619

**FORM 3 Rule 13(1) SUBSTITUTED SERVICE IN THE HIGH COURT OF NAMIBIA (Main Division) CASE NO: HC-MD-CIV-ACT-CON-2024/04335** In the matter between: HOEFFNER PROPERTIES NO 1 CC APPLICANT and FREDERICK ERNST JEFFERIES RESPONDENT To: FREDERICK ERNST JEFFERIES, a major male with ID number 88032101543, phone 081 366 2971, email address: fredy@jeff77@gmail.com and with postal address P.O. Box 86704, Eros but whose present whereabouts are unknown. TAKE NOTICE that by summons sued out of this court, you have been called upon to give notice, within 10 days after the publication of this notice, to the registrar and to the plaintiff's legal practitioner of your intention to defend (if any) in an action wherein the plaintiff claims against the defendants jointly and severally, the one paying the other to be absolved: 1. Payment of N\$43,607.15; 2. Interest on the capital amount of N\$43,607.15 at a rate of 11.25% per annum from 01 September 2023 to the date of full payment by the defendant to the plaintiff; 3. Insofar as may be necessary, confirmation that the lease agreement is cancelled; 4. Cost of suit on an attorney and client scale; 5. Further and/or alternative relief. TAKE FURTHER NOTICE that in the event of your defending the action, you are to deliver a notice of intention to defend which must therein give your full residential or business address, and must also appoint an address, not being a post office box or poste restante, for service on you of all documents in this action within a flexible radius from the office of the registrar or if you elect to be served by electronic means indicate your electronic address and in that case service thereof at the address so given is valid and effectual, except where by any order or practice of the court personal service is required. TAKE NOTICE FURTHER that if you fail to give such notice, judgment may be granted against you without further reference to you. TAKE FURTHER NOTICE that simultaneously with the delivery of the notice of intention to defend, the defendant must deliver the return in terms of rule 6(4), which contains the following information about the defendant: (a) in the case of a natural person, his or her full names, identity number where available and if a Namibian citizen or any other person ordinarily resident in Namibia, his or her physical address and where available, his or her telephone or cellular phone number; (b) Plus interest at 16.4% interest per annum from 30 days after sale to date of full and final payment; (c) Deputy Sheriff's fees IMPROVEMENTS: Double storey dwelling: Ground Floor: 1 x lounge (open plan) 1 x kitchen (open plan) 1 x toilet First Floor: 2 x Bedroom (1 en-suite) 1 x Full Bathroom Outbuilding: Open BBQ KINDLY TAKE NOTICE THAT The "Conditions of Sale in Execution" will lie for inspection at the office of the Deputy Sheriff of Windhoek and at the Head Office of Plaintiff in Windhoek at Plaintiff's Attorneys, Koep & Partners at the undermentioned address, KINDLY FURTHER TAKE NOTICE THAT the Deputy Sheriff and the Judgment Creditor shall enforce strict measures with the compliance of the "Conditions of Sale" signed by the purchaser on the date of the auction. **FORM 3 Rule 13(1) SUBSTITUTED SERVICE IN THE HIGH COURT OF NAMIBIA (Main Division) CASE NO: HC-MD-CIV-ACT-CON-2024/04335** In the matter between: HOEFFNER PROPERTIES NO 1 CC APPLICANT and FREDERICK ERNST JEFFERIES RESPONDENT To: FREDERICK ERNST JEFFERIES, a major male with ID number 88032101543, phone 081 366 2971, email address: fredy@jeff77@gmail.com and with postal address P.O. Box 86704, Eros but whose present whereabouts are unknown. TAKE NOTICE that by summons sued out of this court, you have been called upon to give notice, within 10 days after the publication of this notice, to the registrar and to the plaintiff's legal practitioner of your intention to defend (if any) in an action wherein the plaintiff claims against the defendants jointly and severally, the one paying the other to be absolved: 1. Payment of N\$43,607.15; 2. Interest on the capital amount of N\$43,607.15 at a rate of 11.25% per annum from 01 September 2023 to the date of full payment by the defendant to the plaintiff; 3. Insofar as may be necessary, confirmation that the lease agreement is cancelled; 4. Cost of suit on an attorney and client scale; 5. Further and/or alternative relief. TAKE FURTHER NOTICE that in the event of your defending the action, you are to deliver a notice of intention to defend which must therein give your full residential or business address, and must also appoint an address, not being a post office box or poste restante, for service on you of all documents in this action within a flexible radius from the office of the registrar or if you elect to be served by electronic means indicate your electronic address and in that case service thereof at the address so given is valid and effectual, except where by any order or practice of the court personal service is required. TAKE NOTICE FURTHER that if you fail to give such notice, judgment may be granted against you without further reference to you. TAKE FURTHER NOTICE that simultaneously with the delivery of the notice of intention to defend, the defendant must deliver the return in terms of rule 6(4), which contains the following information about the defendant: (a) in the case of a natural person, his or her full names, identity number where available and if a Namibian citizen or any other person ordinarily resident in Namibia, his or her physical address and where available, his or her telephone or cellular phone number or both; (b) in the case of a close corporation, its name and registration number, postal address and registered office referred to in section 25 of the Close Corporations Act 1988 (Act No. 26 of 1988) and the particulars referred to in paragraph (a) of at least one member or officer as defined in that Act and the particulars referred to in paragraph (a) of its accounting officer appointed in terms of section 59 of that Act; (c) in the case of a company, its name and registered number, postal address and registered office referred to in section 178 of the Companies Act 2004 (Act No. 28 of 2004) and the particulars referred to in paragraph (a) of at least one director and the secretary referred to in section 223 of that Act including all particulars referred to in section 223(1) of that Act and in case of the officer or secretary of any other body corporate the particulars referred to in paragraph (b) of section 223(1) of that Act; (d) in the case of any other juristic person, the particulars referred to in paragraph (a) of at least one officer or secretary or a person, by whatever name called, running its affairs; and (e) in the case of a trust which is duly authorised to litigate, the particulars referred to in paragraph (a) of all trustees and a reference number given by the master to the trust deed registered with the master. The particulars so provided remain binding on the party to which they relate and may be used by the court or by the other party to effect service of any notice or document on such party or to give notice to such party. TAKE FURTHER NOTICE that as soon as the managing judge has given notice of a case planning conference in terms of rule 23(1), you

as defendant will be required to meet with the plaintiff in order to agree a case plan in terms of rule 23(3) for submission to the managing judge for the exchange of pleadings and the time within which you will deliver your plea and counterclaim if any will be determined by the court having regard to such plan and if you fail to cooperate in submitting such a plan, the court will determine the time within which you must deliver your plea and counterclaim, if any, and you as defendant must comply with such order. DATED at WINDHOEK on this 21st day of NOVEMBER 2024 NELMARI NEL KOPPLINGER BOLTMAN VAN GREUNEN LEGAL PRACTITIONERS FOR THE PLAINTIFF 10 JAKARANDA STREET SUIDERHOF WINDHOEK TO: REGISTRAR OF THE HIGH COURT MAIN DIVISION WINDHOEK

**IN THE HIGH COURT OF NAMIBIA Case Number: HC-MD-CIV-ACT-CON-2023/01073** In the matter between: NEDBANK NAMIBIA LIMITED PLAINTIFF and JR FUEL SUPPLIES CLOSE CORPORATION 1st DEFENDANT JEFFREY PATRICK DE KLERK 2nd DEFENDANT RICHARDINE MADELINE DE KLERK 3rd DEFENDANT NOTICE OF SALE IN EXECUTION OF IMMOVABLE PROPERTY In Execution of a Judgment of the above Honourable Court in the above mentioned suit, a sale will be held on TUESDAY, the 28th day of JANUARY 2025 at 11:00 at ERG NO. 3223, NO. 20 CEASAR MARTIN STREET, NARRAVILLE, WALVIS BAY. Certain: Erf 3223 (A portion of Erf No. 3197), Narraville (Extension No. 3) SITUATE: In the Municipality of Walvis Bay Registration Division "F" Erongo Region Measuring : 2056 (Two Zero Five Six) square meters HELD BY: Deed of Transfer No. T7208/2014 Subject: To the conditions contained therein ALLEGED IMPROVEMENTS DESCRIPTION: The following improvements are on the property (although nothing in this respect is guaranteed). The building comprising of: 1X BOARDROOM 1X OFFICE 1X CHANGE ROOM 1X OFFICE 1 X GENTS TOILET 1X LADIES TOILET 1X KITCHEN WITH DOUBLE ZINC CHURCH HALL (HALF BUILD). The property shall be sold by the Deputy Sheriff of WALVIS BAY at ERG NO. 3223, NO. 20 CEASAR MARTIN STREET, NARRAVILLE, WALVIS BAY to the highest bidder in terms of Rule 110(9)(a), in terms of which the property will be sold at no less than 75% of: 1.1 the established municipal value; alternatively, 1.2 the established market value. Should it be established that it is a primary residence. The valuation will be held with the Deputy Sheriff for inspection together with the conditions of sale. The sale is subject to the provisions of the High Court Act No 16 of 1990, as amended, and the property will be sold "voetstoots" according to the existing title deed. 3. 10% of the purchase price to be paid in cash on the date of the sale, the balance to be paid against transfer, to be secured by a Bank or Building Society or other acceptable guarantee to be furnished to the Deputy-Sheriff within 14 (fourteen) days after the date of Sale. 4. The full Conditions of Sale will be read out at the time of the sale. 5. The sale is subject to the provisions of the High Court Act No 16 of 1990, as amended, and the property will be sold "voetstoots" according to the existing title deed. 3. 10% of the purchase price to be paid in cash on the date of the sale, the balance to be paid against transfer, to be secured by a Bank or Building Society or other acceptable guarantee to be furnished to the Deputy-Sheriff within 14 (fourteen) days after the date of Sale. 4. The full Conditions of Sale will be read out at the time of the sale. 5. The sale is subject to the provisions of the High Court Act No 16 of 1990, as amended, and the property will be sold "voetstoots" according to the existing title deed. 3. 10% of the purchase price to be paid in cash on the date of the sale, the balance to be paid against transfer, to be secured by a Bank or Building Society or other acceptable guarantee to be furnished to the Deputy-Sheriff within 14 (fourteen) days after the date of Sale. 4. The full Conditions of Sale will be read out at the time of the sale. 5. The sale is subject to the provisions of the High Court Act No 16 of 1990, as amended, and the property will be sold "voetstoots" according to the existing title deed. 3. 10% of the purchase price to be paid in cash on the date of the sale, the balance to be paid against transfer, to be secured by a Bank or Building Society or other acceptable guarantee to be furnished to the Deputy-Sheriff within 14 (fourteen) days after the date of Sale. 4. ## **PUBLIC CONSULTATION MEETING MINUTES:**

**ENVIRONMENTAL SCOPING ASSESSMENT (ESA) FOR THE PROPOSED PROSPECTING & EXPLORATION ACTIVITIES ON EXCLUSIVE PROSPECTING LICENCE (EPL) No. 10029, 10048, and 10053 LOCATED NORTHEAST OF KAMANJAB, KUNENE REGION.**

**Date:** Tuesday, 02 April 2025

**Time:** 10:00 – 11:10

**Venue:** Hall Farm Vierling, Kunene region

The public consultation meeting was attended by twenty-four (24) people, including one (2) Environmental Consultant and one (1) Archaeologist from Excel Dynamic Solutions (Pty) Ltd (EDS) - **Please refer to the attached attendance register.**

### **1. INTRODUCTION AND WELCOMING REMARKS**

The meeting was opened by the environmental consultant with an introduction of the team, who they are, and why they are consulting affected parties of the proposed prospecting and exploration activities on EPL 10029, 10048, and 10051. The meeting attendance register was then circulated for the attendees to write down their names and contact details so that they could be added to the list of interested and affected parties (I&APs) and receive further information on the ESA process.

### **2. MEETING AGENDA AND PRESENTATION**

The agenda of the meeting included the following main points:

#### **2.1 Brief Description of the Project**

The Environmental Scoping Assessment (ESA) and the reason that the Proponent appointed Excel Dynamic Solutions (Pty) Ltd (EDS), an independent Environmental Consultant to carry out the ESA and apply for the Environmental Clearance Certificate (ECC).

## **2.2 Explanation of what an ESA is, its Process, and the Public Role in the Process**

Mr. Wilbard Angula explained to the attendees the purpose of the meeting and why they were invited (with reference to the Environmental Management Act (EMA) No. 7 of 2007 and its 2012 Environmental Impact Assessment (EIA) Regulations on Public Consultation). Mr. Wilbard further explained what an ESA is and that the proposed exploration activities are one of the listed activities in the 2012 EIA Regulations of the EMA that cannot be undertaken without an ECC from the Environmental Commissioner.

## **2.3 Presentation of Potential Project Impacts**

To ensure transparency and that the attendees understand both sides of the proposed project activities, the Environmental Consultants also presented the potential pre-identified potential positive & negative environmental and social impacts.

## **2.4 Public Open Discussion (Interactive Session)**

Mr. Wilbard allowed the meeting attendees to raise their concerns, issues and/or comments on the proposed project activities. The concerns/issues and comments recorded are presented in **Table 1** below.

**Table 1: Comments and issues raised during the public consultation meeting, 02<sup>nd</sup> of April 2025**

Comment/ issue No.	Commenter name & issue/comment/question	Response and name of responder:
1.	<p><b>Commenter 1:</b> When do you expect to visit the farms?</p> <p>I represent multiple stakeholders here today. We have prepared written submissions, which will be provided shortly. The primary issue is that most farms fall under the Black Rhino Custodian Programme. Under this programme, our Memorandum of Understanding (MoU) with the Ministry of Environment, Forestry, and Tourism (MEFT) prohibits granting access without prior approval. To proceed, you must first apply for access through MEFT. Upon receiving consent, we can discuss the required mitigation measures for entry. Given the presence of endangered and protected species, as well as high poaching risks, unauthorized access is strictly prohibited. We require details on your purpose for entry, the individuals involved, and your proposed</p>	<p><b>Mr. Wilbard Angula (WA):</b> As mention in the email communication the site visit are planned today after the meeting</p> <p><b>MR. WA:</b> Well, Noted</p>

Comment/ issue No.	Commenter name & issue/comment/question	Response and name of responder:
	activities before any permissions can be considered.	
2.	<b>Commenter 2:</b> For open farms (non-custodian properties), I expect prior arrangements for visits. Rather than arriving unannounced and expecting immediate guidance, please schedule an appointment for a specific date and time and adhere to it. This ensures proper coordination and respects my availability.	<b>MR. WA:</b> Noted. This underscores the importance of registering as an Interested and Affected Party (I&AP) and signing the attendance register. By doing so, we can obtain your contact details to facilitate proper arrangements for future engagements.
3.	<b>Commenter 3:</b> Regarding the impacts outlined on page 5 of your BID, what mitigation measures are proposed to enhance positive outcomes while minimizing negative effects?	<b>Mr. WA:</b> The potential impacts identified in the BID represent preliminary findings. A comprehensive analysis of impacts will be detailed in the EMP and Scoping Report. The public stakeholder consultation process serves to identify additional concerns from affected parties regarding the proposed exploration activities
4.	<b>Commenter 4:</b> There is a law that says you are not allowed to prospect or mine in a radius of 10 kilometers of a park.	<b>Mr. Chris Muhapi (CM):</b> The legal framework exists; the Ministry of Mines and Energy is able to verify whether an EPL falls within the 10-kilometer radius restriction.

Comment/ issue No.	Commenter name & issue/comment/question	Response and name of responder:
5.	<b>Commenter 5:</b> What minerals is the proponent prospecting for?	<b>Mr. WA:</b> Prospecting activities typically target commodity groups rather than individual minerals. In this case, the primary target commodities include base & rare metals along with industrial minerals.
6.	<b>Commenter 6:</b> Will the proponent conduct speculative prospecting across the entire concession area exceeding 100,000 hectares, or will exploration be targeted based on geological indicators?	<b>Mr. Mandume Leonard:</b> Exploration occurs in two distinct phases: (1) a prospecting phase involving desktop studies and geological reviews to identify target areas, followed by (2) a drilling phase at selected sites. While an EPL may cover 10+ farms, the target commodities typically occur in specific locations. The larger concession area increases discovery potential. Actual exploration activities focus only on target areas.
7.	<b>Commenter 7:</b> Most Many farm owners have made significant capital investments in tourism enterprises, particularly wildlife-based operations (both hunting and photographic safaris) that leverage proximity to Etosha National Park. These ventures demonstrate: financial investments, Substantial employment generation, wildlife populations, and widespread socioeconomic benefits. Given this established, high-value land use, what justification exists for	<b>Mr. ML:</b> The current exploration phase aims solely to assess the economic feasibility of mineral potential through delineation activities, not extraction. This stakeholder consultation serves to: Document all concerns regarding potential impacts, Inform the drafting of a comprehensive Scoping Report, and Enable the competent authority to make evidence-based licensing decisions. We recognize tourism as a critical land use and seek balanced coexistence during exploration. This process exclusively addresses exploration impacts. No mining activities are proposed or permitted at this stage.

Comment/ issue No.	Commenter name & issue/comment/question	Response and name of responder:
	<p>prioritizing mining over sustainable tourism development?</p> <p>I am concerned because MEFT representatives are not present, given their custodial role over the wildlife potentially affected by these proposed activities?</p> <p>The socioeconomic assessment must account for potential job displacement beyond direct employment impacts. While mining may create new jobs, it risks: Tourism Job Losses such as Lodge staff (chefs, housekeepers, guides, Wildlife management personnel, Secondary Sector Impacts: such as Agricultural suppliers to tourism facilities, Local craft and service industries and Brand Erosion such as Wilderness experiences (e.g., game viewing) are incompatible with active mining operations</p>	<p><b>Mr. ML:</b> The MEFT is already aware of this project because even before we came here, we had registered the project on their portal.</p> <p><b>Mr. ML:</b> This scoping exercise specifically addresses exploration activities only, with no mining proposed at this stage. We recognize the need to balance multiple sectoral interests, particularly tourism, during the exploration phase.</p>

Comment/ issue No.	Commenter name & issue/comment/question	Response and name of responder:
	Does this EIA relate to prospecting or also for mining or will there be another EIA for the mining	<b>Mr. ML:</b> The current ECC process applies solely to prospecting and exploration activities. Should commercially viable deposits be identified, a separate, comprehensive EIA would be required prior to any mining license consideration.
8.	<b>Commenter 8:</b> Could the proponent clarify whether the EPL boundaries were properly evaluated against the Etosha Heights conservancy designation prior to demarcation? Furthermore, does the company intend to maintain the current EPL boundaries despite this potential overlap with a sensitive ecological zone?	<b>Mr. CM:</b> The proponent's report will be submitted to both the MME and the MEFT. As part of the review process, MEFT may identify ecologically sensitive areas within the EPL, prompting possible boundary adjustments. Site-specific field assessments are essential to confirm the presence of rhino custodial farms not reflected on MME maps, document habitat sensitivities, and develop suitable mitigation measures. This on-the-ground verification allows MEFT to accurately assess conservation conflicts, enforce activity restrictions.
9.	<b>Commenter 9:</b> What happens if the exploration company finds their target minerals on my farm.	<b>Mr. ML:</b> If commercially viable mineral deposits are confirmed, the proponent will be required to apply for a Mining License through the relevant authorities. This will be followed by the completion of a comprehensive EIA, including full specialist studies, and the acquisition of an ECC subject to a rigorous review process. Only after successfully completing these steps can the proponent and the landowner enter into formal negotiations regarding land access agreements, operational safeguards, benefit-sharing arrangements, and compensation mechanisms.

Comment/ issue No.	Commenter name & issue/comment/question	Response and name of responder:
10.	<b>Commenter 10:</b> Could you please confirm the deadline for submitting comments and concerns regarding the draft Scoping Report?	<b>Mr. WA:</b> The deadline for submitting comments on the Scoping Report is 14 weeks from today. All stakeholders are requested to submit their inputs via the email addresses provided in the BID document to ensure their concerns are incorporated into the final assessment.

#### FINAL REMARKS AND CONCLUSION OF THE MEETING

Mr. Wilbard thanked the attendees for their crucial input through comments and raising their concerns. He indicated to the attendees that all their comments, concerns, and inputs had been noted down for consideration and addressing in the Environmental Scoping Assessment (ESA) Report as well as incorporating their recommendations into the draft EMP.

Furthermore, Mr. Wilbard informed the attendees that the draft meeting minutes, Environmental Assessment Report, and Environmental Management Plan (EMP) will be shared with them for review and further comments. These documents will be made available through emails provided on the attendance register.

Once the review of the draft ESA Report and EMP is done, the documents will be finalized and submitted to the Environmental Commissioner at the Department of Environmental Affairs and Forestry (DEAF) for evaluation and consideration of an ECC.

The meeting adjourned at 11h10.

Attention: Mr. Wilbard Angula

E-mail: [wangula@edsnamibia.com](mailto:wangula@edsnamibia.com)

Dear Mr. Angula,

**SUBMISSIONS IN OPPOSITION TO THE PROPOSED EXPLORATION ACTIVITIES ON  
EXCLUSIVE PROSPECTING LICENSES 10023, 10029, 10048 & 10053**

We confirm that we act for African Wildlife Conservation Trust, Ongava Game Reserve (Pty) Ltd, Avondvrede Game Farm (Pty) Ltd and Southern Etosha Farm Four Three Zero (Pty) Ltd (collectively "**Clients**").

Our Clients' environmental concerns and objections in relation to the proposed exploration activities on Exclusive Prospecting License numbers 10023, 10029, 10048 and 10053 ("the **EPLs**") by Bamba Mining Namibia (Pty) Ltd, can be summarised as follows:

**INTRODUCTION AND LOCUS STANDI**

1. The following properties located within the general area of EPL 10053, are either directly or indirectly owned by our Clients, namely: Leeuport, Margo, Tiervlei, Sonop, Burgershof, Avondvrede, Bakenkop and Volouiga ("**Affected Properties**").
2. Our Clients have made substantial tourism and conservation investments in respect of the Affected Properties and surrounding area, and as will appear below, have assumed and been given the responsibility to protect the wildlife on the Affected Properties.
3. The remainder of the properties described in the EPLs (excluding the Affected Properties) ("**Remaining Properties**") are in close proximity to the Affected Properties and accordingly any exploration and/or mining activities will have a direct impact on the conservation and tourism activities of our Clients.
4. As such, our Clients have:
  - 4.1 the necessary locus standi due to their respective ownership and control of the aforesaid Affected Properties;

Directors: Jurie Badenhorst BComm LLB LLM (Stell); Peter Johns BCom LLB (RAU); Christa de Wet BCom Law LLB (UOFS); Karin Klazen BA LLB (UCT); Mia Kellerman LLB (NWU); Jenny Vermeulen LLB LLM (UOFS)

Ellis Shilengudwa Incorporated ("ESI") is a company registered in Namibia (registration number 2011/0099), which provides services from its place of business at 1st Floor, the Steps Building, c/o Grove & Chasie Street, Kleine Kuppe, PO Box 3300, Windhoek, Namibia.

ESI is regulated and authorised by the Law Society of Namibia (<http://www.lawsocietynamibia.org>)

ESI is a member of DLA Piper Africa, a Swiss Verein whose members are comprised of independent law firms in Africa working with DLA Piper. Further information on ESI, DLA Piper Africa and DLA Piper can be found at [www.dlapiperafrica.com](http://www.dlapiperafrica.com).

- 4.2 an interest on the activities conducted on the Remaining Properties, as such activities will directly affect the conservation and tourism efforts undertaken on the Affected Properties; and
  - 4.3 direct and vested interest in the outcome of the Environmental Scoping Assessment ("ESA") for the proposed exploration activities in the area covered by the EPLs ("EPL Areas").
5. Our Clients are conscious of the obvious competing interests between tourism tied together with the protection of Namibia's ecological environment, the protection of endangered species, such as elephant, black faced impala and black and white rhinoceroses - and mining, an equally important activity. However, from the submissions below, it will become evident that there are important considerations that favour our Clients' interests, such as:
- 5.1 the existence of a contractual relationship between some of our Clients and the Ministry of Environment and Tourism ("MEFT") to host black rhinoceroses on some of the Affected Properties, and to protect and care for them;
  - 5.2 the National Policy on Prospecting and Mining in Protected Areas, containing policies to exclude prospecting and mining in biodiversity priority areas, high value tourism areas, and known breeding areas of specific species, such as black rhinoceros;
  - 5.3 the fact that the proposed exploration operations threaten the safety and habitat of the rare and endangered species of animals in the area, together with the usual negative consequences that come with exploration in a protected habitat, such as grazing disturbances, noise and vibration pollution associated with drilling, and potential poaching from exploration personnel gaining access to the area; and
  - 5.4 rhinoceroses are the primary target for specialized criminal syndicates exploiting Namibian wildlife. The effect of poaching on small, isolated populations is increasingly severe.

#### **BLACK RHINOCEROS CUSTODIANSHIP PROGRAMME**

6. The MEFT's "*Black Rhinoceros Custodianship Programme*" ("**Custodianship Programme**") translocates black rhinoceroses to private and communal lands, where landowners become custodians of such black rhinoceroses, taking responsibility for their care and security.
7. For purposes of the Custodianship Programme the MEFT concludes Memorandum of Understanding ("**MoU**") with respective landowners. We confirm that various Affected Properties either form part of the Custodianship Programme or have been identified to be incorporated in the Custodianship Programme, in the near future.
8. For security reasons we can however not divulge which of the Affected Properties directly form part of the Custodianship Programme, nor which of the Affected Properties have rhinoceroses roaming on such properties.
9. The MOU provides for numerous rights and obligations for both the landowner and the MEFT. Important obligations for the landowners are set out in the Care and Monitoring provisions of the MOU, such as providing a water supply, sufficient browsing and supplementary feed during times of drought, providing measures for effective combating of illegal hunting or poaching, and not allowing excessive disturbance of the rhinoceroses, with the purpose to avoid any possible harm to the rhinoceroses.
10. Not only may our Clients not be able to fulfil their obligations towards the MEFT if exploration activities are allowed on the Affected Properties or the Remaining Properties ("**EPL Areas**"), but more importantly, any exploration operations in the area poses a direct and imminent threat to the rhinoceroses, which will inevitably result in the reduction of rhinoceros numbers in the area.

11. Accordingly, permitting ESA activities on the Affected Properties will contravene the provisions of the MOUs with the MEFT and accordingly our Clients cannot allow access to the Affected Properties for any activities without the express written consent of the MEFT.

#### **TOURISM OPERATIONS AND EMPLOYMENT**

12. Our Clients' tourism operations are based principally on the natural beauty and biodiversity of the EPL Areas, including the endangered wildlife located on the Affected Properties with specific focus on the protection of rhinoceroses, elephant and black faced impala that inhabit the Affected Properties. Any exploration or mining operations in the EPL Areas will therefore directly interfere with the tourism operations and have a negative effect on associated economic benefits for the local community.
13. Our Clients collectively employ more than 200 employees, mostly from the surrounding areas, and rely on tourism operations and conservation activities to conduct their business. Any exploration or mining activities in the EPL Areas would directly affect the activities of our Clients and therefore will have a negative impact on employment. Our Clients can't guarantee continued employment should the EPLs be granted.

#### **THE NATIONAL POLICY ON PROSPECTING AND MINING IN PROTECTED AREAS**

14. The National Policy on Prospecting and Mining in Protected Areas, a policy prepared jointly by MEFT and the Ministry of Mines and Energy ("MME") and signed by the respective Ministers in late 2018 was to endure for a period until 2022, and we understand the policy was extended by the aforesaid Ministers and is still currently still used as a guide to decision-making.
15. The policy recognizes that the potential negative impacts of exploration and mining activities can be devastating to biodiversity and ecosystems. We submit that the policy was thus developed to guide decision-making with regard to exploration and mining in protected areas. The approach in the policy is to exclude prospecting and mining, amongst others, in biodiversity priority areas, high value tourism areas, and known breeding areas of specific species.
16. Accordingly, our Clients' environmental interests must be considered in the context of the policy and alongside global environmental practices and Namibia's national environmental commitments and constitutional obligations.

#### **PROJECT PLAN AND ACTIVITIES**

17. The Project Plan and Activities as per the Background Information Documents for each of the EPLs ("BIDs") provides that the proposed exploration activities will inter alia consist of non-invasive techniques, such as mapping/surveys, and invasive techniques e.g., soil sampling, trenching and drilling.
18. The duration of the exploration activities is anticipated to last for about 3 years or longer. Considering the duration of the exploration activities, size of the EPL Areas and the multitude of mineral groups listed in the EPLs this appears to be a speculative exercise at best and should be treated accordingly.
19. The measures outlined in the BID (the "Measures") fail to address the fundamental concerns of our Clients regarding the risks posed by prospecting operations on the Affected Properties. Specifically, none of the Measures:
  - 19.1 will prevent confidential and sensitive information about the presence and location of rare or endangered animals and plant species on the Affected Properties from being disclosed by employees or service providers to unauthorized third parties; or
  - 19.2 will ensure that the unique biodiversity features and attributes of the Affected Properties are protected from direct or indirect invasive or disruptive actions by such employees or service providers.

20. Additionally, the area is already water- stressed which makes the planned water abstraction a concern. It is unlikely that there will be sufficient water for exploration activities or mining operations.
21. The Measures do not conform to the requirements of international best practices and global standards regarding the regulation of interactions between mining and other commercial land use or exploitation rights, and environmental, eco-conservation, biodiversity, and wildlife rights. In this regard, our Clients reserve the right to make further submissions on this matter in the appropriate forum at the relevant time.
22. Also, given the number of dangerous animals (lions, hyena, wild dogs, elephants and rhinoceroses) in the area, our Clients are in no position whatsoever to safeguard anyone's personal safety in the area.
23. Our Clients, therefore have legitimate reasons to be seriously concerned about the manageability, feasibility and financial ability of the EPL applicant for purposes of undertaking any prospecting operations in the EPL Areas. These concerns extend not only to the Affected Properties but also to any activities conducted on the Remaining Properties.

#### **NEGATIVE IMPACTS OF THE PROPOSED EXPLORATION OPERATIONS**

24. Exploration and mining activities threaten to undo years of conservation work, and the tourism hub established in the EPL Areas. In habitats where critically endangered species live, exploration and mining are not a compatible activity. Mining (and exploration) and conservation cannot coexist in a fragile ecosystem.
25. Exploration and mining activities, such as drilling, the noise of including heavy machinery, and blasting, force rhinoceroses and other endangered animals to abandon their habitats, destroying the tourism models reliant on them. Therefore, our Clients have a justified fear that the rhinoceroses and other endangered species may leave the area which will create harmful results for our Clients who have set up their conservation and tourism programmes in the area, through continuous investment.
26. Accordingly, our Clients believe that intrusive prospecting operations are incompatible with their investment in Namibia and the purpose of nature conservation. These operations also pose a risk of attracting poachers to the area. Such activities conflict with our Clients' role in supporting Namibia's biodiversity and natural capital. Especially as some of our Clients are custodians for critically endangered wildlife species in Namibia.
27. Due to the presence of rhinoceroses, elephants and other endangered species in the EPL Area, there has been a significant increase in poaching activities, leading to heightened risks. To mitigate disturbance and control the potential gathering of information by poachers or their accomplices, our Clients already monitor district roads in and around the EPL Areas for poaching activities. With increased activity and traffic in the area, anti-poaching resources will be stretched, and the effectiveness of the anti-poaching measures will be severely affected, which will not be limited to the EPL Areas, but will extend to surrounding areas including Etosha National Park.
28. The issuing of an exploration licence would also be a direct contradiction of the National Strategy on Wildlife Protection and Law Enforcement. This is a policy document signed by the Minister of MEFT in December 2020, which recognises the unprecedented levels of rhinoceroses poaching in Namibia and the need to ensure the effective enforcement of laws governing wildlife resources in the country.

**CONCLUSION**

29. For the reasons expressed in this submission, our Clients will not provide access to the Affected Properties for any ESA or exploration activities without the express instruction of the MEFT and then only if our Clients are satisfied that such ESA activities will comply with international best practise for areas containing endangered and dangerous animals.

We thank you for the opportunity provided to raise our concerns and trust that this submission will be included in your report. Additionally, and for good order, we confirm that this submission will be forwarded to both the Environmental Commissioner and the Mining Commissioner

Dear Mr Angula

**RE: Exclusive Prospecting Licenses (EPL) 10029,10048, and 10053 located northeast of Kamanjab, Kunene Region.**

1. We record that we act on behalf of Etosha Rand Conservation Area Trust (ERCA) and Etosha Heights Game Safaris (Pty) Ltd ("our Clients")
2. Our Clients are the owners of farms Moesamoeroep, Vlakwater Eensgesind, Serengetti, Uitkoms Oos, Sonderwater, Grenswag, Leeurante and Olifantshoek all of which are listed in BID : EPLs 10029,10048 and 10053 document that our Client received today, as .farms that will be impacted by the exploration and prospecting activities associated with the EPLs.
3. Kindly register both our Clients as Interested and Affected Parties to enable us to comment and receive further information on the proposed project.

**Kind Regards**

---

Dear Mr. Angula,

**SUBMISSIONS IN OPPOSITION TO THE PROPOSED EXPLORATION ACTIVITIES ON  
EXCLUSIVE PROSPECTING LICENSES 10023, 10029, 10048 & 10053**

Acknowledge receipt:
Date: 02 April 2025
Time: 11:15
(SIGNATURE)
(PRINT NAME)

We confirm that we act for African Wildlife Conservation Trust, Ongava Game Reserve (Pty) Ltd, Avondvrede Game Farm (Pty) Ltd and Southern Etosha Farm Four Three Zero (Pty) Ltd (collectively "Clients").

Our Clients' environmental concerns and objections in relation to the proposed exploration activities on Exclusive Prospecting License numbers 10023, 10029, 10048 and 10053 ("the EPLs") by Bamba Mining Namibia (Pty) Ltd, can be summarised as follows:

#### INTRODUCTION AND LOCUS STANDI

1. The following properties located within the general area of EPL 10053, are either directly or indirectly owned by our Clients, namely: Leeuport, Margo, Tiervlei, Sonop, Burgershof, Avondvrede, Bakenkop and Volouiga ("Affected Properties").
2. Our Clients have made substantial tourism and conservation investments in respect of the Affected Properties and surrounding area, and as will appear below, have assumed and been given the responsibility to protect the wildlife on the Affected Properties.
3. The remainder of the properties described in the EPLs (excluding the Affected Properties) ("Remaining Properties") are in close proximity to the Affected Properties and accordingly any exploration and/or mining activities will have a direct impact on the conservation and tourism activities of our Clients.
4. As such, our Clients have:
  - 4.1 the necessary locus standi due to their respective ownership and control of the aforesaid Affected Properties;

**Directors:** Jurie Badenhorst BComm LLB LLM (Stell); Peter Johns BCom LLB (RAU); Christa de Wet BCom Law LLB (UOFS); Karin Klazen BA LLB (UCT); Mia Kellerman LLB (NWU); Jenny Vermeulen LLB LLM (UOFS)

Ellis Shilengudwa Incorporated ("ESI") is a company registered in Namibia (registration number 2011/0099), which provides services from its place of business at 1st Floor, the Steps Building, c/o Grove & Chasie Street, Kleine Kuppe, PO Box 3300, Windhoek, Namibia.

ESI is regulated and authorised by the Law Society of Namibia (<http://www.lawsocietynamibia.org>)

ESI is a member of DLA Piper Africa, a Swiss Verein whose members are comprised of independent law firms in Africa working with DLA Piper. Further information on ESI, DLA Piper Africa and DLA Piper can be found at [www.dlapiperafrica.com](http://www.dlapiperafrica.com).

- 4.2 an interest on the activities conducted on the Remaining Properties, as such activities will directly affect the conservation and tourism efforts undertaken on the Affected Properties; and
  - 4.3 direct and vested interest in the outcome of the Environmental Scoping Assessment ("ESA") for the proposed exploration activities in the area covered by the EPLs ("EPL Areas").
5. Our Clients are conscious of the obvious competing interests between tourism tied together with the protection of Namibia's ecological environment, the protection of endangered species, such as elephant, black faced impala and black and white rhinoceroses - and mining, an equally important activity. However, from the submissions below, it will become evident that there are important considerations that favour our Clients' interests, such as:
- 5.1 the existence of a contractual relationship between some of our Clients and the Ministry of Environment and Tourism ("MEFT") to host black rhinoceroses on some of the Affected Properties, and to protect and care for them;
  - 5.2 the National Policy on Prospecting and Mining in Protected Areas, containing policies to exclude prospecting and mining in biodiversity priority areas, high value tourism areas, and known breeding areas of specific species, such as black rhinoceros;
  - 5.3 the fact that the proposed exploration operations threaten the safety and habitat of the rare and endangered species of animals in the area, together with the usual negative consequences that come with exploration in a protected habitat, such as grazing disturbances, noise and vibration pollution associated with drilling, and potential poaching from exploration personnel gaining access to the area; and
  - 5.4 rhinoceroses are the primary target for specialized criminal syndicates exploiting Namibian wildlife. The effect of poaching on small, isolated populations is increasingly severe.

#### **BLACK RHINOCEROS CUSTODIANSHIP PROGRAMME**

W-TA

6. The MEFT's "*Black Rhinoceros Custodianship Programme*" ("**Custodianship Programme**") translocates black rhinoceroses to private and communal lands, where landowners become custodians of such black rhinoceroses, taking responsibility for their care and security.
7. For purposes of the Custodianship Programme the MEFT concludes Memorandum of Understanding ("**MoU**") with respective landowners. We confirm that various Affected Properties either form part of the Custodianship Programme or have been identified to be incorporated in the Custodianship Programme, in the near future.
8. For security reasons we can however not divulge which of the Affected Properties directly form part of the Custodianship Programme, nor which of the Affected Properties have rhinoceroses roaming on such properties.
9. The MOU provides for numerous rights and obligations for both the landowner and the MEFT. Important obligations for the landowners are set out in the Care and Monitoring provisions of the MOU, such as providing a water supply, sufficient browsing and supplementary feed during times of drought, providing measures for effective combating of illegal hunting or poaching, and not allowing excessive disturbance of the rhinoceroses, with the purpose to avoid any possible harm to the rhinoceroses.
10. Not only may our Clients not be able to fulfil their obligations towards the MEFT if exploration activities are allowed on the Affected Properties or the Remaining Properties ("**EPL Areas**"), but more importantly, any exploration operations in the area poses a direct and imminent threat to the rhinoceroses, which will inevitably result in the reduction of rhinoceros numbers in the area.

11. Accordingly, permitting ESA activities on the Affected Properties will contravene the provisions of the MOUs with the MEFT and accordingly our Clients cannot allow access to the Affected Properties for any activities without the express written consent of the MEFT.

#### **TOURISM OPERATIONS AND EMPLOYMENT**

12. Our Clients' tourism operations are based principally on the natural beauty and biodiversity of the EPL Areas, including the endangered wildlife located on the Affected Properties with specific focus on the protection of rhinoceroses, elephant and black faced impala that inhabit the Affected Properties. Any exploration or mining operations in the EPL Areas will therefore directly interfere with the tourism operations and have a negative effect on associated economic benefits for the local community.
13. Our Clients collectively employ more than 200 employees, mostly from the surrounding areas, and rely on tourism operations and conservation activities to conduct their business. Any exploration or mining activities in the EPL Areas would directly affect the activities of our Clients and therefore will have a negative impact on employment. Our Clients can't guarantee continued employment should the EPLs be granted.

#### **THE NATIONAL POLICY ON PROSPECTING AND MINING IN PROTECTED AREAS**

14. The National Policy on Prospecting and Mining in Protected Areas, a policy prepared jointly by MEFT and the Ministry of Mines and Energy ("MME") and signed by the respective Ministers in late 2018 was to endure for a period until 2022, and we understand the policy was extended by the aforesaid Ministers and is still currently still used as a guide to decision-making.
15. The policy recognizes that the potential negative impacts of exploration and mining activities can be devastating to biodiversity and ecosystems. We submit that the policy was thus developed to guide decision-making with regard to exploration and mining in protected areas. The approach in the policy is to exclude prospecting and mining, amongst others, in biodiversity priority areas, high value tourism areas, and known breeding areas of specific species.
16. Accordingly, our Clients' environmental interests must be considered in the context of the policy and alongside global environmental practices and Namibia's national environmental commitments and constitutional obligations.

W.T.A

#### **PROJECT PLAN AND ACTIVITIES**

17. The Project Plan and Activities as per the Background Information Documents for each of the EPLs ("BIDs") provides that the proposed exploration activities will inter alia consist of non-invasive techniques, such as mapping/surveys, and invasive techniques e.g., soil sampling, trenching and drilling.
18. The duration of the exploration activities is anticipated to last for about 3 years or longer. Considering the duration of the exploration activities, size of the EPL Areas and the multitude of mineral groups listed in the EPLs this appears to be a speculative exercise at best and should be treated accordingly.
19. The measures outlined in the BID (the "Measures") fail to address the fundamental concerns of our Clients regarding the risks posed by prospecting operations on the Affected Properties. Specifically, none of the Measures:
  - 19.1 will prevent confidential and sensitive information about the presence and location of rare or endangered animals and plant species on the Affected Properties from being disclosed by employees or service providers to unauthorized third parties; or
  - 19.2 will ensure that the unique biodiversity features and attributes of the Affected Properties are protected from direct or indirect invasive or disruptive actions by such employees or service providers.

20. Additionally, the area is already water- stressed which makes the planned water abstraction a concern. It is unlikely that there will be sufficient water for exploration activities or mining operations.
21. The Measures do not conform to the requirements of international best practices and global standards regarding the regulation of interactions between mining and other commercial land use or exploitation rights, and environmental, eco-conservation, biodiversity, and wildlife rights. In this regard, our Clients reserve the right to make further submissions on this matter in the appropriate forum at the relevant time.
22. Also, given the number of dangerous animals (lions, hyena, wild dogs, elephants and rhinoceroses) in the area, our Clients are in no position whatsoever to safeguard anyone's personal safety in the area.
23. Our Clients, therefore have legitimate reasons to be seriously concerned about the manageability, feasibility and financial ability of the EPL applicant for purposes of undertaking any prospecting operations in the EPL Areas. These concerns extend not only to the Affected Properties but also to any activities conducted on the Remaining Properties.

#### **NEGATIVE IMPACTS OF THE PROPOSED EXPLORATION OPERATIONS**

W.T.A

24. Exploration and mining activities threaten to undo years of conservation work, and the tourism hub established in the EPL Areas. In habitats where critically endangered species live, exploration and mining are not a compatible activity. Mining (and exploration) and conservation cannot coexist in a fragile ecosystem.
25. Exploration and mining activities, such as drilling, the noise of including heavy machinery, and blasting, force rhinoceroses and other endangered animals to abandon their habitats, destroying the tourism models reliant on them. Therefore, our Clients have a justified fear that the rhinoceroses and other endangered species may leave the area which will create harmful results for our Clients who have set up their conservation and tourism programmes in the area, through continuous investment.
26. Accordingly, our Clients believe that intrusive prospecting operations are incompatible with their investment in Namibia and the purpose of nature conservation. These operations also pose a risk of attracting poachers to the area. Such activities conflict with our Clients' role in supporting Namibia's biodiversity and natural capital. Especially as some of our Clients are custodians for critically endangered wildlife species in Namibia.
27. Due to the presence of rhinoceroses, elephants and other endangered species in the EPL Area, there has been a significant increase in poaching activities, leading to heightened risks. To mitigate disturbance and control the potential gathering of information by poachers or their accomplices, our Clients already monitor district roads in and around the EPL Areas for poaching activities. With increased activity and traffic in the area, anti-poaching resources will be stretched, and the effectiveness of the anti-poaching measures will be severely affected, which will not be limited to the EPL Areas, but will extend to surrounding areas including Etosha National Park.
28. The issuing of an exploration licence would also be a direct contradiction of the National Strategy on Wildlife Protection and Law Enforcement. This is a policy document signed by the Minister of MEFT in December 2020, which recognises the unprecedented levels of rhinoceroses poaching in Namibia and the need to ensure the effective enforcement of laws governing wildlife resources in the country.

## **CONCLUSION**

29. For the reasons expressed in this submission, our Clients will not provide access to the Affected Properties for any ESA or exploration activities without the express instruction of the MEFT and then only if our Clients are satisfied that such ESA activities will comply with international best practise for areas containing endangered and dangerous animals.

We thank you for the opportunity provided to raise our concerns and trust that this submission will be included in your report. Additionally, and for good order, we confirm that this submission will be forwarded to both the Environmental Commissioner and the Mining Commissioner

01 April 2025

Dear Mr. David

## **SUBMISSIONS BY ETOSHA HEIGHTS AND ERCA IN OPPOSITION TO THE PROPOSED EXPLORATION ACTIVITIES ON EXCLUSIVE PROSPECTING LICENSE ( EPL) 10029,10048 & 10053**

We confirm that we act for the Etosha Rand Conservation Area Trust ("ERCA") and Etosha Heights Game Safaris (Pty) Ltd ("Etosha Heights"), owner of the Etosha Heights Private Reserve.

Our clients' environmental concerns in relation to the proposed exploration activities on Exclusive Prospecting License numbers 10029, 10048 and 0053 by Bamba Mining Namibia (Pty) Ltd, as well as 9378 by Lolou Gold Trading Namibia (Pty) Ltd can be summarised as follows:

### **INTRODUCTION AND LOCUS STANDI**

1. Portions of Farms Moesamoeroep, Olifantshoek, Seringetti, Eensgesind, Grenswag, and Leeurante, all of which are owned by our clients respectively, are located within the general area of the EPLs. The Etosha Heights will possibly also extend to the Farms Uitspruit, Vaalkop and Brakpan in the near future.
2. Both our clients have made substantial tourism and conservation investments in these Farms, and as will appear below, assumed and given the responsibility to protect its wildlife.
3. As such, our clients have:
  - 3.1 the necessary locus standi due to their respective ownership and control of the aforesaid area; and

**Directors:** Jurie Badenhorst BComm LLB LLM (Stell); Peter Johns BCom LLB (RAU); Christa de Wet BCom Law LLB (UOFS); Karin Klazen BA LLB (UCT); Mia Kellerman LLB (NWU); Jenny Vermeulen LLB LLM (UOFS)

Ellis Shilengudwa Incorporated ("ESI") is a company registered in Namibia (registration number 2011/0099), which provides services from its place of business at 1st Floor, the Steps Building, c/o Grove & Chasie Street, Kleine Kuppe, PO Box 3300, Windhoek, Namibia.

ESI is authorised and regulated by the Law Society of Namibia (<http://www.lawsocietynamibia.org>)

ESI is a member of DLA Piper Africa, a Swiss Verein whose members are comprised of independent law firms in Africa working with DLA Piper. Further information on ESI, DLA Piper Africa and DLA Piper can be found at [www.dlapiperafrica.com](http://www.dlapiperafrica.com).

- 3.2 direct and vested interest in the outcome of the Environmental Scoping Assessment (ESA) for the proposed exploration activities in the area covered by the EPLs.
4. Our clients are conscious of the obvious competing interests between tourism - tied together with the protection of Namibia's ecological environment – in this case, the protection of an endangered species, the black and white rhinoceroses - and mining, an equally important activity. However, from the submissions below, it will become evident that there are important considerations that favour our clients' interests, such as but not limited to:
- 4.1 the existence of a contractual relationship by Etosha Heights with the Government of Namibia to host black rhinoceroses on its Farms, and to protect and care for them;
- 4.2 The National Policy on Prospecting and Mining in Protected Areas, containing policies to exclude prospecting and mining in biodiversity priority areas, high value tourism areas, and known breeding areas of specific species, such as black rhinoceros;
- 4.3 the fact that Etosha Heights, ERCA Trust and the connecting Farms, which is one of the largest private reserves in Namibia, offering 50,000 hectares of unspoiled wildlife, landscapes, and tranquility, with a strong population of both black and white rhinoceros, operates an intensive rhinoceros conservation program in its Reserve, as part of its tourism operations, all of which cannot be pursued if exploration operations are performed in parts of its Reserve.
- 4.4 The fact that the proposed exploration operations threaten the safety and habitat of the rare and endangered species of black and white rhinoceros in the area, and possibly the Reserve as a whole, together with the usual negative consequences that come with exploration in a protected habitat, such as grazing disturbances, noise and vibration pollution associated with drilling, and potential poaching from exploration personnel gaining access to the area, just to mention a few.
- 4.5 Rhinoceroses are the primary target for specialized criminal syndicates exploiting Namibian wildlife. The effect of poaching on small, isolated populations is increasingly severe.

W.T.A

#### MEMORANDUM OF UNDERSTANDING BETWEEN ETOSHA HEIGHTS AND THE GOVERNMENT

5. The Reserve is a significant habitat for black and white rhinoceros's, which are considered critically endangered, and fall for protection under Article 95 of the Namibian Constitution.
6. During September 2021, Etosha Heights concluded a Memorandum of Understanding ("MOU") with the Government of Namibia through the Ministry of Environment, Forestry and Tourism ("the Ministry") under the Black Rhinoceroses Custodianship Programme for the placement of black rhinoceroses outside of protected areas in Namibia. A copy of the MOU is attached hereto.
7. The land which the Ministry identified for the placement of black rhinoceroses was *inter alia* Moesamoeroep, Sonderwater, and Leeurante, being the farms mentioned above, and portions of which fall within the general area of the EPL.
8. The MOU provides for numerous rights and obligations for both Etosha Heights and the Ministry. Important obligations for Etosha Heights are set out in the Care and Monitoring - provisions in Paragraph 3 of the MOU, such as but not limited to providing water supply, sufficient browse and supplementary feed during time of drought, **providing measures for effective combating of illegal hunting or poaching, and not allowing excessive disturbance on the rhinoceroses, with the purpose to avoid any possible harm to the rhinoceroses.**

9. Not only may Etosha Heights not be able to fulfil its obligations towards the Ministry if exploration activities are allowed in the Area, but more importantly, any exploration operations in the area do pose a direct and imminent threat to the black and white rhinoceros's, which will inevitably result in the migration of black and white rhinoceros's from the Reserve, or even worse, the reduction of black and white rhinoceros's numbers through poaching.

#### **ETOSHA HEIGHTS TOURISM OPERATIONS**

10. Etosha Heights tourism operations are based principally on rhinoceroses tracking and the wildlife in the Reserve, with specific focus on the protection of black and white rhinoceroses that inhabit the Reserve. Any exploration operations in the Area will therefore directly interfere with the tourism operations of Etosha Heights.

#### **PROJECT PLAN AND ACTIVITIES**

11. The Project Plan and Activities as per the Background Information Document ("BID") provides that the proposed exploration activities will inter alia consist of non-invasive techniques, such as mapping/surveys, and invasive techniques e.g., soil sampling, trenching and drilling.
12. The duration of the exploration activities is anticipated to last for about three years or longer.
13. You will appreciate the mere presence of persons in the area puts the on black and white rhinoceroses in danger of poaching and other possible harm.
14. It is therefore obvious that these activities are a direct and long-term (a minimum of 3 years) threat to the safety and habitat of the black and white rhinoceros in the area. Our clients are determined to prevent these activities in the area.

#### **THE ERCA TRUST**

W.T.N

15. The ERCA Trust is a charitable trust with its main objective being the conservation and protection of the black and white rhinoceros on Farm Moesamoeroep, and the rehabilitation and relocation of these rhinoceroses wherever encountered. ERCA likewise operates an intensive rhinoceros conservation program in its own right, as well as under the auspices of, and part of, Etosha Heights.

#### **THE NATIONAL POLICY ON PROSPECTING AND MINING IN PROTECTED AREAS**

16. The National Policy on Prospecting and Mining in Protected Areas, a policy prepared jointly by MEFT and the Ministry of Mines and Energy ('MME'), and signed by both the Environmental Minister and the Mines Minister in late 2018 was to endure for a period until 2022. The policy recognizes that the 'potential negative impacts of exploration and mining activities can be devastating to biodiversity and ecosystems'. We submit that the policy was thus developed to 'guide decision-making with regard to exploration and mining in protected areas' and the policy was extended by the aforesaid Ministers and is still currently a guide to decision-making. The approach in the aforementioned policy was to allegedly exclude prospecting and mining, amongst others, in biodiversity priority areas, high value tourism areas, and known breeding areas of specific species.

#### **NEGATIVE IMPACTS OF THE PROPOSED EXPLORATION OPERATIONS**

17. Exploration and mining activities threaten to undo years of conservation work, expecting tour operators and communities to move aside after everything that has been built up. In habitats where critically endangered species like the black rhinoceros live, exploration and mining are

not a compatible activity. Mining (and exploration) and conservation cannot coexist in a fragile ecosystem.

18. Etosha Heights operations depend, to a large extent, on black and white rhinoceroses, a species critically sensitive to noise and human disturbance. Evidence shows that exploration and mining activities – such as drilling, the noise of including heavy machinery, and blasting – force rhinoceroses to abandon their habitats, destroying the tourism models reliant on them. Our clients have therefore a justified fear that the rhinoceroses may leave the area which will create harmful results for Etosha Heights and ERCA who have set up their conservation and tourism programmes in the same area.
19. The issuing of an exploration licence would also be a direct contradiction of the National Strategy on Wildlife Protection and Law Enforcement. This is a policy document signed by the Environment Minister in December 2020, which recognises the unprecedented levels of rhinoceroses poaching in Namibia and the need to ensure the effective enforcement of laws governing wildlife resources in the country.
20. The area is already water- stressed which makes the planned water abstraction a concern. It is unlikely that there will be sufficient water for exploration activities or mining operations.

In the light of the above, kindly include our clients' submissions in your report. We record our clients' instructions to prevent any exploration activities in the area.

Please note that no access will be granted to the farms managed by our clients, because as stated previously, such access will pose a direct and imminent threat to the black and white rhinoceros's and put our Client in a position where they will not be able to fulfil thier obligations towards the Ministry

Yours faithfully,

**Jenny Vermeulen**  
Director

10 February 2025

Dear Mr. David

**SUBMISSIONS BY ETOSHA HEIGHTS AND ERCA IN OPPOSITION TO THE PROPOSED EXPLORATION ACTIVITIES ON EXCLUSIVE PROSPECTING LICENSE ( EPL) 10029,10048 & 10053**

We confirm that we act for the Etosha Rand Conservation Area Trust ("**ERCA**") and Etosha Heights Game Safaris (Pty) Ltd ("**Etosha Heights**"), owner of the Etosha Heights Private Reserve.

Our clients' environmental concerns in relation to the proposed exploration activities on Exclusive Prospecting License numbers 10029, 10048 and 0053 ("the EPLs") by Bamba Mining Namibia (Pty) Ltd, can be summarised as follows:

**INTRODUCTION AND LOCUS STANDI**

1. Portions of Farms Moesamoeroep, Olifantshoek, Seringetti, Eensgesind, Grenswag, and Leeurante, all of which are owned by our clients respectively, are located within the general area of the EPLs. The Etosha Heights will possibly also extend to the Farms Uitspruit, Vaalkop and Brakpan in the near future.
2. Both our clients have made substantial tourism and conservation investments in these Farms, and as will appear below, assumed and given the responsibility to protect its wildlife.
3. As such, our clients have:
  - 3.1 the necessary locus standi due to their respective ownership and control of the aforesaid area; and

---

**Directors:** Jurie Badenhorst BComm LLB LLM (Stell); Peter Johns BCom LLB (RAU); Christa de Wet BCom Law LLB (UOFS); Karin Klazen BA LLB (UCT); Mia Kellerman LLB (NWU); Jenny Vermeulen LLB LLM (UOFS)

**Ellis Shilengudwa Incorporated ("ESI")** is a company registered in Namibia (registration number 2011/0099), which provides services from its place of business at 1st Floor, the Steps Building, c/o Grove & Chasie Street, Kleine Kuppe, PO Box 3300, Windhoek, Namibia.

ESI is authorised and regulated by the Law Society of Namibia (<http://www.lawsocietynamibia.org>)

ESI is a member of DLA Piper Africa, a Swiss Verein whose members are comprised of independent law firms in Africa working with DLA Piper. Further information on ESI, DLA Piper Africa and DLA Piper can be found at [www.dlapiperafrica.com](http://www.dlapiperafrica.com).

- 3.2 direct and vested interest in the outcome of the Environmental Scoping Assessment (ESA) for the proposed exploration activities in the area covered by the EPLs.
4. Our clients are conscious of the obvious competing interests between tourism - tied together with the protection of Namibia's ecological environment – in this case, the protection of an endangered species, the black and white rhinoceroses - and mining, an equally important activity. However, from the submissions below, it will become evident that there are important considerations that favour our clients' interests, such as but not limited to:
  - 4.1 the existence of a contractual relationship by Etosha Heights with the Government of Namibia to host black rhinoceroses on its Farms, and to protect and care for them;
  - 4.2 The National Policy on Prospecting and Mining in Protected Areas, containing policies to exclude prospecting and mining in biodiversity priority areas, high value tourism areas, and known breeding areas of specific species, such as black rhinoceros;
  - 4.3 the fact that Etosha Heights, ERCA Trust and the connecting Farms, which is one of the largest private reserves in Namibia, offering 50,000 hectares of unspoiled wildlife, landscapes, and tranquility, with a strong population of both black and white rhinoceros, operates an intensive rhinoceros conservation program in its Reserve, as part of its tourism operations, all of which cannot be pursued if exploration operations are performed in parts of its Reserve.
  - 4.4 The fact that the proposed exploration operations threaten the safety and habitat of the rare and endangered species of black and white rhinoceros in the area, and possibly the Reserve as a whole, together with the usual negative consequences that come with exploration in a protected habitat, such as grazing disturbances, noise and vibration pollution associated with drilling, and potential poaching from exploration personnel gaining access to the area, just to mention a few.
  - 4.5 Rhinoceroses are the primary target for specialized criminal syndicates exploiting Namibian wildlife. The effect of poaching on small, isolated populations is increasingly severe.

#### **MEMORANDUM OF UNDERSTANDING BETWEEN ETOSHA HEIGHTS AND THE GOVERNMENT**

5. The Reserve is a significant habitat for black and white rhinoceros's, which are considered critically endangered, and fall for protection under Article 95 of the Namibian Constitution.
6. During September 2021, Etosha Heights concluded a Memorandum of Understanding ("MOU") with the Government of Namibia through the Ministry of Environment, Forestry and Tourism ("the Ministry") under the Black Rhinoceroses Custodianship Programme for the placement of black rhinoceroses outside of protected areas in Namibia. A copy of the MOU is attached hereto.
7. The land which the Ministry identified for the placement of black rhinoceroses was *inter alia* Moesamoeroep, Sonderwater, and Leeurante, being the farms mentioned above, and portions of which fall within the general area of the EPL.
8. The MOU provides for numerous rights and obligations for both Etosha Heights and the Ministry. Important obligations for Etosha Heights are set out in the Care and Monitoring - provisions in Paragraph 3 of the MOU, such as but not limited to providing water supply, sufficient browse and supplementary feed during time of drought, **providing measures for effective combating of illegal hunting or poaching, and not allowing excessive disturbance on the rhinoceroses, with the purpose to avoid any possible harm to the rhinoceroses.**

9. Not only may Etosha Heights not be able to fulfil its obligations towards the Ministry if exploration activities are allowed in the Area, but more importantly, any exploration operations in the area do pose a direct and imminent threat to the black and white rhinoceros's, which will inevitably result in the migration of black and white rhinoceros's from the Reserve, or even worse, the reduction of black and white rhinoceros's numbers through poaching.

#### **ETOSHA HEIGHTS TOURISM OPERATIONS**

10. Etosha Heights tourism operations are based principally on rhinoceroses tracking and the wildlife in the Reserve, with specific focus on the protection of black and white rhinoceroses that inhabit the Reserve. Any exploration operations in the Area will therefore directly interfere with the tourism operations of Etosha Heights.

#### **PROJECT PLAN AND ACTIVITIES**

11. The Project Plan and Activities as per the Background Information Document ("BID") provides that the proposed exploration activities will inter alia consist of non-invasive techniques, such as mapping/surveys, and invasive techniques e.g., soil sampling, trenching and drilling.
12. The duration of the exploration activities is anticipated to last for about three years or longer.
13. You will appreciate the mere presence of persons in the area puts the on black and white rhinoceroses in danger of poaching and other possible harm.
14. It is therefore obvious that these activities are a direct and long-term (a minimum of 3 years) threat to the safety and habitat of the black and white rhinoceros in the area. Our clients are determined to prevent these activities in the area.

#### **THE ERCA TRUST**

15. The ERCA Trust is a charitable trust with its main objective being the conservation and protection of the black and white rhinoceros on Farm Moesamoeroep, and the rehabilitation and relocation of these rhinoceroses wherever encountered. ERCA likewise operates an intensive rhinoceros conservation program in its own right, as well as under the auspices of, and part of, Etosha Heights.

#### **THE NATIONAL POLICY ON PROSPECTING AND MINING IN PROTECTED AREAS**

16. The National Policy on Prospecting and Mining in Protected Areas, a policy prepared jointly by MEFT and the Ministry of Mines and Energy ('MME'), and signed by both the Environmental Minister and the Mines Minister in late 2018 was to endure for a period until 2022. The policy recognizes that the 'potential negative impacts of exploration and mining activities can be devastating to biodiversity and ecosystems'. We submit that the policy was thus developed to 'guide decision-making with regard to exploration and mining in protected areas' and the policy was extended by the aforesaid Ministers and is still currently a guide to decision-making. The approach in the aforementioned policy was to allegedly exclude prospecting and mining, amongst others, in biodiversity priority areas, high value tourism areas, and known breeding areas of specific species.

#### **NEGATIVE IMPACTS OF THE PROPOSED EXPLORATION OPERATIONS**

17. Exploration and mining activities threaten to undo years of conservation work, expecting tour operators and communities to move aside after everything that has been built up. In habitats where critically endangered species like the black rhinoceros live, exploration and mining are

not a compatible activity. Mining (and exploration) and conservation cannot coexist in a fragile ecosystem.

18. Etosha Heights operations depend, to a large extent, on black and white rhinoceroses, a species critically sensitive to noise and human disturbance. Evidence shows that exploration and mining activities – such as drilling, the noise of including heavy machinery, and blasting – force rhinoceroses to abandon their habitats, destroying the tourism models reliant on them. Our clients have therefore a justified fear that the rhinoceroses may leave the area which will create harmful results for Etosha Heights and ERCA who have set up their conservation and tourism programmes in the same area.
19. The issuing of an exploration licence would also be a direct contradiction of the National Strategy on Wildlife Protection and Law Enforcement. This is a policy document signed by the Environment Minister in December 2020, which recognises the unprecedented levels of rhinoceroses poaching in Namibia and the need to ensure the effective enforcement of laws governing wildlife resources in the country.
20. The area is already water- stressed which makes the planned water abstraction a concern. It is unlikely that there will be sufficient water for exploration activities or mining operations.

In the light of the above, kindly include our clients' submissions in your report. We record our clients' instructions to prevent any exploration activities in the area.

## **BAMBA MINING NAMIBIA (PTY) LTD, EPL 10053**

### **NOTICE OF PROHIBITION AND OBJECTION TO MINING ACTIVITIES ON EPACHA PRIVATE GAME RESERVE**

This document serves as a formal objection to any and all prospecting or mining activities within the boundaries of the Epacha Private Game Reserve, particularly concerning EPL No. 10053 as applied for by Bamba Mining Namibia (Pty) Ltd. We highlight our unequivocal stance to deny access to, and the use of, our land for mining purposes due to the significant environmental, economic, cultural, and social risks it poses.

#### **1. LEGAL AND PROCEDURAL CONTEXT**

- The Environmental Scoping Assessment (ESA) process was introduced via a public meeting on 2 April 2025 at the Hall on Farm Vierling, as part of the application for EPL No. 10053.
- EPL\_10053 encompasses Mariana, Florida Oos, and Sangaree—farms entirely owned by Epacha Private Game Reserve, covering a total of 3390.9504 hectares.
- These farms fall under the ownership of the following registered farming entities:
  - Farm Mariana – Epacha Resorts Pty (Ltd), Title Deed No. 2000/443
  - Farm Florida Oos – Epacha Resorts Pty (Ltd), Title Deed No. 2000/442
  - Farm Sangaree – Epacha Resorts Pty (Ltd), Title Deed No. 2000/441
- The applicant must obtain an Environmental Clearance Certificate (ECC) under the Environmental Management Act (EMA) 2007 and EIA Regulations (2012) before proceeding.

#### **2. OBJECTIONS AND IMPACTS**

##### **a. Economic and Social Impact**

- More than 85 direct employees (impacting over 850 dependents) would lose employment.
- 30+ suppliers and contractors would lose their business partnerships with Epacha.
- 10,000 annual bed-nights would be lost, directly affecting Namibia's tourism industry.
- 8,000 annual guests would no longer visit Etosha National Park via Epacha.
- 4,000 guests sent annually to the traditional Himba village will no longer contribute to their local economy.
- Millions in private investments over the last 20 years would be compromised.

#### b. Environmental Impact

- Potential permanent destruction of habitats and local ecosystems.
- Risk to water resources, including the disturbance of subterranean water flow and borehole viability.
- Accelerated desertification and ecosystem imbalance.
- Disruption to migratory species such as bee-eaters.

#### c. Conservation Impact

Epacha is home to hundreds of species, many with vulnerable or endangered conservation statuses. A partial list includes:

- **Angolan Giraffe (*Giraffa giraffa angolensis*) – Vulnerable (IUCN)**
- **Leopard (*Panthera pardus*) – Vulnerable (IUCN)**
- **Brown Hyena (*Parahyaena brunnea*) – Near Threatened (IUCN)**
- **Spotted Hyena (*Crocuta crocuta*)**
- **Aardvark (*Orycteropus afer*)**
- **Aardwolf (*Proteles cristata*)**
- **Porcupine (*Hystrix africaeaustralis*)**
- **Honey Badger (*Mellivora capensis*)**
- **Rock Dassie (*Procavia capensis*)**
- **Plains Zebra (*Equus quagga*)**
- **Mountain Zebra (*Equus zebra*) – Vulnerable (IUCN)**
- **Bat-eared Fox (*Otocyon megalotis*)**
- **Black-faced Impala (*Aepyceros melampus petersi*) – Vulnerable (IUCN)**
- **Springbok (*Antidorcas marsupialis*)**
- **Tsessebe (*Damaliscus lunatus*) – Vulnerable in some regions**
- **Red Hartebeest (*Alcelaphus buselaphus caama*)**
- **Oryx (*Oryx gazella*)**
- **Eland (*Taurotragus oryx*)**

Epacha is also a conservation partner in national biodiversity and species survival efforts. With more than 1900 animals (according to the latest Game Count in 2024),

Epacha is playing a crucial role for conservation. Mining activities would cease data collection vital for these programs.

#### d. Heritage and Cultural Impact

- **Sacred Resting Place:** One of Epacha's beloved shareholders chose to have his ashes permanently placed atop a mountain within the reserve. A specially designed memorial site now stands as a sacred resting place. Mining activity would desecrate this site.
- **Ondundonzu Nananadana Mountains:** These historically and ecologically significant mountains run through the Epacha property. They are historically documented as having one of the highest densities of leopard populations in Namibia. Mining would directly threaten this population and irreparably damage the ecosystem.
- **Himba Heritage:** Mariana and Florida Oos farms contain mountains and land with deep cultural and spiritual relevance to the Himba community.

#### e. Safety and Security Concerns

- Increased risk of poaching due to easier access to protected wildlife.
- Road safety concerns with heavy machinery and unsupervised workers.
- Risk of unvetted individuals encountering paying guests.
- Potential breach of operational safety standards and reserve regulations.

### 3. CONCLUSION

We, the owners and custodians of Epacha Private Game Reserve, formally prohibit and object to any exploration or mining activity on our property. The long-term risks and irreversible damage to the economy, environment, wildlife, cultural heritage, and guest safety cannot be justified by short-term mineral exploration.

We urge the Ministry of Mines and Energy, and the Ministry of Environment, Forestry and Tourism to reject the application for ECC and deny any access to EPL 10053 for mining purposes.

For any other queries please contact us at **+264 81 124 2269/ +264 61 37 5300**

**Mr CGG Van de Vijver**

Mr. J. J Robberts

P. O. Box 260

Outjo

Monday 05 May 2025

Subject: Objection and Registration as I&AP – EPL 10053

Dear Ms. Nakale and Mr. Angula,

In reference to the Background Information Document (BID) for EPL 10053.

I hereby request to be registered as an Interested and Affected Party (I&AP) in relation to this project.

This letter serves as a disapproval and deep concern to this mining exploration on my farm, Vierling, No 435, in the Outjo district, of which I am the legal owner of, which falls within the boundaries of the proposed EPL area.

I wish to write on record that I DO NOT give my consent, nor any approval for such activities to be carried out on my farm of any prospecting or exploration, which is private property, without a valid and legal Court order. Not by Bamba Mining Namibia (PTY) Ltd or any of its representatives, nor any other Company for this matter.

I have serious concerns about the potential environmental, agricultural and Tourism impacts of such activities on my farm, on the land, the water sources, illegal animal hunting and theft, grazing fields and overall farming practices.

Also to mention the serious impact such operations will have on our Tourism. On the farm is a Ovahimba cultural Village, which attracts hundreds of guests daily, mostly overseas guests.

It will also have a huge negative impact on the Restcamp located on the farm, where guests overnight.

As an I&AP, I formally request to receive the following documents and information:

1. The Draft Environmental Scoping Report (ESA)
2. The Environmental Management Plan (EMP)
3. The Mine Closure Plan, detailing the measures to be taken to restore the land to its original condition after exploration activities, and proof of financial proof thereof
4. The schedule and location of all public consultation meetings, since a was not informed the previous time of such a meeting

No person shall step foot on my private property or start any kind of Mining prospecting, exploration or any activities such as drilling, excavation or any such practices without legal and proper documentation and written consent from me, and only me.

Please confirm my Registration and acknowledgement receipt of this communication.

Yours sincerely

A handwritten signature in black ink, appearing to be 'JJ Robberts', with a long horizontal stroke extending to the right.

Mr. JJ Robberts (Jakkie)

Owner of farm Vierling

**Subject:** Objection and Registration as I&AP - EPLs 10029, 10048, and 10053

Dear Ms. Nakale and Mr. Angula,

I refer to the Background Information Document (BID) regarding the Environmental Scoping Assessment (ESA) for EPLs 10029, 10048, and 10053.

I hereby request to be registered as an Interested and Affected Party (I&AP) in relation to this project. I am the legal owner of the farm:

Buschberg no: 234, which falls within the boundaries of the proposed EPL area.

I wish to place on record that I do not consent to any prospecting or exploration activities on my property by Bamba Mining Namibia (Pty) Ltd or any of its representatives. I have serious concerns about the potential environmental and agricultural impacts of such activities on my land, water sources, animal hunting and theft, grazing fields, and overall farming operations.

As an I&AP, I formally request to receive the following documents and information:

- The Draft Environmental Scoping Report (ESA)
- The Environmental Management Plan (EMP)
- The Mine Closure Plan, detailing the measures to be taken to restore the land to its original condition after exploration activities, and proof of financial proof thereof.
- The schedule and location of all public consultation meetings

Please confirm my registration and acknowledge receipt of this communication.

Yours sincerely,

Jac Haast  
J DE HAAST

**Subject:** Objection and Registration as I&AP - EPLs 10029, 10048, and 10053

Dear Ms. Nakale and Mr. Angula,

I refer to the Background Information Document (BID) regarding the Environmental Scoping Assessment (ESA) for EPLs 10029, 10048, and 10053.

I hereby request to be registered as an Interested and Affected Party (I&AP) in relation to this project. I am the legal owner of the farm:

Uitspruit . no: 658 , which falls within the boundaries of the proposed EPL area.

I wish to place on record that I do not consent to any prospecting or exploration activities on my property by Bamba Mining Namibia (Pty) Ltd or any of its representatives. I have serious concerns about the potential environmental and agricultural impacts of such activities on my land, water sources, animal hunting and theft, grazing fields, and overall farming operations.

As an I&AP, I formally request to receive the following documents and information:

- The Draft Environmental Scoping Report (ESA)
- The Environmental Management Plan (EMP)
- The Mine Closure Plan, detailing the measures to be taken to restore the land to its original condition after exploration activities, and proof of financial proof there of.
- The schedule and location of all public consultation meetings

Please confirm my registration and acknowledge receipt of this communication.

Yours sincerely,

GH Burger

## MEMORANDUM OF UNDERSTANDING ("MOU")

ENTERED INTO BY AND BETWEEN

THE GOVERNMENT OF THE REPUBLIC OF NAMIBIA

through the

MINISTRY OF ENVIRONMENT, FORESTRY AND TOURISM ("MEFT")

herein represented by Teofilus Nghitila in his capacity as EXECUTIVE DIRECTOR and duly  
authorized thereto

("the Ministry")

AND

THE CUSTODIAN

André de Wet Nel [REDACTED] (name, surname and id of person(s))

in his/her/their personal capacity and his/her/their official capacity as member(s) of the ~~Closed Corporation~~ shareholder(s) of the Company/trustee(s) of the Trust

Elosha Heights Game Sefaris Pty (name of CC/Company/Trust)

T. N.  
[Signature]  
[Signature]  
[Signature]

duly registered in Namibia under Registration number 2007/783 (reg nr of ~~EE~~/  
~~Company/ Trust~~ jointly and severally, and represented by  
André de Wet Nel [REDACTED] (if applicable) (name, surname, id) in  
his/her/ their capacity as Director (position e.g. Director of Company/ Attorney of  
owners/ one shareholder or member on behalf of other shareholders or members) who are duly authorized  
thereto in terms of the Power of Attorney attached hereto.

**The Ministry and Custodian(s) jointly referred to as “the Parties”**

**Under the Black Rhinoceros Custodianship Programme**  
for the placement of black rhinoceros (*Diceros bicornis bicornis*)  
Outside of protected areas in Namibia

T. N. [Signature] mJ<sub>2</sub> [Signature]

## PREAMBLE

**WHEREAS** the Ministry has decided to place BLACK RHINOCEROS (*Diceros bicornis* *bicornis*), (hereinafter to be referred to as "Rhino") on the land unit(s) identified as

Etosha Heights Game Safari Pty Ltd Farms

**Farm names covered for safety reasons, please refer to hard copies**  
(description of farm including name and title deed registration)

**WHEREAS** the placement forms part of the Black Rhinoceros Custodianship Programme with the overall aim of conservation of the Rhino population in Namibia;

## NOW THEREFORE THE PARTIES AGREE AS FOLLOW:

### 1. PURPOSE AND OWNERSHIP OF THE BLACK RHINO

- 1.1. The purpose of this MOU is to establish the relationship between the owner of the Black Rhino ("Rhino") being the Government of the Republic of Namibia and the Custodian, in order to ensure the conservation of the Rhino placed on the land unit managed by the Custodian.
- 1.2. Subject to any other agreement reached between the Ministry and the Custodian(s) regarding a dispensation of ownership / compensation in respect of the Rhino and its progeny on their land unit(s) as provided for in clause 16 hereof, the Rhino and their progeny shall remain the property of the Government of the Republic of Namibia. The registered and/or legal holder of the aforementioned land unit(s) will be deemed to be the Custodian(s).
- 1.3. All references to the Rhino in this agreement shall include their progeny.

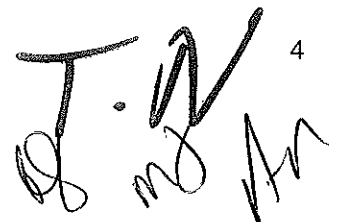

RT. N. 3  
mg  
hm

## 2. DURATION AND DELIVERY

- 2.1. This Agreement will come into force on the date of signature hereof by the party signing last and shall remain in force until termination by either the parties in accordance with the provisions hereof and specifically clause 15.
- 2.2. The Ministry will, after signature hereof, deliver the Rhino or cause the Rhino to be delivered to the Custodian on the aforementioned land unit(s) on a pre-arranged date. Information on the number, sex, age and condition of the Rhino will be determined by the Ministry and provided to the Custodian in writing upon delivery, or as soon as reasonably possible following the completion of a capture operation. If any problems or defects are observed on receipt of the Rhino, the Custodian is expected to report this in writing to the Ministry within 7 days.
- 2.3. The State Veterinarian or any other authorised Veterinarian will upon delivery examine the Rhino and conduct a normal health and bodily inspection and compare such findings with the written report accompanying delivery thereof.

## 3. CARE AND MONITORING

- 3.1 Subject to the provisions of clause 3.3 hereof, the Custodian will ensure that the Rhino are cared for properly at all times whilst being under the Custodian's lawful control. This includes the Custodian's best endeavours within his financial means:
- 3.1.1 to provide for adequate water supply;
- 3.1.2 to provide for sufficient browse (or supplementary feed when browse is not sufficient to maintain the health of the Rhino e.g. during time of drought);
- 3.1.3 to provide for secure and proper fencing, around the external borders unless agreed upon by the parties;
- 3.1.4 to introduce measures to minimise any illegal hunting or poaching;

 4

3.1.5 to refrain from allowing excessive disturbance on the Rhino's.

3.2 In the event of the Custodian experiencing:

3.2.1 any shortage in water;

3.2.2 any shortage or lack of browse or feeding;

3.2.3 problems with securing of any fences;

3.2.4 problems securing the Rhino's from illegal hunting (poaching) or

3.2.5 any excessive disturbance of the Rhino which he/she is unable to deal with and/or to rectify or remedy due to inter alia lack of financial means or otherwise, the Custodian will inform the Ministry of the situation in order to enable the Ministry to provide the necessary assistance. The purpose hereof is to avoid any possible harm to the Rhino.

3.3. The Ministry, or any Veterinarian the Ministry authorizes, will provide veterinary care whenever required. The Ministry will also provide any management advice when requested thereto by the Custodian.

3.4. The Custodian will, as soon as becoming aware of any criminal activity (or the planning thereof) involving the Rhino, immediately notify the Ministry and the Protected Resource Unit (PRU) of the Namibian Police Force ("PRU") who will:

3.4.1 respond to such notice as soon as reasonably possible but at least within 48 (forty eight) hours after being notified;

3.4.2 promptly conduct any required investigation into such activities;

3.4.3 insofar as is reasonably possible, assist in all security related matters, and

3.4.4 furnish the Custodian with feedback on the progress of any such investigation.

The Ministry may withhold information it deems being of a sensitive or

privileged nature and to not share such information with the Custodian for the purpose of avoiding jeopardy to the said investigation.

3.5. The Custodian will, as far as reasonably possible, on a quarterly basis monitor and identify the movements and behaviour of the Rhino's under custodianship and report back to the Ministry on the prescribed form as provided to the Custodian. In case the Ministry requests more frequent monitoring of the Rhino the Custodian should adhere to such request.

3.6 In the event of any individual Rhino under the observation of the Custodian not being spotted or located during any such monitoring exercise, the Custodian will immediately inform the Ministry accordingly.

Such report to the Ministry will include the following information:

- (a) when and where the Rhino was last seen;
- (b) when the intensive search was started;
- (c) how the search was conducted;
- (d) any other relevant information (Which will vary from case to case, depending on the circumstances).

3.7 The Custodian will not cede or assign any of his/her rights or obligations under this MOU without the written consent from the Ministry.

#### **4. NOTIFICATION OF ESCAPE FROM LAND UNIT**

The Custodian will notify the Ministry and the PRU/nearest reachable NAMPOL office within 24 hours of becoming aware of, or suspecting that any Rhino escaped from or has been removed from or attempts were made to remove any Rhino from the specified land unit(s). Possible scenario's which may occur includes (but is not limited to) the following:

- 4.1 finding a break in the fence or rhino tracks outside the game camp; receipt of information indicative of such escape or removal;

T.N.  
R. M. An 6

- 4.2 receipt of information indicative of such escape/ removal or attempt to remove any Rhino.

## **5. NOTIFICATION OF DISEASE, INJURY OR DEATH OF ANY RHINO**

- 5.1. The Custodian will notify the Ministry and the PRU within 24 hours of becoming aware of any disease, injury to, or death of any Rhino.
- 5.2. The Custodian will notify the Ministry within 24 hours of any outbreak of a disease in other game or domestic animals on the specified land unit(s) or surrounding land.

## **6. REGISTERS, NOTIFICATION OF CHANGES AND REPORTS**

### **6.1. REGISTER**

The Custodian will be obliged to keep a register for each individual Rhino in which all information, as listed in Annexure A to this MOU shall be recorded. Such register shall be kept by the Custodian in a secure and safe place in the boundaries of the specified land unit(s) where the individual Rhino is kept.

### **6.2 NOTIFICATION OF CHANGES**

The Custodian will notify the Ministry in writing of any major change in management, infrastructure, security, or habitat that may influence the subsistence of the Rhino in any way.

### **6.3. REGULAR REPORTS**

- (a) The Custodian shall submit a written report every three months, stating in respect of each individual Rhino the following information:
- (i) how often it was seen;
  - (ii) when it was last seen;
  - (iii) what condition each rhino was in when last seen;

T.N.  
7  
AG MD  
HAN

(iv) any other relevant information (including, but not limited to calves born, observations of rhino mating, interaction with other rhino or other interesting behaviour and any problems identified).

(v) additional general comments or any suggestions.

#### 6.4 SPECIAL REPORTS

Notwithstanding the regular reporting as provided for in clause 6.3 hereof, The Custodian shall submit a further comprehensive report to the Ministry covering all aspects relating to any disease, injury or death of a Rhino. This report shall be submitted within 14 days of becoming aware of the disease, injury or death.

6.5 The reports referred to in clauses 6.3 and 6.4 hereof shall comply with and be in the format as to a standard as may be required by the Ministry.

### 7. INSPECTION, INFORMATION, RESEARCH AND FILMING

7.1 Subject to the provisions of clause 7.2 hereof:

- (a) The Ministry will have the right to inspect the Rhino at any time and to request any information about the Rhino;
- (b) The Ministry reserves the right to conduct ecological research on the Rhino and/or authorise all research on the Rhino by any third party accredited, approved and authorised by the Ministry;
- (c) The Ministry reserves the right to authorise all filming of the Rhino whether by commercial or documentary film operators or news teams and will arrange a prior consultation session with the Custodian to furnish the Custodian with all necessary information regarding such filming.

7.2. For purposes of the compliance with the provisions of clauses 7.1 (a) to (c) hereof the Custodian will grant to the Ministry access to the land unit(s) in order to undertake

T. N.  
18 MD AN 8

the above mentioned inspections, research or filming of the Rhino provided that such inspections takes place:

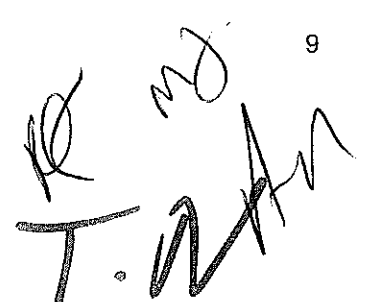

- (a) within working hours,
- (b) on working days (or after hours if so arranged between the Parties),
- (c) subject to prior notification to the Custodian by the Ministry.

## **8. SALE OR TRANSFER OF PROPERTY**

Should the Custodian under any circumstances or for any reason whatsoever part with or intend to part with the possession and/or ownership or usufruct of the specified land unit(s) on which the Rhino are or have been placed, the Custodian will notify the Ministry in writing of such intention at least 3 months prior to such intended change in ownership or possession or usufruct of the specified land unit(s) prior to such change becoming effective, whereupon the Ministry shall be at liberty to recapture and remove the Rhino or alternatively to enter into this Agreement with any such successor in title.

## **9. RIGHT TO CAPTURE AND RELOCATE**

- 9.1. The Ministry reserves the right to capture and relocate any or all of the Rhino at pre-arranged times when the need for such exercise arises. This may become necessary for the following reasons (however not limited thereto): drought, poaching, over-population, or failure by the Custodian to take proper care of the Rhino as stipulated in this MOU.
- 9.2. Where possible, the Ministry will give adequate warning and notice of any such planned capture and translocation of Rhino.
- 9.3. The Custodian will have the right, at any time during the currency of this Agreement and without terminating the MoU, to request the removal of one or more Rhino from the specified land unit(s) in the event of any circumstances, which in the opinion of

9  

the Custodian, would create an immediate safety hazard for the Custodian or his family, employees, guests or invitees, provided however that the overall conservation objective is not jeopardised.

- 9.4 As stipulated under clause 15.4, once all rhinos have been removed from the property, for whatever reason, the MoU will automatically terminate.

## 10. GENETIC MANAGEMENT

10.1. The Ministry and the Custodian, will as far as reasonably possible, manage the Rhino at all times according to the National Rhino Strategy. This will include the protection of the genetic integrity.

10.2 The Ministry will further furnish the Custodian with a copy of such strategy as well as any amendments thereto or information or documentation relating to the proper management and protecting of the genetic integrity of the Rhino.

## 11. INDEMNITY FROM CIVIL LIABILITY

11.1 As a result of the Rhino not being under the direct control of the Ministry, and instead in the custody and control of the Custodian, the Custodian shall indemnify the Ministry against all liabilities, costs, expenses, damages and losses including but not limited to any direct, indirect or consequential losses, loss of profit, loss of reputation and all interest, penalties and legal costs and all other reasonable professional costs and expenses suffered or incurred by the Custodian or third party arising out of or in connection with:

- (a) the Custodian's breach or negligent performance or non-performance of this Agreement;
- (b) any claim made against the Custodian for actual or alleged infringement of a third party's intellectual property rights arising out of or in connection with this Agreement;

T. N. 10  
P. M. J.  
H. M.

(c) any claim made against the Custodian by a third party for the provision of any services or supply of goods arising out of or in connection with this MoU; and

(d) any claim made against the Custodian by a third party for death, personal injury or damage to property arising out of or in connection with this MOU.

11.2. The Custodian will, as good precautionary measures, display adequate notices or warnings of the presence of dangerous game upon the land unit(s) and that entering upon such land unit(s) will be at the sole risk of such entrant.

## **12. DOMICILIUM CITANDI ET EXECUTANDI AND MINISTERIAL CONTACT PERSON**

12.1 The Ministry will appoint, for each region in Namibia, a designated person in the Ministry to act as contact person between the Ministry and the Custodian. The contact details of such person will be communicated to all Custodians. The Ministry will also appoint an alternative person to act as contact person for instances where the contact person is not available. The contact person will be responsible for receiving all correspondence (including reports and notices) from the Custodian and ensure that the said correspondence is filed and kept in a safe and secure place, such place to be identified by the Ministry.

12.2 Information received by the Ministry from the Custodian regarding the Rhino on his/her land unit(s) will not be disclosed in whole or in part, to any third Party whatsoever, without prior written notice thereof to the Custodian and his approval being obtained.

12.3 The Parties choose as domicilium citandi et executandi the following addresses:

THE MINISTRY:

P. Bag 13306

T. N  
11  
AJ  
AU

Windhoek.....

Troskie Building; Gr. Robert Mngabe Ave +  
Dr. Kenneth Kaunda Str.  
THE CUSTODIAN(S):

Station rd 17

Outjo.....

.....

12.4 All correspondence (including notices and reports) under this MOU will be deemed duly given when delivered by courier, registered mail, facsimile transmission, or a confirmed email to each Party at the domicilium addresses chosen.

12.5 Any party may, by written notice to the other party, change its Domicilium Citandi et Executandi to another physical address and/or telephone, telefax numbers or e-mail addresses provided that such changes will become effective only on the 7th day after receipt of such notice.

### 13. DISPUTE RESOLUTION

In the event of any dispute arising out of the interpretation and implementation of this MOU Agreement, the respective parties will use their best endeavours to settle such dispute through constructive negotiation and mediation and such dispute will not be referred to any national or international tribunal or third party for settlement.

### 14. CONFIDENTIALITY AND MEDIA RELEASES

The parties will keep the fact of the conclusion and details of the terms and conditions of this Agreement in the strictest confidence and will not divulge the same to any third party save to the extent that the parties may be required to do so at law and/or to give

T.N  
my JLC 12

effect to the implementation of the terms of this Agreement. The Minister of Environment, Forestry and Tourism however retains the right to, from time to time, inform the public through the media on the general status of the Rhino of Namibia.

## **15. TERMINATION OF AGREEMENT**

15.1 Subject to the provisions of any agreement pursuant to the provisions of clause 16 hereof, this MOU may be terminated in the following circumstances namely:

- (a) upon agreement between the parties; or
- (b) upon 6 (six) months written notice to this effect by either party; or
- (c) upon the happening of any of the events or upon occurrence of any of the circumstances referred to in clause 8 or 9 hereof; or
- (d) a material breach by either party of any of the terms and conditions hereof upon which termination, and failing an agreement with any successor in title as provided for in clause 8 hereof, the Rhino's shall be captured, removed and/or translocated by the Ministry within a period of 90 (ninety) days after such termination.

15.2 The Custodian remains obligated to take care of the Rhino until the physical removal thereof by the Ministry, upon a date decided by the Ministry. The Ministry will however not unreasonably delay the removal of the Rhino.

15.3 In case of emergency, written notice of removal of the Rhino by the Ministry will not be possible. Oral notice will in such case suffice.

15.4 Once all rhinos have been removed from the property for whatever reason, the MOU with regard to that particular custodian, will automatically terminate. In order for the custodian to again become party of the programme, the entity will have to re-apply for

T. N. 13  
M. J. R. A. N.

custodianship and go through the entire assessment process, the same as first time applicants for custodianship.

## **16. MONETARY OR ANY OTHER COMPENSATORY MODEL**

16.1 The parties hereto record, undertake and agree to use their respective best endeavours, to commence with negotiations in good faith, in order to agree and/or accept a financial model or otherwise relating to a monetary or other compensation relating to the Rhino relocated to privately owned land unit(s) or communal land.

16.2 The parties undertake to do all such things as are or may be necessary or desirable so as to achieve the goal as provided for in clause 16.1 hereof.

## **17. ENTIRE AGREEMENT**

17.1 The parties agree that this MOU constitutes the entire contract between them and that there are no other conditions, stipulations, warranties or representations whatsoever made, other than such as may be included herein or in any subsequent written document signed by the parties hereto.

17.2 This MOU supersedes and replaces any and all agreements between the parties (and other persons, as may be applicable) and undertakings given to or on behalf of the parties (and other persons, as may be applicable), whether in writing or otherwise, in relation to the subject matter hereof.

## **18. COMING INTO OPERATION AND VARIATIONS**

18.1 This MOU will commence on the date of signature of the last party signing and will remain in force until terminated by either of the Parties in accordance with preceding clauses of this MOU.

T. N. 14

MJ. PL AM

18.2. No variation of or addition to this MOU will be of any force or effect unless reduced to writing and signed by or on behalf of both Parties.

**19. GOVERNING LAW AND JURISDICTION**

This Agreement shall be governed by the laws of the Republic of Namibia.

**20. NO EMPLOYMENT OR AGENCY**

Nothing in this Agreement shall be construed, nor shall either of the parties represent itself, as an employee or agent of the other.

**21. DUTY TO COOPERATE**

Each Party undertakes to act in the utmost good faith towards the other and to comply with the terms and conditions of this Agreement to the best of its ability.

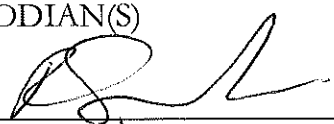

**IN WITNESS WHEREOF** the undersigned, duly authorized thereto, have signed this MOU.

Dear MR Angula – my name is Jockel Gruettemeyer and I am the MD of the company Namibia Tracks and Trails (Pty ) Ltd based in Swakopmund.

We are a namibian tour operator focusing on offering tourism associated products to our international partners across the whole globe. One of our main product partners are the owners of Etosha Heights who in turn informed us about the below meeting to be held soon.

It is our intention to increase our tourism activity into this area and we are furthermore very keen to invest in future projects and opportunities into this region. We therefore kindly request your esteemed organisation to register us as interested and possibly affected party and keep us informed about any future developments in this regard.

Your kind consideration in this matter is highly appreciated.

Looking forward to further hear from you soonest.

Kind regards.

Jockel Gruettemeyer.

**To:** [iyaloon@edsnamibia.com](mailto:iyaloon@edsnamibia.com)

**Cc:** [amebjerry@gmail.com](mailto:amebjerry@gmail.com)

**Subject:** Response to Invitation for Consultation Meeting on EPLs 10029, 10048, and 10053

Dear sir/madam,

I acknowledge receipt of your invitation to attend the consultation meeting regarding the proposed exploration activities on EPLs 10029, 10048, and 10053, scheduled for 02 April 2025, at Farm Vierling. I appreciate the opportunity to participate in discussions that are critical to the sustainable development of our shared resources.

While I value the intent of this consultation, I would like to express my concerns regarding the potential impacts that the exploration activities may have on our communal farming areas, particularly those occupied by marginalized communities.

Specifically: Farm – **Bellalaika; Skuinbank ; Stilverwag; Moreson (tc)**

### **Natural Resources and Biodiversity:**

The proposed activities may pose risks to the ecological balance of these areas. I am concerned about possible degradation of soil, vegetation, and water resources, which are crucial to the livelihoods of the local inhabitants and the environment.

### **Community Livelihoods and Well-Being:**

The areas in question support communities whose lives and traditions are deeply tied to the land. It is vital to ensure that these exploration activities do not negatively impact their daily lives, farming activities, or cultural heritage.

Inclusive Decision-Making:

Meaningful and inclusive engagement with affected communities is essential to ensure their voices and concerns are incorporated into the decision-making process.

I look forward to attending the meeting to gain more insights into the proposed exploration plans, understand the measures being proposed to mitigate potential adverse impacts, and contribute to discussions that prioritize environmental sustainability and the well-being of the marginalized communities.

Thank you for the opportunity to engage on this matter. Please do not hesitate to share any preparatory materials or agendas for the meeting in advance.

Kind regards,

**Stefanus Haneb**

**Subject:** Grave on Olifaantshoek

Good evening,  
I hope this email finds you well.

I just wanted to re-raise my concern again as an affected Party for Olifantshoek farm, Karkai Property investments PTY.

First there is a grave, see picture below at the following GPS position: S 19,339988 E 15.335467

Secondly, we are already losing income due to the hesitation from investors due to the potential mining activity. We bought the property last year for tourism development but due to the potential mining operations the investors are holding back, and we are suffering economic losses. I want this to be noted, and we consider legal action.

Yours truly,  
Dr Aschenborn

Good day esteem stakeholders,

Following the public consultation meeting held at **Farm Vierling** on **2 April 2025**, site assessments were scheduled for participating farms to evaluate archaeological, heritage, and environmental conditions. However, due to persistent

heavy rainfall throughout April, these site visits were postponed. The assessments have now been rescheduled for **31 May–2 June 2025**.

The primary objective of these assessments is to document areas of archaeological significance, identify sensitive species habitats, and delineate zones to be excluded from Exclusive Prospecting License (EPL) operations.

Regards,

**Subject:** Public Consultation meeting for the proposed mineral exploration activities on Exclusive Prospecting Licenses (EPL) 10029,10048, and 10053 located northeast of Kamanjab, Kunene Region.

Dear Esteemed stakeholders/ Interested & Affected Parties.

This email serves to inform you that Excel Dynamic Solutions (Pty) Ltd (the consultant) has been appointed by Bamba Mining Namibia (Pty) Ltd (the proponent) to act on their behalf in obtaining an Environmental Clearance Certificate (ECC) for the proposed mineral exploration activities on Exclusive Prospecting License (EPLs) 10029, 10048, and 10053.

Mineral prospecting and exploration is one of the listed activities that cannot be undertaken without an Environmental Clearance Certificate (ECC) as per the 2012 Environmental Impact Assessment (EIA) Regulations of the Environmental Management Act No. 7 of 2007. The Proponent, therefore, appointed Excel Dynamic Solutions (Pty) Ltd, an independent Environmental Consultants firm to conduct the required Environmental and Social Impact Assessment (ESIA) process and apply for the ECC.

Furthermore, Sections 21 to 24 of the EIA Regulations require that Public Consultation is undertaken as one of the crucial components of the Environmental Assessment, which involves the pre-identification of potential Interested & Affected Parties (I&APs) or Stakeholders and ongoing registration of new I&APs and subsequent consultation. You have therefore been identified as a potential I&AP for this proposed activity, and the reason you are receiving this communication. Please find the attached Background Information Document (BID) and site notice for the proposed exploration activities .

You are hereby invited to a Public Meeting as per the following details:

- **Date: Wednesday, 02 April 2025.**
- **Time: 10H00**
- **Venue: Hall on Farm Vierling, Kunene region. (Hall on farm Vierling on the D-2695 district road.)**

**On behalf of the team at Excel Dynamic Solutions (Pty) Ltd, we would like to inform you that we will require permission to access the farms as part of the Environmental and Heritage Assessment, following the public consultation meeting.**

Once the ESA process is completed, a draft ESA Report will be compiled and together with its associated documents/appendices will be shared with you for review and comments before we submit these to the Department of Environmental Affairs and Forestry (DEAF) of the Ministry of Environment, Forestry and Tourism (MEFT) for evaluation and consideration of the ECC.

Regards,

---

**Subject:** Stakeholder identification for the proposed mineral exploration activities on Exclusive Prospecting Licenses (EPL) 10029,10048, and 10053 located northeast of Kamanjab, Kunene Region.

Dear Esteemed stakeholder,

This email serves to inform you that Excel Dynamic Solutions (Pty) Ltd (The consultant) has been appointed by Bamba Mining Namibia (Pty) Ltd (The proponent) to act on their behalf in obtaining an Environmental Clearance Certificate (ECC) for the proposed mineral exploration activities on Exclusive Prospecting Licenses (EPL) 10029,10048, and 10053. The EPLs are located about 100 km northeast from Kamanjab, in the Kunene region as shown in the locality map in the attached Background Information Document (BID).

Mineral prospecting and exploration is one of the listed activities that cannot be undertaken without an Environmental Clearance Certificate (ECC) as per the 2012 Environmental Impact Assessment (EIA) Regulations of the Environmental Management Act No. 7 of 2007. Furthermore, Section 21 to 24 of the EIA Regulations requires that Public Consultation is undertaken as one of the crucial components of the Environmental Assessment, which involves the pre-identification of potential Interested and affected Parties (I&APs) or Stakeholders and ongoing registration of new I&APs and subsequent consultation.

You have therefore been identified as a potential I&AP for this proposed activity, and the reason you are receiving this communication. Please find the attached Background Information Document (BID) for the proposed exploration activities.

**On behalf of the team at Excel Dynamic Solutions (Pty) Ltd, we would like to inform you that we will require permission to access the farms as part of the Environmental and Heritage Assessment, following the upcoming public consultation meeting. Details regarding the public consultation will be communicated in due course.**

**We kindly request your assistance in distributing the attached Background Information Document (BID) to all affected and interested stakeholders.**

Thank you and best regards,
