Dear Sir

Re: Consent for the proposed construction of the gravel access road (3km) from DR3609 to lipanda-YaAmiti Clinic and Combined School and utilization of sand and gravel for the road

As the headman of lipanda YaAmiti Village, I hereby give consent to the proposed construction of the gravel access road (3km) from DR3609 to lipanda-YaAmiti Clinic and Combined School in the Omusati Region (*the project*) as per the EIA consultation meeting held on the 22nd of May 2025 in lipanda YaAmiti.

In addition to the above, given that the project will require materials for the construction of the access road, I also give consent for the exploration of such materials to site/establish a borrow pit in the village to source materials. Furthermore, I would like to request that, once the construction starts, it should be done fairly and transparently, and that the utilization of the borrow pit(s) be done in an environmentally and socially friendly and sustainable manner. This includes proper rehabilitation of the borrow pit to a safe state, once the material is depleted or activities are completed. Rehabilitation of the borrow pit should be done to ensure that it does not pose a threat to the people and livestock in the area, even after road construction works are completed. It will therefore be important to notify me when operations at the borrow pit have ceased so that we can forge a way forward regarding the pit, which would entail the Construction Contractor either rehabilitating the borrow pit by backfilling and or levelling to safe conditions, or so that it can act as a rainwater holding dam for the community livestock.

Thank you for your cooperation, as we are looking forward to this much-needed development.

Yours sincerely,

A handwritten signature in black ink, appearing to read "P. f. Namambo".

Dear Sir

Re: Consent for the proposed construction of the gravel access road (3km) from DR3609 to lipanda-YaAmiti Clinic and Combined School and utilization of sand and gravel for the road

As the headman of **Ombalala Village**, I hereby give consent to the proposed construction of the gravel access road (3km) from DR3609 to lipanda-YaAmiti Clinic and Combined School in the Omusati Region (*the project*) through our village (Ombalala) as per the EIA consultation meeting held on the 22nd of May 2025 in lipanda YaAmiti.

In addition to the above, given that the project will require materials for the construction of the access road, I also give consent for the exploration of such materials to site/establish a borrow pit in the village to source materials. Furthermore, I would like to request that, once the construction starts, it should be done fairly and transparently, and that the utilization of the borrow pit(s) be done in an environmentally and socially friendly and sustainable manner. This includes proper rehabilitation of the borrow pit to a safe state, once the material is depleted or activities are completed. Rehabilitation of the borrow pit should be done to ensure that it does not pose a threat to the people and livestock in the area, even after road construction works are completed. It will therefore be important to notify me when operations at the borrow pit have ceased so that we can forge a way forward regarding the pit, which would entail the Construction Contractor either rehabilitating the borrow pit by backfilling and or levelling to safe conditions, or so that it can act as a rainwater holding dam for the community livestock.

Thank you for your cooperation, as we are looking forward to this much-needed development.

Yours sincerely,

Mr. Steven Lucas: Senior Traditional Councilor & Headman - Ombalala Village
