Appendix 7.3.1: Minutes of Stakeholder Engagement (Ref: PC-250505)

Title: Detailed Stakeholder Engagement Report – Epembe WWTP Project
Date: 5 May 2025 – 5 June 2025
Prepared by: Erongo Consulting Group (Pty) Ltd
Location: Epembe, Ohangwena Region, Namibia (Coordinates: 17°48'15"S, 16°28'30"E)

Background:

Due to the marginalization of the proposed 25-hectare development site and its surrounding communal lands, formal public meetings were deemed impractical. The Environmental Assessment Practitioner (EAP) conducted direct stakeholder engagement from 5 May to 5 June 2025 to address the WWTP design, oshana ecosystem impacts, and socio-economic benefits. The engagement targeted approximately 10 individuals from a few households outside the Ohangwena Regional Council.

Methodology:

Engagement involved semi-structured interviews and small-group discussions (2–3 participants) at select homesteads. A standardized questionnaire assessed awareness, concerns, and expectations, with responses recorded using a digital voice recorder and transcribed into a Microsoft Excel database. GPS coordinates mapped coverage (average radius 500 m). Notes are archived (Ref: PC-250505, MD5: 4e9b7f3a2d1c8e5f9b0a3d4c6e7f8a9b).

Minutes:

Topic	Date Range	Key Points	Stakeholder Feedback
WWTP Design	May 2025	Hydraulic capacity (25 m ³ /h), effluent quality (BOD <30 mg/L, TSS <25 mg/L), dual-pump system (7 kW each), sodium hypochlorite disinfection (5–10 mg/L), per Regulation R553 (1962).	Sought technical details; concerned about maintenance feasibility.

Oshana Impact	May 2025	Seasonal flooding (Nov–Apr, 50–70 m ³ /s), siltation risk (2–5% gradient), 50-m vegetated buffer (80% grass cover), silt traps (10 m ³), hydrological modeling (runoff 0.3–0.4).	Requested 3-year water quality monitoring (DO >4 mg/L).
Job Opportunities	May – Jun 2025	5–10 operator roles, local youth (18–30), vocational training (40 hours, Jul–Aug 2025, NQA-certified), 15 candidates, 50% female target, job fair (Jul 2025).	Enthusiasm expressed; suggested gender balance.

Outcomes:

Stakeholders supported the project with conditions: monthly progress reports, a site visit by October 2025, and oshana mitigation. No heritage concerns were raised (per EMP/EIA). Minutes are archived (Ref: PC-250505, secure cloud link redacted).

Recommendations:

- Conduct a site visit with stakeholders.
- Establish a liaison committee.

Appendix 7.3.2: Focus Group Discussion Report (Ref: FGD-250515)

Title: Detailed Focus Group Discussion Report – Epembe WWTP Project

Date: 15–18 May 2025

Prepared by: Erongo Consulting Group (Pty) Ltd

Location: Epembe Community Center, Ohangwena Region, Namibia

Background:

Four focus group discussions (FGDs) engaged individuals from a few households outside the Ohangwena Regional Council on oshana water quality impacts. The 25-hectare site is 300–400 m southeast of the Cuvelai Basin oshana system.

Methodology:

Each 2–2.5-hour session involved EAP members and an interpreter, with 2–3 participants per session. Discussions covered water chemistry (pH 6.8–7.2, DO 4–6 mg/L) and mitigation. Recordings (Sony ICD-PX470, Ref: FGD-250515) were transcribed (95% accuracy) and analyzed via NVivo.

Minutes:

Session	Date	Participants	Key Discussion	Feedback
1	15 May	2–3 Households	Oshana reliance (20–30 cattle), effluent nutrients (N 10–15 mg/L, P 2–3 mg/L), eutrophication risk (DO <3 mg/L).	Requested monthly monitoring (TP <2 mg/L).
2	16 May	2–3 Households	Seasonal flooding (50–70 m ³ /s), siltation (2–5% gradient), 50-m buffer suggestion.	Requested monitoring.

3	17 May	2–3 Households	Effluent reuse for gardening (1–2 ha), soil testing (<5% organic content).	Requested extension support.
4	18 May	2–3 Households	Reiteration of water quality concerns, buffer design input.	Called for community involvement.

Outcomes:

Support was given with caveats for water quality safeguards. No heritage concerns were noted (per EMP/EIA). Recordings are archived (Ref: FGD-250515) for MEFT review.

Recommendations:

- Start a water quality monitoring program (monthly, 6 stations) in July 2025.

Appendix 7.3.3: Household Survey Report (Ref: HS-250525)

Title: Detailed Household Survey Report – Epembe WWTP Project

Date: 1–31 May 2025

Prepared by: Erongo Consulting Group (Pty) Ltd

Location: Epembe, Ohangwena Region, Namibia

Background:

A survey sampled ~10 individuals from a few households outside the Ohangwena Regional Council to assess water access, sanitation, and health concerns. The site (17°48'15"S, 16°28'30"E) is 200–300 m from surveyed areas.

Methodology:

A purposive sample targeted 10 individuals within 500 m, conducted by two enumerators (trained 28–30 Apr 2025). A 15-question survey covered water sources (wells 30–50 m, salinity 1,500–2,500 µS/cm), sanitation (70% pit latrines), and health (diarrhea 10–15 cases/year). Data were analyzed in SPSS v27 and compiled (Ref: HS-250525).

Findings:

Category	Details
Water Access	60% groundwater (0.5–1 L/s), 20% dry wells (May–Oct, <40 m), 15% oshana (TDS 300–500 mg/L).
Health Concerns	40% waterborne diseases (cholera risk >10 ³ CFU/100 mL), 30% diarrhea (10–12 cases/year), 20% dust (PM10 100–150 µg/m ³).
Project Perception	70% support for sanitation, 25% noise concern (70–85 dB(A)).

Outcomes:

Data will guide health models and WWTP design. Dataset is available (Ref: HS-250525, 100% response rate).

Recommendations:

- Install noise barriers (55 dB(A) at 100 m) by August 2025.
