

Preliminary Site Map

Commonage Farm No. 2 is situated on the western side of the Windhoek Highlands, adjacent to the Dr. Hage Geingob Windhoek–Hosea Kutako Highway (GPS: 22.600019°S, 17.123860°E). The preliminary extraction site covers approximately 12 hectares. A relatively large area is proposed because extraction will be conducted in patched subsurface excavations to minimize surface disturbance and to facilitate subsequent revegetation. The anticipated duration of mining activities is about 12 months.
