COMMENTS AND CONCERNS FROM THE PUBLIC MEETING –FRANSFONTEIN

No.	Name / Organisation	Questions / Comments / Inputs	Responses (Consultant / Proponent)
	Mr Ilonga (Swaartbooi Traditional Authority Representative)	Comment: Mr Ilonga opened the meeting with a prayer and welcomed everyone to the meeting.	
	Mr Ilonga (Swaartbooi Traditional Authority Representative)	Comment: Mr Ilonga also introduced the owner of the Mining Claims, Mr Romanus Goreseb, and urged the community members to fully support him in his endeavors.	
	Mr Hanganda Community member	Question: Can the current workers on-site be provided with proper ablution facilities?	Most definitely, ablution facilities must be provided to workers on site to avoid open defecation and nuisance to the environment
	Mr Hanganda (Community member)	Question: We fear that our small livestock roam around existing holes and could fall prey to poaching. What can be done?	The proponent would be advised accordingly to fence off the site. This would prevent the small livestock in the farm from coming near the mining site. Suggestion: The fencing off would also prevent possible poaching of small livestock by the workers.
	Mr Awaseb (Community member)	Comment: It would be a great idea if the proponent could upgrade the existing borehole and access road to the farm.	It would be a good idea if the community could formally communicate the priority areas that need funding from the investors. Also, the investor is fully aware of the pressing needs faced by the community and committed to addressing them.
	Mr Awaseb (Community member)	Comment: Also, the community of the farm near the mining sites seeks to benefit in real economic activities, such as	The food parcels were only given as a token of appreciation and also because the elderly members of the community asked

		agricultural gardening activities for long-term sustainability and not mere handouts such as food parcels.	to be assisted in that regard. Ultimately, the real economic activities are what uplift the community.
	Mrs Haraes, Community member)	Comment: It would also be ideal if the mining activities is in full operation so that the nearby household could benefit from Solar power that the Mine intends to establish in the long run	
	Mr Ilonga (Swaartbooi Traditional Authority Representative)	Comment: Mr Ilonga thanked everyone for attending the meeting and emphasised that the project surely has the best interest of the community should it is operational in the long run.	
	Mr Ilonga (Swaartbooi Traditional Authority Representative)	Comment: Mr Ilonga asked
