

REPUBLIC OF NAMIBIA

ENVIRONMENTAL QUESTIONNAIRE FOR MINING CLAIMS IN NAMIBIA

BEING APPENDIX A TO THE ENVIRONMENTAL CONTRACT

1. BACKGROUND INFORMATION

- 1.1 Companies/Natural persons applying for **MINING CLAIMS** must complete this questionnaire. (Please fill in ALL questions).
- 1.2 The answers provided in this questionnaire shall be regarded as commitments which will become part of the **Environmental Contract** between the Holder and the Government of the Republic of Namibia, duly represented by the Ministry of Environment and Tourism (MET) and the Ministry of Mines and Energy (MME).
- 1.3 Once the Holder has completed this questionnaire MET and MME will either accept/reject/request further information regarding the environmental commitments made therein. MET and MME reserve the right to add further conditions.
- 1.4 Once agreed to by all parties concerned, the completed questionnaire shall form part of the **Environmental Contract**.
- 1.5 Please attach a map of the mining claim area and a copy of the application to register mining claims.

2. Holder details

2.1 Name of Holder	NATALIA DAVID
2.2 Name of Mining Claim Holder (if different from 2.1)	N/A
2.3 Telephone, Fax, Cell Phone and/or E-Mail	Tel: 0812128449 / 0816328664 Fax: E-Mail: Cell: 0812128449 / 0816328664
2.4 Postal Address Residential/Registered Address	PO BOX 26497 WINDHOEK 5 DROUWES STREET HOCHLAND PARK WINDHOEK
2.5 Reference Number	NEPL No: 10741 Expiry: 15 SEPTEMBER 2026
2.6 Registered Number(s)	76484 AND 76483 / 76483-76484
2.7 Location (Farm, District, Region) of mining claim(s)	OKOZONBOMBE VILLAGE, UKOLO NKADHI, OMUSATI REGION
2.8 Group(s) of Mineral(s) to be mined	BRNL

2.9 How many people will work on your mining claim, and where will they live?

Number of people	Where will they live?
SIX PEOPLE	LIVE IN NR. KATITHA STONBE HOSE OKOZONGOMBE VILLAGE HETANAN

3. Environmental commitments

3.1 Pollution and Waste

3.1.1 What will you do with **normal litter** (e.g. Kitchen spoils, cans, bottles, paper, etc.)?

Implement Recycling Management program: food spoils will be used for animal fodder safely packaged for transport. Recyclable materials will be compressed and safely transported to certified recycle plants.

3.1.2 What **industrial waste** will be generated and what will you do with it (e.g. old machinery, vehicles, building rubble, batteries, paint, thinners, vehicle oil, etc.)?

Proper disposal management plan is developed by locating and design waste dumpsite away from streams/streams, rivers and wetlands to avoid contamination. Hazardous waste will be inventoried, controlled and disposed according to environment at safety.

3.1.3 Describe what type of toilet facilities will be provided.

Mobile and Bio-Toilet units for remote, mobile and environment unfriendly, waste water treatment system. Provide Sustaining bio sanitation solution without reliance on infrastructure. Minimal water use, easy servicing, odor control and healthy safety.

3.2 Vehicle, earthmoving equipment, drilling and blasting

3.2.1 List the type and quantity of vehicles, earthmoving equipment, drilling equipment, and other machinery likely to be used on your mining claim (e.g. 2 x bakkies; 1 x bulldozer, etc.)

Vehicles:

2X 1 4X4 NISSAN HARD BODY

Earthmoving equipment:

1X JCB FRONT LOADER
1X TIP TRUCK
1X WATER TANK

Drilling equipment:

3X 2X JACK HAMMERS

Other equipment and/or machinery:

~~XXXX~~ N/A

3.2.2 Describe the environmental damage that is likely to result from the use of vehicles and machinery within the mining claim area (e.g. on the landscape in general, soil, vegetation, noise, dust, etc.).

Landscape and soil: Mining Machinery and Vehicles Compact and disturb the soil leading to soil degradation due to soil leakage and this destroys natural soil structure and lead to sediment run-off into nearby water bodies, road construction and vehicle traffic occasionally cause permanent damage to native vegetation. Clearing of vegetation for mining operation reduce vegetation recovery contributing to habitat loss and increase soil erosion. Dust deposits from vehicle activities can inhibit plant growth and negatively affect animals welfare in their surrounding area.

Noise pollution: Mining Machinery produce intense noise that disturb wildlife and the communities, it disrupt animal behaviours: breeding and habitat use, it could also negatively affect the quality of life of the host communities. Dust pollution: causes respiratory health hazard to the workers and the communities.

3.2.3 How will you control the movement of vehicles and machinery in order to minimise environmental damage?

Designated specific roadways and routes
Implement speed limit and traffic movement measure.
Operate heavy and light vehicle tracking traffic time slot operation.

Install real-time vehicle tracking and traffic management system.
Provide training and communication protocol such as low splunk water tank truck system.

3.2.4 Which routes will be used by vehicles to get to your mining claim and state whether you intend making new roads or tracks (both to your mining claim and within your mining claim)?

Kualana - Epupa water Fall road D370

3.2.5 Will you do any blasting on your mining claim?

Yes: _____

No: X

Unsure: _____

3.2.6 If "yes" above, explain how you intend minimising environmental impacts, including the safety of humans, livestock and wildlife?

N/A

3.3 Water

3.3.1 How much water do you intend using for various activities (e.g. human use, washing of equipment, washing sand/stones, dust control, gardens, etc.) and state how you intend saving water within each category of use.

Activity or category of use	Quantity of water needed per month (litres)	Water saving methods
Human	2500 400 litres	Saving water by drinking 4x 25L per week
Washing Equipment	25x5 per week	washing equipment with bucket/ container.
Garden	100 Litres	Drip irrigation

3.3.2 Where will you get your water (e.g. river, own borehole, Water Affairs connection, etc.)?

From the Ruvuvu River

3.3.3 Explain how you will minimise or completely avoid polluting any water source, including underground water.

Responsible Chemical use.
Minimize or avoid the use of toxic chemicals such as Cyanide or Mercury
Store and handle fuel and chemical safely with spillage containment systems.

3.4 Relations with neighbouring communities and/or the general public

3.4.1 Are there any people living in or near your mining claim?

Yes: X

No:

Unsure:

3.4.2 If "yes", explain where these people live and describe their economic activities.

They live in temporary build traditional houses
on tents
The primary economic activities is goat farming

3.4.3 If "yes" in 3.4.1, explain what you will do to maintain a good relationship with such people.

Employment opportunities
Build primary school and a clinic
Establish a community structure garden and a soup
kitchen

3.4.4 Will the activities on your mining claim restrict the movement of other people in the area (e.g. the general public, tourists, farmers, local people, etc.)?

Yes: X

No: X

Unsure:

3.4.5 If "yes" for 3.4.4, please explain why their movements or access will be restricted.

Employment opportunity
X/A

3.5 Protection of plants and wildlife

3.5.1 How will you ensure that your activities will not cause unnecessary damage to plants and wildlife in or near your mining claim) e.g. hunting, plant collecting, fishing, etc.)?

Rules and regulation of nature conservation
will be explained well to all personnel on site
and the importance of wildlife protection.

The headman will be required to supervise the con-
duct of employees in conjunction with the site
manager.

3.6 Historical, archaeological and cultural heritage (e.g. rock art, graves, monuments, fossils, sacred sites, historical buildings, etc.)

3.6.1 Are there any historical, archaeological or culturally important sites within your mining claim area?

Yes:

No: X

Unsure:

3.6.2 If "yes", please describe briefly.

X/A

3.6.3 If such sites are known, how will you avoid damaging them?

N/A

3.6.4 If such sites are discovered after you have started working your mining claim, would you accept new conditions to this contract so that they can be properly protected?

Yes: _____

No: _____

Unsure: _____

3.7 Rehabilitation

3.7.1 When will you rehabilitate the environmental damage done during prospecting? (Tick the appropriate box)

I have no intention of rehabilitating any damage

On a continuous basis (i.e. simultaneous with prospecting)

Only after all prospecting has finally been completed

I don't know

☒

☐

☐

3.7.2 Describe the programme of mining from the start and the methods to rehabilitate damage.

Start with digging pit to discover if there is minerals deposit. Once it is found the material will be removed and safely stored. After the process is complete the pit will be filled back with top soil to recover its original shape.

4. Existing Damage

Describe what environmental damage exists in your mining claim area now, in other words, damage caused by someone else before you began working on the mining claim. Where possible, provide evidence such as photos, statements, etc.

no existing damage.

I hereby declare that the information provided in this questionnaire, is to the best of my knowledge, accurate and correct, and that I'm prepared to keep to the commitments stated therein.
