

2.4. PROJECT LOCATION

The MCs 75536 – 75540 and 75661 – 75664 are situated in central Namibia, within Exclusive Prospecting License (EPL 8106, owned by KEMA Resources cc), located about fourteen (14 km) North-west of the Otjimbingwe Village in the Karibib Constituency of Erongo Region (**Figure 3**, locality map and **Table 3** corner coordinates). The dominant land-use in the area is predominantly consisting of communal settlements and community practicing some subsistence farming activities.

The mining claims are primarily accessible directly via the D1953 gravel road in the western direction from the settlement. Other section of the mining claims will only be accessed by foot to ensure minimum impacts on the receiving environment.

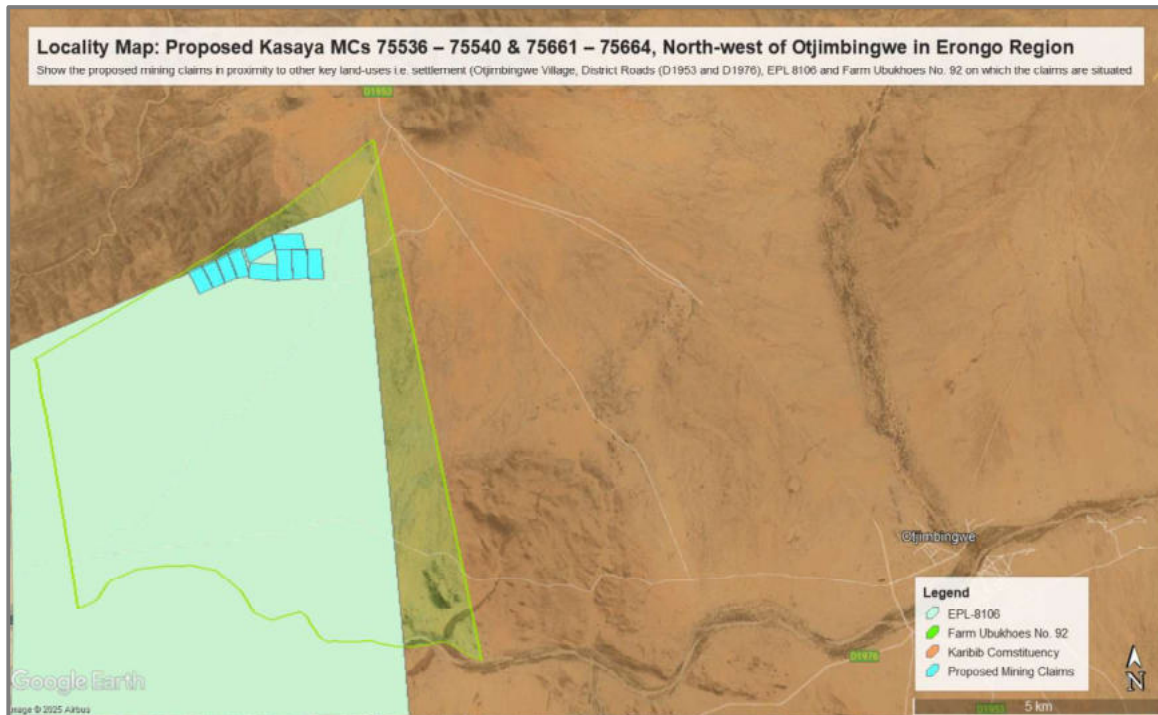

Figure 3: Locality map of the proposed Mining Claims 75536 – 75540 and 75661 – 75664, Erongo Region

Table 3: Corner coordinates of the proposed development site

Corner point	Latitude	Longitude
A – MC 75536 – Centre Point	-22.297001°	16.004651°
B – MC 75537 – Centre Point	-22.301150°	16.009607°
C – MC 75538 – Centre Point	-22.300732°	16.006886°
D – MC 75539 – Centre Point	-22.298058°	15.999176°
E – MC 75540 – Centre Point	-22.301511°	15.999584°
F – MC 75549 – Centre Point	-22.300549°	16.003836°
G – MC 75661 – Centre Point	-22.301243°	15.992655°
H – MC 75662 – Centre Point	-22.300140°	15.994992°
I – MC 75663 – Centre Point	-22.301888°	15.990021°
J – MC 75664 – Centre Point	-22.303019°	15.987458°

2.5. SUPPORTING INFRASTRUCTURE

2.5.1 Basecamp

Given the location the Mining Claims (MCs) in a communal area, a suitable site must be identified in collaboration with all relevant authorities including the Traditional Authority / Otjimbingwe Settlement Office to decide on a basecamp location. Where practical and possible, it is strictly recommended that for unskilled labour, local community members are employed and thus accommodated at the base-camp pre-identified in collaboration with the property owner and only for the duration during which the exploration programme is being implemented.

This is a key and necessary management exercise to mitigate and reduce potential conflict with the property owner in regard to wildlife and livestock management protocols. Critically, it is highly recommended that temporary ablution facilities must be provided and limited to within the existing base-camp footprint pre-identified and agreed upon by the stakeholder in the proposed development, and the necessary authorization must be obtained prior to installation of any such facility.

2.5.2 Water supply

Water will, at this stage only be required mainly for domestic use and will be sourced from the nearby boreholes or Witvlei Village and transported by truck in 5 000 litres water tanks, thus equally stored in tanks at the base-camp site. Where portable ablution facility is provided, it is recommended that they are regularly emptied and sewer transported by the returning water supply truck.
