1. Introduction

The Environmental Assessment Practitioner (EAP) was appointed by the Otjozondjupa Regional Council to undertake the Environmental Assessment (EA) process for the proposed Okandjira Settlement Landfill, located in Okandjira Settlement within the Omatako Constituency of the Otjozondjupa Region.

As part of the Environmental Impact Assessment (EIA) process, a public consultation programme was undertaken to ensure that Interested and Affected Parties (I&APs) were informed about the proposed development and provided with an opportunity to raise concerns, comments, and recommendations.

This Issues and Response Report (IRR) record all comments and issues raised during the consultation process and demonstrates how these issues have been addressed within the Environmental Assessment.

2. Legal Context

This Issues and Response Report has been prepared in accordance with the requirements of the Environmental Management Act, 2007 (Act No. 7 of 2007) and the Environmental Impact Assessment Regulations of 2012.

The report specifically complies with the provisions of Regulations 21, 22, and 23 of the EIA Regulations, which require that public participation be undertaken during environmental assessments to ensure transparency and stakeholder involvement. These regulations further require that:

- Stakeholders are given an opportunity to comment on proposed activities.
- All comments and concerns raised by stakeholders are documented.
- Responses to these issues are provided by the Environmental Assessment Practitioner.

The preparation of this report therefore forms an important component of the environmental assessment process and demonstrates compliance with the legislative framework governing environmental management in Namibia.

3. Purpose of the Report

The purpose of this Issues and Response Report is to document all concerns, comments, and suggestions raised by Interested and Affected Parties during the public consultation process undertaken for the proposed Okandjira Settlement Landfill development.

The report further demonstrates how stakeholder inputs have been considered and addressed during the Environmental Impact Assessment process.

The report promotes transparency, accountability, and inclusive decision-making by ensuring that stakeholder views are formally recorded and integrated into the Environmental Impact Assessment (EIA) and Environmental Management Plan (EMP).

4. Summary of Stakeholder Engagement

4.1. Public Participation Activities

A public participation process was undertaken to inform stakeholders about the proposed landfill development in Okandjira Settlement and to provide them with an opportunity to comment on the project.

The consultation process included the following activities:

- Distribution of email notifications to relevant institutions and stakeholders.
- Publication of newspaper advertisements in national newspapers.
- Placement of public site notices at strategic locations within Okandjira and surrounding areas.
- Distribution of a Background Information Document (BID).
- Hosting of a public consultation meeting with community members and stakeholders.

Email notifications were distributed on 07 January 2026 to relevant government institutions, local leadership structures, and other stakeholders to formally notify them of the proposed development and invite them to submit comments or register as Interested and Affected Parties.

Public notices were placed in national newspapers to reach a wider audience. Advertisements were published in the New Era Newspaper on 07 and 14 January 2026 and in the Windhoek Observer Newspaper on 07, 08, 14, and 15 January 2026.

Site notices were also placed at prominent locations within Okandjira Settlement during January 2026 to inform community members and encourage participation in the consultation process.

A public consultation meeting was held on 09 February 2026 at the Okandjira MICT Centre, where community members and stakeholders were provided with an opportunity to discuss the proposed landfill development and raise concerns or questions.

Table 1 Public Participation Activities

Activity	Date	Location / Medium	Description
Email Notification (Appendix A)	07 Jan 2026	Email distribution to institutions and stakeholders	Formal notification of the proposed project and invitation to submit comments
Registration of Project at MEFT (Appendix B)	07 Jan 2026	MEFT EIA Portal	Registration of project on the Environmental Impact Assessment Portal
Newspaper Advertisements (Appendix C)	07 & 14 January 2026	New Era Newspaper	Public notice inviting registration of Interested and Affected Parties
Newspaper Advertisements (Appendix D)	07, 08, 14 & 15 Jan 2026	Windhoek Observer Newspaper	Public notice providing project information and

			comment submission details
Site Notices (Appendix E)	Jan 2026	At project Site, Okandjira Settlement Office, KJ Kapeua Combined School, Ovitoto Police Station, Otjozondjupa Regional Council Head Office	Public notices informing community members about the proposed development
Public Meeting (Appendix F)	09 Feb 2026	Okandjira MICT Centre	Public consultation meeting with community members and stakeholders

4.2. Registration of Interested and Affected Parties (I&APs)

Throughout the consultation process, a register of Interested and Affected Parties was maintained. This register includes representatives from government institutions, local authorities, community members, conservation stakeholders, and private sector stakeholders who expressed interest in the project.

The register serves as an important record of stakeholder participation and ensures that all registered parties receive project updates and documentation related to the Environmental Impact Assessment process. The full Interested and Affected Parties Register is provided in **Appendix G** of this report.

5. Methodology for Issue Management

All issues and comments raised by stakeholders were collected through several engagement channels during the consultation process. These included discussions held during the public consultation meeting, written submissions received via email, and consultations with relevant institutions and authorities.

Once collected, the issues were carefully reviewed and categorized into thematic areas such as environmental, social, institutional, and safety-related concerns. Each issue was then assessed to determine its relevance to the proposed landfill development. Appropriate responses were subsequently developed for each issue, including clarifications where necessary, the identification of mitigation measures, or the incorporation of the issue into the Environmental Impact Assessment (EIA) and Environmental Management Plan (EMP).

This systematic approach ensured that all stakeholder concerns were properly considered and addressed during the environmental assessment process.

6. Issues and Responses Register

Table 2 Issues Raised by Stakeholders

No	Name & Affiliation	Date Raised	Issue / Comment Raised	Response	Status
1	Mr John Kapepu	8 Jan 2026, telephonically	Are you the contractor who won the tender of collecting refuse removal at Okandjira?	No, I am not, we are the consultants that are doing the Environmental Impact Assessment study for the proposed landfill. Please share your email so we share the background information document and register you as interested or affected party. Email of Bid was sent the same day.	Closed
2	Ms Carolina Uanivi, Ministry of Gender and Equality	09 Feb 2026, During Public meeting	Can local businesspeople recycle some of the materials instead of disposing of them at the landfill?	That would be a great initiative, as it promotes proper waste management practices to reduce, reuse, and recycle. Local businesses can also generate income from this process. However, the landfill will be administered by the Otjozondjupa Regional Council, so any such proposal should be submitted directly to them.	Open
3	Mbaseuako Tjaveondja, Resident	09 Feb 2026, During Public meeting	How can waste be collected and reused? Additionally, a concern that street children scavenge at the landfill and feed on expired food. How do we prevent this?	This is a valid public health concern. Proper monitoring of the landfill will be required, including fencing off, and maintaining the landfill. The issue will be included in the Environmental Management Plan (EMP).	Open
4	Mbaseuako Tjaveondja, Resident	09 Feb 2026, During Public meeting	Will the land be able to be used again after closure of the landfill?	Yes. If the landfill is properly managed. We are proposing for a separate post closure Environmental Management and monitoring Plan to guide the rehabilitation of the area and restoration of the site. There are examples where rehabilitated landfill sites have been converted into parks. Once properly rehabilitated, the area can be reused again for selected land uses.	Open
5	Mbaseuako Tjaveondja, Resident	09 Feb 2026, During Public meeting	If I want to have my own landfill as an individual, will I need an ECC?	Yes. The Environmental Management Act and its 2012 Regulations list activities that may not be undertaken without an Environmental Clearance Certificate (ECC). A landfill falls under Listed Activity No. 2: Waste Management and therefore requires an ECC. If land	Closed

				clearing is required, forest clearance is also a listed activity requiring approval. The consultant further read out all the listed activities in the regulations.	
6	Jeffrey Mbaha, Ministry of Education, KJ Kapeua Combined School	09 Feb 2026, During Public meeting	There is concern about underground water due to the type of soil. How will groundwater be protected?	This is a valid concern. The Environmental Management Plan will address this issue in detail. The planning and design phase, as well as the construction phase, include measures such as compaction and installation of a composite liner system and leachate management system (leachate pond) to prevent groundwater contamination. The consultant showed the approved designs as planned.	open
7	Jeffrey Mbaha, Ministry of Education, KJ Kapeua Combined School	09 Feb 2026, During Public meeting	Will the land be returned to the community after the landfill reaches its lifespan and is rehabilitated?	The general objective is to rehabilitate the area so that vegetation and the environment can continue to exist. The decommissioning phase requires its own Environmental Management Plan to ensure proper rehabilitation of the site. The custodian of the land, who is the regional council and the Traditional Authority will decide on the land uses after.	Open
8	Jeffrey Mbah, Ministry of Education, KJ Kapeua Combined School	09 Feb 2026, During Public meeting	Is there a plan to ensure monitoring and proper operation of the landfill?	Once the ECC is issued, it comes with specific conditions as outlined a legally binding Environmental Management Plan that regulates operations and appointment of an appointed Environmental Control Officer. The plan outlines monitoring responsibilities. Health inspectors from the local clinic and community members can report any irregularities.	Closed
9	Joseph Mwanyangapo, Otjozondjupa Regional Council, Okandjira Settlement Office	09 Feb 2026, During Public meeting	Does the landfill have protective layers to safeguard underground water?	Yes. The landfill will be compacted and fitted with protective layers to prevent both surface and groundwater contamination. Pipes will be installed to channel leachate into a protected pond where it will evaporate. The residue will be disposed of at designated hazardous waste disposal facilities. Construction just needs to be monitored properly	Open

10	David Zamuee, Ministry of Agriculture, Fisheries, Water and Land Reform	09 Feb 2026, During Public meeting	Will water samples be taken before and after the landfill begins operations?	For this study, new water sampling will not be conducted. Instead, reliance will be placed on existing data, including the NamWater Ovitoto Water Supply Scheme Environmental Management Plan (September 2020) and a 2023 groundwater quality and human health risk assessment study conducted in Ovitoto, including Okandjira, by Ms. Priskila Mwatukange. I will get the research paper and share it with you. However considering there is a lot of rivers, we will do a special study related to existing literatures.	Closed
11	Ms Carolina Uanivi, Ministry of Gender and Equality	09 Feb 2026 submitted via a registration and comments form	From the recycling part, I would like to come up with a cleanup campaign for Okandjira Settlement, that will help raise awareness among the community members. The date has been set for the 20 March 2026 I propose for a recycling plant here in Okandjira	That is indeed a good idea. Solid waste management is a major concern, and Namibia Solid Waste Management Strategy advocates for such initiatives, and we therefore refer you to the proponent who is the Otjozondupa Regional Council, through the settlement office. Fortunately, they are present at the meeting. Regarding setting up a recycling plant, I would equally advise that you consult the Regional Council directly, as they are the custodians of the project operations. Fortunately, the landfill layout provided is already designed with waste-sorting cells which will support recycling initiatives,	Closed
12	Ms Tjizouje Ngoimue	09 Feb 2026 submitted via a registration and comments form	Is it not possible to burn the waste inside the layers of the landfill, instead of covering with sand	Burning waste within the layers of a landfill is not a safe practice. covering of waste with soil helps to control smell, pests, windblown litter etc. Burning wastes cause uncontrolled fires, and release of harmful gases and smoke, which pose risks to human health and the environment, and cause climate change.	Closed

7. Summary of Key Thematic Issues

7.1. Environmental and Ecological Issues

The issues raised during the stakeholder consultation include the installation of a composite landfill liner and leachate management system, installation of perimeter fencing and access control, implementation of waste covering and compaction procedures, development of a Closure and Rehabilitation Plan, and consideration of recycling and waste recovery initiatives.

8. Incorporation into the EIA Scoping / EMP

The issues raised during the stakeholder consultation process have been incorporated into the environmental assessment and project planning processes. Wildlife movement considerations have been integrated into the project design to minimize potential impacts on ecological corridors. Measures to protect groundwater resources have also been included through the design of drainage systems and landfill containment structures.

Waste management procedures have been developed to ensure proper containment and disposal of waste, thereby reducing environmental and public health risks. In addition, plans have been prepared for the rehabilitation of the existing dumpsite, and vegetation management measures have been included to ensure compliance with forestry regulations and minimize the removal of protected tree species.

9. Outstanding Issues

Certain issues raised during the consultation process require ongoing monitoring and management during project implementation including:

- Protection of groundwater resources
- Monitoring of landfill operations
- Prevention of scavenging and unauthorised access
- Development of recycling opportunities

These issues will be addressed through implementation of the Environmental Management Plan and ongoing environmental monitoring.

10. Conclusion

The public consultation process undertaken for the proposed Okandjira Settlement Landfill has provided stakeholders with an opportunity to participate in the Environmental Assessment process and raise concerns regarding the proposed development. All comments and concerns raised by stakeholders have been recorded and considered in the Environmental Impact Assessment and Environmental Management Plan. The consultation process has therefore complied with the requirements of the Environmental Management Act (2007) and the EIA Regulations (2012).

11. Declaration by Environmental Assessment Practitioner

I hereby declare that this Issues and Response Report is a true and accurate representation of the issues raised and responses provided during the public consultation process.

Dear Potentially Interested and/or Affected Party

Envirofficient Consultants cc hereby gives notice to all Potentially Interested and Affected Parties (I&APs) that an application will be submitted to the Environmental Commissioner in terms of the Environmental Management Act (Act No. 7 of 2007) and the Environmental Impact Assessment Regulations (Government Notice No. 30 of 6 February 2012) for the following proposed activity:

- **Construction and operation of a solid waste disposal facility (landfill) at Okandjira Settlement, Omatako Constituency, Otjozondjupa Region.**

The proposed development triggers listed activities in accordance with the List of Activities Requiring Environmental Clearance (Government Notice No. 29 of 6 February 2012) and therefore requires the undertaking of an Environmental Impact Assessment (EIA).

Public participation forms an integral part of the EIA process, and the Environmental Impact Assessment involves consultation with individuals, communities, and organisations that may have an interest in, or may be affected by, the proposed development and its associated activities. The purpose of this participatory process is to provide I&APs with an opportunity to raise comments, concerns, suggestions, and questions regarding the proposed project.

An Environmental Assessment will be conducted to identify and assess potential impacts associated with the proposed development and its operations. A Background Information Document (BID), which provides details of the proposed activity and the process of conducting an EIA, is attached for your information.

Should you wish to be registered as an Interested and Affected Party and receive further information as the EIA process progresses, please complete the registration and comments form provided on the **LAST PAGE** of the BID attached, and submit it on or before **4 February 2026** to:

Unit 8, Stop & Shop Complex, Vrede Rede Street, Mondesa, Swakopmund

REPUBLIC OF NAMIBIA
Ministry of Environment, Forestry & Tourism

2026-01-06

Dear Nikolas Ndeikonghola,

This email serves to inform you that your application **APP-006866** has been verified

Taking the following into considerations:

- Location of the project
- Pollution potential
- Scale of operation of the project

Please upload the following documents:

- Scoping Report
- EMP
- Confirmation of screening notice received (through email) in terms of assessment procedures (Section 35 (1)(a)(b) of the Environmental Management Act, No 7 of 2007)
- Preliminary Site Map (Project boundaries) with coordinates (decimal degrees) and a Legend
- CV of Environmental Assessment Practitioner (EAP)
- Declaration for the Submission of Assessment Reports and other Support Documents (upload Declaration Form from www.eia.meft.gov.na (downloads))
- List of all persons, organisations and organs of state that were registered in terms of regulation 22 as interested and affected parties in relation to the application
- Proof of Newspaper advertisement, once a week for two consecutive weeks in at least two newspapers circulated widely in Namibia
- Proof of written notice to the local authority council, regional council and traditional authority, in which the site or alternative site is situated; and consent obtained
- Copies of the minutes of any meetings held by the proponent with interested and affected parties and other role players which record the views of the participants

- Copies of any representations, objections and comments received in connection with the application or the scoping report

Please login onto our portal to upload required documents, if any
<https://eia.met.gov.na>

NB- for the purpose of Section 38 of the Environmental Management Act, 2007 read with Regulation 4(d), kindly forward copies of all relevant documents i.e (application forms, EIA, Scoping reports, EMP etc) to the office of the Environmental Commissioner

Thank you

Phillip Troskle Bulding
P/Bag 13306, Windhoek | Tel: +264 61 284 2111 | DEA: +264 61 284 2701

Ukraine's EU, US allies meet in Paris on security guarantees

PARIS – Key European allies of Ukraine and top US envoys met in Paris yesterday in their latest bid to agree security guarantees for any ceasefire in Russia's war against its neighbour. The summit of the so-called "Coalition of the Willing" comes despite no ease up in fighting, almost four years into Europe's deadliest conflict since World War II.

The capture by US forces of Venezuelan president Nicolas Maduro, an ally of Russian leader Vladimir Putin, has unsettled some European countries and added a potential new element of transatlantic tension. Some members of the coalition aim to send a multinational force to Ukraine to deter any future Russian attack if the war sparked by Russia's February 2022 invasion ends.

But no ceasefire deal has been reached as both sides remain at odds over territory in a post-war settlement, with Kyiv insisting Russia must withdraw from all of the Ukrainian territory it currently occupies. Russia has repeatedly opposed any NATO boots on the ground in Ukraine to monitor a halt in hostilities. Representatives of 35 countries, including 27 heads of state, will gather in Paris.

The French presidency said the meeting aims to show the "alignment" between Washington,

Kyiv and European allies on security guarantees for Ukraine. Zelensky arrived in Paris ahead of the start of the talks on Tuesday afternoon, his office said. US president Donald Trump's special envoy Steve Witkoff and son-in-law Jared Kushner will attend the meeting of the coalition, launched last year by France and Britain.

French president Emmanuel Macron spoke to Canadian prime minister Mark Carney over breakfast at the Elysee presidential palace, ahead of a planned lunch with Zelensky and the US envoys. UK prime minister Keir Starmer, German chancellor Friedrich Merz and Italy's prime minister Giorgia Meloni are also going to attend, according to diplomatic sources.

European leaders have been at pains to not firmly condemn the US operation to grab Maduro at the weekend in the run-up to the Paris meeting, while expressing discomfort at the implications for international law. Before leaving for Paris, Polish prime minister Donald Tusk said the aim of the meeting was to "tighten and align the European and American positions." He said this was because "only that kind of pressure has a chance of forcing the Russians to take the issue of a ceasefire, and then peace, seriously." He warned against expecting final decisions to be made in Paris.

– Nampai/APP

Thailand accuses Cambodia of violating truce

BANGKOK – Thailand accused Cambodia of violating a 10-day-old truce yesterday, saying cross-border mortar fire wounded a soldier, while Phnom Penh said a "pile of garbage" exploded, injuring two of its own troops. Bangkok's foreign ministry said Thai forces "did not retaliate," opting instead to contact the Cambodian side to verify what happened, adding that Phnom Penh "claimed it was an accident." The Thai ministry also urged Cambodia to "prevent such incidents from recurring" and issue an apology, according to a statement. A decades-old border dispute between the Southeast Asian nations erupted into military clashes several times last year, with fighting in December killing dozens of people and displacing around one million on both sides. The two countries agreed to a fragile truce on 27 December, ending three weeks of clashes. Cambodia "violated the ceasefire" on Tuesday morning, the Thai army said in a statement, accusing Cambodian forces of firing mortar rounds into Thailand's Ubon Ratchathani province. One Thai soldier was hospitalised due to non-life-threatening shrapnel wounds to his right arm, the army said. The Thai army said in a separate statement that the Cambodian side had contacted a Thai military unit and claimed "there was no intention to fire into Thai territory." "The incident was caused by an

operational error by Cambodian personnel," the statement added. Thailand's military also said it warned Cambodian forces that if a similar incident occurred, Thai forces may need to retaliate. Cambodia's defence ministry spokesman Maly Socheata said two Cambodian soldiers were injured, one severely, on Tuesday morning when "an explosion occurred from a pile of garbage." The incident happened while Cambodian forces were performing "organisation and orderliness" duties in Cambodia's Preah Vihear province, which sits opposite Thailand's Ubon Ratchathani, he said in a statement. The two injured soldiers were hospitalised. Maly Socheata did not mention the strike alleged by Thailand, but said both nations' border coordination teams had consulted on the incident involving the Cambodian soldiers and addressed the matter. The explosion occurred in a frontier region known as the Emerald Triangle, where the borders of both countries and Laos meet, she said. In May, a Cambodian soldier was killed in a firefight with Thai troops in the area, reigniting the border conflict.

"An accident" Thailand's prime minister Anutin Charnvirakul said his government had lodged a protest with Phnom Penh, stating "the truce was violated." "At the military-to-military level, we have been told the incident was an accident, but we are seeking clarification on how responsibility will be taken," Anutin told reporters in Bangkok. He added that Thailand had the "capability to respond" to Cambodia, which is vastly outgunned by its neighbour.

NOTICE FOR ENVIRONMENTAL IMPACT ASSESSMENT

Environet are Consultants on behalf of a national interest and Affected Parties (IAAP) that an application will be made to the Environmental Commissioner in terms of the Environmental Management Act (No. 7 of 2007) and EA Regulations (GN 30 of 6 February 2012) for the following project:

PROJECT DESCRIPTION: Construction and operation of Solid Waste Disposal Facility (SWDF) in Okavango Settlement under the Okavango Regional Council.

PROJECT LOCATION: Okavango Settlement, Oshana Constituency, Okavango Region.

PROPOSITOR: Okavango Regional Council.

ENVIRONMENTAL PRACTITIONER: Environet Consultants cc

PURPOSE OF THE PROJECT: The proposed facility aims to establish a formal environmental regulated industrial site to improve waste management and protect the environment. The EIA process will identify potential impacts and recommend appropriate mitigation measures.

REGISTRATION OF IAAPs AND SUBMISSION OF COMMENTS: In line with Environmental Management Act (No. 7 of 2007) and EA regulations, Members of the public are hereby invited to:

- None
-

3. **MINUTES OF THE PREVIOUS MEETING**

- None
-

4. **PURPOSE OF THE MEETING**

Public Consultation for Environmental Impact Assessment Study for the Construction and operation of Solid Waste Disposal Facility in Okandjira Settlement

5. **ADDOPTION OF THE AGENDA POINTS**

- Presentation
 - Questions, Concerns raised
 - closing
-

6. **DISCUSSION POINTS**

6.1. **Presentation**

The Consultant delivered a presentation (**Annexure B**)

6.2. **Questions and concerns raised**

No.	Name & Affiliation	Issue / Comment Raised	Response (Nikolas Ndeikonghola – Envirofficient Consultants CC)
1	Carolina Uanivi, Ministry of Gender	Can local business people recycle some of the materials instead of disposing of them at the landfill?	That would be a great initiative, as it promotes proper waste management practices such as reduce, reuse, and recycle. Local businesses can also generate income from this process. However, the landfill will be administered by the Otjozondjupa Regional Council, so any such proposal should be submitted directly to them.
2	Mbaseuako Tjaveondja, Resident	How can waste be collected and reused? Additionally, street children scavenge at the landfill and feed on expired food. How do we prevent this?	Proper monitoring of the landfill will be required, and this is a valid public health concern. The issue will be included in the Environmental Management Plan (EMP).
3	Mbaseuako Tjaveondja, Resident	Will the land be reused after closure of the landfill?	Yes. If the landfill is properly managed and the Environmental Management Plan is enforced, there will be a rehabilitation plan to guide the closure and restoration of the site. There are examples where rehabilitated landfill sites have been converted into parks. Once properly rehabilitated, the area can be reused.
4	Mbaseuako Tjaveondja, Resident	If I want to have my own landfill as an individual, will I need an ECC?	Yes. The Environmental Management Act and its 2012 Regulations list activities that may not be undertaken without an Environmental Clearance Certificate (ECC). A landfill falls under Listed Activity No. 2: Waste Management and therefore requires an ECC. If land clearing is required, forest clearance is also a listed activity requiring approval. The consultant further explained all the listed activities.
5	Jeffrey Mbaha, Ministry of Education, KJ Kapeua Combined School	There is concern about underground water due to the type of soil. How will groundwater be protected?	This is a valid concern. The Environmental Management Plan addresses this issue in detail. The planning and design phase, as well as the construction phase, include measures such as compaction and installation of protective layers to prevent leachate contamination.
6	Jeffrey Mbaha, Ministry of Education, KJ Kapeua Combined School	Will the land be returned to the community after the landfill reaches its lifespan and is rehabilitated?	The general objective is to rehabilitate the area so that vegetation and the environment can continue to exist. The decommissioning phase requires its own Environmental Management Plan to ensure proper rehabilitation of the site.
7	Jeffrey Mbaha, Ministry of Education, KJ Kapeua	Is there a plan to ensure monitoring and proper operation of the landfill?	Once the ECC is issued, it comes with specific conditions and is accompanied by a legally binding Environmental

	Combined School		Management Plan that regulates operations. The plan outlines monitoring responsibilities. Health inspectors from the local clinic and community members can report any irregularities.
8	Joseph Mwanyangapo, Otjozondjupa Regional Council, Okandjira Settlement Office	Does the landfill have protective layers to safeguard underground water?	Yes. The landfill will be compacted and fitted with protective layers to prevent groundwater contamination. Pipes will be installed to channel leachate into a protected pond where it will evaporate. The residue will be disposed of at designated hazardous waste disposal facilities.
9	David Zamuee, Ministry of Agriculture, Fisheries, Water and Land Reform	Will water samples be taken before and after the landfill begins operations?	For this study, new water sampling will not be conducted. Instead, reliance will be placed on existing data, including the NamWater Ovitoto Water Supply Scheme Environmental Management Plan (September 2020) and a 2023 groundwater quality and human health risk assessment conducted in Ovitoto, including Okandjira, by Ms. Priskila Mwatukange in collaboration with the Namibia University of Science and Technology. The report will be shared with stakeholders.

6.3. Closing of the meeting

The consultant acknowledged the meaningful input and positive spirit of the meeting, thanked all participants for their attendance, and adjourned the meeting at 12h30.

Dear Potentially Interested and/or Affected Party

Envirofficient Consultants cc hereby gives notice to all Potentially Interested and Affected Parties (I&APs) that an application will be submitted to the Environmental Commissioner in terms of the Environmental Management Act (Act No. 7 of 2007) and the Environmental Impact Assessment Regulations (Government Notice No. 30 of 6 February 2012) for the following proposed activity:

- **Construction and operation of a solid waste disposal facility (landfill) at Okandjira Settlement, Omatako Constituency, Otjozondjupa Region.**

The proposed development triggers listed activities in accordance with the List of Activities Requiring Environmental Clearance (Government Notice No. 29 of 6 February 2012) and therefore requires the undertaking of an Environmental Impact Assessment (EIA).

Public participation forms an integral part of the EIA process, and the Environmental Impact Assessment involves consultation with individuals, communities, and organisations that may have an interest in, or may be affected by, the proposed development and its associated activities. The purpose of this participatory process is to provide I&APs with an opportunity to raise comments, concerns, suggestions, and questions regarding the proposed project.

An Environmental Assessment will be conducted to identify and assess potential impacts associated with the proposed development and its operations. A Background Information Document (BID), which provides details of the proposed activity and the process of conducting an EIA, is attached for your information.

Should you wish to be registered as an Interested and Affected Party and receive further information as the EIA process progresses, please complete the registration and comments form provided on the **LAST PAGE** of the BID attached, and submit it on or before **4 February 2026** to:

Wed, Mar 18, 2026 at 12:57 AM

Dear Mr. Zamuee,

This email follows your question raised during the public consultation meeting held on 9 February 2026 at the Okandjira MICT Centre for the Environmental and Social Impact Assessment (Scoping) for the proposed Okandjira Settlement Landfill.

Please find attached the groundwater quality and human health risk assessment study conducted in Ovitoto (including Okandjira) by Ms. Priskila Mwatukange et al (2023), as promised during the meeting. The study includes water quality sampling results.

Kindly note that we will be sharing draft versions of the Okandjira Landfill Scoping Report and Environmental Management Plan in the coming days as a registered interested and affected party, before submission to the Ministry of Environment, Forestry and Tourism for consideration.

Kind regards,

Nikolas Ndeikonghola

21 January 2026

Dear Interested and Affected Party

SUBJECT: INVITATION TO A PUBLIC MEETING – ENVIRONMENTAL IMPACT ASSESSMENT FOR THE PROPOSED LANDFILL AT OKANDJIRA SETTLEMENT, OTJOZONDJUPA REGION

We refer to the above subject matter.

Envirofficient Consultants cc hereby invites all Interested and Affected Parties (I&APs) to attend a public meeting as part of the Environmental Impact Assessment (EIA) process for the proposed solid waste disposal facility (landfill) at Okandjira Settlement, Otjozondjupa Region. This process is undertaken in accordance with the Environmental Management Act (Act No. 7 of 2007) and the Environmental Impact Assessment Regulations of 2012.

The purpose of the meeting is to present information on the proposed project and to provide stakeholders with an opportunity to raise comments, concerns, and suggestions for consideration during the assessment process. The Meeting details are as follows:

Date: Monday, 9 February 2026

Time: 10h00

Venue: Okandjira Settlement Office

We look forward to your participation in this important public consultation process.

Yours Sincerely
