ENVIRONMENTAL IMPACT ASSESSMENT TO OBTAIN AN ENVIRONMENTAL CLEARANCE TO CONSTRUCT AND OPERATE A DESALINATION PLANT ON ERF 4585, WALVIS BAY, ERONGO REGION

Green Earth Environmental Consultants have been appointed to attend to and complete an Environmental Impact Assessment and Environmental Management Plan (EMP) to obtain an Environmental Clearance Certificate as per the requirements of the Environmental Management Act (No. 7 of 2007) and the Environmental Impact Assessment Regulations (GN 30 in GG 4878 of 6 February 2012) to construct and operate a seawater desalination plant on Erf 4585, Walvis Bay, Erongo Region.

Name of proponent: Merlus Properties (Pty) Ltd
Project location and description:
The Merlus Group operates various seafood processing facilities, which include the Merlus, Abroma, Comorant and Seagull companies situated in Walvis Bay with factories located next to each other. It is intended to use Erf 4585, No. 86 Ben Amadhila Avenue, Walvis Bay for the construction and operation of a desalination plant. The Erf is located close to the other factories of the Merlus Group and large enough to accommodate the proposed facility. The Group currently use around 15 000 m³ of fresh water per month and consumption is expected to increase in the new future. Erf 4585 is located on the shore, with own jetty protruding into the ocean which means that raw seawater can be extracted from the sea for treatment to potable water quality using desalination by reverse osmosis (RO) treatment. The proposed facility will produce 2400 m³/day of permeate (final water) for 26 days per month, which will contribute ±10 400 m³ per month of potable water for the Merlus Group's activities. The plant will be positioned in an existing warehouse on the site, and the seawater will be abstracted from a point at one of the available jetties. The wastewater (brine) produced during the desalination as well as the backwash water for the cleaning of the system will be released back into the ocean. Interested and affected parties are hereby invited to register in terms of the assessment process to give input, comments, and opinions regarding the proposed project. A public meeting will be held on 23 (Monday) February 2026 at 11h00 at the site. The last date for comments and/or registration is 17 February 2026. Contact details for registration and further information:

NOTICE LEGAL NOTICE

CALL FOR PUBLIC PARTICIPATION/ ENVIRONMENTAL IMPACT ASSESSMENT TO OBTAIN AN ENVIRONMENTAL CLEARANCE TO CONSTRUCT AND OPERATE A DESALINATION PLANT ON ERF 464, WALVIS BAY, ERONGO REGION

Green Earth Environmental Consultants have been appointed to attend to and complete an Environmental Impact Assessment and an Environmental Management Plan (EMP) in accordance with the requirements of the Environmental Management Act (No. 7 of 2007) and the Environmental Assessment and Environmental Regulations (GN 30 in GG 4878 of 4 February 2012) to construct and operate a seawater desalination plant on Erf 464, Walvis Bay, Erongo Region.

Name and legal address of executor or authorized agent:
 Green Earth Environmental Consultants
 111 Main Street, Windhoek
 T: +264 61 564 787
 F: +264 61 564 787
 Email: info@geec.com.na

Project location and description:
 The Marlin Group operates various seafood processing facilities, which include the Marlin, Albino, Camilla and Sagal companies situated in Walvis Bay with features located next to each other. It is intended to use Erf 464, No. 88, Ben Amadiela Avenue, Walvis Bay for the construction and operation of a desalination plant. The Erf is located close to the other facilities of the Marlin Group which are used for processing of seafood. The proposed facility The Group currently use around 1500m³ of freshwater per month and consumption is expected to increase in the future. Erf 464 is situated on the shore with open prevailing into the ocean which means that raw seawater can be extracted from the sea for treatment to potable water quality using desalination by reverse osmosis (RO) treatment. The proposed facility will produce 8000 m³ of permeate (fresh water) for 26 days per month, which will contribute to 10400 m³ per month of potable water for the Marlin Group activities. The plant will be positioned on an existing warehouse on the site, and the seawater will be abstracted from a point at one of the available jetties. The wastewater (brine) produced during the desalination as well as the backwash water for the clearing of the system will be released back into the ocean. Interested and affected parties are hereby invited to register in terms of the assessment process to give input, comments, and opinions regarding the proposed project. A public meeting will be held on 23 (Monday) February 2024 at 11:00 AM at the office of the Deputy Sheriff. The last date for comments and/or registration is 17 February 2024.

Green Earth Environmental

CALL FOR PUBLIC PARTICIPATION / COMMENT

ENVIRONMENTAL IMPACT ASSESSMENT TO OBTAIN AN ENVIRONMENTAL CLEARANCE TO CONSTRUCT AND OPERATE A DESALINATION PLANT ON ERF 488, WALVIS BAY, ERON GO.

Green Earth Environmental Consultants have been appointed to attend to and complete the Environmental Impact Assessment and Environmental Management Plan (EMP) to obtain an Environmental Clearance Certificate as per the requirements of the Environmental Management Act (No. 7 of 2007) and the Environmental Impact Assessment Regulations (GN 30 in GG 4878 of 2 February 2012) to construct and operate a seawater desalination plant on Erf 488, Walvis Bay, Erong Region.

The Main Group operates various seafood processing facilities, which include the Metrus, Abrama, Comstant and Constant facilities situated in Walvis Bay with factories located next to each other. It is intended to use Erf 488, No. 48 B, Amalia Avenue, Walvis Bay for the construction and operation of a desalination plant. The land is located close to the other factories of the Main Group and large enough to accommodate the proposed plant. The Group currently use an IS O 9001:2015 quality management and consumption is expected to increase in the next few years. The desalination plant will produce 400 m³ of permeate final water for 26 days per month which will contribute to 8 400 per month of potable water for the Main Group activities. The plant will be constructed in a way that will ensure the seawater intake produced during the day of the plant will be used for the clearing of the system will be released back into the ocean.

Interested and affected parties are hereby invited to register in terms of the provisions of the Act, comments, and opinions regarding the proposed project. A public meeting will be held on 22 (Monday) February 2026 at 11:00 at the site.

The last date for comments and/or registrations is 17 February 2026.

CALL FOR PUBLIC PARTICIPATION / COMMENT

ENVIRONMENTAL IMPACT ASSESSMENT FOR MINERAL EXPLORATION ON EPL 10446

The notice serves to inform interested and affected parties that an application for the environmental clearance certificate will be launched with the Environmental Commissioner in terms of the Environmental Management Act (No. 7 of 2007) and the Environmental Impact Assessment Regulations (GN 30 of 2012).

Location: The license area is located about 48 km East of Opuwo. The project interventions are on the property although nothing in this respect is guaranteed. The building comprises of:

- 2 X BEDROOMS
- 1 X BATHROOM
- 1 X KITCHEN
- 1 X LOUNGE

The property shall be sold by the Deputy Sheriff of WINDHOEK subject to the Conditions of Sale that may be appended and the property will be sold "as is" according to the existing title deed.

2. The sale is subject to the provisions of the High Court Act No. 56 of 1995, as amended, and the property will be sold "as is" according to the existing title deed.

3. 10% of the purchase price to be paid in cash on the date of the sale, the balance to be paid by instalment to be secured by a Bank or Building Society or other acceptable guarantee to be furnished to the Deputy Sheriff within 14 (fourteen) days after the date of sale.

4. The full Conditions of Sale will be read out by the Deputy Sheriff on the day of the sale, but may be inspected at any time prior to the sale at the office of the Deputy Sheriff or at the office of the Sheriff's Attorneys.

NOTICE

CALL FOR PUBLIC PARTICIPATION/ COMMENTS

ENVIRONMENTAL IMPACT ASSESSMENT TO OBTAIN AN ENVIRONMENTAL CLEARANCE TO CONSTRUCT AND OPERATE A DESALINATION PLANT ON ERF 4585, WALVIS BAY, ERONGO REGION

Green Earth Environmental Consultants have been appointed to attend to and complete an Environmental Impact Assessment and Environmental Management Plan (EMP) to obtain an Environmental Clearance Certificate as per the requirements of the Environmental Management Act (No. 7 of 2007) and the Environmental Impact Assessment Regulations (GN 30 in GG 4878 of 6 February 2012) to construct and operate a seawater desalination plant on Erf 4585, Walvis Bay, Erongo Region.

Name of proponent:
Merlus Properties (Pty) Ltd

Project location and description:

The Merlus Group operates various seafood processing facilities, which include the Merlus, Abroma, Cormorant and Seagull companies situated in Walvis Bay with factories located next to each other. It is intended to use Erf 4585, No. 86 Ben Amadhila Avenue, Walvis Bay for the construction and operation of a desalination plant. The Erf is located close to the other factories of the Merlus Group and large enough to accommodate the proposed facility. The Group currently use around 15 000 m³ of fresh water per month and consumption is expected to increase in the new future. Erf 4585 is located

new future. Erf 4585 is located on the shore, with own jetties protruding into the ocean which means that raw seawater can be extracted from the sea for treatment to potable water quality using desalination by reverse osmosis (RO) treatment. The proposed facility will produce ± 400 m³/day of permeate (final water) for 26 days per month, which will contribute $\pm 10\,400$ m³ per month of potable water for the Merlus Group's activities. The plant will be positioned in an existing warehouse on the site, and the seawater will be abstracted from a point at one of the available jetties. The wastewater (brine) produced during the desalination as well as the backwash water for the cleaning of the system will be released back into the ocean.

Interested and affected parties are hereby invited to register in terms of the assessment process to give input, comments, and opinions regarding the proposed project.

A public meeting will be held on 23 (Monday) February 2026 at 11h00 at the site.

The last date for comments and/or registration is 17 February 2026.
