

APPENDIX A: CONSULTANT CURRICULUM VITAE

ENVIRONMENTAL ASSESSMENT PRACTITIONER

Lovisa Hailaula has a solid educational background within the field of Solid Waste Engineering; Environmental, General and Administration Management studies comprising the subjects of physical science, environmental management, organizational behaviour, financial and human resource management. In addition to the qualification above, she has also completed various short courses on issues such as Environmental Management, Impact Assessment and Decision Making, Environmental Education, Supervisor Skills, Microsoft Excel, Waste Management and Professional Communication. She has obtained vast exposure in the coordination of safety, health & coastal and urban environmental issues during her time span within the public service sector (Municipality of Walvis Bay). Worthwhile mentioning is the valuable practical experience gained from her involvement in project planning, implementation and evaluation and more specifically with the Municipality of Walvis Bay and as a consultant with the Town & Environmental Planning and with SandSea Consultants cc. She has an excellent experience in Environmental Impact Assessments, environmental management, waste management and project sustainability. She assisted on various EIAs, including the township establishments, rezoning and mining activities, land-use development, waste disposal etc.
