Description of your Concern/Comment/Inputs

Mashi Conservancy Management, Staffs and intire Members. Comments and Support The Efforts Made by Ngongg Communities for proposing to renovate The Campsite known as Mavunje Campsite and indeed to upgrade The Camp into The lodge (Mavunje lodge).

Mashi Conservancy needs More Joint Venture Agreements to Source income that will strengthen the operations of The Conservancy and plough back benefits to The members.

Any Proposals you would like to make to the proposed Project based on your interest area described above.

We propose to Extend Mavunje as proposed by Members to be The lodge, that can Cater visitors or Tourists Exceeding The Number of 30-40 visitors and we recommend a Go-ahead to up grade the project.

(Add additional information on separate papers if possible)

Description of your Concern/Comment/Inputs

As a councilor of the jurisdiction where the Mavungu Lodge will be established, I fully support this project.

The Savari Lodge Collection Pty. Ltd should as part of its social responsibility drill boreholes in the Ngonga and Sachona areas for the inhabitants of these areas. The site for where boreholes will be drilled will be responsibility of the Office of the Councilor in consultation with the communities.

Any Proposals you would like to make to the proposed Project based on your interest area described above:

The Savari Company must recruit/employ the youth from Ngonga area before investing other areas in the constituency. The Office of the Councilor must be involved in the recruitment process.

(Add additional information on separate papers if possible)

My contact details 0811414966. The Ngonga area has the community has family ties with some families at Sachona (they are relatives or related).

We agree that, the Campsite should be upgraded to a lodge. This upgrading will be very beneficial to the entire community hence it will bring development within the areas in term of employment to the youth and benefit to the community. A campsite is small and does not cater for a large number of youth for employment whereas a lodge can employ a bigger number of youth.

Any Proposals you would like to make to the proposed Project based on your interest area described above:

The fauna and flora in and around the lodge should be protected at all times and used in a sustainable manner. Mavunje is close to a corridor, therefore, safe passage for animals to and from the two parks should be protected.

To: Namib Consulting <namibconsulting@gmail.com>

Dear Sililo,

Sorry for not getting back to you earlier.

Our concerns would be the following: to avoid conflict as previously experienced with Mavunje Camp would be to have landboard lease and JV agreement in place with the Conservancy. We do not need issues again on our doorstep - its bad for tourism in the area.

Light pollution/lights visible from Kazondwe - our lights might bother guests at Mavunje and the other way around.

Possible Infringement on the wildlife corridor. Not sure where the corridor borders.

There are regulations on no fencing which need to be adhered too.

Kind regards

Susanne Allers
