CC Department of Economic Development and Community Services

Dear Sir/Madam

Re: Environmental Clearance Certificate Renewal for Nampost's Consumer Fuel Installation in the Southern Industrial Area, Windhoek

Geo Pollution Technologies (Pty) Ltd has been appointed by Namibia Post Ltd to apply for renewal of their existing environmental clearance certificate (ECC) for the continued operations of their consumer fuel installation on erf 8231, Voigts Street, Southern Industrial Area, Windhoek. The facility operates in accordance with a consumer installation certificate as issued by the Ministry of Industries, Mines and Energy. The renewed ECC is required as per the Environmental Management Act No. 7 of 2007 (EMA). The accompanying background information document provides information regarding the project and renewal of the ECC. In support of the ECC renewal application, an updated environmental management plan (EMP) will be submitted to the Ministry of Environment, Forestry and Tourism's (MEFT) Directorate of Environmental Affairs (DEA).

The City of Windhoek is hereby notified of the intent to renew the ECC. The MEFT requires a letter of support/consent for the renewal of the ECC to be issued by the local authority. You are thus hereby requested to send comments, if any, or your letter of support/consent on the proposed ECC renewal to Geo Pollution Technologies for submission to the MEFT. Please send comments to:

E-Mail: andre@thenamib.com

Do not hesitate to contact us for additional information.

Sincerely,
Geo Pollution Technologies
