June was a month of both big wins and heartbreaking losses for Victoria Falls Anti-Poaching Unit.

Our rangers recovered 90 snares and traps, detected five poacher incursions, and helped rescue two animals caught in snares. A buffalo bull was successfully treated and is expected to recover, while the loss of a lioness to another snare just days after her rescue was a devastating reminder of the ongoing threat facing Victoria Falls' wildlife.

There was also a major intelligence-led win, with two suspects arrested in connection with pangolin scales—an important step in tackling the illegal wildlife trade.

Thank you to every ranger, partner and supporter who continues to stand with us. Together, we keep fighting for our wild spaces. 🐘🐘
